Chair Curatalo called the Watermaster Board meeting to order at 11:05 a.m.

PLEDGE OF ALLEGIANCE

AGENDA - ADDITIONS/REORDER

No additions or reorders were made to the agenda.

I. CONSENT CALENDAR

A. MINUTES

1. Minutes of the Watermaster Board Meeting held August 27, 2009

B. FINANCIAL REPORTS

1. Watermaster Visa Check Detail for the month of July 2009
2. Combining Schedule for the Period July 1, 2009 through July 31, 2009
3. Treasurer's Report of Financial Affairs for the Period July 1, 2009 through July 31, 2009
4. Budget vs. Actual July 2009

Motion by Hofer, second by Feenstra, and by unanimous vote

Moved to approve Consent Calendar A through B, as presented

II. BUSINESS ITEM

A. COMPREHENSIVE SOLUTION FOR THE SACRAMENTO-SAN JOAQUIN DELTA – POLICY POSITION

Mr. Manning reviewed this item in detail and noted Watermaster has not taken a position on this item; however, the Advisory Committee took action to support this item today. Mr. Manning stated this item comes before the board from a request by a member of the Watermaster Board who is very active on the Southern California Water Committee regarding working on a comprehensive solution regarding the Delta. The Southern California Water Committee has taken a policy position and is asking other agencies to support them in their endeavor and Mr. Vanden Heuvel, who is not present today, is asking Chino Basin Watermaster to support this effort. A discussion regarding Delta issues and solutions ensued. Chair Curatalo, Mr. Feenstra, Mr. Whitehead, and Mr. Field offered comment and support for this item. Mr. Manning noted Inland Empire Utilities Agency has already offered support for this item.

Motion by Whitehead, second by Feenstra, and by unanimous vote

Moved to approve supporting the Southern California Water Committees position on the Comprehensive Solution for the Sacramento-San Joaquin Delta, as presented

Added Comment:

Mr. Manning stated there will be two representatives from Brownstein, Hyatt, Farber & Schreck, Chris Frahm and Paul Bauer, who are both lobbyists who will be attending the upcoming Strategic Planning Conference to discuss the Delta Package. Mr. Manning stated he will also be contacting Phil Rosentrater from Western Municipal Water District to invite him to sit on the panel with Ms. Frahm and Mr. Bauer. This will create a well rounded panel to review the Delta issues.

III. REPORTS/UPDATES

A. WATERMASTER GENERAL LEGAL COUNSEL REPORT

1. Court Transition Process

Counsel Slater stated we received a letter from the presiding judge which is in response from a letter sent to the court regarding Watermaster offer to assist in the new judge selection process. The letter simply states thank you but no thank you; a new assignment will be made by the court. There will be a waiting period to see if there are any preemptory challenges on the judge that is chosen.

B. FINANCIAL REPORT1. Financial Changes

Ms. Rojo stated as a result in the change in the meetings normally there are five financial reports included in the meeting package and now there will be a month lag time for the cash disbursement report which is a listing of all the checks paid. That report is not in the package this month but will be back in the package starting next month.

2. Assessment Package Workshop

Ms. Rojo stated the Assessment Package Workshop was held on September 9, 2009 which went well. There was some feedback on some of the title headings which is an easy fix. The discussion did become focused on the Cumulative Unmet Replenishment Obligation (CURO). Ms. Rojo reviewed what CURO is and how it plays a role for the parties. Ms. Rojo stated the CURO will be the main focus at the upcoming Strategic Planning Conference next week.

C. CEO/STAFF REPORT1. Legislative Update

Mr. Manning stated the legislature did have a tremendous amount of work that was accomplished on the Delta Package in their legislative session. There was discussion to bring that legislation back into session to try and accomplish more on the Delta Package. Mr. Manning stated he will keep the parties apprised as the information becomes available. Mr. Manning stated AB 1366 regarding water softeners has passed is going to be sent to the governor's office this week for signature.

2. Recharge Update

Mr. Manning stated the most recent recharge update is available on the back table.

3. Watermaster Policy Manual

Mr. Manning stated Watermaster is in the process of developing a Policy Manual and noted this item has been mentioned and discussed at previous meetings. Mr. Manning noted the Appropriative Pool had put together an Ad-Hoc Committee regarding the manual. Mr. Manning stated Jeff Pierson from the Agricultural Pool was recently appointed to sit on that Ad-Hoc Committee and that appointment came two days after the committee met for the first time. After the Ad-Hoc Committee met the committee chair gave Watermaster staff some good direction and will be providing some suggested changes. A discussion regarding this item ensued.

4. Auction Update

Mr. Manning demonstrated the Chino Basin Watermaster web page which contains a separate water auction website. Mr. Manning reviewed the new water auction website in detail. Mr. Manning stated there is a team that is working on all elements of the water auction. A due diligence package and resource materials have been developed to assist possible bidders. A discussion on the progress of the water auction ensued.

IV. INFORMATION1. Newspaper Articles

No comment was made regarding this item.

V. BOARD MEMBER COMMENTS

No comment was made regarding this item.

VI. OTHER BUSINESS

Mr. Manning discussed the upcoming holiday schedule which will require meeting dates for November and December to be changed.

Mr. Manning stated the next IEUA Dry Year Yield meeting that was scheduled for October 15, 2009 has been changed to October 22, 2009 at 9:00 a.m.

VII. CONFIDENTIAL SESSION - POSSIBLE ACTION

Pursuant to the Advisory Committee Rules & Regulations, a Confidential Session may be held during the Advisory Committee meeting for the purpose of discussion and possible action.

No confidential session was called.

VIII. FUTURE MEETINGS

KENNETH R. MANNING
Chief Executive Officer

STAFF REPORT

DATE: October 22, 2009
TO: Watermaster Board Members
SUBJECT: Cash Disbursement Report

SUMMARY

Issue – Record of cash disbursements for the month of August 2009.

Recommendation – Staff recommends the Cash Disbursements for August 2009 be received and filed as presented.

Fiscal Impact – Funds disbursed were included in the FY 2009-2010 Watermaster Budget.

BACKGROUND

A monthly cash disbursement report is provided to keep all members apprised of Watermaster expenditures.

DISCUSSION

Total cash disbursements during the month of August 2009 were \$2,457,085.68. The most significant expenditures during the month were Marygold Mutual Water Company in the amount of \$1,003,000.00, Inland Empire Utilities Agency in the amount of \$684,570.51, and Wildermuth Environmental Inc. in the amount of \$476,288.70.

ACTIONS:

10-01-09 Appropriative Pool moved to approve unanimously
10-01-09 Non-Agricultural Pool moved to approve unanimously
10-08-09 Agricultural Pool moved to approve unanimously
10-15-09 Advisory Committee moved to approve unanimously
10-22-09 Watermaster Board

KENNETH R. MANNING
Chief Executive Officer

STAFF REPORT

DATE: October 22, 2009
TO: Watermaster Board Members
SUBJECT: FY 2009-2010 Assessment Package

RECOMMENDATION

Staff recommends approval of the Fiscal Year 2009-2010 Assessment Package as presented.

BACKGROUND

In March 2009, Watermaster, at the request of Appropriators, published a schedule of annual reporting deadlines, including those that relate to the Assessment Package. Per that schedule, production, land use conversion, assignment/voluntary agreement, and water transfer data were all due back to Watermaster by July. Watermaster compiled the data and on July 31, 2009, the members of the Overlying Non-Agricultural Pool and the Appropriative Pool were each sent a copy of their Water Activity Report that summarized their water activity for the previous year—including production, land use conversions, water transfers and voluntary agreements/assignments—and were each asked to verify the data gathered and summarized by Watermaster. Most of the approved and signed Water Activity Reports were received back by Watermaster by the August 14, 2009 deadline. (Watermaster followed-up with the overdue submittals, and all were eventually received.) All identified discrepancies in the reports were addressed and resolved.

Watermaster held an Assessment Package Workshop on September 9, 2009. The purpose of the workshop was to review the prior year reconciliation of production and transfers and to review the current year cash requirements pursuant to the adopted budget and the resulting impact on assessments. Discussion at the workshop covered the breakdown of how assessments are calculated, including adding administrative and OBMP budgeted costs. During the workshop, it was noted that the current Assessment Package does not address any of the issues regarding reassigning the MWD DYY losses, as approved during the August 2009 Board meeting. That will be addressed in a future Assessment Package. The Cumulative Unmet Replenishment Obligation (CURO) was also discussed at the workshop. The resulting increase attributed to the CURO from the 2007-2008 production year is included

in the current Assessment Package in the column titled "prior year adjustment". Although the budgeted costs went down this year, the Assessment Package identifies a decrease in assessable production by 16,174 AF resulting in assessments of \$44.02 for OBMP and \$7.19 for general administration, excluding recharge debt service and assessments for replenishment water. For production year 2008-2009, there is a replenishment obligation of 11,426 AF, in addition to the carry-over obligation of 9,527 AF from the previous year.

ACTIONS:

10-01-09 Appropriative Pool moved to approve FY 2009-2010 Assessment Package unanimously
10-01-09 Non-Agricultural Pool moved to approve FY 2009-2010 Assessment Package unanimously
10-08-09 Agricultural Pool moved to approve FY 2009-2010 Assessment Package unanimously
10-15-09 Advisory Committee moved to approve FY 2009-2010 Assessment Package unanimously
10-22-09 Watermaster Board

Assessment Package

- Assessment Package (AP) is a “DRAFT”
- Issues relating to DYY – MWD losses are NOT addressed
- Does address increase of CURO as a “Previous Year Adjustment”
- Workshop was how to read and understand the information in the AP

Assessment Package

- Watermaster is a budget driven organization
 - Assessments = Approved Budget/Production
 - Debt service = \$1,131,233 * %OSY
 - Replenishment = Overproduction by agency * \$380
- Fiscal Year July 1, 2008 – June 30, 2009
 - This AP generates the funds that will be used this fiscal year for expenses budgeted in this current year
 - Budget was approved in May, 2009

Assessment Package

- Overview of assumptions and changes
 - Recalculation of over-allocation of Ag Pool Rights
 - Transfer 10% of Non-Ag Pool OSY to predetermined Appropriate Pool members
 - No SAR inflow to offset desalter production
 - Desalter production offset by remaining 400k af of water approved with Peace II

<u>Budget</u>	<u>2009/2010</u>	<u>2008/2009</u>	<u>Difference</u>
Administrative	872,374	848,059	24,315
OBMP & Special Proj.	5,677,182	6,205,673	(528,491)
Less Offsets	<u>(339,950)</u>	<u>(149,000)</u>	<u>(190,950)</u>
Subtotal Budgeted Costs	6,209,606	6,904,732	(695,126)
<u>P/Y Assessable Production</u>	121,253	137,427	(16,174)
<u>Admin Cost per AF by Pool</u>	\$ 7	\$ 6	\$ 1
<u>OBMP Cost per AF by Pool</u>	\$44	\$44	\$ 0

(Rates above do not include Debt Service or Replenishment Water costs)

Assessment Year 2009-2010 (Production Year 2008-2009)

Pool 3 Assessment Package Notes

	Company	Account	Note
A	Desalter Authority	Local Storage	There is no loss assessed on the native basin water allocated to offset desalter production as a result of basin reoperation as approved in Peace II.
B	Metropolitan Water District	Local Storage	On August 27, 2009, the Watermaster Board authorized Watermaster to assign the uniform storage loss to the DYY account, and then redistribute the obligation to other stakeholders.

REPORT REFERENCE	NAME	DESCRIPTION
1A	AF Production	Total production and exchanges, excluding Desalter production. Copied from [2L].
1B	Appropriative Pool—AF/Admin	Production [1A] <times> per acre foot Admin fee.
1C	Appropriative Pool—AF/OBMP	Production [1A] <times> per acre foot OBMP fee.
1D	Ag Pool SY Reallocation—AF Total Reallocation	Reallocation of Ag Pool Safe Yield. Copied from [2F] and [6F].
1E	Ag Pool SY Reallocation—AF/Admin	Party Ag Pool reallocation [1D] <divided by> Total Ag Pool Reallocation [1D Total] <times> total dollar amount needed for Ag Pool administration.
1F	Ag Pool SY Reallocation—AF/OBMP	Party Ag Pool reallocation [1D] <divided by> Total Ag Pool Reallocation [1D Total] <times> total dollar amount needed for Ag Pool OBMP.
1G	Replenishment Assessments—AF/15%	For parties participating in the 85/15 Rule: Percentage of total 85/15 participant production <times> required credit amount.
1H	Replenishment Assessments—AF/85%	For parties participating in the 85/15 Rule: Total overproduced [2M] <times> 85% of the replenishment rate.
1I	Replenishment Assessments—AF/100%	For parties not participating in the 85/15 Rule: Total overproduced [2M] <times> 100% of the replenishment rate.
1J	85/15 Water Transaction Activity—15% Producer Credits	For parties participating in the 85/15 Rule: Credit amount equals 15% of the cost of the water purchased.
1K	85/15 Water Transaction Activity—15% Pro-rated Debits	For parties participating in the 85/15 Rule: Percentage of total 85/15 participant production <times> required credit amount.
1L	Pomona Credit	Debit amount to Pomona <times> -1 <times> percent share of operating safe yield [2A].
1M	Previous Year Adj	This number reflects the difference between the assessment amount reported in the last period Assessment Package and the adjusted assessment amount from a revised package, if necessary.
1N	ASSESSMENTS DUE—Total Production Based	Total fees assessed based on party production. [1B] + [1C] + [1E] + [1F] + [1G] + [1H] + [1I] + [1J] + [1K] + [1L] + [1M].
1O	ASSESSMENTS DUE—MZ1 Supplemental Water	Total AF required to purchase <times> AF price <times> percent share of operating safe yield [2A].
1P	ASSESSMENTS DUE—Recharge Debt Payment	Total recharge debt payment <times> percent share of operating safe yield [2A].
1Q	ASSESSMENTS DUE—Total Due	Total production based assessments [1N] + MZ1 Supplemental Water [1O] + Recharge Debt Payment [1P].

Assessment Package References and Definitions

REPORT REFERENCE	NAME	DESCRIPTION
2A	Percent of Safe Operating Yield	The Party's yearly percentage of operating safe yield as delineated in the judgment.
2B	Assigned Share of Operating Safe Yield	The Party's yearly volume of operating safe yield as delineated in the judgment.
2C	Carryover Beginning Balance	The beginning balance in each Annual Account. This number carries forward from the ending balance in the previous period Assessment Package.
2D	Prior Year Adjustments	This number reflects the adjusted production rights from a previous Assessment Package, in the event that corrections are needed.
2E	2% Carryover Storage Loss	Carryover beginning balance [2C] \times 0.02.
2F	Net Ag Pool Reallocation	Reallocation of Ag Pool Safe Yield. Copied from [6F]. The calculations that lead to this are made on Page 6.
2G	Water Transaction Activity	Water transactions. Copied from [5E]. The calculations that lead to this are made on Page 5.
2H	New Yield	New yield \times percent share of operating safe yield [2A].
2I	Annual Production Right	Current Year Production Rights. [2B] + [2C] + [2D] + [2E] + [2F] + [2G] + [2H].
2J	Actual Fiscal Year Production	Actual production from CBWM's production system (as verified by each party on their Water Activity Report).
2K	Storage and Recovery Program(s)	Total exchanges for the period (July 1- June 30) including MZ1 forbearance and DYY deliveries (as reported to CBWM by IEUA and TVMWD and as verified by each party on their Water Activity Report).
2L	Total Production and Exchanges	Actual production [2J] $+$ Storage and Recovery exchanges [2K]. Includes a sub note subtracting Desalter production.
2M	Net Over-Production—85/15%	For 85/15 rule participants: Production rights [2I] $-$ total production and exchanges [2L], equaling less than zero.
2N	Net Over-Production—100%	For non-85/15 rule participants: Production rights [2I] $-$ total production and exchanges [2L], equaling less than zero.
2O	Under Production Balances—Total Under-Produced	Production rights [2I] $-$ total production and exchanges [2L], equaling more than zero.
2P	Under Production Balances—Carryover: Next Year Begin Bal	Either total under-produced [2O] or share of operating safe yield [2B], whichever is less.
2Q	Under Production Balances—To Excess Carryover Account	Total under produced [2O] $-$ carryover to next year [2P].

Assessment Package References and Definitions

REPORT REFERENCE	NAME	DESCRIPTION
3A	Storage and Recovery Program(s)—Carryover Beginning Balance	The beginning balance in each S&R partner's account. This number carries forward from the ending balance in the previous period Assessment Package.
3B	Storage and Recovery Program(s)—2% Carryover Storage Loss	Carryover beginning balance [3A] \times 0.02.
3C	Storage and Recovery Program(s)—Storage Exchanges/Adjustments	Total exchanges with each S&R partner for the period, including MZ1 forbearance and DYY deliveries.
3D	Storage and Recovery Program(s)—Ending Balance	The current balance in each S&R partner's account. [3A] + [3B] + [3C].
3E	Excess Carry Over Account (ECO)—Carryover Beginning Balance	The beginning balance in the ECO account. This carries forward from the ending balance in the previous period Assessment Package.
3F	Excess Carry Over Account (ECO)—2% Carryover Storage Loss	ECO beginning balance [3E] \times 0.02.
3G	Excess Carry Over Account (ECO)—Transfers to (from)	Total of water transferred to the Annual Account. Desalter account includes 400,000 AF of SAR inflow based on Basin Re-operation as approved in Peace II documents.
3H	Excess Carry Over Account (ECO)—From Local Supplemental Storage	Total of water transfers from Local Supplemental Storage.
3I	Excess Carry Over Account (ECO)—From Under Production	Total of water transferred from the Annual Account due to under production.
3J	Excess Carry Over Account (ECO)—Ending Balance	The current balance in each ECO account. [3E] + [3F] + [3G] + [3H] + [3I].
3K	Local Supplemental Storage Account—Carryover Beginning Balance	The beginning balance in the Local Supplemental Storage account. This number carries forward from the ending balance in previous period Assessment Package.
3L	Local Supplemental Storage Account—2% Carryover Storage Loss	Local Supplemental Storage account beginning balance [3K] \times 0.02.
3M	Local Supplemental Storage Account—Transfers to (from)	General transfers to the Local Supplemental Storage account.
3N	Local Supplemental Storage Account—MZI 6,500 Eligible for Storage	Total MZI amount eligible for storage \times percent share of safe yield [2].
3O	Local Supplemental Storage Account—Transfer to Excess Carryover	Local Supplemental Storage water transferred to the ECO account.
3P	Local Supplemental Storage Account—Ending Balance	The current balance in each Local Supplemental Storage account. [3K] + [3L] + [3M] + [3N] + [3O].
3Q	Combined—Combined Storage Account Balance	The combined amount in all storage accounts [3D] + [3J] + [3P].

Assessment Package References and Definitions

REPORT REFERENCE	NAME	DESCRIPTION
4A	Water Transactions—Beginning Balance	The beginning balance in each Partner's account. This number carries forward from the ending balance in the previous period Assessment Package.
4B	Water Transactions—2% Loss	Beginning balance [4A] \times 0.02.
4C	Water Transactions—Current Recharged Recycled	Total recycled water recharges for each partner for the period.
4D	Water Transactions—Transfer to ECO Account	Total transfers to the Excess Carryover Account for each partner for the period.
4E	Water Transactions—Ending Balance	The current balance in each partner's account. [4A] + [4B] + [4C] + [4D].
4F	Reference—Production and Exchanges (RW Agencies Only)	For parties participating in the recycled water program, their current year production from [2L]. This reference information is used by IEUA for LRP Recharged Recycled Water Accounting.

REPORT REFERENCE	NAME	DESCRIPTION
5A	Water Transactions—Assigned Rights	Total of assignment transactions for this period.
5B	Water Transactions—General Transfer	Total of water transfers between parties for this period. Transfers in this column include the annual transfer of 10-percent of the Non-Ag OSY to the seven Appropriator parties, as stated in Peace II.
5C	Water Transactions—Transfers to (from)	Water transferred from ECO Account [3G], excluding Desalter transfer.
5D	Water Transactions—Total Water Transactions	Total water transactions. [5A] + [5B] + [5C].

REPORT REFERENCE	NAME	DESCRIPTION
6A	% Share of Operating Safe Yield	The Party's yearly percentage of operating safe yield as delineated in the judgment. Copied from [2A].
6B	Reallocation of Agricultural Pool Safe Yield—32,800 AF Early Transfer	The Party's percent share of operating safe yield [2A] multiplied by 32,800.
6C	Reallocation of Agricultural Pool Safe Yield—Land Use Conversions	Total land use conversions claimed (as verified by each party on their Water Activity Report).
6D	Reallocation of Agricultural Pool Safe Yield—Potential for Reallocation (AF)	Ag Pool early transfer [6B] $+$ land use conversions [6C].
6E	Reallocation of Agricultural Pool Safe Yield—Difference: Potential vs. Net	(Total Ag Pool Safe Yield $-$ total Ag Pool production $-$ Ag Pool early transfer [6A] $-$ land use conversions [6C]) \times party's percent of potential for reallocation [6D].
6F	Reallocation of Agricultural Pool Safe Yield—Net Ag Pool Reallocation	Net Ag Pool reallocation to each party. [6D] + [6E].

Officials: Water transfers won't increase

Updated: Thursday, September 24, 2009 10:04 AM

'Water is so scarce in California, when people have it they want to hang on to it'

By WES SANDER

Capital Press

When Don Mills caught wind of the largest known water transfer to have ever happened in Kings County, he didn't take it well.

A partner in a local farming operation had sold his share of state-allocated water to the Mojave Water Agency, which encompasses an area of growing urban development in the desert northeast of Los Angeles.

The sale was significant for its permanence as well as its size. It would ultimately transfer 14,000 acre feet annually, the amount increasing by increments over an 11-year period beginning in 2010. The reported sale amount: \$5,500 per acre foot.

It's the kind of transfer that happens every once in a while in California, and tends to strike fear among locals that water will keep flowing away from agriculture as urban jurisdictions pay prices farmers can't afford.

The Kings County Water Commission, of which Mills is a member, spent much of its August meeting discussing the transfer's implications. Mills said that he would like to halt the deal, were there a legal avenue for doing so. The fact that the landowner hails from the Bay Area seemed to make the situation all the worse.

"None of us like it, but it's the free market at work," said Mills, who manages the Kings County Water Agency, in an interview. "We're going to see more (big water sales). The economics are in place for more of it to happen."

But that perception isn't shared by observers and state officials. Despite ongoing swings in crop markets and California's difficulties with delivering water, transfers of this size are considered anomalies, occasional occurrences whose frequency likely won't increase by much.

More common are temporary transfers, often single-year sales from one landowner to another within the San Joaquin Valley. But even those don't happen as often as the state Department of Water Resources would like, and for similar reasons.

For one thing, users are protective of their water rights and contract allocations, says Teresa Geimer, who coordinates the state's drought water bank with the Department of Water Resources.

That prevents more transfers, event the short-term transfers the state is trying to encourage through its drought water bank, from happening, Geimer said.

"I've gotten calls from people out of state, and they're very confused why we don't have more (transfers)," Geimer said. "Water is so scarce in California, when people have it they want to hang on to it."

When California created its first drought water bank during the dry years of the early 1990s, it took plenty of coaxing to assure landowners that the transaction process would keep their water rights and allocations intact, Geimer says.

There are other speed bumps in the process -- environmental reviews, routine challenges from conservation groups and resistance from local jurisdictions fearing economic impacts.

"One of our biggest adversaries ... are the counties," said Wendy Martin, DWR's statewide drought coordinator, discussing water transactions before the state agriculture board in May. "Every portion of every transaction has had a fight associated with it. We have to stop fighting about this stuff and figure out what will work.

"Transfers are one of the ways that we can balance the water portfolio," Martin said. "We have to be more effective at it."

Ellen Hanak, director of research at the Public Policy Institute of California, says ag-to-urban water transfers will never expand enough to significantly alter the ratio of farm-to-urban usage. Agriculture uses about four-fifths of all water consumed by farm and urban users combined, says Hanak, who published a 2003 study on the economic impacts of water transfers.

"Based on the math, transfers are going to (remain) a marginal thing," she said.

Gary Sawyers, attorney for Dudley Ridge Water District in Kings County, agreed that although landowners will continue seeking solutions to water shortages, they're not likely to begin selling water in larger numbers.

Urban buyers are instead working to increase efficiency while developing alternate sources, like desalination technology, until the state overcomes its challenges in managing the Sacramento-San Joaquin Delta, Sawyers said.

"I think it's probably the case that there are not a lot of (urban) buyers out there because the water is unreliable," he said.

Meanwhile, plenty of farmers are looking to buy, Sawyers says, but the hesitation to part with water will likely keep much of it from moving.

In Kings County, talk has surfaced of turning the recent transfer into a local advantage.

As part of his effort to rearrange assets, the landowner intends to fallow the land to which the allocation was attached. The ground is considered marginal, with weak fertility and limited groundwater access. Now a plan is taking shape to encircle it in levees and create a local storage reservoir, said Don Mills.

Mills said his negative reaction changed after meeting the landowner, who was simply aiming to trade state-allocated water for a more reliable source, possibly groundwater pumped from land purchased elsewhere.

"The ultimate trigger that made him make this decision is the Delta issues and the fact that the water supply is not reliable," Mills said. "I wasn't real happy in the beginning, but after sitting with this fella and having him explain, I can't blame him."

Water to be auctioned by Chino Basin Watermaster

The auction is bound to raise the price. Putting water up for bid seems to be a first in California.

By Bettina Boxall

September 24, 2009

Need more water? If you've got \$30 million or so, you can bid for it at an auction this fall.

In what officials believe is a first for the state, a Southern California water agency is planning to auction off enough water to supply about 70,000 homes for a year.

Water sales are not uncommon in California, especially when supplies are tight, as they are in the current drought.

But putting water up for bid in an auction -- which is bound to drive up the price -- appears to be unprecedented in the state.

"Water in general has always been a very low-priced commodity, and I think the reality is, it's going to start catching up with other utilities. It's going to fluctuate with markets," said Ken Manning, chief executive of Chino Basin Watermaster, a quasi-public entity that manages the basin. "Whether that's right or wrong, I don't know. I just know where it's going."

The Chino Basin, most of which lies in western San Bernardino County, is one of the largest groundwater basins in Southern California.

Pumping rights were settled in a 1978 state court judgment that divvied them up among local farms, industry and water agencies.

Some of the businesses, including a Sunkist packing plant, have since closed operations and don't need all of their supplies.

So in a court-approved deal, the companies are selling the unused water to Chino Basin Watermaster.

The water agency, in turn, intends to auction the supplies at a much higher price and use the proceeds to pay for new facilities to replenish the aquifer.

The town of Prescott Valley, Ariz., helped blaze the water-bidding trail two years ago when it auctioned off permanent rights to a small block of its water for about \$67 million.

The buyer was a New York investment firm that is marketing the water options to developers, who will need the supplies to get approval for any new residential projects in the area.

"You have to get creative," Assistant Town Atty. Colleen Auer said. "We knew if we sat in a typical backroom deal with the development community, there was no guarantee we would get the best price."

Prescott Valley, which was experiencing explosive growth until the real estate bust, is planning to spend the money on new water infrastructure.

Michael Hanemann, a resource economics professor at UC Berkeley, called water auctions "an idea that makes sense" but wasn't sure whether they would take off as a trend.

Water "is a limited resource and we need to be aware of that. Putting a price on that is good. It makes the real value of the water transparent," he said. "Raising the price, while unpleasant, is telling us something we need to know."

Manning said that three categories of potential bidders are surfacing: local water agencies, Southland developers who under state law have to demonstrate there is enough water to supply new projects, and private investment groups that deal in natural resources.

Chino Basin Watermaster will offer a total of 36,000 acre-feet, sold in four blocks, in the online auction to be held Nov. 4. An acre-foot is roughly a year's supply for two Southern California households.

Manning anticipates that the water will fetch \$800 to \$1,000 an acre-foot, or roughly \$30 million. Underground storage in the basin will cost another \$30 million.

"We think we're offering a reliable product. It's in the ground. So it will demand a higher price," he said.

Federal officials estimate that about 600,000 acre-feet -- slightly less than Los Angeles residents, combined, use in a year -- will change hands in California water sales in 2009 thanks to a supply shortage caused by the statewide drought and environmental restrictions on pumping water from Northern California.

The sellers are typically agricultural irrigation districts that leave some of their land unplanted for a year and negotiate short-term, individual deals with other farm districts or municipal water agencies that need water.

Supplies sold through the state's Drought Water Bank this year are going for \$275 an acre-foot plus conveyance costs, which can amount to an additional \$150 or more per acre-foot, depending on how far the water is piped.

Under following agreements with the Palo Verde Irrigation District in southeastern California, the Metropolitan Water District of Southern California is paying roughly \$210 and \$410 an acre-foot, including transport, for two separate large blocks of water.

The higher rate is for drought supplies.

When the Mojave Water Agency looked for more long-term supplies for Victorville and the other high

desert towns it serves, it pursued a different tack.

It is buying a portion of a state water contract from a Kings County farm enterprise for \$73.5 million.

The deal, which is awaiting state approval, would entitle the Mojave district to an additional 14,000 acre-feet a year.

Kirby Brill, the agency's general manager, said it took a while to find a state contractor willing to give up water not just for a season or two, but forever.

"Everybody's just hanging on to what they have to sustain their operation. We're never going to have a real loose, EBay type of water market in California," he said. "There are so many hurdles."

Editorial: Governor turns up the water pressure

Pending bills held hostage to a deal on fixing state's contrived water shortage.

An Orange County Register editorial

There may be a can't-lose situation brewing in Sacramento, where Gov. Arnold Schwarzenegger is holding 700-plus bills hostage to pressure legislators into agreeing on a solution to the state's water distribution problem.

It's only fitting that political arm-twisting be used to solve California's manufactured water shortage, itself the result of competing political interests. As we note in [our accompanying editorial](#) calling for restoration of water flow to San Joaquin Valley farmers, the state's water problems can be traced back to politics, not the climate, not the drought.

Even amid successive years of drought, California has more than enough water to meet its needs. The problem lies in how that water is distributed. The governor's threatened veto tacitly acknowledges that reality. Mr. Schwarzenegger isn't threatening to turn away rain clouds unless there's a water agreement. He's threatening to reject legislation.

The bottom line is competing interests battling for decades over life-sustaining, crop-nourishing, environment-nurturing water have refused to budge in negotiations. Gov. Schwarzenegger realizes these intractable interests may never be dislodged – unless they have something to lose.

There's little the political powers that be value more than the fruits of their power, in this case 700-plus individual bills, each ingratiating their authors and legislative supporters with constituencies who stand to benefit from the new laws.

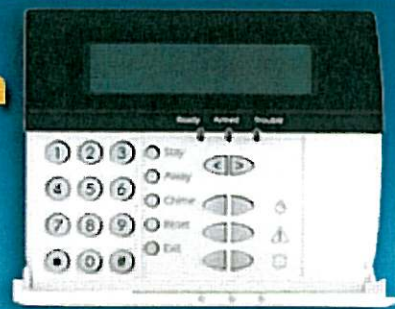

The governor threatens to kill these legislative payoffs unless lawmakers resolve their differences over water. That would benefit the entire state, not merely San Joaquin Valley farmers. We say, "Hold your ground, governor." Even if you don't get the water flowing, killing 700-plus new laws isn't a bad week's work, either.

Editorial: Growing food takes water

Government has put smelt above farmers.

An Orange County Register editorial

Finally acknowledging that there is a significant government-created crisis in the San Joaquin Valley, the Interior Department convened a public hearing Sept. 30, and Sen. Dianne Feinstein has announced she has asked her staff to begin assembling a major piece of legislation to address the water crisis facing the Sacramento-San Joaquin River Delta. Interior Secretary Ken Salazar has issued a "memorandum of understanding" that will keep representatives from six federal agencies talking to various interest groups in California.

The problem is that it will take months to make such decisions and years for results to be apparent. The crisis is immediate for San Joaquin Valley farmers in the agricultural breadbasket for California and much of the nation. While the search for long-range

solutions is worthy, in the short run the best and highest-impact option is to reverse a questionable decision to cut off irrigation water to Central Valley farmers.

The decision to cut off water to farmers resulted from a decision by the U.S. Fish and Wildlife service that the delta smelt, a three-and-a-half-inch-long minnow, was threatened, as defined by the Endangered Species Act. That announcement led to lawsuits by environmental groups arguing that sending water to farmers disrupted the fish's fall spawning season. In 2007, U.S. District Judge Oliver Wanger agreed and ordered the 6 million-acre-feet of water normally sent to farmers to be cut by a third.

The result has been agricultural devastation. A reader who recently drove home from Sacramento told us of miles and miles of brown fields, of groves of fruit and nut trees dying. A UC Davis study estimated farm revenue losses of \$482 million to \$647 million a year. To be sure, California's water troubles are driven by a number of factors, but the smelt ruling greatly exacerbated the problem.

Of course, it is not just farmers who are affected. Farm workers find themselves jobless, supply stores have to lay off workers or go out of business, real estate prices are plummeting, grocery stores, restaurants and all manner of businesses are seeing hard

times of Dust Bowl proportions.
"Communities in my district are facing unemployment of 30 percent, 34 percent, 38 percent and, mind you, those are Depression-like numbers," Democratic Rep. Jim Costa of Hanford told the Interior Department hearing.

It might well make sense to study and refurbish the Delta, whose infrastructure of canals and levees is aging and, in some cases, crumbling. The best thing to do now, however, is to reverse the decision on water. That might or might not harm the delta smelt – the science is far from settled. But continuing to skew policy to favor fish over people will devastate California's heartland.

MWD

Money spigot to drain consumers

Considering all the talk about fat pensions threatening to bankrupt government entities, we were intrigued to hear that the giant Metropolitan Water District was planning to fatten its employee pensions. What's more, we're supposed to believe the plan will cost consumers less, not more.

Pardon us if we have a few doubts about exactly who is getting hosed. The inflated pension obligations would come at the same time the MWD is planning a 30 percent increase in water rates.

Still, we want to be fair to the MWD. If all goes as planned, this deal would cut costs, a little.

Here are some details. The MWD, which imports water for millions of consumers throughout Southern California, has negotiated an agreement with its six unions that would give employees a 25 percent increase in pension benefits and a 23 percent increase in wages over the next five years. The cost-cutting provision is that employees would pay 8 percent of their salaries toward the cost of the pensions.

But do you see the problem? The pension increase gets locked into place for life, but the employees' commitment doesn't. If the next labor agreement erased employees' pension contributions, the pension increase would cost many millions, and ratepayers would be the only ones on the hook.

How likely are ratepayers to end up losers? Look around you. Many government employee unions have "negotiated" deals that excuse employees from having to contribute to pension costs totally, or nearly totally, supposedly instead of wage increases (yet their wages keep going up, and the splendidiferous pensions become the taxpayers' problem).

The proposed MWD pension increase would allow employees to retire at age 55, a decade before the traditional retirement age, with up to 75 percent of their salaries, compared to zero for most taxpayers who work in the private sector.

We put "negotiated" in quotation marks because nobody at the negotiating table represents taxpayers or ratepayers. People on the management side will be entitled to the same fat pension rates, only with bigger monthly checks.

What's worse is that the pension increases are retroactive, in the sense that employees who are ready to retire under the existing terms suddenly find even more money pouring in, for the rest of their lives.

The MWD board of directors was ready to approve the new contract last month, then put things off because of a public outcry, stirred by news coverage and righteous editorials published by the Orange County Register. But the issue hasn't gone away.

You won't get a chance to vote on this giveaway, but you certainly can express your opinion. Write a letter to the editor or better yet, contact the MWD at (213) 217-6000 or www.mwdh2o.com.

It's your money.
