### CHINO BASIN WATERMASTER

# THIRTY-THIRD 3 ANNUAL REPORT

FISCAL YEAR 2009-10

## Developing Local and Regional Water Solutions MEETING WATER CHALLENGES

### A Message From the Executive Director

The Chino Basin region has experienced a long history of water challenges. The situation is no different today. Recent rainfall data showed that 2007-2009 was the twelfth driest three-year period in the state's recorded history. Last year rainfall improved, but runoff was below average. In addition, court rulings to protect fish in the California Delta have resulted in cuts of imported Delta supplies by 50%!

**Meeting the Challenges.** Watermaster and its Basin partners have stepped up to meet these challenges. Some of our notable water management achievements in the 2009-2010 fiscal year, include:

- · Facilitated agreements with local and regional partners to expand desalter capacity.
- Completed the Phase II Chino Basin Facilities Improvement Project that increased recharge capacity to 99,000 acre-feet per year from 49,000 acre-feet.
- Made plans for cost-saving changes to the Basin Plan Amendment that are designed to reduce monitoring costs by hundreds of thousands of dollars per year.
- · Continued actively facilitating cleanup programs throughout the Basin.

Completed the Recharge Master Plan Update. Watermaster's principal focus for the fiscal year was completion of the Recharge Master Plan Update. With cutbacks of replenishment water, a key goal of the plan is to identify how the Basin can take larger amounts of water during wet periods and recharge it in a shorter amount of time. Watermaster worked with the Chino Basin Conservation District and the Inland Empire Utilities Agency to successfully complete the Plan by the July 1, 2010 deadline.

**Kept Costs Down.** The Inland Empire's economy is one of the hardest hit in California, and Watermaster made administrative changes to improve efficiency and keep costs down. Many other technical, administrative and institutional achievements are summarized in this report.

Watermaster's successes are rooted in collaboration locally, regionally and across the state. The result is that in drought years and flood years, we continue to enjoy the benefits of a reliable, high-quality and affordable water supply.

I am grateful to all my fellow stakeholders for their contributions to another successful year, and look ahead with confidence to more achievements in the future.

Kenneth R. Manning, CEO Chino Basin Watermaster 

# Cooperation and Leadership Serves All Basin Stakeholders ANNUAL PLANNING CONFERENCE BUILDS

In September 2009, Chino Basin Watermaster met for the Strategic Annual Planning Conference with staff, Board members, consulting experts and stakeholders to plan for the future and to continue to develop the Recharge Master Plan Update (RMPU). This annual planning conference builds on a growing and successful history of collaboratively managing water supplies to benefit the entire region.

### Early 1970s and Before: Conflict Over Water Supplies

Basin stakeholders had endured decades of conflict over water supplies, but this began to change in 1974 when stakeholders signed a memorandum of agreement. Within a year, the state authorized a \$2 assessment per acre-foot of water to help support this effort by funding development of a Chino Groundwater Plan.

### 1978: Watermaster Provides a Permanent Forum

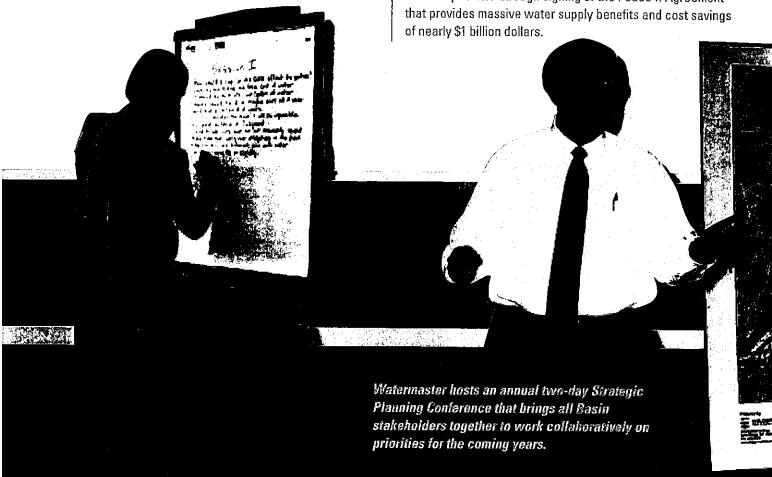

By 1978 a permanent structure was created by the San Bernardino Superior Court when it formed Watermaster. In subsequent years, Watermaster developed a governance structure, technical understanding and funding to manage the Basin.

### Later 1990s: Optimum Basin Management Program, a Major Technical Advance

In the late 1990s, Watermaster developed a detailed program consisting of hundreds of specific actions designed to resolve basin water supply and quality challenges. This program, required by the Court, is still being systematically implemented and continually refined.

### 2000 and 2007: Peace Agreements Represent a Major Institutional Advance

Following years of negotiation, Basin stakeholders and the Court approved the Peace I Agreement in 2000, formalizing and making permanent the Watermaster governance structure. In 2007, a more profound level of collaboration became possible through signing of the Peace II Agreement that provides massive water supply benefits and cost savings of nearly \$1 billion dollars.

### ON HISTORY OF COLLABORATION

### 2008-2010: Recharge Master Plan Update Development and Implementation

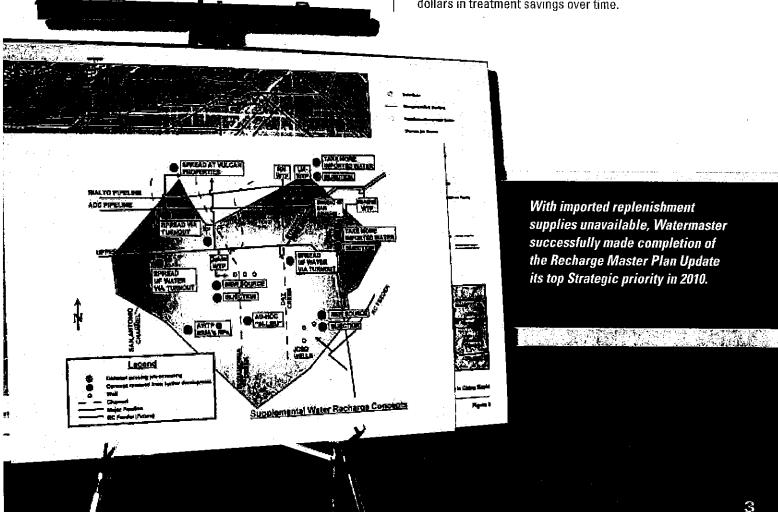

The most important single initiative of the last several years has been the Recharge Master Plan Update. Work on the plan was initiated at the 2008 Strategic Planning Conference. During the rest of the year and through 2009 the Recharge Master Plan Update was developed and finalized. Implementation of the Recharge Master Plan Update will begin during the 2010-2011 fiscal year.

### 2010 and Beyond: Increasing Capabilities and Successfully Managing Water Supply and Quality

While the 2009-2010 fiscal year focused on the Recharge Master Plan Update, Watermaster continued working in many arenas to increase water management capabilities and successes with more technical sophistication, better cost effectiveness and continually improved results.

What distinguishes progress in 2009-2010, and in recent years, are achievements that build on each other to make it possible to monitor, protect and expand our water supply and quality in ways that simply could not be achieved in the past.

- Improved working relationships and governance tools through Watermaster that allow stakeholders to work together and resolve complex challenges in a sustained way.
- Regional partnerships that make it possible to plan and implement large, cost-effective projects involving multiple parties, and that utilize multiple sources: recycled water, stormwater, imported water and groundwater.
- Extensive physical facilities: desalters, recharge basins, pipelines and channels that allow Watermaster to collect, spread and move water.
- Unique regulatory and management tools: such as
   Hydraulic Control and Maximum Benefit that will provide
   up to 140,000 acre-feet of new water and nearly one billion
   dollars in treatment savings over time.

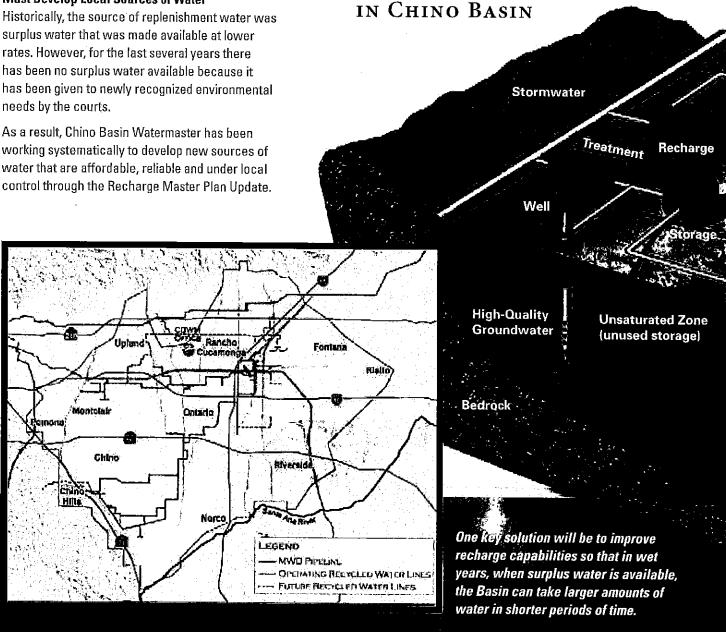

# Recharge Master Plan Update SOLVING OUR REGIONS WATER SUPPLY

STORAGE AND RECOVERY

### Statewide Water Crisis Means Our Region **Must Develop Local Sources of Water**

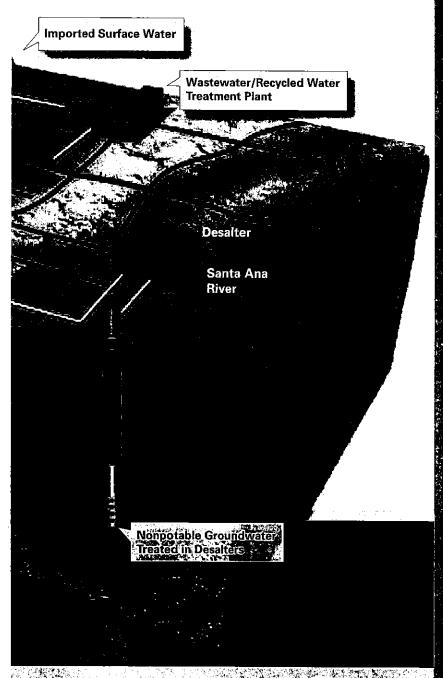

Historically, the source of replenishment water was surplus water that was made available at lower rates. However, for the last several years there has been no surplus water available because it has been given to newly recognized environmental

As a result, Chino Basin Watermaster has been working systematically to develop new sources of water that are affordable, reliable and under local

The Chino Groundwater Basin is a principal source of water for nearly one million people, extensive agriculture, businesses, and recreational facilities. The Basin itself stretches across 220 square miles, and stores an estimated six million acre-feet of water (about two trillion gallons). The Basin's safe yield is 140,000 acre-feet per year. Last year, about 170,000 acre-feet of water were pumped from it.

### CHALLENGES LOCALLY

# Progress Toward Our Goal of Water Independence DEVELOPING WATER SUPPLY SOLUTIONS

It Rained Last Year, But Long-Term Water Supply Challenges Remain. Following three years of being below average, rainfall improved in the 2009-2010 fiscal year. However, there remains an ongoing supply challenge caused by environmental and regulatory restrictions that have slashed the amount of water that can be pumped from the Delta to protect endangered fish, limiting the ability to import adequate supplies from Northern California. Additionally, there have been multi-year droughts on the Colorado River Basin, and population growth that has further impacted statewide water supplies. As a result, the area needs to look inward to find solutions for developing local water independence.

Watermaster and its partners in the Chino Basin have started by developing the tools and maximizing the resources most easily available: increasing the use of recycled water, capturing more stormwater, desalinating brackish water, increasing conservation and more.

### COLLABORATIVE WELLFIELD AND DESALTER EXPANSION

Watermaster has made progress toward its commitment to expand the desalters and obtain hydraulic control through a variety of coordinated and collaborative efforts with many partner agencies.

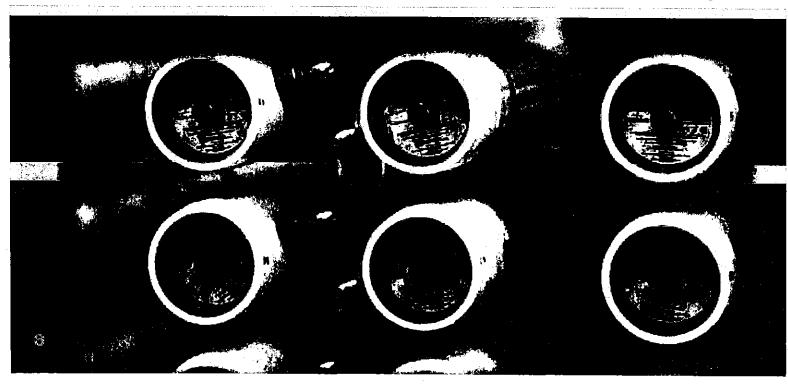

Progress on a Partnerships to Expand the Desalters and Well Fields. Chino Basin Watermaster took a leadership role in collaborating with neighboring agencies, Jurupa Community Services District, City of Ontario and Western Municipal Water District, on the Desalter expansion.

One key part of the program involves Western Municipal Water District paying to substantially expand the capacity of the Desalter II treatment facility by 10.5 million gallons per day or 11,800 acre-feet per year. Western Municipal will also fund construction of a new wellfield required for the hydraulic control commitment associated with the Maximum Benefit program.

This win/win desalter expansion program resulted in Western Municipal Water District obtaining a new and reliable water supply that is not dependent on the state water system. In doing so they will pay for treating contaminated groundwater and improving hydraulic control in the Chino Basin.

The Regional Water Quality Control Board (RWQCB) levied an Administrative Civil Liability complaint and fine against Watermaster and IEUA for not keeping up with the mandated schedule to expand the Desalters. Watermaster is now working with the various parties as a facilitator to maintain the realistic schedule approved by the RWQCB, and the project is progressing.

Reverse osmosis (RO) membrane array at the Chino II Desalter plant.

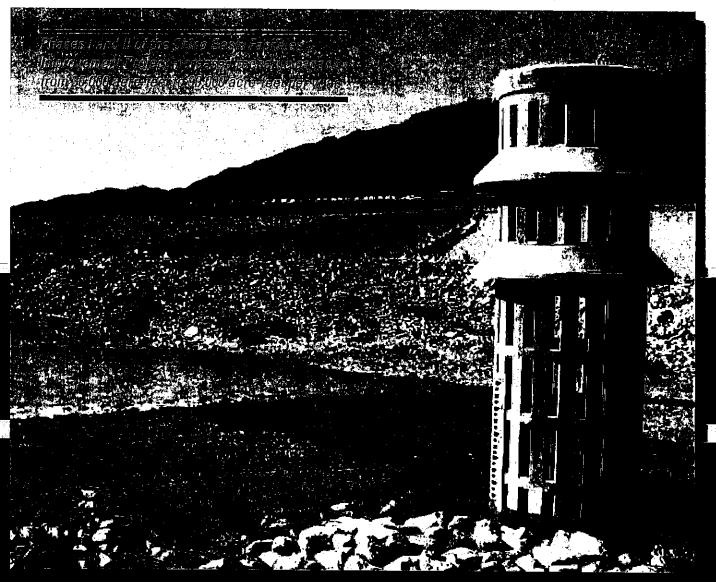

### UNDER LOCAL CONTROL

Dry Year Yield. The Dry Year Yield Program provided Metropolitan Water District the right to store groundwater in the Basin, as a hedge against drought, in exchange for paying the costs of developing the facilities that deliver that water. The Program has now almost completed a full cycle, with Chino Basin benefiting from those facilities, and by Metropolitan Water District having filled the account and now drawing it down over three years. In April, MWD made the final call on that water, and the Dry Year Yield program will be zeroed out by April 30, 2011.

The Basin did not obtain large amounts of water from Metropolitan Water District (MWD) for replenishment purposes but did obtain and use storm and recycled water for recharge.

### Chino Basin Facilities Improvement Project Completed.

The Chino Basin Facilities Improvement Project (CBFIP) Phase II, a joint program of Watermaster, Chino Basin Water Conservation District, Inland Empire Utilities Agency, and the San Bernardino County Flood Control District, was created to increase the annual recharge of storm, imported, and recycled water and reduce long-term maintenance costs. The \$10.5 million project, completed in May 2010, was co-funded by Watermaster and IEUA with matching funds from the California Department of Water Resources (DWR). The program installed monitoring wells, lysimeters, recycled water connections, remote computer control systems, and heightened and hardened berms.

Riser outlet tower at the Etiwanda Debris Basin.

# Quality, Quantity, Production and More: EXTENSIVE MONITORING PROVIDES DATA FOR

The Chino Groundwater Basin spreads across 220 square miles and holds about two trillion gallons of water. Watermaster carries out a number of extensive monitoring programs that make it possible to manage the Basin water supply and quality with increasing effectiveness and sustainability.

### Changes to Basin Plan Expected to Result in Large Savings.

Watermaster introduced Amendments to the 2010 Basin Plan that must be approved by regulators. The most important changes centered on the monitoring programs. Years ago, when Watermaster was developing the Hydraulic Control concept, a substantial monitoring program to prove whether Hydraulic Control is working was required, but can now be decreased. The 2010 amendments are expected to result in substantial cost savings in the monitoring program of up to \$400,000 per year.

**Obtained New Monitoring Wells.** Watermaster began work on an agreement to take over three wells that would otherwise be destroyed by a local business. Watermaster proposes to accept this equipment and use it to monitor the groundwater basin.

MZ-1 Management Monitoring and Actions to Stop Subsidence. Due to the historical occurrence of pumping-induced land subsidence and ground fissuring in MZ-1, this management plan calls for numerous monitoring activities aimed at minimizing or completely avoiding future occurrences in the Chino Basin. During this year, Watermaster successfully recharged 5,000 acre-feet (AF) of imported water in the MZ-1 area.

# OPTIMUM BASIN MANAGEMENT PROGRAM— MONITORING PROGRAMS

The Groundwater Level Monitoring Program is comprised of about 700 wells. The wells in the monitoring program within the southern portion of the Basin were selected to assist in Watermaster's monitoring programs for Hydraulic Control, land subsidence, and desalter impacts to private well owners. The remaining wells are monitored in support of the triennial re-computation of water quality in the Chino-North management zone. Water level data is collected quarterly with the assistance of several partner agencies. The water level data is checked by Watermaster staff and uploaded to a centralized relational database.

### IMPROVED BASIN MANAGEMENT

### Extensive Groundwater Quality Monitoring Program Consists of Four Components:

- An annual key well water quality monitoring program designed to target privately owned agricultural wells in the southern portion of Chino Basin that are otherwise not included in an established sampling program.
- 2. Annual sampling at nine monitoring well clusters strategically placed between the Chino Basin Desalter wellfields and the Santa Ana River. Results of the quarterly sampling are used to analyze the effect of the desalter pumping over time by comparing water quality of the native groundwater and the Santa Ana River.
- Monthly sampling at four near-river wells to characterize the Santa Ana River's influence on nearby groundwater.
- 4. Cooperative Basin-Wide data collection effort, known as the Chino Basin Data Collection (CBDC)

program, which relies on municipal producers and other government agencies to supply groundwater quality data on a cooperative basis, so it can be loaded into Watermaster's relational database.

### Groundwater-Production Monitoring.

All active wells (except for minimum user wells) are now metered.

Watermaster reads the Agricultural Pool production data from the meters on a quarterly basis and enters the data into Watermaster's relational database.

### Surface Water Monitoring.

Watermaster measures the quantity and quality of storm and supplemental water in the recharge basins. Pressure transducers or staff gauges are used to measure water levels during recharge operations. In addition to these quantity measurements, imported water quality data for State Water Project water are obtained from the MWD and recycled water quality data for the RP-1 and RP-4 treatment plant effluents are obtained

from IEUA. Water quality samples are also collected from recharge basins that are actively recharging recycled water from lysimeters installed within those recharge basins. Combining the measured flow data with the respective water qualities enables the calculation of the blended water quality in each recharge basin, the "new yield" to the Chino Basin, and the adequate dilution of recycled water.

Surface Water Monitoring in the Santa Ana River. Watermaster conducts bi-weekly flow and water quality measurements of the Santa Ana River and combines the data with discharge data from permanent USGS and Orange County Water District (OCWD) stream gauges, and discharge data from publicly owned treatment works. These data are used along with groundwater modeling to assess the extent of Hydraulic Control.

# Improved Management, Advanced Technology & Efficiency Helps Support LONG-TERM SOLUTIONS FOR A RELIABLE

Progress on the Peace II SEIR—The Peace II Environmental Impact Report (SEIR) was circulated for public review in May 2010. Several meetings were held to review the comments received as well as discussions on the impacts and mitigation measures. The final report is due out in September.

Changes in Judges. In September 2009, sitting Judge Wade retired. During his year on the case, Judge Wade carried out a comprehensive review of Watermaster's implementation of the OBMP and made a finding that Watermaster was fully compliant with all requirements associated with implementation.

In December 2009, Judge Reicher was assigned to the case. Reicher was the former assistant to Judge Gunn, who was Watermaster's sitting judge when the Peace I Agreement was written. Since that time, Judge Reicher has held informational hearings in order to come up to speed on the case and has successfully addressed a Paragraph 31 motion and approval of the Recharge Master Plan Update.

### Cumulative Unmet Replenishment Obligation (CURO).

Historically, when a pumper took more water than it had rights to, Watermaster would purchase replenishment water on its behalf and recharge it into the Basin. But, if Watermaster cannot purchase replenishment water due to unavailability. an unmet replenishment obligation is created. The sum of all these obligations becomes the Cumulative Unmet Replenishment Obligation (CURO). One challenge of the CURO is that the cost of water increases over time. So, for example, if the replenishment obligation occurs in one year, but the water to make it up is available two years later, the cost will be higher than originally assessed for, making it increasingly costly to buy water to meet the CURO. If the CURO debt grows, the concern is that the replenishment obligation debt could get too big and costly to pay off-leading to a perpetual overdraft of the Basin. Although these severe possibilities have not occurred, Watermaster began working with stakeholders on resolving the policy, water supply, and financial issues of the CURO.

### WATER SUPPLY

Chino Basin Groundwater Recharge
Program. IEUA, Watermaster, CBWCD,
and the SBCFCD jointly sponsor the
Chino Basin Groundwater Recharge
Program. This is a comprehensive,
ongoing water supply program to
enhance water supply reliability and
improve the groundwater quality in local
drinking water wells throughout the
Chino Basin by increasing the recharge
of stormwater, imported water, and
recycled water.

Custom HydroDaVE™ Software Improves Technical Collaboration.

Hydrologic Database and Visual Explanations (HydroDaVE™) is a custom-developed software database that includes all of Watermaster's data and makes it readily available to Watermaster staff and any Watermaster Party. As Watermaster's partners use the software, it will be easier to share and download massive amounts of data

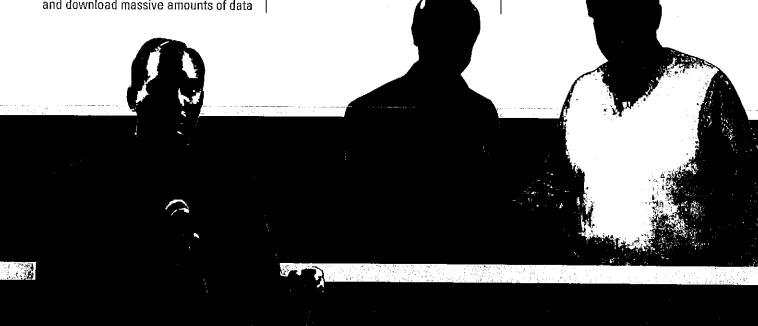

about Basin water supply and quality. Of course, private party water quality data remains confidential.

Auction and Paragraph 31 Motion conflict. A water auction was originally scheduled for November 2009, but was postponed until questions about how to recover the water can be resolved. Once this issue is resolved, the water will have a higher value and it is anticipated that the auction will resume. Many serious potential purchasers expressed interest in the water and a strong sale is expected once a new date is set. Also, some overlying Non-Agricultural parties challenged whether Watermaster provided adequate notice of the purchase of their storage water and sought to invalidate the sale of the water. The judge denied the motion and found on behalf of Watermaster that proper notice was provided.

### Administrative Improvements.

Watermaster continually looks to improve its administration and management, but this year made an unusual number of changes to make it a more efficient and effective organization.

Changes ranged from updating financial forms for water leases and purchases, to initiating cleanup of its database of members, which is critical to meet legal requirements of the Judgment. Cleaning up the database is especially challenging for the Agricultural Pool where there are hundreds of parties for whom there is no contact information or their status as water rights holders is unclear. Meeting dates were also changed so that the Watermaster Board and Advisory Committee don't meet on the same day.

# Effective Long-Range Water Quality Management WATER QUALITY PROGRAMS BENEFIT

Watermaster takes an active role in regional water quality issues by helping the Regional Water Quality Control Board set priorities by providing detailed monitoring data, and by reviewing plans and cleanup options.

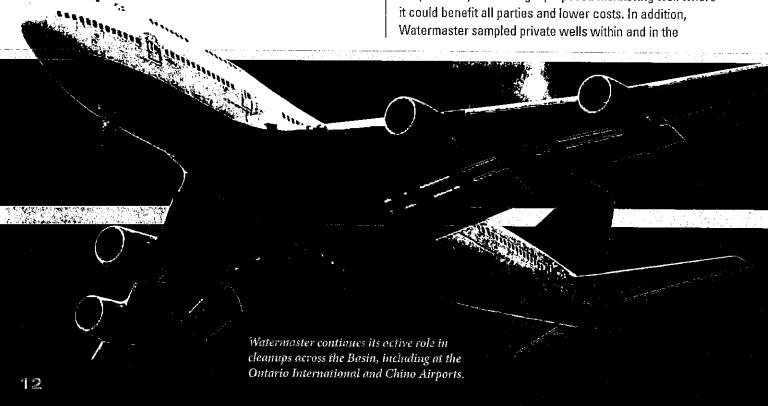

# MASSIVE BENEFITS FROM COORDINATED QUALITY AND SUPPLY MANAGEMENT

The value of the comprehensive, long-range water planning contained within the OBMP is demonstrated in regional water quality successes. The most dramatic examples include the water quality and financial benefits from the desalters. For example, the desalter wells are uniquely placed to intercept contamination plumes from Chino Airport and Ontario International Airport, providing a cost-effective additional level of treatment. By removing salts from the groundwater, and offsetting salt loads from recharged recycled water, the desalters provide \$900 million in savings over 20 years compared to traditional salt management methods. In addition, there is a massive 400,000 acre-feet of new water that will be developed over time from the Basin Reoperation program. Local water suppliers that collaborate and place their wells and other facilities in locations that support the OBMP increase the overall benefits of the program and obtain access to the supply of reoperation water.

### WATER QUALITY AND CLEANUP PROGRESS

Active role in the Ontario International Airport (OIA) Plume Investigation and Cleanup. Watermaster is active in the investigation of the trichloroethene (TCE) plume. Actions included: working with the potentially responsible parties (PRPs) to coordinate water quality sampling; working with stakeholders to identify the source of the plume; reviewing monthly reports; and receiving electronic data deliverables that were uploaded into HydroDaVETM. In addition, Watermaster sampled 12 private wells within and in the vicinity of the plume as part of its on-going plume-characterization work.

Developing Multi-Purpose Cleanup at Chino Airport and Identified Cost Savings. Watermaster has been working closely with the San Bernardino County Department of Airports on a number of programs aimed at facilitating the groundwater cleanup at the airport, lowering costs and benefiting all the parties. For example, Watermaster exchanged groundwater elevation and groundwater quality data for wells installed by the County, and coordinated on the possibility of locating a proposed monitoring well where it could benefit all parties and lower costs. In addition, Watermaster sampled private wells within and in the

### WATER SUPPLY AND LOWER COSTS

vicinity of the plume. Watermaster's high-definition monitoring program also helped to establish that there is a 1,2,3-trichloropropane (TCP) plume co-mingled with the TCE plume at the Chino Airport. This is critical, because TCP will ultimately drive the mitigation costs at the Chino Airport. Watermaster continues to negotiate with the Department of Airports in order to find common ground for a joint remedy for desalting and plume mitigation.

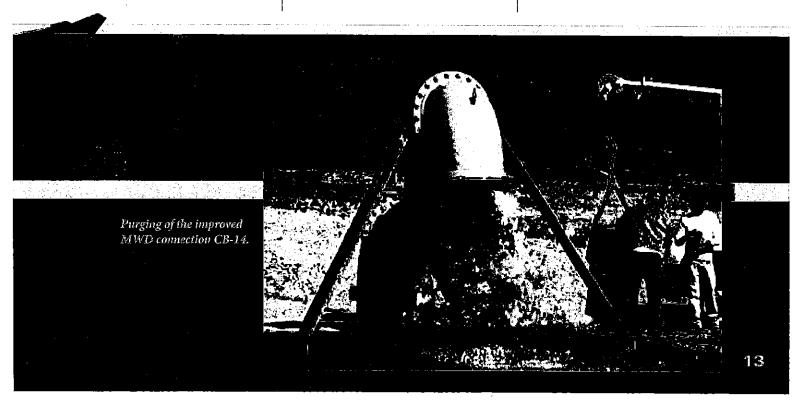

Extensive Actions in Management Zone 3 (MZ-3). Watermaster is actively participating on a Technical Advisory Committee overseeing a collaborative project funded by the Department of Defense that seeks to determine the source of the wide-spread, low-level perchlorate in groundwater in MZ-3, and to develop a cost-effective and environmentally appropriate solution.

Watermaster has provided extensive groundwater elevation and groundwater quality data to the co-principal investigators on this project.

Interagency Cooperation Saves
Significant Funds. Watermaster
coordinated closely with the State
of California to retain 16 monitoring
wells at the California Institution for
Men. These wells are critical for ongoing monitoring of both groundwater
elevations and groundwater quality
and are key to the HCMP. This interagency cooperation saved the State and
Watermaster parties significant funds.

Maximum Benefit Objectives Will
Allow Vastly Increased Recycled
Water Use. Watermaster and IEUA
convincingly demonstrated to
regulators that groundwater quality
objectives for total dissolved solids
and nitrogen could be raised, allowing
for vastly increased amounts of
recycled water to be recharged and
reused, which resulted in the maximum
beneficial use of water supplies.

Peace II Agreement, Basin Reoperation and Hydraulic Control. A primary element of the Peace II Agreement is Basin Reoperation. Essentially, Basin Reoperation is the controlled overdraft of the Basin by 400,000 acrefeet via forgiveness of the Desalter replenishment obligation, resulting in a regional lowering of groundwater levels across the Chino Basin, which makes it possible for the Desalter pumping to achieve and maintain Hydraulic Control. The many benefits of Basin Reoperation and Hydraulic Control include improved basin yield by reduced groundwater outflow to (and increased groundwater inflow from) the Santa Ana River, a local and reliable supply of potable water from the Chino Desalters, improved salinity management via salt export from the Chino Desalters, and the "maximum benefit" groundwater quality objectives which allow for recycled water reuse, among others. An independent macroeconomic analysis suggested that the net value of these management programs is about \$900 million dollars.

### WATERMASTER REPRESENTS ALL KEY STAKEHOLDER GROUPS

To draw together in a single organization all the diverse interests in the Basin, a governing structure was formed that represents all stakeholder groups, including a Board, Advisory Committee and three Producer Pools:

- · Agricultural Pool to represent dairymen, farmers, and State interests.
- · Non-Agricultural Pool to represent commercial and industrial producers.
- · Appropriative Pool to represent cities, water districts, and water companies.

### COURT HEARINGS AND ORDERS FISCAL YEAR 2009-2010

During the fiscal year 2009-10, several hearings were held relating to implementation of the Optimum Basin Management Program (OBMP). Hearings and orders were as follows:

Hearing Date	Primary Subject Matter
June 18, 2010	<ul> <li>Hearing – Paragraph 31 Motion of the Non-Agricultural Pool Committee</li> <li>Ruling and Order – The Motion of the Non-Agricultural Pool Committee and Joinder Therein Is Denied</li> </ul>
April 14, 2010	Case Management Order – Regarding Paragraph 31 Motion by the Non-Agricultural Pool Committee
April 2, 2010	Hearing – Ex-parte Application Regarding the Case Management Order for the Paragraph 31 Motion by the Non-Agricultural Pool Committee
December 11, 2009	Hearing Status Conference
November 30, 2009	Notice and Order – To Attend the Status Conference on December 11, 2009
September 21, 2009	<ul> <li>Minute Order – By Order of Presiding Judge James C. McGuire, CHINO BASIN MUNICIPAL WATER DISTRICT V CITY OF CHINO, Et Al Is Hereby Reassigned to Judge Stanford Reichert, Judge of the Superior Court of San Bernardino County, Chino District, Department C-1, For All Purposes</li> </ul>
September 17, 2009	<ul> <li>Hearing – Approval of Case Management Order That Indicates That Watermaster Is in Compliance with All of Its Current Deadlines with the Implementation of the OBMP</li> </ul>
September 15, 2009	Revised Order – Watermaster's Motion for Approval of the Template Storage and Recovery Agreement Is Granted
August 11, 2009	Hearing – Status Update on Program Elements Seven, Eight, and Nine and the Motion Filed by Watermaster for Approval of the Template Auction Storage and Recovery Agreement
	Order – Watermaster's Motion for Approval of the Template Storage and Recovery Agreement Is Granted

### RESOLUTIONS CALENDAR YEAR 2010

Resolution	Adopted	Summary of Resolution
10-03	June 24, 2010	<ul> <li>Regarding Ongoing Support for the Chino Basin Recharge Master Plan</li> <li>The updated Recharge Master Plan is based on sound technical analysis and adequately updates the 2000 Recharge Master Plan in light of Basin Re-Operation and Hydraulic Control and in light of changed economic and hydrologic conditions within the State of California.</li> <li>Watermaster adopts the updated Recharge Master Plan as the guidance document for the further development of the recharge facilities for the Chino Basin.</li> <li>Pursuant to the Peace II Agreement section 8.1, Watermaster and IEUA will update this plan not less than once every five years. In particular, the Plan will be updated following the completion of the parties' Urban Water Management Plans by June 30, 2011.</li> </ul>
Revised 10-02	June 24, 2010	<ul> <li>Authorizing Investment of Monies in the Local Agency Investment Fund</li> <li>The Board of Directors does hereby authorize the deposit and withdrawal of Chino Basin Watermaster monies in the Local Agency Investment Fund in the State Treasury in accordance with the provisions of Section 16429.1 of the Government Code for the purpose of investment as stated therein, and verification by the State Treasurer's Office of all banking information provided in that record.</li> <li>The following Chino Basin Watermaster officers and designated employees or their successors in office/position shall be authorized to order the deposit or withdrawal of monies in the Local Agency Investment Fund: Chairman of the Board, Vice-Chair, Board Secretary/Treasurer, Chief Executive Officer/Secretary, and CFO.</li> </ul>
10-02	January 28, 2010	<ul> <li>Authorizing Investment of Monies in the Local Agency Investment Fund</li> <li>The Board of Directors does hereby authorize the deposit and withdrawal of Chino Basin Watermaster monies in the Local Agency Investment Fund in the State Treasury in accordance with the provisions of Section 16429.1 of the Government Code for the purpose of investment as stated therein, and verification by the State Treasurer's Office of all banking information provided in that record.</li> <li>The following Chino Basin Watermaster officers and designated employees or their successors in office/position shall be authorized to order the deposit or withdrawal of monies in the Local Agency Investment Fund: Chairman of the Board, Vice-Chair, Board Secretary/Treasurer, Chief Executive Officer/Secretary, and CFO/Asst. GM.</li> </ul>
10-01	January 28, 2010	<ul> <li>Establishing a Watermaster Investment Policy</li> <li>The authority to invest and reinvest funds of Watermaster is hereby delegated to the Watermaster Chief Executive Officer (and his/her designees) subject to the provisions of said Investment Policy and the ongoing review and control of Watermaster and the Watermaster Advisory Committee.</li> <li>This resolution shall take effect from and after its date of adoption and Resolution 09-01 is rescinded in its entirety.</li> </ul>

A In 1990, Chino received a portion of San Bernardino County Water Works #8 (WW#8) OSY (363.790 AF) as a result of a permanent transfer.

<sup>&</sup>lt;sup>B</sup> City of Chino Hills incorporated in 1991 and assumed the responsibility for providing the public services formerly provided by WW#8. WW#8 acquired a portion of the rights of Park and Pomona Valley Water Companies in 1983.

<sup>&</sup>lt;sup>c</sup> CCWD acquired the rights to Etiwanda Water Company (upon dissolution) in 1986. CCWD changed its name to CVWD in 2004.

<sup>&</sup>lt;sup>D</sup> JCSD acquired the rights of Mira Loma Water Company in 1979 (776.940 AF OSY), Feldspar Gardens in 1988 (47.549AF OSY) and Mutual Water Company of Glen Avon Heights in 1997 (467.974 AF OSY).

E MVCWD changed its name to MVWD in 1980. In 1990, MVWD received 675.610 AF of WW#8 OSY as a result of a permanent transfer.

 $<sup>^{\</sup>rm F}$  WSBCWD changed its name to WVWD in 2003,

 $<sup>^{\</sup>rm G}$  In FY 01-02, 5.000 AF OSY was reassigned: 1.000 AF to FWC and 4.000 AF to the Nicholson Trust.

H FWC intervened in 1989 and was assigned 1,000 AF OSY as a result of a permanent transfer of water rights from FUWC.

 $<sup>^{\</sup>rm I}$  Los Serranos intervened into the Appropriative Pool in 1990 with 0,000 AF OSY.

<sup>&</sup>lt;sup>1</sup> Niagara Bottling Company intervened in FY 02-03 with 0.000 AF OSY.

K Nicholson Trust intervened in FY 01-02 and was assigned 4,000 AF OSY as a result of a permanent transfer of water rights from FUWC.

<sup>&</sup>lt;sup>L</sup> GSWC permanently transferred 823,900 AF OSY to Park Water Company in 1980. Park Water Co was acquired by WW#8 which was subsequently acquired by the City of Chino Hills. SCWC changed its name to GSWC in 2005.

M San Bernardino County Prado Tiro (now known as Prado Snooting Park) was involuntarily reassigned to the Appropriative Pool from the Agricultural Pool in 1985.

<sup>&</sup>lt;sup>N</sup> Arrowhead intervened in 1992 with 0.000 AF OSY.

<sup>&</sup>lt;sup>o</sup> City of Fontana intervened in 1996 with 0.000 AF OSY,

A Conrock became Calmat and in FY 99-00 became Vulcan Materials Co. On July 23, 2009, Vulcan permanently transferred its 317.844 AF SY to Aqua Capital Management.

<sup>&</sup>lt;sup>8</sup> Kalser Steel Corporation became Kalser Resources and then Kalser Venture, Inc. Kalser sold portions of its property to CSI & Speedway, then its last property holdings and all its remaining water rights to CCG Ontario LLP on August 16, 2000.

<sup>&</sup>lt;sup>c</sup> Red Star Fertilizer became Anaheim Citrus then was acquired by West Venture Development. West Venture went out of business in 91-92 and abandoned its rights to production in FY 90-91.

 $<sup>^{\</sup>rm D}$  A portion of SCE was sold in FY 98-99; SCE retained 27,959 AF SY.

E Mountain Vista Power Generating Company (MVPG) purchased the Etiwanda Generating Facility owned by SCE in FY 98-99. MVPG became Reliant Energy, Etiwanda with 954-540 AF SY. Reliant Energy, Etiwanda changed its name to RRI Energy West, Inc. in FY 08-09.

<sup>&</sup>lt;sup>F</sup> Southern Service Company became Angelica Rental Service in FY 90-91.

<sup>&</sup>lt;sup>G</sup> On May 22, 2008, Sunkist permanently transferred 22,000 AF SY to Koil. On October 23, 2008 Sunkist permanently transferred 1,873,402 AF SY to Ontario City Non-Ag.

<sup>&</sup>lt;sup>H</sup> Carlsberg Mobile Home Properties became Mobile Community Management and is known as Swan Lake Mobile Home Park.

Lution Carbide Corp. became Praxair, Inc. On May 27, 2010, Praxair permanently transferred 426.446 AF SY to Ontario City Non-Ag.

Quaker Chemical Company went out of business in FY 93-94.

K California Steel Industries (CSI) intervened in FY 91-92 after purchasing land from Kaiser.

L General Electric Company intervened in FY 95-96 with 0,000 AF SY.

M California Speedway intervened in FY 96-97 after purchasing land from Kaiser. On August 16, 2000, Catellus permanently transferred 525,000 AF SY to Speedway. California Speedway changed its name to Auto Club Speedway in FY 07-08.

 $<sup>^{\</sup>rm N}$  Loving Savior of the Hills Lutheran Church intervened in FY 00-01 with 0.000 AF SY.

<sup>&</sup>lt;sup>o</sup> CCG Ontario LLC intervened in FY 00-01. Kaiser sold its last properly holdings and all its remaining water rights to CCG Ontario LLP on August 16, 2000. On December 18, 2009, CCG Ontario permanently transferred its 630.274 AF SY to Aqua Capital Management.

F KCO/Koll intervened in FY 07-08 after purchasing land from Sunkist. On May 22, 2008, Sunkist permanently transferred 22.000 AF SY to Koll. On May 28, 2009, the 22.000 AF SY was permanently transferred to Ontario City Non-Ag.

 $<sup>^{\</sup>rm Q}$  San Antonio Winery intervened in FY 07-08 with 0.000 AF SY.

R Ontario City Non-Ag intervened in FY 08-09 after purchasing land from Sunkist. On October 23, 2008, Sunkist permanently transferred 1,873.402 AF SY to Ontario City Non-Ag. On May 28, 2009, Koll's 22.000 AF SY was permanently transferred to Ontario City Non-Ag. On May 27, 2010, Praxair permanently transferred 426.446 AF SY to Ontario City Non-Ag.

s Aqua Capital Management intervened in FY 08-09 after purchasing land from CCG Ontario. On December 18, 2008, CCG Ontario permanently transferred 630.274 AF SY to Aqua Capital Management. On July 23, 2009, Vulcan permanently transferred 317.844 AF SY to Aqua Capital Management.

<sup>&</sup>lt;sup>1</sup> Source: Watermaster Annual Reports and Assessment Packages.

<sup>&</sup>lt;sup>2</sup> First-year reallocation occurred under the Judgment.

<sup>&</sup>lt;sup>3</sup> Appropriators agree to pay Ag Pool assessments. Reallocation procedure changed by agreement.

<sup>&</sup>lt;sup>4</sup> Peace Agreement signed. Appropriators agree to pay Ag Pool assessments for life of Peace Agreement. Procedure changed by agreement. Ag Pool Annual Safe Yield is 82,800 AF.

<sup>&</sup>lt;sup>5</sup> After duplication of conversion areas were identified, Jurupa's Pre-Peace Agreement acres were adjusted (337.6 acres), and Post-Peace Agreement acres were adjusted (846.4 acres).

Total	57,953.2	20,799.0	40,220.9	25,380.4	144,353.6

<sup>&</sup>lt;sup>1</sup> Includes groundwater produced from Cucamonga Basin and surface water from Lloyd Michaels, Royer-Nesbit, and Arthur H. Bridge WTPs, and Deer Canyon.

<sup>&</sup>lt;sup>2</sup> IEUA provided 24,505.8 AF of recycled water as follows: 7,157.2 AF to the City of Chino, 1,494.0 AF to the City of Chino Hills, 659.5 AF to Cucamonga Valley Water District, 818.0 AF to IEUA, 241.3 AF to Monte Vista Water District, 5,677.9 AF to Ontario, 1,250.7AF to San Bernardino County, and 0.0 AF to the City of Upland. Additionally, recycled water groundwater recharge in the amount of 7,208.0 AF is shown as allocated within each service area.

<sup>&</sup>lt;sup>3</sup> Imported groundwater produced from Colton/Rialto, Lytle, and "unnamed" Basins. Surface water deliveries are from Lytle Creek. Imported deliveries are via both IEUA/MWD and SVBMWD.

<sup>&</sup>lt;sup>4</sup> Imported groundwater produced from Rubidoux Basin. Recycled water is purchased through IEUA.

Imported groundwater produced from wells located in the Rialto Basin.

<sup>&</sup>lt;sup>6</sup> MWDSC and SBVMWD deliveries (See Appendix K, "Summary of MWDSC Deliveries," for individual agencies breakdown).

Includes 4,192.2 AF of groundwater from Six Basins and 444.7 AF of groundwater from Spadra Basin. Imported water was delivered through TVMWD.

<sup>&</sup>lt;sup>a</sup> An amount of 2,250.8 AF was treated local canyon flow used in the overlying Chino Basin. The imported groundwater was 638.5 AF from San Antonio Tunnel, 3,219.6 AF from Cucamonga Basin, and 254.0 AF from Six Basins.

<sup>&</sup>lt;sup>9</sup> Recycled wastewater that was applied to fields, including water held in storage ponds.

Imported groundwater produced from Cucamonga and Six Basins. Surface water deliveries are from the San Antonio Water Company and treated at the San Antonio Canyon WTP.

<sup>&</sup>lt;sup>11</sup> Imported groundwater produced from Cucamonga and Six Basins.

<sup>&</sup>lt;sup>12</sup> Listed amount was delivered to "meter book" service area.

6: Ontario City Non-Ag purchased all but 4,463.259 AF of Praxair's storage water. The 4,463.259 AF amount is the amount that was in the account on 06/30/07 subject to the Attachment G Purchase and Sale Agreement.

### ASSESSMENT PACKAGE NOTES PRODUCTION YEAR 2009-2010

### Assessment Year 2010-2011 (Production Year 2009-2010)

### **Assessment Package Notes**

	Сотралу	Account	Note
A	Cucamonga Valley Water District	Local Storage	The Peace II Vulcan over-transfer has been corrected by removing 292,989 AF from Vulcan's Storage account & 560,011 AF from CVWD's ECO account.
В	Desailer Authority	Local Storage	There is no loss assessed on the native basin water allocated to offset desalter production as a result of basin reoperation as approved in Peace II.
Ģ	Vulcan Materials Company	Local Storage	The Peace II Vulcan over-transfer has been corrected by removing 292.989 AF from Vulcan's Storage account & 560.011 AF from CVWD's ECO account.

Board of Directors Chino Basin Watermaster Rancho Cucamonga, California

### Independent Auditors' Report

We have audited the accompanying basic financial statements of the Chino Basin Watermaster as of and for the year ended June 30, 2010, as listed in the table of contents. These basic financial statements are the responsibility of the management of Chino Basin Watermaster. Our responsibility is to express an opinion on these basic financial statements based on our audit. The prior year partial comparative information has been derived from the Chino Basin Watermaster's basic financial statements for the year ended June 30, 2009 and, in our report dated December 11, 2009, we expressed an unqualified opinion on those financial statements.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Chino Basin Watermaster as of June 30, 2010, and respective changes in financial position and cash flows of the Chino Basin Watermaster for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The information identified in the accompanying table of contents as management's discussion and analysis is not a required part of the basic financial statements, but is supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the Chino Basin Watermaster's basic financial statements. The supplementary information is presented for purposes of additional analysis and is not a required part of the basic financial statements. The supplementary information identified in the table of contents has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Mayor Hoffman Mc Con Al.

### **MANAGEMENT'S DISCUSSION AND ANALYSIS**

### **BACKGROUND**

The Chino Basin Watermaster (Watermaster) was established under a Judgment entered in the Superior Court of the State of California for the County of San Bernardino, entitled "Chino Basin Municipal Water District v. City of Chino, et al.," (originally Case No. SCV 164327, the file was transferred in August 1989 and assigned a new Case No. RCV 51010). The Judgment prescribes Watermaster's authorities and specifies classes of water production assessments to be used to fund certain activities. Those assessment categories are: Administration, Optimal Basin Management Program, Special Projects and Replenishment. Each class of assessment has a prescribed purpose and water production base. Assessment revenue is Watermaster's principal source of income.

This section of the Watermaster's annual financial report presents our analysis of the Watermaster's financial performance during the fiscal year ended on June 30, 2010. Please read it in conjunction with the basic financial statements that follow this section.

### **OVERVIEW OF THE FINANCIAL STATEMENTS**

The discussion and analysis are intended to serve as an introduction to the Watermaster's basic financial statements, which are comprised of two components: Financial Statements (pages 6-8) and Notes to the Financial Statements (pages 9-19). This report also contains other supplementary information in addition to the basic financial statements (pages 20-22).

### **Required Financial Statements**

The financial statements of the Watermaster report information using the accrual basis of accounting; accordingly, all of the current year's revenues and expenses are accounted for regardless of when the cash is received or paid. This accounting treatment is similar to the methods used by private sector companies and aids in answering the question of whether the Watermaster, as a whole, has improved or deteriorated as a result of this year's activities.

The Statement of Net Assets (page 6) includes all of the Watermaster's investments in resources (assets) and the obligations to creditors (liabilities). It also provides the basis for evaluating the capital structure of the Watermaster and assessing the liquidity and financial flexibility of the Watermaster.

The Statement of Revenues, Expenses and Changes in Net Assets (page 7) includes all of the current year revenues and expenses. This statement measures the success of the Watermaster's operations over the past year and can be used to determine whether the Watermaster has successfully recovered all of its costs through assessments and other charges.

The Statement of Cash Flows (page 8) reports cash receipts, cash payments, and net changes in cash resulting from operations, investing, and financing activities. This statement demonstrates where the cash came from, how the cash was used, and how much the change in cash was during the fiscal year.

These statements are one of many different ways to measure the Watermaster's financial health, or financial position. Over time, increases or decreases in the Watermaster's net assets are one of the indicators of whether its financial position is improving or deteriorating. You will need to consider other non-financial factors, however, such as changes in the Watermaster's, assessment income, cost sharing agreements, and other operational measures to help assess the overall financial position of the Watermaster.

### SUMMARY OF FINANCIAL INFORMATION

### Statement of Net Assets

June 30, 2010 (With comparative totals for June 30, 2009)

Assets		2010	2009	Difference	% Change
Current Capital		\$ 10,614,785 46,889	\$ 11,596,978 53,176	\$ (982,193) (6,287)	-8.5% <u>-11.</u> 8%
Liabilities	Total Assets	10,661,674	11,650,154	(988,480)	-8.5%
Current		1,989,063	469,002	1,520,061	324.1%
Non current	t ,	194,246	185,186	9,060	4.9%
Net Assets	Total Liabilities	2,183,309	654,188	1,529,121	233.8%
Invested in	capital assets	46,889	53,176	(6,287)	-11.8%
Restricted for	or Water Purchases	1,280,113	4,111,568	(2,831,455)	-68.9%
Unrestricted	<u>.</u>	7 <u>,151,363</u>	6,831,222	320,141	4.7%
	Total Net Assets	\$ 8,478,365	\$10,995,966	(\$ 2,517,601)	

For the year ended June 30, 2010 and June 30, 2009, Watermaster's Total Net Assets was \$8,478,365 and \$10,995,966 respectively.

Total Assets decreased by \$988,480 or 8.5% in FY 2010 compared to FY 2009. Parties who extract water in excess of their rights are assessed on an annual basis to cover the cost of purchasing replenishment water. In fiscal year 2008/2009, Watermaster collected the money for the purchase of replenishment water but was unable to satisfy the purchase obligation of the replenishment water. For FY 2010, the majority of the decrease in Total Assets was a direct result of the purchase of replenishment water throughout the fiscal year. Comparing FY 2010 to FY 2009, Cash and Investments (Note 2 - pages 12-15) decreased by \$787,508 or 7.0% (net of the audit adjustment described below), Accounts Receivables decreased by \$176,515 or 89.2%, Prepaid Expenses decreased by \$18,170 or 54.3% and Capital Assets (net of accumulated depreciation) decreased by \$6,287 or 11.9%.

The first of four payments related to the purchase and sale agreement between the Overlying (Non-Agricultural) Pool and Watermaster (Note 9 - page 19) was issued on January 14, 2010 in the amount of \$2,166,022. At the end of the fiscal year June 30, 2010, three checks issued to members of the Overlying (Non-Agricultural) Pool totaling \$415,136 had not cleared the Watermaster bank account. As a result, an

audit adjustment was recorded increasing the categories of Cash and Investments and Accounts Payable for \$415,136.

Total Liabilities increased by \$1,529,121 or 233.8% in FY 2010 as compared to FY 2009. Accounts Payable increased \$1,581,185 or 406.4% (which included the audit adjustment amount of \$415,136 listed above). The Accounts Payable increase was directly related to the recording and paying of outstanding invoices at fiscal year end June 30, 2010. Accrued Salaries and Benefits decreased by \$61,124 or 76.5% and Compensated Absences (Note 4 - page 16) increased by \$9,060 or 4.9%.

### Statement of Revenues, Expenses, and Changes in Net Assets

June 30, 2010 (With comparative totals for June 30, 2009)

	2010	2009	Difference	% Change
Operating Revenues				
Administrative assessments	\$ 7,404,003	\$ 8,166,124	(\$ 762,121)	-9.3%
Mutual agency project revenue	0	51,217	(51,217)	-100.0%
Replenishment water	7,073,805	6,437,643	636,162	9.9%
Miscellaneous revenue	111,188	0	111,188	100.0%
Total Operating Revenues	14,588,996	14,654,984	(65,988)	-0.5%

Pool, Advisory and Board	277,050	250,870	26,180	10.4%
Optimum Basin Management Plan	6,327,400	6,913,336	(585,936)	-8.5%
Mutual agency project costs	. 0	10,000	(10,000)	-100.0%
Groundwater replenishment	9,894,321	2,326,075	7,568,246	325.4%
Total Operating Expenses	17,185,110	10,036,846	7,148,264	71.2%
Income from operations	(2,596,114)	4,618,138	(7,214,252)	-156.2%
Non-Operating Revenues				
Interest	78,513	179,866	(101,353)	-56,3%
Total Non-Operating Revenues	78,513	179,866	(101,353)	-56.3%
Change in net assets	(2,517,601)	4,798,004	(7,315,605)	-152.5%
Net assets at beginning of year	10,995,966	6,197,962	4,798,004	77.4%
Total net assets at end of year	\$ 8,478,365	\$ 10,995,966	(\$ 2,517,601)	-22.9%

### **REVIEW OF REVENUES AND EXPENSES**

Total Operating Revenues decreased \$65,988 or 0.5% in FY 2010 as compared to FY 2009. Annual administrative assessments are determined by dividing the adopted budget by the total assessable production. Administrative assessment revenue for FY 2010 decreased \$762,121 or 9.3% from the previous year due to budgeted decreases in the overall OBMP expenses, recharge basin operations and maintenance expenses. Replenishment water assessment revenue for FY 2010 increased by \$636,162 or 9.9% compared to the previous year due to production increases in excess of production rights, and due to the increased cost of replenishment water. For the current fiscal year, there was no Mutual Agency Project Revenue recorded (a

decrease of \$51,217 or 100.0%) and the Miscellaneous Revenue category increased by \$111,188 or 100.0% as compared to the previous year.

Overall operating expenses (excluding replenishment activities) decreased by \$419,982 or 5.4% in FY 2010 as compared to FY 2009. The operating expense categories for the fiscal year ending June 30, 2010 were as follows: Watermaster administrative expenses increased \$146,248 or 28.6%; Depreciation expense increased by \$3,526 or 13.8%; the Pools, Advisory and Board administration expenses increased by \$26,180 or 10.4%; Optimum Basin Management Plan (OBMP) decreased \$585,936 or 8.5%; and Mutual agency project costs decreased \$10,000 or 100% as compared to the previous fiscal year ended June 30, 2009.

Groundwater replenishment activities increased dramatically in FY 2010 as compared to FY 2009. The replenishment activities for FY 2010 were \$7,728,299, along with the water purchase of \$2,166,022 (see Note 9) for a total of \$9,894,321 as compared to \$2,326,075 for FY 2009, an increase of \$7,568,246 or 325.4% from the prior year.

Non-operating revenue represented interest income of \$78,513 and \$179,866 for the years ending June 30, 2010 and June 30, 2009, which decreased due to the falling interest rates.

### **CONTACTING THE WATERMASTER**

This financial report is designed to provide a general overview of the Watermaster's finances and to demonstrate the Watermaster's accountability for the resources it receives. If you have any questions about this report, or need additional information, please contact Joseph S. Joswiak, Chief Financial Officer at (909) 484-3888.

### Notes to the Basic Financial Statements

Year ended June 30, 2010

### (1) Reporting Entity and Summary of Significant Accounting Policies

### Description of Reporting Entity

The Chino Basin Watermaster ("Watermaster") was established under a judgment entered in Superior Court of the State of California for the County of San Bernardino as a result of Case No. RCV 51010 (formerly Case No. SCV 164327) entitled "Chino Basin Municipal Water District v. City of Chino, et al.", signed by the Honorable Judge Howard B. Wiener on January 27, 1978. The effective date of this Judgment for accounting and operations was July 1, 1977.

Pursuant to the Judgment, the Chino Basin Municipal Water District (CBMWD) five member Board of Directors was initially appointed as "Watermaster". Their term of appointment as Watermaster was for five years, and the Court, by subsequent orders, provides for successive terms or for a successor Watermaster. Pursuant to a recommendation of the Advisory Committee, the Honorable J. Michael Gunn appointed a nine-member board as Watermaster on September 28, 2000.

Under the Judgment, three Pool committees were formed: (1) Overlying (Agricultural) Pool which includes the State of California and all producers of water for overlying uses other than industrial or commercial purposes; (2) Overlying (Non-Agricultural) Pool which represents producers of water for overlying industrial or commercial purposes; and (3) Appropriative Pool which represents cities, districts, other public or private entities and utilities. The three Pools act together to form the "Advisory Committee".

The Watermaster provides the Chino Groundwater Basin service area with services which primarily include: accounting for water appropriations and components of acrefootage of stored water by agency, purchase of replenishment water, groundwater monitoring and implementation of special projects.

Watermaster expenditures are allocated to the pools based on the prior year's production volume (or the same percentage used to set the annual assessments). Allocations for fiscal year 2009-10 expenses are based on the 2008-09 production volume.

	2008-09	
Production Volume:	Acre Feet	<u>%</u>
Appropriative Pool Agricultural Pool Non-Agricultural Pool	84,716 32,143 4,394	69.867 26.509 3.624
Total Production Volume	<u>121.253</u>	100.000

### Notes to the Basic Financial Statements

(Continued)

### (1) Reporting Entity and Summary of Significant Accounting Policies, (Continued)

The Agricultural Pool members ratified an agreement with the Appropriative Pool at their meeting of June 16, 1988, wherein the Appropriative Pool assumes Agricultural Pool administrative expenses and special project cost allocations in exchange for an accelerated transfer of unpumped agricultural water to the Appropriative Pool. In addition the Agricultural Pool transferred all pool administrative reserves at June 30, 1988 to the Appropriative Pool effective July 1, 1988.

In July of 2000, the principal parties in the Basin signed an agreement, known as the Peace Agreement, which among other things formalized the commitment of the Basin parties to implement an Optimum Basin Management Program. The Peace Agreement was signed by all of the parties, and the Court has approved the agreement and ordered the Watermaster to proceed in accordance with the terms of the agreement. The Court has approved revisions to the Chino Basin Watermaster Rules and Regulations.

### Basis of Accounting

The Watermaster is accounted for as an enterprise fund (proprietary fund type). A fund is an accounting entity with a self-balancing set of accounts established to record the financial position and results of operations of a specific governmental activity. The activities of enterprise funds closely resemble those of ongoing businesses in which the purpose is to conserve and add to basic resources while meeting operating expenses from current revenues. Enterprise funds account for operations that provide services on a continuous basis and are substantially financed by revenues derived from user charges. The Watermaster utilizes the accrual basis of accounting. Revenues are recognized when earned and expenses are recognized as they are incurred.

The Watermaster applies all applicable GASB pronouncements in accounting and reporting for proprietary operations as well as the following pronouncements issued on or before November 30, 1989, unless those pronouncements conflict with or contradict GASB pronouncements: Financial Accounting Standards Board (FASB) Statements and Interpretations, Accounting Principals Board (APB) Opinions, and Accounting Research Bulletins (ARB's) of the Committee on Accounting Procedure.

### Cash and Investments

Investments are reported in the accompanying balance sheet at fair value. Changes in fair value that occur during a fiscal year are recognized as interest income reported for that fiscal year.

Watermaster pools cash and investments of all fund balance reserves. Interest income earned by the pooled investments is allocated quarterly to the various reserves based on each reserve's average cash and investments balance.

### (1) Reporting Entity and Summary of Significant Accounting Policies, (Continued)

### Cash Equivalents

For the purposes of the statements of cash flows, cash equivalents are defined as short-term, highly liquid investments that are both readily convertible to known amounts of cash or so near their maturity that they present insignificant risk of changes in value because of changes in interest rates, and have an original maturity date of three months or less.

### Capital Assets

Capital assets are valued at cost where historical records are available and at an estimated historical cost where no historical records exist. The Watermaster capitalizes all assets with a historical cost of at least \$5,000 and a useful life of at least three years. The cost of normal maintenance and repairs that do not add to the value of the assets or materially extend asset lives are not capitalized.

Depreciation is computed utilizing the straight-line method over the following estimated useful lives:

Computer equipment and software	5 years
Office furniture and fixtures	7 years
Leasehold improvements	10 years
Automotive equipment	7 years

### Use of Estimates

The preparation of financial statements requires management to make certain estimates and assumptions that affect the reported amounts of assts and liabilities, and disclosure of contingent assets and liabilities, at the date of the financial statements, as well as the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

### Appropriative Interest Revenue Allocation

On August 30, 1979, the Appropriative Pool unanimously approved assessment procedures whereby any interest earned from the Watermaster assessments paid by Appropriative Pool members would reduce the total current assessment due from those members. Fiscal year 2008-09 interest revenue was allocated to the Appropriative Pool, resulting in a reduction of the 2009-10 assessments. The amount of administrative assessment received for the year ended June 30, 2010 was \$7,404,003.

### Notes to the Basic Financial Statements

### (1) Reporting Entity and Summary of Significant Accounting Policies, (Continued)

### Prior Year Data

The information included in the accompanying financial statements for the prior year has been presented for comparison purposes only and does not represent a complete presentation in accordance with generally accepted accounting principles. Accordingly, such information should be read in conjunction with the Watermaster's prior year financial statements, from which the financial data was derived.

### (2) Cash and Investments

Cash and investments as of June 30, 2010 are classified in the accompanying financial statements as follows:

Statement of net assets:

Cash and investments

\$10,578,034

Total cash and investments

\$10.578,034

Cash and investments as of June 30, 2010 consist of the following:

Cash on hand Deposits with financial institutions Investments	\$	500 603,604 9,973,930
Total cash and investments	<u>\$1</u>	0,578,034

<u>Investments Authorized by the California Government Code and the Watermaster's Investment Policy</u>

The table below identifies the investment types that are authorized for the Watermaster by the California Government Code and the Watermaster's investment policy. The table also identifies certain provisions of the California Government Code (or the Watermaster's investment policy, if more restrictive) that address interest rate risk, credit risk, and concentration of credit risk.

•	Authorized		*Maximum	*Maximum
	$\mathbf{B}\mathbf{y}$		Percentage	Investment

### Notes to the Basic Financial Statements

(Continued)

### (2) Cash and Investments, (Continued)

### Disclosures Relating to Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates. One of the ways that the Watermaster manages its exposure to interest rate risk is by purchasing a combination of shorter term and longer term investments and by timing cash flows from maturities so that a portion of the portfolio is maturing or coming close to maturity evenly over time as necessary to provide the cash flow and liquidity needed for operations.

Information about the sensitivity of the fair values of the Watermaster's investments to market interest rate fluctuations is provided by the following table that shows the distribution of the Watermaster's investment by maturity:

	Re	maining Matur	ity (in Months	)
Investment Type	Total <u>Amount</u>	12 Months Or Less	13-24 <u>Months</u>	25-60 <u>Months</u>
Local Agency Investment Fund	\$ 9,973,930	9,973,930		· 
Total	<u>\$_9.973,930</u>	<u>9.973,930</u>		H

### Disclosures Relating to Credit Risk

Generally, credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization. Presented below is the minimum rating required by (where applicable) the California Government Code, the Watermaster's investment policy, and the actual rating as of year end for each investment type:

			Ratin	ng as of Y	ear End
Investment Type	Total <u>Amount</u>	Minimum Legal <u>Rating</u>	AAA	<u>Aa</u>	Not <u>Rated</u>
Local Agency Investmen	t Fund \$9,973,930	N/A			9,973,930
Total	<u>\$9,973,930</u>				<u>9.973.930</u>

### Notes to the Basic Financial Statements

(Continued)

### (2) Cash and Investments, (Continued)

### Custodial Credit Risk

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, a government will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty (e.g., broker-dealer) to a transaction, a government will not be able to recover the value of its investment or collateral securities that are in the possession of another party. The California Government Code and the Watermaster's investment policy do not contain legal or policy requirements that would limit the exposure to custodial credit risk for deposits or investments, other than the following provision for deposits: The California Government Code requires that a financial institution secure deposits made by governmental units by pledging securities in an undivided collateral pool held by a depository regulated under state law (unless so waived by the governmental unit). The market value of the pledged securities in the collateral pool must equal at least 110% of the total amount deposited by the public agencies. California law also allows financial institutions to secure Watermaster deposits by pledging first trust deed mortgage notes having a value of 150% of the secured public deposits.

### Investment in State Investment Pool

The Watermaster is a voluntary participant in the Local Agency Investment Fund (LAIF) that is regulated by the California Government Code under the oversight of the Treasurer of the State of California. The fair value of the Watermaster's investment in this pool is reported in the accompanying financial statements at amounts based upon the Watermaster's pro-rata share of the fair value provided by LAIF for the entire LAIF portfolio (in relation to the amortized cost of that portfolio). The balance available for withdrawal is based on the accounting records maintained by LAIF, which are recorded on an amortized cost basis.

### Notes to the Basic Financial Statements

(Continued)

### (3) Capital Assets

Capital asset activity for the year ended June 30, 2010 is as follows:

	Balances at July 1, 2009	Additions	<u>Deletions</u>	Balances at June 30, 2010
Computer equipment and software Office furniture and fixtures Leasehold improvements Automotive equipment	\$ 94,774 42,291 23,443 90,484	22,816	- - -	117,590 42,291 23,443 90,484

Less accumulated depreciation: Computer equipment and software Office furniture and fixtures Leasehold improvements Automotive equipment	(74,055) (36,953) (14,068) _(72,740)	(13,565) (5,339) (2,345) _(7,854)	- - - -	(87,620) (42,292) (16,413) (80,594)
Total accumulated depreciation	<u>(197,816</u> )	(29,103)		(226,919)
Net capital assets	<u>\$ 53,176</u>	<u>(6,287)</u>		<u>46,889</u>

### (4) Compensated Absences

Permanent Watermaster employees earn from 10 to 20 vacation days a year, depending upon their length of employment and 12 sick days a year. Employees may carry vacation days forward up to the equivalent number of days earned in the immediately preceding twenty-four (24) month period. There is no maximum accumulation of sick leave; and upon retirement or resignation at age 55 or greater, employees with continuous employment for a minimum of twenty (20) years are compensated for all accumulated sick leave at 50% of their rate of pay at termination. Other employees are paid based upon length of employment and age at time of retirement or resignation. The amount of compensated absences outstanding as of June 30, 2010 was \$194,246.

### Notes to the Basic Financial Statements

(Continued)

### (5) Deferred Compensation Plan

The Watermaster has established deferred compensation plans for all employees of Watermaster in accordance with Internal Revenue Code Section 457, whereby employees authorize the Watermaster to defer a portion of their salary to be deposited in individual investment accounts. Participation in the plans is voluntary and may be revoked at any time upon advance written notice. The amount of compensation subject to deferral until retirement, disability, or other termination by a participant may not exceed the maximum legal amounts for deferred compensation plans. Amounts withheld by Watermaster under this plan are deposited regularly with California Public Employees' Retirement System. The Watermaster makes no contribution under the plan. As of June 30, 2010, the deferred compensation plan assets were held in trust accounts for the sole benefit of the employees and their beneficiaries, and accordingly have been excluded from Watermaster's reported assets.

### (6) Operating Lease

The Watermaster entered into a new lease for rent of office space on September 1, 2003, expiring August 30, 2018. The amount paid under this lease was \$65,940 for the year ended June 30, 2010. The future minimum lease payments for this lease are as follows:

Year Ending June 30:	Amount
2011 2012 2013 2014 2015-2019	69,504 69,504 69,504 69,504 289,600
Total	<u>\$567,616</u>

### (7) Defined Benefit Pension Plan (PERS)

### Plan Description

The Watermaster contributes to the California Public Employees Retirement System (PERS), a cost-sharing multiple-employer public employee defined benefit pension plan. PERS provides retirement, disability benefits, and death benefits to plan members and beneficiaries. Effective May 2009, the Watermaster changed from a 2% at 55 Risk Pool during year ending June 30, 2008 to a 2.5% at 55 Risk Pool. PERS acts as a common investment and administrative agent for participating public entities within the State of California. PERS issues a publicly available financial report that includes financial statements and required supplementary information for the cost sharing plans that are administered by PERS. Copies of PERS' annual financial report may be obtained from its executive office at 400 "P" Street, Sacramento, California 95814.

### Notes to the Basic Financial Statements

(Continued)

### (7) Defined Benefit Pension Plan (PERS), (Continued)

### Contributions

Participants are required to contribute 8% of their annual covered salary. The Watermaster makes the contributions required of the employees on their behalf and for their account. Benefit provisions and all other requirements are established by state statute and the Watermaster contract with employee bargaining groups.

For each of the fiscal years shown below, the Watermaster has contributed at the actuarially determined rate provided by PERS' actuaries. Under GASB 27, an employer reports an annual pension cost (APC) equal to the annual required contribution (ARC) plus an adjustment for the cumulative difference between the APC and the employer's actual plan contributions for the year. The cumulative difference is called the net pension obligation (NPO). The ARC for the period July 1, 2009 to June 30, 2010 has been determined by an actuarial valuation of the plan as of June 30, 2007. The Watermaster's covered payroll for PERS was \$862,905.01 for the year ended June 30, 2010, while the Watermaster's total payroll for all employees was \$862,905.01 during the same period. In order to calculate the dollar value of the ARC for inclusion in financial statements prepared as of June 30, 2010, the contribution rate is multiplied by the payroll of covered employees that were paid during the period from July 1, 2009 to June 30, 2010.

### Three-Year Trend Information

### Annual Pension cost (Safety)

### Notes to the Basic Financial Statements

(Continued)

### (8) Project Commitments

Under a financing agreement developed pursuant to the OBMP Recharge Master Plan, the Watermaster is obligated to pay for one-half of the fixed project costs for certain recharge facilities in the Chino Basin area that are being constructed to increase the recharge of imported water, storm water, and recycled water to the Chino Groundwater Basin. The recharge facilities being constructed will be owned by the Inland Empire Utilities Agency pursuant to a Recharge Operations Agreement. When complete, the recharge project will enable the Watermaster to increase annual recharge supplemental water to the Chino Groundwater Basin. In addition, stormwater and recycled water recharge would be increased. Fixed project costs include construction costs, debt service on the related bond financing and reserves for repair, replacement, improvement and debt service. The Watermaster's share of the cost for 2009 is \$515,006.

### (9) Purchase of Water from Non-Agricultural Pool

As part of the Peace II Agreement, a purchase and sale agreement between the Overlying (Non-Agricultural) Pool and Watermaster was signed on September 27, 2007. The signed agreement (Attachment "G") was titled "PURCHASE AND SALE AGREEMENT FOR THE PURCHASE OF WATER BY WATERMASTER FROM THE OVERLYING (NON-AGRICULTURAL) POOL". Section D of the Agreement states:

"Commencing thirty (30) calendar days from the Notice of Intent to Purchase ("Payment Date") Watermaster will pay to the Non-Agricultural Overlying Pool for each acre-foot of the Storage Transfer Quantity in accordance with the following schedule as the schedule is adjusted for inflation by the consumers price index ("CPI") for San Bernardino County from May 31, 2006 until the Payment Date:

1. \$215 times 1/4 of the Storage Transfer Quantity on the Payment Date.

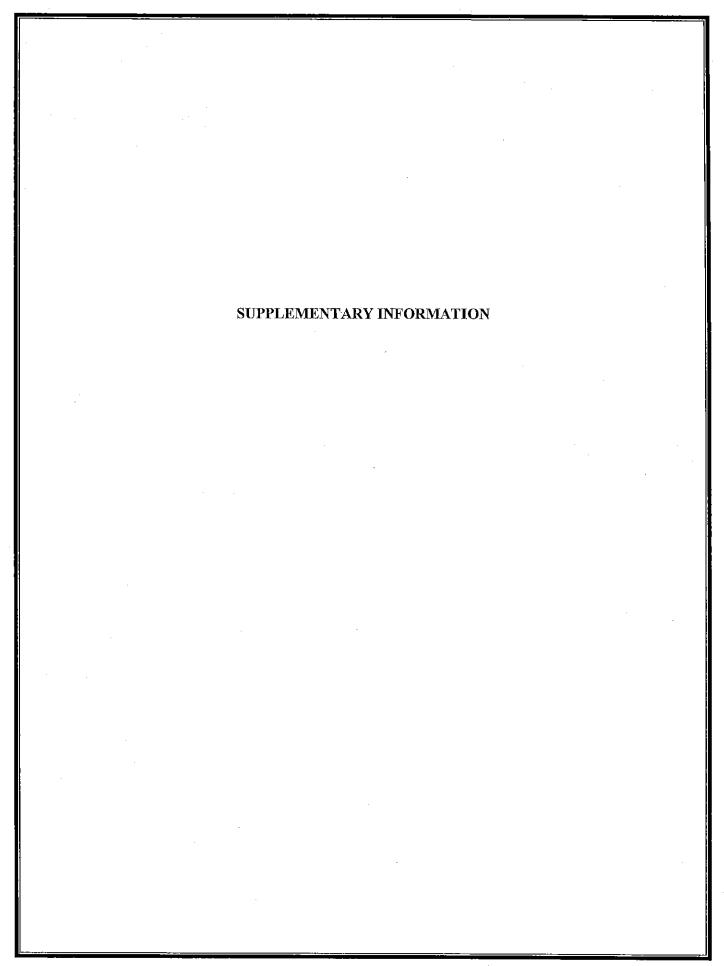

2. \$220 times 1/4 of the Storage Transfer Quantity on the first anniversary of the Payment Date.

3. \$225 times 1/4 of the Storage Transfer Quantity on the second anniversary of the Payment Date.

4. \$230 times 1/4 of the Storage Transfer Quantity on the third anniversary of the Payment Date.

However, all payments provided for herein, including inflation adjustments, are subject to an express price cap and will not exceed ninety-two (92) percent of the then prevailing MWD replenishment rate in any year".

The Notice of Intent to Purchase ("Payment Date") was December 18, 2009. On January 14, 2010 the first of four installment payments in the amount of \$2,166,022 (adjusted for inflation as prescribed by Section D) were issued to the Non-Agricultural Overlying Pool. The future three payments (adjusted for inflation) will be issued in accordance to Section D.

ORDER CONFIRMING AND
APPROVING INTERVENTIONS

CITY OF CHINO,
Defendant.
Defendant.

Defendant.

Dept: H

Specially assigned to the
Honorable Judge
J. Michael Gunn

LA\960780053

- 1 -

On April 25, 1996, at 8:30 a.m., the request of the Chino Basin Watermaster for an order confirming and approving the interventions of the City of Fontana, Frank Lizarraga, Wineside 45, S.N.S. Dairy, Richard Van Loon, Elizabeth H. Rohrs and the General Electric Company as parties in this action came on regularly for hearing, the Honorable Judge J. Michael Gunn presiding.

Frederic A. Fudacz and John Ossiff, of Nossaman, Guthner, Knox & Elliott, appeared on behalf of Chino Basin Watermaster. No other appearances were made.

No opposition having been received and good cause appearing therefor, IT IS HEREBY ORDERED:

- 1. That the City of Fontana is confirmed as a party in this action and its production is assigned to the Appropriative Pool. The City of Fontana shall be bound by all benefits and burdens of the Judgment, as amended, herein. The City of Fontana shall pay a Net Assessment equal to 100% of the cost of replenishment water required to replace all production in excess of the City of Fontana's allocated share of the Basin Safe Yield. The City of Fontana shall have an initial share of the operating Base Safe Yield of zero (0.0) percent. The City of Fontana shall pay the Administrative Assessment on said production, and the Gross Assessment will not apply to said production for which the City of Fontana pays a 100% Net Assessment.
- That Frank Lizarraga is confirmed as a party in this action and his production is assigned to the Overlying (Agricultural) Pool. Frank Lizarraga shall be bound by all benefits and burdens of the Judgment, as amended, herein.
- That Wineside 45 is confirmed as a party in this action and its production is assigned to the Overlying (Agricultural) Pool. Wineside 45 shall be bound by all benefits and burdens of the Judgment, as amended, herein.
- 4. That S.N.S. Dairy is confirmed as a party in this action and its production is assigned to the Overlying (Agricultural) Pool. S.N.S. Dairy shall be bound by all benefits and burdens of the Judgment, as amended, herein.

5	. That Ric	chard Van Loon is confirmed as a	party in this action and
his production	is assigned to	the Overlying (Agricultural) Pool.	Richard Van Loon shall
be bound by a	ll benefits and	burdens of the Judgment, as ame	ended, herein.

- 6. That Elizabeth H. Rohrs is confirmed as a party in this action and her production is assigned to the Overlying (Agricultural) Pool. Elizabeth H. Rohrs shall be bound by all benefits and burdens of the Judgment, as amended, herein.
- 7. That the General Electric Company is confirmed as a party in this action and its production is assigned to the Appropriative Pool. The General Electric Company shall have an initial share of the operating Base Safe Yield of zero (0.0) percent. The General Electric Company shall be bound by all benefits and burdens of the Judgment, as amended, herein.

J. Michael Gunn

J. Michael Gunn Judge, San Bernardino County Municipal Court

### CHINO BASIN WATERMASTER Case No. RCV 51010 Chino Basin Municipal Water District v. The City of Chino

### **PROOF OF SERVICE**

I declare that:

I am employed in the County of San Bernardino, California. I am over the age of 18 years and not a party to the within action. My business address is Chino Basin Watermaster, 9641 San Bernardino Road, Rancho Cucamonga, California 91730; telephone (909) 484-3888.

On October 3, 2011 I served the following:

1.	MOTION FOR	R APPROVAL	OF \	NATERM.	ASTER	RESOL	UTION	2010-	-04
----	------------	------------	------	---------	-------	-------	-------	-------	-----

/_x_/	BY MAIL: in said cause, by placing a true copy thereof enclosed with postage thereon fully prepaid, for delivery by United States Postal Service mail at Rancho Cucamonga, California, addresses as follows:  See attached service list: Mailing List 1
//	BY PERSONAL SERVICE: I caused such envelope to be delivered by hand to the addressee.
//	BY FACSIMILE: I transmitted said document by fax transmission from (909) 484-3890 to the fax number(s) indicated. The transmission was reported as complete on the transmission report, which was properly issued by the transmitting fax machine.
/_x_/	BY ELECTRONIC MAIL: I transmitted notice of availability of electronic documents by electronic transmission to the email address indicated. The transmission was reported as complete on the transmission report, which was properly issued by the transmitting electronic mail device.
l decla	re under penalty of perjury under the laws of the State of California that the above is true and

Executed on October 3, 2011 in Rancho Cucamonga, California.

Janine Wilson
