STAFF REPORT

DATE: October 20, 2016
TO: Advisory Committee Members
SUBJECT: VISA Check Detail Report - Financial Report B2 (August 31, 2016)

SUMMARY

Issue: Record of VISA credit card payment disbursed for the month of August 31, 2016.

Recommendation: Receive and file VISA Check Detail Report for August 31, 2016 as presented.

Financial Impact: Funds disbursed were included in the FY 2016/17 "Amended" Watermaster Budget.

Future Consideration

Advisory Committee: October 20, 2016; Receive and File

Watermaster Board: October 27, 2016; Receive and File (Normal Course of Business)

ACTIONS:

October 13, 2016 – Appropriative Pool – Unanimously approved

October 13, 2016 – Non-Agricultural Pool – Moved unanimously to receive and file, without approval

October 13, 2016 – Agricultural Pool – Unanimously approved

October 20, 2016 – Advisory Committee –

October 27, 2016 – Watermaster Board –

BACKGROUND

A monthly VISA Check Detail report is provided to keep all members apprised of Watermaster expenditures charged against the General Manager and Chief Financial Officer's Bank of America VISA card.

DISCUSSION

The total cash disbursement during the month of August 2016 was \$2,391.42. The payment was processed by check number 19624 dated August 24, 2016. The monthly charges for August 2016 of \$2,391.42 were for routine and customary expenditures and properly documented with receipts.

STAFF REPORT

DATE: October 20, 2016
TO: Advisory Committee Members
SUBJECT: Treasurer's Report of Financial Affairs for the Period July 1, 2016 through August 31, 2016 - Financial Report B4 (August 31, 2016)

SUMMARY

Issue: Record of increases or decreases in the cash position, assets and liabilities of Watermaster for the Period of July 1, 2016 through August 31, 2016.

Recommendation: Receive and file Treasurer's Report of Financial Affairs for the Period July 1, 2016 through August 31, 2016 as presented.

Financial Impact: Funds disbursed were included in the FY 2016/17 "Amended" Watermaster Budget.

Future Consideration

Advisory Committee: October 20, 2016; Receive and File

Watermaster Board: October 27, 2016; Receive and File (Normal Course of Business)

ACTIONS:

October 13, 2016 – Appropriative Pool – Unanimously approved

October 13, 2016 – Non-Agricultural Pool – Moved unanimously to receive and file, without approval

October 13, 2016 – Agricultural Pool – Unanimously approved

October 20, 2016 – Advisory Committee –

October 27, 2016 – Watermaster Board –

BACKGROUND

A Treasurer's Report of Financial Affairs for the Period July 1, 2016 through August 31, 2016 is provided to keep all members apprised of the total cash in banks (Bank of America, LAIF, and CalTRUST) and on hand at the Watermaster office (petty cash) at the end of the period stated. The Treasurer's Report details the change (increase or decrease) in the overall cash position of Watermaster, as well as the changes (increase or decrease) to the assets and liabilities section of the balance sheet. The report also provides a detailed listing of all deposits and/or withdrawals in the California State Treasurer's Local Agency Investment Fund (LAIF) and/or CalTRUST, the most current effective yield as of the last quarter, and the ending balance in LAIF as of the reporting date.

DISCUSSION

The Treasurer's Report of Financial Affairs has been created from various financial reports and statements created from Intuit QuickBooks Enterprise Solutions 17.0, the Watermaster accounting system. The Treasurer's Report provided, balances to the supporting documentation in the Watermaster accounting system, as well as the supporting bank statements.

DATE: October 20, 2016
TO: Advisory Committee Members
SUBJECT: Budget vs. Actual Report for the Period July 1, 2016 through August 31, 2016 -
Financial Report B5 (August 31, 2016)

SUMMARY

Issue: Record of revenues and expenses of Watermaster for the Period of July 1, 2016 through August 31, 2016.

Recommendation: Receive and file Budget vs. Actual Report for the Period July 1, 2016 through August 31, 2016 as presented.

Financial Impact: Funds disbursed were included in the FY 2016/17 "Amended" Watermaster Budget.

Future Consideration

Advisory Committee: October 20, 2016; Receive and File

Watermaster Board: October 27, 2016; Receive and File (Normal Course of Business)

ACTIONS:

October 13, 2016 – Appropriative Pool – Unanimously approved

October 13, 2016 – Non-Agricultural Pool – Moved unanimously to receive and file, without approval

October 13, 2016 – Agricultural Pool – Unanimously approved

October 20, 2016 – Advisory Committee –

October 27, 2016 – Watermaster Board –

BACKGROUND

A Budget vs. Actual Report for the period July 1, 2016 through August 31, 2016 is provided to keep all members apprised of the total revenues and expenses for the current fiscal year. The expense section is categorized into four distinct sections. Those sections are: General and Administrative Expenses; Optimum Basin Management Program Expenses; Project Expenses; and Other Income/Expenses. The Budget vs. Actual report has been created from Intuit QuickBooks Enterprise Solutions 17.0, the Watermaster accounting system. The Budget vs. Actual report provided, balances to the supporting documentation in the Watermaster accounting system, as well as the supporting bank statements.

DISCUSSION

CURRENT MONTH – AUGUST 2016

Year-To-Date (YTD) for the two months ending August 31, 2016, all but one category was at or below the projected budget. The category over budget was the Watermaster Legal Services expenses (6070's) which was over budget by \$33,612 or 80.8% as a result of ongoing Personnel Matters regarding the CalPERS Administrative Hearing for Mr. Alvarez. The Watermaster budget for FY 2016/17 is divided into 12-monthly amounts and allocated accordingly for almost all budget line items. As the fiscal year progresses, this category might level out over time and be within the budget levels. Overall, the Watermaster (YTD) Actual Expenses were \$2,833,414 or 62.3% below the (YTD) Budgeted Expenses of \$4,547,854.

The Amended Budget for FY 2016/17 is \$13,123,806.45 which includes \$2,630,337.45 for the prior years "Carry Over" funding. The Original Approved budget for FY 2016/17 of \$10,493,469 was approved by the Watermaster Board on May 26, 2016 ($\$10,493,469 + \$2,630,337.45 = \$13,123,806.45$).

PREVIOUSLY REPORTED ACTIONS (Descending Order)

July 2016:

During the month of July 2016, the "Carry Over" funding was calculated. The Total "Carry Over" funding amount of \$2,630,337.45 has been posted to the general ledger accounts. The total amount of \$2,630,337.45 consisted of \$2,264,522.96 from Capital Improvement Projects, \$326,577 from Engineering Services, \$29,285.99 from Chino Hills ASR, and \$9,951.50 from the Administrative section for the ongoing completion of the 37th Annual Report for Fiscal Year 2013/14 and the 38th Annual Report for Fiscal Year 2014/15. More detailed information is provided regarding this issue under the "Carry Over" Funding section.

SALARIES EXPENSE

CURRENT MONTH – AUGUST 2016

As of August 31, 2016, the total (YTD) Watermaster salary expenses were \$10,805 or 3.9% below the (YTD) budgeted amount of \$279,095. The overall staffing budget was developed with a staffing level of ten Full-Time Equivalent (FTE's), and staffing is currently at eight Full-Time Equivalent (FTE's).

Watermaster is currently in the process of filling one vacant position. Watermaster started the recruitment process for the Water Resources Professional position on March 16, 2016. After several candidates completed the interview process during the month of May, it was determined that a new recruitment process should begin. An updated recruitment advertisement was submitted to Brown & Caldwell and Water District Jobs on June 27, 2016. A group of new candidates were selected and scheduled for interviews between August 22, 2016 and September 1, 2016. Because Watermaster is a small organization, it is very important to ensure that the new team member not only has the right skills and abilities to succeed, it is also critical to ensure the employee has the right personality, cultural fit, and understands the challenges of working within a small organization. While some of the candidates had the experience and qualifications for the job description, the culture and personality fit was not a good match

for Watermaster. As a result, the recruitment advertisement was resubmitted to Brown & Caldwell and Water District Jobs on September 19, 2016. Watermaster is reviewing all resumes as they are received for consideration. It is anticipated that the recruitment process could take an additional 45-60 days to complete the selection process, background verification, and hire the Water Resources professional.

Watermaster utilizes an in-house database time and attendance system to track and record staff's actual hours worked and records those hours to a specific project or activity. This time and attendance database of captured staff hours and activities is the basis for the bi-weekly payrolls which are processed using an external payroll processing service. Watermaster staff can record time to a large number of activities but the five most used categories are as follows (1) General Administrative activities; (2) Paid Leaves of vacation, sick or holiday; (3) Pools, Advisory or Board Meeting attendance; (4) OBMP activities; and (5) OBMP Implementation Program Elements 1 through 9 activities.

When the FY 2016/17 budget was developed, basic assumptions were used in allocating how staff's time would be spent and on which of the projects or activities. The staffing dollars were then allocated into those specific areas and budgeted on a 1/12 monthly budget. When actual staffing activities vary from the budgeted assumptions, a positive or negative variance can be created. Currently, the allocations are tracking within budget.

The table summarizes the Year-To-Date (YTD) Actual Watermaster salary costs compared to the Year-To-Date (YTD) Budget as of August 31, 2016. Please be advised that the "\$ Over Budget" and the "% of Budget" columns are a comparison of the (YTD) Actual to the (YTD) Budget, not the 12-month Annual Budget. The 12-month Annual Budget column is presented only to provide the data in a full and complete format. The following details are provided:

PREVIOUSLY REPORTED ACTIONS (Descending Order)

July 2016:

Watermaster is currently in the process of filling one vacant position. Watermaster started the recruitment process for the Water Resources Professional position on March 16, 2016. After several candidates completed the interview process during the month of May, it was determined that a new recruitment process should begin. An updated recruitment advertisement was submitted to Brown & Caldwell and Water District Jobs on June 27, 2016. A group of new candidates have been selected and scheduled for interviews between August 22, 2016 and September 1, 2016. It is anticipated that the recruitment process could take an additional 30-45 days to complete the selection process, background verification, and hire the Water Resources professional.

LEGAL SERVICES

BROWNSTEIN HYATT FARBER SCHRECK EXPENSES

CURRENT MONTH – AUGUST 2016

As of August 31, 2016, the total (YTD) Watermaster Legal Services expenses (consolidating the three categories of Watermaster Administrative Legal Services, Pool/Advisory/Board Meeting legal expenses, and OBMP legal expenses) were \$98 or 0.06% below the (YTD) budgeted amount of \$156,282.

The Watermaster Legal Services budget was developed jointly by the Watermaster staff and Brownstein Hyatt Farber Schreck staff with specific assumptions regarding the tasks and legal activities that would occur during FY 2016/17. The total legal services budget was developed by multiplying the number of hours that would be required to complete the specific tasks by the hourly rate. The "Approved" budget amount was adopted for the amount of \$871,426.

WATERMASTER ADMINISTRATIVE LEGAL SERVICES:

Overall, the Watermaster Administrative Legal Services expense (6070's), as of August 31, 2016, was \$33,612 or 80.8% above the budgeted amount of \$41,614. The specific items within the Administrative Legal Services expenses (6070's) which were under budget were the expenses for Court Coordination (6071) under budget by \$5,428 or 79.5%; Annotated Judgment (6072) under budget by \$5,019 or 100.0%; Interagency Issues (6074) under budget by \$5,100 or 100.0%; and the Party Status Maintenance (6077) under budget by \$4,780 or 100.0%. The specific items within the Administrative Legal Services expenses (6070's) which were over budget were the Personnel Matters (6073) over budget by \$33,276 or 237.7% as a direct result of ongoing legal activities related to the administrative hearing with CalPERS regarding the Alvarez issue; and the Miscellaneous Category expenses (6078) over budget by \$20,663 or 350.8%.

Personnel Matters: As reported during the previous monthly meetings, Watermaster's legal counsel filed an appeal with CalPERS regarding CalPERS original determination (from February 2013) which rejected the base salary of the former CEO, Desi Alvarez, with regards to his retirement pension benefit. There have been several filings of appeal and we are awaiting CalPERS determination. On December 9, 2013 CalPERS notified the attorneys of record that the CalPERS Legal Office received the case on November 22, 2013 and we would be notified when the case has been assigned to an attorney who will represent CalPERS regarding the appeal. On February 27, 2014 the case was assigned to Wesley E. Kennedy, Senior Staff Attorney for CalPERS. On July 17, 2014 a document request from CalPERS was received by Watermaster related to the pending case. On August 22, 2014 the specific documents were provided to CalPERS. On September 9, 2014 Watermaster received the Notice of Hearing from CalPERS and the hearing has been scheduled for March 11-13, 2015 at the Glendale CalPERS Regional office. On October 1, 2014 Watermaster received from CalPERS a discovery request for Case No. 2013-1113. On December 31, 2014 Brownstein Hyatt Farber Schreck provided the information to Mr. Kennedy of CalPERS as requested on October 1, 2014. On January 16, 2015 a Prehearing conference along with a Settlement conference was conducted in Los Angeles. On March 2, 2015 a Motion to Continue was granted and the new Administrative Hearing (OAH Case No. 2014080757) was scheduled for November 16-18, 2015 at the Glendale CalPERS Regional Office. On September 28, 2015 the attorney for Mr.

Alvarez (Mr. Jensen), at the suggestion of Mr. Kennedy, requested a short continuance of the OAH hearing because CalPERS has scheduled a full Board hearing on the claims of one of Mr. Jensen's clients for October 13, 2016 which is right in the middle of the three-day hearing scheduled for Mr. Alvarez's case. On October 9, 2015, an Order Granting Continuance; Notice of New Hearing Dates was provided by the State of California, Department of General Services, Office of Administrative Hearings. The administrative hearing was rescheduled for January 4-6, 2016 at the Glendale CalPERS Regional Office. On October 14, 2015 a Notice of Case Reassignment was received from the CalPERS providing notice that OAH Case No. 2014080757 has been reassigned from attorney Wesley Kennedy to Preet Kaur, Staff Attorney. On November 20, 2015, a Request for Continuance was issued from CalPERS to reschedule the hearing to either the period of April 4 through April 6, 2016 or April 11 through April 15, 2016. On December 11, 2015, an Order Granting Continuance; Notice of New Hearing Dates was issued from the State of California, Department of General Services, Office of Administrative Hearings to reschedule the hearing to April 11-13, 2016. The Administrative Hearing was held on April 11-13, 2016 at the Glendale CalPERS Regional Office. A ruling was scheduled for issuance by the Administrative Judge in July 2016. On June 9, 2016 a request by the CalPERS attorney to extend the deadlines for filing the opening and response briefs was submitted to the Administrative Law Judge. On June 13, 2016 the request was granted and the order now states the opening briefs shall be filed and served no later than July 11, 2016. The response briefs were filed and served no later than August 8, 2016. On September 7, 2016 the Administrative Law Judge issued his proposed decision. The proposed decision by Judge Sawyer is as follows:

1. Concluded that Mr. Alvarez's Watermaster salary did not meet the requirements of a "publicly available pay schedule"
2. Concluded that Mr. Alvarez was employed and should receive service credit for his full year at Watermaster

The proposed decision is not effective unless adopted by the CalPERS Board of Administration and consideration of this decision is currently calendared for the Board's November 16, 2016 meeting. Although there is no opportunity for oral argument at that meeting, each party may submit up to a 6-page brief by November 4, 2016.

WATERMASTER POOLS, ADVISORY AND BOARD LEGAL SERVICES:

The Pools, Advisory Committee and the Board meeting legal expenses from BHFS are captured by month within the accounts (6275, 6375, 8375, 8475 and 8575). Overall, this category of legal expenses as of August 31, 2016 was \$10,028 or 28.8% below the budgeted amount of \$34,768. Normal Brownstein Hyatt Farber Schreck meeting attendance during any given month includes attendance at all three pool meetings, one Advisory Committee meeting and one Board meeting.

OBMP LEGAL SERVICES:

The OBMP legal expenses (accounts 6907.31 through 6907.90) were below the budget for the month. As of August 31, 2016 the category of OBMP legal expenses were \$23,682 or 29.6% below the budgeted amount of \$79,900. The majority of expenses within this OBMP category were under budget (YTD), however, the Santa Ana River Water Rights legal expenses (6907.34) were over budget by \$1,265 or 30.0%; the Santa Ana River Habitat legal expenses (6907.36) were over budget by \$620 or 100.0%; the Prado Basin Habitat Sustainability legal expenses (6907.41) were over budget by \$9,044 or 378.4%; and the Safe Yield Redetermination and Reset legal expenses (6907.42) were over budget by \$7,040 or 61.6%.

The table listed below summarizes the Brownstein Hyatt Farber Schreck (BHFS) expenses as of August 31, 2016 compared to the Year-To-Date (YTD) budget. Please be advised that the "\$ Over Budget" and the "% of Budget" columns are a comparison of the (YTD) Actual to the (YTD) Budget, not the 12-month Annual Budget. The 12-month Annual Budget column is presented only to provide the data in a full and complete format. The following details are provided:

Note 1: The types of legal activities that have been charged against the "Miscellaneous" legal category account 6078 are as follows: (1) Correspondence and discussions with Watermaster staff regarding current issues/topics; (2) Correspondence with Watermaster staff regarding special projects (assessment package, replenishment obligations, annual report, audit report, business plan, etc.); (3) Brownstein's status review of ongoing Watermaster projects and issues; (4) Brownstein's update of the outstanding issues list; (5) Coordination of ongoing Watermaster projects; (6) Review of draft documents; (7) Review transfer documents; (8) Ground-Level Monitoring Committee reports/meetings; (9) Review process and criteria for SGMA reporting; (10) Review current California issued drought regulations; (11) Review and comment on Waters of the United States rule making; (12) Review and draft documents for basin boundary regulations; (13) September 13, 2016 Workshop on Watermaster committees and Board roles; (14) Chino Basin water bank discussions; and (15) Miscellaneous legal research on current and pending issues.

OBMP ENGINEERING SERVICES AND LEGAL COSTS

CURRENT MONTH – AUGUST 2016

Reviewing in total the OBMP Engineering Services and Legal Costs (consolidating the four categories of OBMP Watermaster Staff and SAWPA, OBMP Engineering Services, OBMP Legal Costs, and OBMP Other Expenses) for the two months ending August 31, 2016, the actual expenses of \$266,757 were below the budgeted amount of \$287,121 by \$20,364 or 7.1%. For a detailed discussion, the following is provided.

For August 31, 2016, the accounts 6901-6903 (Optimum Basin Mgmt Program) section was above the Year-To-Date (YTD) budget by \$3,060 or 13.9%. Watermaster utilizes an in-house database time and attendance system to record and document staff's actual hours worked and also allocates those hours to a specific project or activity. Watermaster staff time could be charged to Administrative, OBMP, or Implementation Project categories. Recently, Watermaster staff spent less time on specific OBMP related areas and more time on administrative related tasks. As a result, Watermaster staff allocated less actual

time to the OBMP project as budgeted, which resulted in an under budget variance of \$1,855 or 21.7%. The remaining expense was the Santa Ana Watershed Project Authority (SAWPA) FY 2016/17 Basin Monitoring Program Task Force Contribution which was budgeted at \$13,500 but actual expenses were billed at \$18,415 which was above the budget by \$4,915 or 36.4% as of August 31, 2016.

For August 31, 2016, the accounts 6906 (Optimum Basin Mgmt Program Engineering Services) section was above the Year-To-Date (YTD) budget by \$232 or 0.13%. For FY 2016/17, the OBMP-Safe Yield Redetermination and Reset expenses (6906.73) did not have a budget amount authorized and for the month of August, there were no expenses charged to the OBMP-Safe Yield Redetermination and Reset account. The majority of expenses within this OBMP category were under budget (YTD), however, the accounts which were over budget were as follows: the Water Rights Compliance Reporting Engineering Services expenses (6906.22) which were over budget by \$5,283 or 125.2%; the Compliance-SB88 and SWRCB Engineering Services expenses (6906.24) which were over budget by \$17,694 or 141.6%; the OBMP-Pool, Advisory, Board Meeting Engineering Services expenses (6906.31) which were over budget by \$13,534 or 84.5%; the OBMP-Other General Meetings Engineering Services expenses (6906.32) which were over budget by \$1,129 or 18.8%; the OBMP-Data Requests-CBWM Staff Engineering Services expenses (6906.71) which were over budget by \$42,327 or 278.5%; and the Preparation of the 38th/39th Annual Reports which were over budget by \$6,835 or 68.7%.

Within the category 6907 (Optimum Basin Mgmt Program Legal Fees) are the remaining Brownstein Hyatt Farber Schreck (BHFS) Watermaster's legal expenses. Within the legal expense category, some individual line item activities were above the budget by \$17,969 while some other line item activities were below the budget by \$41,651. Above the budget line items were the Santa Ana River Water Rights expenses of \$1,265; the Santa Ana River Habitat expenses of \$620; the Prado Basin Habitat Sustainability expenses of \$9,044; and the Safe Yield Redetermination and Reset expenses of \$7,040. The individual legal projects/activities that were below budget for the Year-To-Date (YTD) period were the Archibald South Plume of \$4,080; the Chino Airport Plume of \$4,080; the Desalter/Hydraulic Control of \$4,780; the Regional Water Quality Control Board of \$2,390; the Recharge Master Plan of \$4,099; Storage Agreements of \$17,150; the SGMA Compliance of \$152; and the WM Unanticipated legal expenses of \$4,920. For the two months ended August 31, 2016, the overall cumulative (YTD) budget was \$79,900 and the actual (BHFS) legal expenses totaled \$56,218 which resulted in an under budget variance of \$23,682 or 29.6%.

The OBMP Other Expenses (6909's) were above the budget for the month. These expenses are typically conference calls, meeting expenses, supplies, annual inspection fees, and other miscellaneous type expenses. As of August 31, 2016 this category of expenses was \$25 or 1.1% above the budgeted amount of \$2,250.

The WEI Support for IEUA expenses are categorized within the category (6910's). The individual general ledger accounts are as follows: IRP Groundwater Modeling-WEI expenses (6910.10); As Needed Support for Obtaining Grant Funding of RMPU Projects expenses (6910.11); Preparation of a Compliance Demonstration for Stormwater Recharge expenses (6910.12); Ground Water Velocity Field for the San Sevaine Improvement Project expenses (6910.13); Truing-Up the 2013 RMPU Estimates expenses (6910.14); and RMPU-MPI Analysis expenses (6910.20). These expenses are billed directly to IEUA on the following month once the payment has been issued to Wildermuth Environmental, Inc. per the agreement. As of August 31, 2016 this category of expenses was fully invoiced in the amount of \$56,195.38 to IEUA.

Overall, the Optimum Basin Management Program (OBMP) category was \$266,757 compared to a (YTD) budget of \$287,121 for an under budget of \$20,364 or 7.0% as of August 31, 2016.

The table listed below summarizes the Optimum Basin Management Program (OBMP) expenses as of August 31, 2016 compared to the Year-To-Date (YTD) budget. Please be advised that the "\$ Over Budget" and the "% of Budget" columns are a comparison of the (YTD) Actual to the (YTD) Budget, not the 12-month Annual Budget. The 12-month Annual Budget column is presented only to provide the data in a full and complete format. The following details are provided:

ENGINEERING SERVICES - OBMP IMPLEMENTATION PROJECTS COSTS
WILDERMUTH ENVIRONMENTAL, INC.

CURRENT MONTH – AUGUST 2016

As of August 31, 2016, the total (YTD) Engineering Services expenses were \$393,372 or 71.8% below the (YTD) budget amount of \$547,901. The OBMP Implementation Projects (consolidated accounts 7100's – 7700's) were all under budget as of August 31, 2016.

Wildermuth Environmental, Inc. provides Watermaster an Estimated Cost at Completion (ECAC) report each quarter. The purpose of this ECAC report is to update Watermaster on whether or not the Engineering Services budget will be above or below budget at the end of the fiscal year. If the Engineering Services budget is expected to be above budget at fiscal year-end, a Budget Amendment or Budget Transfer Form would need to be approved to ensure funding. The first quarter ECAC report (for the months July 2016-September 2016) is scheduled to be produced by Wildermuth Environmental, Inc. and distributed to Watermaster during the month of October 2016.

The table listed below summarized the Year-To-Date (YTD) Actual Wildermuth Environmental, Inc., (WEI) and other Engineering costs compared to the Year-To-Date (YTD) Budget as of August 31, 2016. Please be advised that the "\$ Over Budget" and the "% of Budget" columns are a comparison of the (YTD) Actual to the (YTD) Budget, not the 12-month Annual Budget. The 12-month Annual Budget column is presented only to provide the data in a full and complete format. The following details are provided:

	Jul '16 - Aug '16 Actual	Jul '16 - Aug '16 Budget	\$ Over Budget	% of Budget	FY 2016/17 Annual Budget

* Wildermuth and Subcontractor Engineering Budget of \$2,740,852 plus Carryover Funds from FY 2015/16 of \$326,577 = \$3,067,429
Carryover Funds from FY 2015/16 of \$326,577 = \$12,072 (7108.31); \$50,000 (7108.32); \$7,000 (7402); and \$257,505 (7402.10)

PREVIOUSLY REPORTED ACTIONS (Descending Order)

July 2016:

The approved "Original" Engineering Services budget of \$2,740,852 was increased by "Carry Over" funding in the amount of \$326,577 to the "Amended" amount of \$3,067,429 for FY 2016/17 as provided in the Engineering Services Task Order. All of the "Carry Over" funding is for projects or activities that have bridged previous fiscal years and are expected to be completed in the FY 2016/17 timeframe or future years. The Carry-Over amount of \$326,577 from FY 2015/16 to the FY 2016/17 budget are provided in detail as follows:

1. The ongoing Adaptive Management Plan for the Prado Basin Habitat Sustainability Program in connection with the vegetation monitoring database in HydroDaVE (account 7108.31 in the amount of \$12,072). This work was originally scoped for FY 2015/16 but was not performed because the Adaptive Management Plan was not finalized and adopted by Watermaster in FY 2015/16.
2. Preparation of the Final PBHSP Adaptive Management Plan and the 2016 PBHSP Annual Report (account 7108.32 in the amount of \$50,000). The Adaptive Management Plan for the PBHSP was not finalized during FY 2015/16 and as a result, the initial Annual Report was not completed. The scope for preparing the 2016 Annual Report in FY 2016/17 was based on the assumption that the initial 2015 Annual Report of the PBHSP would have already been completed.
3. The finalization of the 2015 Annual Report of the Ground-Level Monitoring Committee (account 7402 in the amount of \$7,000). The Annual Report has been delayed primarily because the InSAR and ground-level survey data were delivered in March, which delayed the report and completion. The report will be finalized in FY 2016/17.
4. Three separate subtasks for the effort to develop a Subsistence Management Plan for the Northwest MZ-1 Area which is a 5-6 year effort (account 7402.1 in the amount of \$257,505) which will be performed in sequential phases. Some of the early phases of the work have been delayed for various reasons (e.g. delays in initiation of the monitoring program because of difficulties in coordination with well owners). These delays push some of the work that was expected to be completed in FY 2015/16 to FY 2016/17, including subtasks associated with setup and initiation of the monitoring program, siting of extensometers, modeling, and reporting.

The breakdown of the total Task Order amount of \$2,740,852 includes direct labor costs for Wildermuth Environmental, Inc. (82.6%) along with other direct charges such as equipment rental, laboratory fees, travel costs, reproduction costs, and outside professional services (17.4%).

PRADO BASIN HABITAT SUSTAINABILITY PROGRAM

The Prado Basin Habitat Sustainability Program came about as a result of the Peace II Agreement SEIR mitigation measure 4.4-3 and was adopted by IEUA's Board in October, 2010. The purpose of the mitigation measure is to ensure that the Prado Basin riparian habitat will not be impacted by Hydraulic Control. The basic program tasks are to convene a committee that will develop this adaptive management plan, to install necessary monitoring wells, to complete vegetation and aerial surveys, and to implement photo station monitoring. In terms of the financial aspects of this program, there is a cost sharing agreement, which was approved by the Watermaster Board in September, 2012 for a total budget of \$440,000. The cost sharing agreement between IEUA and Watermaster was increased from \$220,000 to \$300,000 effective August 22, 2013 with the approval of the Watermaster Board. The increase from \$220,000 to \$300,000 was to reflect a change in the consultant preparing the Adaptive Management Plan. On August 25, 2016, the cost sharing agreement between IEUA and Watermaster was increased from \$300,000 to \$385,000 ($\$770,000 \times 50\% = \$385,000$) with the approval of the Watermaster Board. A number of issues associated with the drilling of the monitoring wells (unavailable locations requiring negotiation of new easements, nesting season limitations, etc.), increased the cost of the construction of the 16 wells. The majority of the additional costs were due to extended construction management, additional easement fees, and environmental reporting for the pre- and during construction time period. The associated increase in cost was \$170,000, changing the total amount from \$600,000 to \$770,000.

This is a 50/50 cost sharing agreement between Watermaster and IEUA with a not to exceed amount of \$385,000 for each party. Included in that cost is hiring a consultant to develop the adaptive management plan, WEI performing the project management tasks related to the monitoring well installation, hiring a contractor to construct and install up to seventeen monitoring wells at nine separate sites, and United States Bureau of Reclamation performing vegetation monitoring every three years. Grants have been applied for to offset the cost of this program; however, the Grants were not approved.

The process of invoicing IEUA for their 50% portion of the (WEI) invoices will be completed by Watermaster staff at the end of every quarter. The information listed below is provided for the period of May 1, 2012 through August 31, 2016:

	Wildermuth Environmental, Inc.	50% Billing "TO" IEUA	50% Billing "FROM" IEUA	Costs For Watermaster	Watermaster Staff "Hours"	Watermaster Staff "Costs"

OTHER INCOME AND EXPENSE

There were no other significant items to report within the category of Other Income and Expenses for the month ending August 31, 2016.

PREVIOUSLY REPORTED ACTIONS (Descending Order)

July 2016:

Per section VI.D.3 of the Groundwater Storage Program Funding Agreement No. 49960 in the Chino Basin with The Metropolitan Water District of Southern California, the FY 2016/17 annual administrative fee invoice was issued on August 31, 2016 in the amount of \$159,631.04 under invoice number DYY 16-01.

"CARRY OVER" FUNDING

BACKGROUND OF "CARRY OVER" FUNDING

Once the FY 2015/16 period as of June 30, 2016 was closed, the amount of unfinished capital projects and related engineering costs was calculated and the "Carry Over" funding amount was added to the current FY 2016/17 budget. The Total "Carry Over" funding amount of \$2,630,337.45 was posted to the accounts as of July 1, 2016. The total amount of \$2,630,337.45 consisted of \$2,264,522.96 from Capital Improvement Projects; \$326,577.00 from Engineering Services; \$29,285.99 from the Chino Hills ASR Project; and \$9,951.50 from the Administration budget for completion of the Annual Reports.

CURRENT MONTH – AUGUST 2016

As of August 31, 2016, the total (YTD) amount remaining of the "Carried Over" funding is \$2,567,298.70 (\$2,630,337.45 - \$63,038.75 = \$2,567,298.70). The following details are provided:

¹ Preparation of a vegetation monitoring database in HydroDaVE pursuant to the Adaptive Management Plan for the PBHSP

² Preparation of the Final PBHSP Adaptive Management Plan and the 2016 PBHSP Annual Report

³ Finalization of the 2015 Annual Report of the Ground-Level Monitoring Committee

⁴ Carryover budget for three separate subtasks to develop a Subsidence Management Plan for the Northwest MZ-1 Area

⁵ Project completed and funds are available for reallocation to another project, distribution to Appropriative Pool, or maintain as extra funding

ANNUAL REPORTS:

Unspent funds of \$9,951.50 related to the ongoing Annual Reports for development, production, and printing from the Administrative budget from FY 2015/16 from two accounts were "Carried Over" into the current FY 2016/17 budget. These funds were from the Printing-Annual Report [A] in the amount of \$5,000 in account (6045); and Rauch Communication Consultants-Annual Report [B] in the amount of \$4,951.50 in account (6061.3).

CHINO HILLS ASR:

The ongoing Chino Hills ASR Project [C] continues into FY 2016/17 and previous years funding of \$29,285.99 has been carried over into account (7107.62).

ENGINEERING SERVICES:

Unspent funds related to ongoing projects and associated activities from the Engineering Services budget from FY 2015/16 in several accounts totaling \$326,577 were "Carried Over" into the current FY 2016/17 budget. These funds were from the Hydraulic Control Monitoring-Engineering-PBHSP [D] in the amount of \$12,072 in account (7108.31); Hydraulic Control Monitoring-Adaptive Management Plan [E] in the amount of \$50,000 in account (7108.32); PE4-Engineering Services [F] in the amount of \$7,000 in account (7402); and PE4-Northwest MZ-1 Area Project [G] in the amount of \$257,505 in account (7402.10).

COMPLETED PROJECTS WITH FUNDING AVAILABLE:

Several projects were completed during FY 2014/15 and have remaining funds available to be either (1) transferred to other project(s) that need additional funding, (2) keep amounts on reserve for future Capital Improvement Projects, or (3) refunded back to the Appropriative Pool when the Assessment package is invoiced. The funding amounts available are as follows: Jurupa Pumping Station [H] in the amount of \$37,981.33 (account 7209.1); Wineville Basin Proof of Concept [I] in the amount of \$35,397.53 (account 7209.2); and Hickory Basin Recharge Improvement Project [J] in the amount of \$3,877.00 (account 7690.3). One project was completed during FY 2015/16 and has funds available. This project is the CB20 Turnout Noise Abatement Project [M] in the amount of \$859.80 (account 7690.5). The total amount available is \$78,115.66 ($\$37,981.33 + \$35,397.53 + \$3,877.00 + \$859.80 = \$78,115.66$).

ONGOING RECHARGE IMPROVEMENT PROJECTS:

The RMPU Amendment-Task Order #1 [K] has a remaining budget from FY 2015/16 of \$467,269.61 in account (7690.15); the San Sevaine Recharge Improvement Project-Task Order #8 [L] has a remaining funded budget balance of \$1,360,583.31 in account (7690.4); the CB 20 Turnout project has a remaining funded budget balance of \$80,000 in account (7690.5); the GWR SCADA Upgrades-Task Order #4 [N] has a remaining funded budget balance of \$318,018.47 in account (7690.61); the Upper Santa Ana River HCP-Task Order #7 [O] has a remaining funded balance of \$37,836.88 in account (7690.7); and the Lower Day Basin RMPU-Task Order #2 [P] has a remaining funded budget balance of \$2,699.03 in account (7690.8). The total funded budget for these combined projects is \$1,609,700.

As invoices are received from the vendors and booked against these items listed above, the "Carried Over" balance will be reduced throughout the current fiscal year. At June 30, 2017, any remaining balances of the FY 2016/17 and prior years funding (if any), along with any new FY 2016/17 expenses, will then be "Carried Over" into the FY 2017/18 budget.

AUDIT FIELD WORK

FY 2015/16:

Auditors from the audit firm of Fedak & Brown, LLP were onsite at the Watermaster offices on March 28, 2016. This was the start of the interim field work for the period of July 1, 2015 through January 31, 2016. The final field work for the period of February 1, 2016 through June 30, 2016 was completed during August 16, 2016 and August 17, 2016. It is anticipated that the Annual Financial and Audit Reports will be presented to the Watermaster Board at the November 17, 2016 Board meeting. The Annual Financial and Audit Reports for FY 2015/16 are projected to be posted to the Watermaster website no later than December 23, 2016.

FY 2016/17:

The start of the interim field work for the period of July 1, 2016 through January 31, 2017 is planned for March 2017. The final field work for the period of February 1, 2017 through June 30, 2017 is planned for August 2017, with the Annual Financial and Audit Reports presented to the Watermaster Board at the November 16, 2017 Board meeting. The Annual Financial and Audit Reports for FY 2016/17 is anticipated to be posted to the Watermaster website no later than December 22, 2017.

A. 2015 GROUND-LEVEL MONITORING COMMITTEE ANNUAL REPORT

CHINO BASIN WATERMASTER

9641 San Bernardino Road, Rancho Cucamonga, Ca 91730
Tel: 909.484.3888 Fax: 909.484.3890 www.cbwm.org

PETER KAVOUNAS, P.E.
General Manager

STAFF REPORT

DATE: October 20, 2016
TO: Advisory Committee Members
SUBJECT: 2015 Ground-Level Monitoring Committee Annual Report (Business Item II.A.)

SUMMARY

Issue: Watermaster is required annually to file a Ground-Level Monitoring report with the Court. The 2015 annual report has been drafted.

Recommendation: Recommend to the Watermaster Board to adopt the 2015 Annual Report of the Ground-Level Monitoring Committee, along with filing a copy with the Court.

The report can be downloaded using the links in the Attachments section below.

Financial Impact: Approval of the report does not result in additional expenses. All of the 2015 Annual Report recommendations for ground-level monitoring are included in the approved FY 2016/17 budget.

Future Consideration

Advisory Committee: October 20, 2016 Recommendation to the Watermaster Board

Watermaster Board: October 27, 2016 Adopt the 2015 Annual Report of the Ground-Level Monitoring Committee along with filing a copy with the Court [Discretionary Function]

ACTIONS:

Appropriative Pool: October 13, 2016 – Unanimously recommend Advisory Committee recommendation

Non-Agricultural Pool: October 13, 2016 – Unanimously approved recommendation as presented and directed the Pool representatives to support at the Advisory Committee and Watermaster Board meetings subject to changes which they deem appropriate.

Agricultural Pool: October 13, 2016 – Unanimously recommend Advisory Committee recommendation

Advisory Committee: October 20, 2016 –

Watermaster Board: October 27, 2016 –

BACKGROUND

In 1999, the OBMP Phase I Report identified pumping-induced drawdown and resultant aquifer-system compaction as the most likely cause of land subsidence and ground fissuring that had been observed in Management Zone 1 (MZ-1). Program Element 4 of the OBMP, "Develop and Implement a Comprehensive Groundwater Management Plan for Management Zone 1," called for the development and implementation of an interim management plan (IMP) for MZ-1.

From 2001 to 2005, Watermaster developed, coordinated, and conducted the IMP under the guidance of the MZ-1 Technical Committee (now called the Ground-Level Monitoring Committee or GLMC). The IMP provided enough information for Watermaster to develop Guidance Criteria for the MZ-1 producers in the investigation area that, if followed, would minimize the potential for subsidence and fissuring during the completion of the MZ-1 Subsidence Management Plan (MZ-1 Plan). The Guidance Criteria formed the basis for the MZ-1 Plan, which was developed by the MZ-1 Technical Committee and approved by Watermaster in October 2007. By a November 15, 2007 Order, the Watermaster Court approved the MZ-1 Plan and ordered its implementation.

The MZ-1 Plan states that Watermaster will produce an annual report at the end of each calendar year, which includes the results of ongoing monitoring efforts, interpretations of the data, and recommended adjustment to the MZ-1 Plan, if any. The Court's Order directs Watermaster to file the annual reports with the Court. The first such report was published for 2012, and was approved by Watermaster and filed with the Court in December 2013.

DISCUSSION

The Draft-Final 2015 Annual Report of the GLMC includes results and interpretations for data that were collected during calendar year 2015, and includes recommendations for Watermaster's Ground-Level Monitoring Program for FY 2016/17.

The GLMC met on March 21, 2016, and via GoToMeeting on May 4, 2016 to discuss monitoring results and to develop a scope-of-work and budget for FY 2016/17. An overview of the monitoring results and recommendations (proposed scope-of-work and budget for FY 2016/17) was presented to the Pool Committees during the May 12, 2016 meeting.

The GLMC was provided with the draft 2015 Annual Report on August 19, 2016, and the Committee was asked to provide any comments or questions on or before September 2, 2016. Comments were received and incorporated and an overview of the monitoring results and recommendations contained within the Report, and comments submitted by the GLMC with responses to those comments were presented to the Appropriate Pool Committee at its September 8, 2016 meeting. The Appropriate Pool recommended that an additional meeting of the GLMC be held to further discuss the comments and responses. A GLMC meeting was held on September 22, 2016 and at that meeting, the GLMC recommended the 2015 Annual Report for consideration by the Pools, Advisory Committee, and Watermaster Board with some changes to the Comments and Responses.

The changes recommended by the Committee are incorporated in the Final 2015 Annual Report. The Pools recommend to the Advisory Committee to recommend Board approval of the Final 2015 GLMC Annual Report (Attachments 1-3).

B. SUPPLEMENTAL WATER RECHARGE PROCEDURE

CHINO BASIN WATERMASTER

9641 San Bernardino Road, Rancho Cucamonga, Ca 91730
Tel: 909.484.3888 Fax: 909.484.3890 www.cbwm.org

PETER KAVOUNAS, P.E.
General Manager

STAFF REPORT

DATE: October 20, 2016
TO: Advisory Committee Members
SUBJECT: Supplemental Water Recharge Procedure (Business Item II.B.)

SUMMARY

Issue: Supplemental water recharge procedure needs to be improved to allow for better coordination with Inland Empire Utilities Agency (IEUA) operations, and to allow Watermaster to collect more robust data to fulfill its obligation to manage recharge in the Chino Basin.

Recommendation: Offer advice and assistance.

Financial Impact: There is no financial impact associated with this agenda item.

Future Consideration

Advisory Committee: October 20, 2016 - advice and assistance

Watermaster Board: October 27, 2016 – adopt proposed procedures (Within Watermaster Board Duties and Powers)

ACTIONS:

Watermaster Board: Date –

BACKGROUND

The Peace Agreement (Section 5.1) provides that any person may make an application to recharge Supplemental Water in Chino Basin, and Watermaster has the responsibility to ensure that the recharge is consistent with the Judgment, the Optimum Basin Management Plan, and the Peace Agreement; and further, that the recharge does not cause Material Physical Injury to any party to the Judgment. Watermaster Rules and Regulations (Section 7.1) further state, among other provisions, that Watermaster needs to ensure proper accounting of the sources of recharge.

Under the existing process any party that wishes to recharge Supplemental Water submits Form 2, which after staff review, is presented to the Pool and Advisory Committees and then the Board for approval. Form 2 (Attachment 1) requires a party to provide information on water source, method of recharge, water quality and levels in the affected areas.

In the past when an Application for Recharge has been approved, there has been some informal communication with the applicant about the recharge operation and measurement, and some communication with IEUA. There is limited information available to Watermaster to assess the effectiveness of the recharge and to calculate the appropriate credit to be given.

DISCUSSION

While Supplemental Water Recharge in the past has been mostly conducted by IEUA, there are signs that the practice is likely to increase in frequency, and be undertaken by other parties. Recent examples include Vulcan Materials Company, Fontana Water Company, and San Antonio Water Company; more are possible if there are changes in the way water can be transferred among State Water Contractors, and if wet water in excess of annual demands is available. The ongoing development of the Santa Ana Regional Conservation and Conjunctive Use Program (SARCCUP) is yet another indication of rising interest in the possibility of Supplemental Water Recharge.

To help Watermaster meet its obligation to control Supplemental Water Recharge in the Basin, a set of proposed procedures and forms (Attachment 2) have been developed to guide a prospective party. The existing Form 2 would be renamed as Form 2a, and two new forms would be utilized; the three forms would be utilized in place of the existing Form 2 that is part of the Rules and Regulations. It is anticipated that Rules and Regulations will be updated in the coming months to reflect other amendments, and at that time the new forms would also be incorporated.

The procedure is intended to help provide adequate information for an MPI analysis; create a recharge operations plan that can be clearly communicated and coordinated with IEUA operations; establish a measurement system; and collect and report data that is accurate and useful in the calculation of recharge.

The proposed procedure and forms were presented in August 2016 to the Pools in draft form for advice and assistance. Staff received input from parties and has made modifications to reflect the comments. Staff received further input during the October 13, 2016 Pool meetings and has made further edits.

The primary change to the proposed procedures is to clarify that costs associated with a supplemental water recharge event such as IEUA and Watermaster staff time, and estimated O&M expenses, will be charged to any one recharging supplemental water in Chino Basin if they have not contributed to the implementation of the OBMP; these costs would be charged since an outside party is not currently contributing to the Watermaster activities. In addition, losses that apply to those parties, set at 6%, provide an offset for the historical capital investment made by the parties to the Judgment.

The procedure is being brought back to the Advisory Committee for any further advice. After all input has been received the procedure will be brought to the Board for approval.

Procedure for the Recharge of Supplemental Water by a Person

Introduction

Section 5.1 of the Peace Agreement provides that any Person¹ may make an application to Watermaster to recharge Supplemental Water in the Chino Basin. Sections 7 and 10 of the Watermaster ~~rules~~[Rules](#) and ~~regulations~~[Regulations](#) reiterate the conditions of approval and describe the recharge application process, respectively. This document describes the procedure to be used by a Person to recharge Supplemental Water. This procedure includes three main steps:

1. Apply for and obtain Watermaster approval to recharge Supplemental Water;
2. Plan, schedule, coordinate, and execute a Supplemental Water recharge event; and
3. Provide the monitoring and accounting necessary to enable the applicant and Watermaster to determine how much water was actually recharged during a recharge event and to account for the recharged water.

In Step 1, a Person makes an application to the Watermaster to obtain approval to recharge Supplemental Water. Watermaster Form 2a (formerly Form 2) *Application for Recharge* is used to make an application to Watermaster to recharge Supplemental Water. By submitting Form 2a, the Person, if not a Party to the Judgment, agrees to pay the cost associated with the use of recharge facilities, including IEUA and Watermaster staff time to monitor the recharge event and compute the actual recharge.

In Step 2, Watermaster Form 2b *Request to Recharge Supplemental Water by a Person* is used to propose a Supplemental Water recharge event to Watermaster. A Supplemental Water recharge event is a period-specific event where the Person will bring a specified volume of Supplemental Water under their dominion to either their own recharge facility or storm and supplemental water recharge facilities that are integrated into the drainage channels in the Chino Basin². The Step 2 process depends on whether or not the Person intends to recharge supplemental water in its own recharge facilities or in the storm and supplemental water recharge facilities that are integrated into the drainage channels in the Chino Basin. For the former, the Step 2 process is relatively simple.

For the latter, the process is more involved. The Person is required to work with Watermaster and potentially the IEUA to plan, schedule, and coordinate a Supplemental Water recharge event. Watermaster and IEUA staffs need to jointly plan the use of and monitoring of the Person's Supplemental Water recharge event to ensure there are no conflicts in the operation of the facilities with storm and other Supplemental Water recharge activities and maintenance activities, and to ensure that there is capacity to receive the Person's Supplemental Water into the recharge facilities. The Person, Watermaster, and the IEUA need to make sure the Person's Supplemental Water is actually diverted into a recharge basin or facility and recharges in the Chino Basin; this requires monitoring of the recharge event. Upon receiving Form 2b, Watermaster and IEUA staffs will work with the Person to finalize a Recharge Plan, to develop a precise schedule to implement it, and to develop a precise

¹ The terms "Person" and "Supplemental Water" used herein have the same meaning as those used in the Judgment, the Peace Agreements and the Rules and Regulations.

² Recharge Event – An instance of supplemental water recharge in the Chino Basin by a Person authorized under Forms 2a and 2b.

PROCEDURE FOR THE RECHARGE OF SUPPLEMENTAL WATER BY A PERSON

coordination plan among specific individuals to complete the recharge event. The recharge event would then occur pursuant to the final Recharge Plan.

Step 3 involves the reporting and validation of the Supplemental Water recharge event. Once the recharge event is completed, the Person, Watermaster, and potentially the IEUA will need to determine how much of the Supplemental Water provided by the Person actually recharged. Some of the Person's Supplemental Water may have been lost due to losses at the diversion works into the spreading grounds (e.g. blocked inlet, improperly set gates), losses from evaporation³, and losses from spillage (e.g. stormwater displacing Supplemental Water, dewatering for maintenance). Watermaster will utilize the meter information provided by the Person and other data collected by the IEUA and Watermaster to estimate actual Supplemental Water recharge. Form 2c *Report of Supplemental Water Recharge by a Person* is used by the Person to provide information on their measurement of the delivery of Supplemental Water to either the Person-owned recharge facility or the storm and supplemental water recharge facilities that are integrated into the drainage channels in the Chino Basin, including information on the meters and the time history of meter readings. This completed form is to be submitted to Watermaster at the completion of the recharge event for Watermaster's use in estimating Supplemental Water recharge.

These procedures are described in detail below.

Step 1 Apply for and Obtain Watermaster Approval to Recharge Supplemental Water

Any Person seeking to recharge Supplemental Water is required to complete Watermaster Form No. 2a *Application for Recharge*. Form 2a requires the following: the applicant's identification and contact information; summary information on the amount of recharge requested, the rate of recharge and the projected duration of recharge; the source of Supplemental Water and its water quality characterization; the method of recharge; groundwater levels and water quality in the recharge area; and an affirmative statement by the applicant on whether they know if their proposed recharge will cause potential material physical injury (MPI) to a party or to the basin and if so what mitigation measures the applicant proposes to ensure that the proposed recharge does not cause potential MPI. The procedure to make a recharge application is listed below:

1. Person (applicant) completes Form 2a and submits it to Watermaster with backup information.
2. Watermaster staff will review Form 2a for completeness. If the form is determined to be complete, proceed to step 3 immediately below; if incomplete, then Watermaster staff will notify the Person and inform them of deficiencies in the application and return the form so that it can be completed and resubmitted to Watermaster. The approximate time to determine that the request form is complete should not exceed five business days.

[For Persons that have not previously contributed to the implementation of the OBMP as a Party to the Judgment, are not in compliance with their continuing covenants under the Peace Agreement or in lieu thereof have paid or delivered to Watermaster "financial equivalent" consideration to offset the cost of past performance prior to the implementation of the OBMP.](#)

³ Watermaster staff will develop a uniform method for computing losses due to evaporation based on recent historical data and will update it periodically based on new information.

PROCEDURE FOR THE RECHARGE OF SUPPLEMENTAL WATER BY A PERSON

Watermaster staff will estimate the cost for staff time to monitor the recharge event & compute the supplemental water recharge, and associated O&M.

3. Watermaster staff reviews the completed application and conducts an analysis to determine if the proposed recharge as described in the recharge application will cause potential MPI.
4. If Watermaster staff determines that the proposed recharge will cause potential MPI, Watermaster staff will work with the applicant to develop mitigation measures such that the proposed recharge will not cause MPI.
5. Watermaster will then place the recharge application and MPI assessment on the agenda for subsequent action by the Pool Committees, the Advisory Committee, and the Watermaster Board. This approval process should take no more than 90 days.
6. In special situations where a Person is expected to conduct multiple regular recharge events over a period of several years, Form 2a can be used to approve the recharge of Supplemental Water for up to five years.

Step 2 Plan, Schedule, Coordinate, and Execute a Supplemental Recharge Event

After Form 2a has been approved and prior to recharging Supplemental Water, a Person must complete and submit Form 2b *Request to Recharge Supplemental Water by a Person* to the Watermaster. Form 2b contains the information necessary to precisely describe the Supplemental Water recharge event desired by the Person. Watermaster and potentially the IEUA will review the submitted form and assess how the recharge event can be executed consistent with the Court-approved management agreements and the Watermaster-approved recharge application. The procedure to plan, schedule, coordinate, and execute a Supplemental Water recharge event is listed below:

1. Person will complete a Form 2b that can be downloaded from the Watermaster website and submit it to Watermaster. The Person will indicate on the form if the planned recharge event will occur in its own recharge facility or the storm and supplemental water recharge facilities that are integrated into the drainage channels in the Chino Basin.
2. Watermaster staff will review the form for completeness. If the form is determined to be complete, proceed to the next step immediately below; if incomplete, Watermaster staff will notify the Person, inform them of the deficiencies in the form, and return the form such that it can be completed and resubmitted. The approximate time to determine if the request form is complete should not exceed five business days. For special situations where a Person is expected to conduct regular recharge events over a period of several years, Form 2b can cover multiple Supplemental Water recharge events over a period of up to five years.
3. If the Person intends to use the storm and supplemental water recharge facilities that are integrated into the drainage channels in the Chino Basin, proceed to 3(a) below; otherwise proceed to 3(b) below.
 - a. Conducting Supplemental Water Recharge in Facilities *not* Owned by Person.
 1. Watermaster and IEUA staffs will review the completed Form 2b and prepare a Recharge Plan to be used by the Person. The Recharge Plan will describe: the specific recharge facilities that will be used, the precise recharge period (starting date and time and number of days), Supplemental Water delivery rates, the

PROCEDURE FOR THE RECHARGE OF SUPPLEMENTAL WATER BY A PERSON

metering practices that will be used to measure the Supplemental Water recharge, and the operations plan and monitoring necessary to accomplish the recharge and account for the water. The IEUA and Watermaster may request other information from the Person other than that was provided in Form 2b⁴. Watermaster staff will provide the Recharge Plan to the Person for their review and acceptance. The review and approval process for the completed Recharge Plan should take no more than 30 days.

2. The Person will sign onto the Recharge Plan and conduct the recharge event per the Recharge Plan.
 3. The Person will provide Watermaster and the IEUA a five-day notice of its intent to commence recharge; the IEUA and Watermaster must concur within 24 hours that recharge can begin at the requested time.
 4. The Person will provide Watermaster and the IEUA a 24-hour notice of its intent to commence recharge. Watermaster and IEUA reserved discretion to request an adjustment to the approved Recharge Plan at any point prior to the recharge event.
 5. To the extent required by the Recharge Plan, the IEUA will adjust gates and other related hydraulic appurtenances to facilitate basin recharge operations. The Person's staff will not be allowed to adjust gates and other related hydraulic appurtenances to facilitate basin recharge operations.
 6. Watermaster and IEUA staffs will monitor recharge operations, as described in the Recharge Plan. The monitoring will include observations and data collection to verify that the Supplemental Water supplied for recharge by the Person has been diverted into the recharge facility and how much of that water actually recharged.
 7. During recharge operations, the IEUA or Watermaster, ~~at their discretion~~, may request the Person to cease recharge operations. This could occur due for a variety of reasons including but not limited to an expected stormwater inflow event, unanticipated challenges with the recharge facilities, or some emergency condition. The Person will cease recharge operations when requested by the IEUA or Watermaster. The Person will read their meter when recharge operations cease. Recharge operations can restart with permission from the IEUA or the Watermaster.
 8. When recharge operations are completed, the Person will inform Watermaster and the IEUA by email.
- b. Conducting Supplemental Water Recharge in Person-Owned Recharge Facilities. The Person will be allowed to conduct recharge operations at their facilities as described in the Recharge Plan⁵ developed in 2 above at the Person's discretion. The Person will notify Watermaster at the start and end of each recharge event. During recharge operations, Watermaster staff must have access to the Person-owned recharge facilities

⁴ It is the intent of these procedures to develop monthly estimates of Supplemental Water recharge by source and location and thus the collection and reporting of recharge by the Person will be done in such a way to ensure the monthly accounting of Supplemental Water recharge.

⁵ The intent is that Watermaster will work with the Person proposing to recharge in a Person-owned recharge facility such that the approved form 2b will be the Recharge Plan

PROCEDURE FOR THE RECHARGE OF SUPPLEMENTAL WATER BY A PERSON

and any water meters or measuring devices used to measure recharge to be able to verify the recharge volumes claimed in Form 2c below.

Step 3 Monitoring and Accounting

During the Supplemental Water recharge event, pursuant to the Recharge Plan, the Person, Watermaster and potentially IEUA staffs will be collecting data to enable Watermaster to properly account for the Supplemental Water entering a recharge facility and recharging in that facility. The procedure to obtain monitoring data and conduct an accounting of the Person's recharge from the Supplemental Water recharge event is listed below:

1. After the Supplemental Water recharge event concludes, the Person will complete Watermaster Form 2c *Report of Supplemental Water Recharge by a Person* and submit it to Watermaster. Watermaster Form 2c contains information on the meters and/or other means to estimate the Supplemental Water diverted into a spreading basin and the associated time series of measurements to the Watermaster. For Supplemental Water recharge in the storm and supplemental water recharge facilities that are integrated into the drainage channels in the Chino Basin, The Person will provide the Watermaster a completed Form 2c for each recharge event. For Supplemental Water recharge in Person-owned recharge facilities, Form 2c can document multiple recharge events over a period specified in the Recharge Plan developed from Form 2b.
2. Watermaster will ~~conduct a~~ review ~~of~~ the recharge documentation provided by the Person and prepare an estimate of the actual amount of Supplemental Water recharged. Watermaster will provide the Person with its estimate of the actual amount of Supplemental Water recharged for the Person's review and comment.
3. Watermaster will consider the Person's comments on its recharge estimate and use its discretion to finalize the recharge estimate. Watermaster will subsequently use its finalized Supplemental Water recharge estimate in its accounting.
4. ~~Watermaster staff will estimate the actual staff time and cost incurred to monitor and compute the Supplemental Water recharged, and will invoice the Person for this amount.~~ For Persons that have not previously contributed to the implementation of the OBMP as a Party to the Judgments, are not in compliance with their continuing covenants under the Peace Agreement or in lieu thereof have paid or delivered to Watermaster "financial equivalent" consideration to offset the cost of past performance prior to the implementation of the OBMP. Watermaster will invoice the cost for both IEUA and Watermaster staff time and costs to monitor the recharge event, compute the supplemental water recharge, and O&M associated with this event. This is above and beyond the 6% storage loss being applied to the volume of water being recharged, which is a surrogate for contribution to OBMP implementation.

General Manager

STAFF REPORT

DATE: October 20, 2016
TO: Advisory Committee Members
SUBJECT: Exhibit "G" Physical Solution Transfer Rate Substitution (Business Item II.C.)

SUMMARY

Issue: There is no identified Physical Solution Transfer rate for Fiscal Year 2016-17.

Recommendation: Approve the proposed Fiscal Year 2016-17 substitute Physical Solution Transfer rate, and approve Watermaster legal counsel's filing of motion for Court approval of the same.

Financial Impact: None

Future Consideration

Advisory Committee: October 20, 2016 Approval

Watermaster Board: October 27, 2016 Approval [with advice and assistance from Pools and Advisory Committee]

ACTIONS:

October 13, 2016: Appropriative Pool – Approved by majority vote; no votes by Monte Vista Water District and Monte Vista Irrigation Company.

October 13, 2016: Non-Agricultural Pool – Voted unanimously to recommend Advisory Committee approval of the proposed rate and approval of Watermaster legal counsel filing motion with the Court; and authorize Pool's legal counsel to sign the stipulation; and to direct the Pool representatives to support at the Advisory Committee and Watermaster Board meetings subject to changes which they deem appropriate.

October 13, 2016: Agricultural Pool – No action required; information only.

October 20, 2016 – Advisory Committee –

October 27, 2016 – Watermaster Board –

BACKGROUND

Paragraph 9 of Exhibit "G" to the Restated Judgment, entitled "Physical Solution Transfers," provides mechanisms pursuant to which, during the term of the Peace Agreement, the members of the Overlying (Non-Agricultural) Pool have the right to transfer or lease their quantified Production rights and carry-over water held in storage accounts. Pursuant to the procedures outlined in Paragraph 9, Paragraph 9(d) of Exhibit "G" specifies that the payment for water purchased for transfer to Watermaster, and thence to the members of the Appropriative Pool, will be 92% of the then-prevailing "[Metropolitan Water District of Southern California] Replenishment Rate."

According to Watermaster's past practice, the MWD Replenishment Rate utilized would be that applicable for the calendar year in which Watermaster's purchase takes place. As applied to transfers in Fiscal Year 2016-17, as payment would be made by June 30, 2017, if MWD had a Replenishment Rate in effect for 2017, that rate would be utilized. MWD ceased publishing a Replenishment Rate in 2013 and it is not presently known when and how MWD may reinstate a replenishment program. Accordingly, Watermaster and the parties to the Restated Judgment are without a rate from which to calculate the Physical Solution Transfers in Fiscal Year 2016-17. This has been the case since Fiscal Year 2012-13, during which the Watermaster Court approved a requested one-year rate substitution.

DISCUSSION

The members of the Overlying (Non-Agricultural) and Appropriative Pools considered the use of a multi-year substitute rate for the Fiscal Years 2016-17 through Year 2018-19 as follows:

	FY 2016/17	FY 2017/18	FY 2018/19
Proposed Substitute Rate	\$570	\$595	\$635

Following discussion and action by both the Appropriative and Non-Agricultural Pools at its October 13, 2016 meetings, the option approved was a one-year substitute rate of \$570 for Fiscal Year 2016/17.

The proposed rate represents 85.59% of the published 2017 MWD Tier 1 Untreated rate of \$666, and is consistent with the percentages used in prior years to determine substitute rates. A motion to allow substitution of Physical Solution Transfer rate for Fiscal Year 2016-17 would request the deviation from the terms of the Restated Judgment in order to utilize a substitute "Physical Solution Transfer" rate applicable to transfers from the Overlying (Non-Agricultural) Pool to Watermaster, and thence to members of the Appropriative Pool, pursuant to Paragraph 9 of Exhibit "G" to the Restated Judgment. If granted, this would allow Watermaster to substitute the Physical Solution Transfer rates as shown above, as MWD no longer publishes a Replenishment Rate.

If approved, Counsel for the Pool and Watermaster will collaborate to prepare a draft stipulation and proposed order, and draft motion for Court approval of the Fiscal Year 2016-17 substitute rate.

The Court's approval of a substitute rate under Paragraph 9(d) of Exhibit "G" would allow transfers to proceed without issue in Fiscal Year 2016-2017 allowing the Overlying (Non-Agricultural) and Appropriative Pools to continue to transact among one another until a longer-term solution and MWD's long term replenishment plans become clear.

IEUA Updates – Discussion

Notice for Rialto Pipeline Shutdown:

- MWD will inspect the pipeline to determine the condition of the pre-stressed rings. The shutdown is scheduled for November 14-19, 2016 and will commence at 12:01am. Pending results of the inspection, MWD could schedule another shutdown for repair work during the first quarter of CY2017.

MWD Conservation Program:

- MWD Board approved biennial budget of \$59M for FY2016-17 and 2017-18. Due to dropout rate from last FY turf removal program, an additional \$76.7M is available as carryover funds. This will increase the biennial conservation budget to \$135.7M. MWD will focus additional funds for devices and educational workshops (landscape friendly classes). In addition, MWD added \$10M into their recycled water onsite retrofit program.

Imported Water Rates:

- The new imported water rates and charges took effect on October 1, 2016 per IEUA Resolution 2016-6-15. Staff is preparing a summary report of the proposed Readiness-to-Serve change and will forward in the coming weeks.

Salinity Update:

- Rising levels of salinity in the water supply are being evaluated. IEUA has initiated discussions with the Regional Water Quality Control Board and Chino Basin Watermaster to further develop near- and long-term strategies for managing salinity. Meetings will be held with the RWQCB and CBWM in October to discuss progress and the next steps in salinity management. With anticipated prolonged drought conditions, persistent salt management will be vital to meeting the regional water quality commitments. Efforts by the Basin Monitoring Program Task Force are also being undertaken to coordinate a study of Total Dissolved Solids

trends in Southern California. A Southern California Salinity Management Summit is being held on November 17th.

Integrated Water Resources Plan (IRP) Phase 2:

- Phase 2 of the IRP began in September 2016. Phase 2 will begin by updating the project list with projects from local and regional water agencies, and reassessing issues and challenges to establish performance benchmarks. Modeling work will include developing a financial evaluation and local project infrastructure and interconnection schematics which can align with the larger SARCCUP model and the Chino Basin Water Bank discussions. A Master Contract RFP is being developed for the modeling work and financial evaluations, and will be posted by the end of the year.

SARCCUP:

- The Santa Ana River Conservation & Conjunctive Use Program (SARCCUP) is being implemented by the five member agencies of SAWPA with \$55M in grant funding from California Department of Water Resources (DWR). Total cost for SARCCUP is \$100M with SAWPA member agencies each adding \$9M in matching funds.
 1. The DWR grant contract was finalized with SAWPA in September 2016. Sub-agreements with member agencies are currently being drafted with expected completion by December 2016.
 2. CEQA evaluation for the program is in progress. Notice of Preparation is scheduled to be released by end of October 2016. Scoping meeting is expected to be scheduled for December 6th at 6 PM. The Programmatic EIR is expected to be completed by June 2017.
 3. A Technical Memorandum regarding details on a Decision Support Model (DSM) will be finalized by November 2016. The objective of the DSM is to simulate anticipated operation of the SARCCUP facilities, identify potential constraints, optimize the operation and quantify the benefits and costs of the overall program.

RE: September Legislative Report

Overview:

Governor Brown took final action on the final 789 bills of the 2015-16 legislative session before the September 30 deadline. There were not many surprises in the action he took. As expected, he signed IEUA's bill, SB 970 (Leyva), as well as the suite of climate change legislation, SB 32 (Pavley), AB 197 (E. Garcia) and SB 1383 (Lara). Additionally, he signed legislation relating to water transfers data, AB 1755 (Dodd), sub-metering multi-unit structures, SB 7 (Wolk) and AB 2480 (Bloom) which declares source watersheds as "critical components" of California's water infrastructure.

A long-awaited report on the feasibility of developing direct potable reuse (DPR) requirements was recently released. The report concludes that while more research needs to be conducted, developing regulations for DPR is not only feasible, but consistent with the California Water Action Plan and the Governor's goals to increase the use of recycled water as part of sustainable water management plans. There is no timeline for when the final regulations might be adopted.

On September 15th, the State Water Resources Control Board (SWRCB) released a revised draft Substitute Environmental Document (SED) for flow requirements on the Lower San Joaquin River and salinity standards for the southern Delta, as part of the Water Quality Control Plan of the Bay-Delta (Bay-Delta Plan). If adopted, the draft proposes increased flows for fish and wildlife and adjusts salinity requirements to a slightly higher level to reflect updated scientific data.

A report commissioned, but not released, by the Natural Resources Agency finds that the federal government might need to contribute approximately one-third of the \$16 billion the twin tunnels project price tag. Restore the Delta obtained and released the report. The Natural Resources Agency states that the report is outdated and that the plan still relies on beneficiaries paying for the project.

SB 970 (Leyva), IEUA's sponsored bill to promote the use of existing digester capacity at wastewater treatment plants for food waste diversion has been signed by the Governor. Because the language of SB 970 was also inserted into a budget trailer bill, which was also signed by the Governor, it will be implemented immediately.

The California Air Resources Board recently held a workshop to discuss the next AB 32 Scoping Plan update. Discussions were focused around how the state plans to achieve the ambitious 2020, and 2030 GHG reduction targets. At the workshop that focused mainly on transportation,

officials outlined a suite of policies that could be included in the Scoping Plan Update including a vehicle miles traveled (VMT) fee to replace state gas taxes and the tightening of regional GHG limits. Creating “Low-Emission Zones” that establish stringent emissions standards for select types of heavy-duty vehicles within sensitive areas was also discussed.

Inland Empire Utilities Agency Status Report – September 2016

Draft Report Released on Regulating Direct Potable Reuse of Recycled Water

After reviewing the recommendations of an expert panel and advisory group, the State Water Resources Control Board’s Division of Drinking Water released a draft report to the Legislature that states it is feasible to develop regulations for the direct potable reuse (DPR) of recycled water. Adopting DPR regulations would not only be consistent with the California Water Action Plan’s goals of sustainable water management and increased use of recycled water, but would make California the first state in the nation to adopt DPR policies.

State Water Board Chair Felicia Marcus said in a written statement. “We need to take a thoughtful and deliberate approach to diversifying and securing our long term water resilience. Today’s draft, focused on the feasibility of direct potable reuse, is one part of a multifaceted effort that includes a wide range of sources, including indirect potable reuse through groundwater recharge, surface water augmentation, storm water capture, and desalination. The release of today’s draft report is a historic step in bringing online a potential future source of potable water.”

The adoption of regulations will not take place until the knowledge gaps are addressed and additional research is completed related to the protection of public health. However, the development of the criteria for the use of DPR will go forward while that is being done. Some of the Division of Drinking Water’s recommendations in moving forward on the development of DPR, include:

1. Convening technical workgroups to assist in developing uniform water recycling criteria for direct potable reuse.
2. Convening a “blue ribbon” panel to review scientific literature and report on the current state of scientific knowledge regarding the risks of emerging contaminants to public health.
3. Developing new methods to evaluate the performance and reliability of DPR treatment.
4. Working with the Regional Water Quality Control Boards to include monitoring for pathogens in raw wastewater feeding potable reuse systems.
5. Developing more comprehensive analytical methods for unknown contaminants.
6. Addressing important implementation issues including: training and certification of operators for potable reuse treatment facilities; optimizing wastewater treatment plant performance to prepare for DPR; enhancing source control programs designed to prevent or minimize discharges of toxic chemicals to sewer systems that feed into DPR treatment plants; and ensuring that agencies implementing DPR projects have adequate technical, managerial, and financial capacity to ensure the success and safety of the project.

Due to this ongoing process, a concrete timeframe on when regulations for the direct potable reuse of recycled water will be in place is currently not available, officials stated. The draft report is available now for comment under a 45-day public review period before finalization and presentation to the state Legislature by Dec. 31, 2016.

Water Quality Control Plan of the Bay-Delta (Bay-Delta Plan)-San Joaquin River Flow Update

On September 15th, the State Water Resources Control Board (SWRCB) released a revised draft Substitute Environmental Document (SED) for flow requirements on the Lower San Joaquin River and salinity standards for the southern Delta, as part of the Water Quality Control Plan of the Bay-Delta (Bay-Delta Plan). If adopted by the SWRCB, the proposal would update water quality requirements for salinity in the southern Delta and water flows in major tributaries to the San Joaquin River, including the Stanislaus, Tuolumne, and Merced Rivers. Impacted water agencies include the City and County of San Francisco, as well as Modesto, Turlock, Oakdale and South San Joaquin Irrigation Districts.

In summary, the draft proposes increased flows for fish and wildlife and adjusts salinity requirements to a slightly higher level to reflect updated scientific data. The recently released draft SED is a revision to the 2012 Draft SED. The revised plan proposes to make the following updates:

- San Joaquin River flow objectives would increase the required flows to be left in the rivers, referred to as unimpaired flows, to a range of 30 to 50 percent from February to June, starting at 40 percent unimpaired flows. Additionally, a minimum base flow value between 800-1,200 cfs at Vernalis would be implemented at all times from February through June. The standard would also change the area currently protected by flow requirements by adding compliance locations on the Stanislaus, Tuolumne, and Merced rivers, instead of only on the San Joaquin River at Vernalis. The revised flow requirements could cost local residents, businesses and farmers as much as 400,000 acre feet for some water years and lead to severe economic implications.
- Southern Delta Salinity objectives for the protection of agriculture users in the South Delta would be adjusted to 1.0 deciSiemens per meter (dS/m) year-round, an increase of allowable salinity level from the current standard of 0.7 dS/m from April to August and 1.0 dS/m September through March.

The proposed plan update comes after five years of historic drought and plummeting endangered salmon and steelhead populations. Staff maintains that the increased flows will provide improved habitat and migratory signals for native fish species.

Stakeholders have been encouraged by the Governor to reach voluntary agreements that could implement Bay-Delta Plan objectives for fish and wildlife, and potentially reduce the amount of required flow, although that requirement will not drop below 30 percent. If agreements cannot be reached, flow objectives will be implemented through water right actions and water quality actions.

The plan has met strong opposition from local impacted agencies and their legislative representatives in Sacramento who have been running a public affairs campaign all year in anticipation of the release of the new requirements.

The plan does note that looking only at inflows to the Delta is insufficient. Other factors, such as predation, non-native species, loss of habitat, barriers to fish passage and high water temperature have an effect on declining native fish populations as well. Non-flow measures such as restoration of gravel spawning beds, suppression of habitat beneficial to predatory fish, and enhancement of habitat beneficial to native species could reduce needed flows, although not below 30 percent unimpaired flow.

The current proposal is only Phase 1 in a multi-step process to update the entire Bay-Delta Plan. The Bay-Delta Plan has not been updated since 2006. Comments are due on November 15th. Public hearings will be held on November 2nd and 10th in Sacramento and on November 4th in Modesto. The SWRCB will consider the final draft at a public hearing in early 2017.

Report States Tunnels Would Cost Federal Government 1/3 of the \$16 Billion Price Tag

A report that was not intended to be released by the Natural Resources Agency was obtained through a Public Records Act Request by Restore the Delta, a group strongly opposed to the twin tunnels project.

Last year, California commissioned David Sunding, a UC Berkeley economist, to provide an economic analysis of Governor Brown's twin tunnel plan.

The analysis concludes the federal government may need to pay for nearly a third of the \$16 billion project in order to make it feasible. The Brown administration has stated publicly that local water districts would pay the full cost.

Nancy Vogel, with the California Department of Natural Resources, says the economic analysis is outdated and incomplete. She says the state has not concluded that the tunnel plan requires federal funding to be feasible. Regardless of the conclusions, the report has provided yet another opportunity for opponents to challenge the project.

SB 970 (Leyva) Update

IEUA's sponsored legislation, SB 970 (Leyva) not only passed both houses with an overwhelming majority, but the language from the bill is also included in SB 859, the Budget Committee's Resources Trailer Bill. The Governor signed both bills. Because the Trailer Bill is a "budget bill" it becomes effective immediately.

Implementation is now in the hands of CalRecycle who will release a plan to allocate their Greenhouse Gas Reduction Fund allocations sometime in the coming months. Efforts to maximize benefits for regional projects will be critical as CalRecycle amends the program.

Climate Change Legislation

SB 32 (Pavley) was signed by the Governor. The measure establishes the goal of reducing greenhouse gasses (GHGs) at least 40 percent below 1990 levels by 2030. The bill, along with its

companion measure, AB 197 (E. Garcia) passed each legislative house with relative ease. SB 32 was diluted from its original version, to only include the 2030 goal with no mention of the cap and trade program.

AB 197 adds a number of transparency and accountability measures to provide greater scrutiny and oversight of California Air Resources Board (CARB) including adding two non-voting legislative members to the board, and creating a Joint Legislative Oversight Committee.

SB 1383 (Lara) regarding short-lived climate pollutants (SLCPs) is another significant component of the state's climate change agenda, and also was signed by the Governor. The bill authorizes CARB to implement their SLCP strategy to reduce methane and hydrofluorocarbon by 40 percent and anthropogenic black carbon by 50 percent below 2013 levels by 2030.

For the solid waste sector, the final bill:

- Establishes a target of 50 percent reduction in the statewide disposal of organic waste from the 2014 level by 2020 and a 75 percent reduction goal by 2025 and requires CalRecycle and CARB to adopt regulations to achieve the organic waste reduction targets. The requirements are reductions from CARB's original proposal to divert nearly all organic waste.
- The bill prohibits CalRecycle and CARB from establishing numeric organic waste disposal limits for individual landfills.
- Authorizes CalRecycle and CARB to:
 - Require local jurisdictions to impose requirements on generators, and penalties for noncompliance.
 - Include different levels of requirements for local jurisdictions and phased timelines for meeting 2020 and 2030 goals.

AB 32 Scoping Plan Update

The California Air Resources Board recently held a workshop to discuss the next AB 32 Scoping Plan update. Discussions were focused around how the state plans to achieve the ambitious 2030 GHG reduction targets.

At the workshop that focused mainly on transportation, officials outlined a suite of policies that could be included in the Scoping Plan Update including a vehicle miles traveled (VMT) fee to replace state gas taxes and the tightening of regional GHG limits. Creating "Low-Emission Zones" that establish stringent emissions standards for select types of heavy-duty vehicles within sensitive areas was also discussed.

CARB officials also confirmed that they intend to propose tightening regional, per-capita GHG targets for 2030 and 2050, by requiring metropolitan planning organizations throughout the state to adopt sustainable community strategies. While focused on mass transportation and housing, it is unclear how these targets might affect the wastewater and solid waste sectors in each region.

Additionally, the update is expected to include policies and processes for infrastructure siting that are consistent with the state's conservation, development and population health goals.

Regulations are expected to be adopted in early 2017.

Legislative Update

SB 552 (Wolk): Would authorize the State Water Resources Control Board to order consolidation where a public water system or a state small water system is serving, rather than within, a disadvantaged community, and would limit the authority of the state board to order consolidation or extension of service to provide that authority only with regard to a disadvantaged community. This bill would define disadvantaged community for these purposes, to mean if the community is in a mobile home park even if it is not in an unincorporated area or served by a mutual water company. This bill contains other related provisions and other existing laws.

Signed by the Governor.

SB 554 (Wolk): The measure extends a delta levee maintenance program which allows a local agency to request reimbursement for costs incurred in connection with the maintenance or improvement of project or nonproject levees in the Sacramento-San Joaquin Delta.

There is still opposition to the bill. MWD has asked the author to request an audit of the program, for the sake of transparency. The author has refused to do so.

Vetoed by the Governor.

AB 2480 (Bloom): The bill declares it to be state policy that source watersheds are recognized and defined as integral components of California's water infrastructure. The bill states the particular importance to maintaining the reliability, quantity, timing, and quality of California's environmental, drinking, and agricultural water supply as climate change advances of source watersheds that supply the majority of the state's drinking and irrigated agricultural water.
Signed by the Governor

Below are bills IEUA is tracking.

Comprehensive Government Relations

MEMORANDUM

To: Joe Grindstaff and Kathy Besser, IEUA

From: Letitia White, Jean Denton, and Drew Tatum

Date: September 30, 2016

Re: September Monthly Legislative Update

House, Senate Pass Water Infrastructure Bills in Hopes of Legislative Conference

The House overwhelmingly passed a \$5 billion update to the Water Resources Development Act (WRDA) in the final week of session before a pre-election recess. Consideration of the legislation came after negotiations surrounding the continuing resolution forced lawmakers to stay in Washington a week longer than they had previously hoped. While waiting on the Senate to send over an agreement on government funding for the beginning of FY 2017, the House brought up the water policy bill and considered a number of amendments, including a controversial provision to address water contamination in Flint, Michigan and other cities.

The House WRDA bill, which is nearly half the size of the Senate \$10.6 billion WRDA bill, did not contain language regarding lead contamination when it was advanced by the House Transportation and Infrastructure Committee because the jurisdiction for that authorization fell outside of the T&I Committee. As negotiations over the continuing resolution (CR) stalled in the Senate due to demands from Democratic Senators that it contain the Flint provisions, House and Senate leaders negotiated a compromise on the WRDA bill. Instead of addressing Flint in the CR, the House would make an amendment in order so that the Flint provisions could be added to the WRDA legislation. The House ultimately adopted the amendment authorizing \$170 million in funding on a 284-141 vote to allow communities facing water contamination emergencies to tap into federal resources and funding.

In the months long debate over whether to use federal dollars to help Flint, Republican lawmakers have contended that the city's problem is a state and local responsibility, and many fear that lending a hand to fix the Flint water system will set a dangerous and costly precedent for other broken water systems across the country. EPA Administrator Gina McCarthy said in March that there are 10 million lead water lines across the country that need to be treated or replaced. A 2012 estimate that the cost of completing backlogged water infrastructure maintenance projects would range from \$300 billion to \$600 billion.

The Senate considered its own Water Resources Development Act legislation earlier in September, passing it on a bipartisan vote of 95-3. The legislation authorizes 30 water projects, including watershed restoration efforts, repairs and improvements to waterways and flood-control systems, and EPA drinking-water infrastructure programs.

Innovative Federal Strategies LLC

In both the House and Senate bills, the Flint provisions are largely made up of congressionally established loan programs. For decades, municipal drinking water projects all over the country have been financed by federal-state revolving loan funds. Those funds would receive much of the aid proposed for Flint. In the case of the Senate bill, approximately \$50 million would be made available in the form of grants to establish long-term health monitoring programs that public health experts say are needed because the effects of lead poisoning in children can take years to become apparent.

While the House and Senate have not officially requested a conference with one another, it appears likely that staff from the House Transportation and Infrastructure Committee and the Senate Environment and Public Works Committee will use the October recess to begin negotiations on a compromise bill with the hopes of finalizing a conference agreement in the lame duck session for President Obama's signature.

Temporary Funding Bill Crosses the Finish Line

After weeks of negotiations on a path forward for federal funding, the House and Senate passed a bill that will keep the government funded through December 9. When lawmakers returned from the August recess there were only 4-weeks left until the end of the fiscal year. The Senate took the lead in negotiations for procedural reasons.

Negotiations started to break down during the last two weeks of the month leading Senate Majority Leader Mitch McConnell (R-KY) to file a substitute amendment that did not initially have bipartisan support. After it was introduced, Senate Appropriations Committee Ranking Member Barbara Mikulski (D-MD) came to the floor to criticize the continuing resolution package citing two objections from Democrats. First, Democrats wanted to see provisions to help Flint, Michigan included in the legislation if the federal government was going to provide emergency flood relief to other states in the CR. Additionally, Democrats cited objections to language that would block the implementation of a Securities and Exchange Commission Rule regarding corporate political disclosures.

Since Republicans did not have 60-votes in the Senate, they were not able to overcome roadblocks from Democrats without coming to an agreement on funding for Flint, Michigan. After an agreement was reached to attach the Flint provisions to the House WRDA bill, Republicans and Democrats agreed to quickly move the continuing resolution package, which required cooperation from all Senators.

In preparation of the continuing resolution package coming from the Senate, the House Rules Committee acted twice to give the House "same day" authority to consider a bill on the same day it was reported by the committee. Unless legislation is passed under a suspension of the rules, which requires a 2/3 vote of the House, bills are typically subject to a 3-day rule before the measure can be brought to the floor. The original authority expired on September 27, but the Rules Committee extended the authority through September 30 after the Senate was delayed in sending over the legislation. The House on a 342-85 vote easily passed the continuing resolution late Wednesday, clearing the measure for President Barack Obama's signature with two days to spare before a government shutdown.

Innovative Federal Strategies LLC

The final legislative package contained a continuing resolution through December 9 with an across the board reduction in current spending levels of 0.496%. Additionally, the package contains \$1.1 billion in supplemental funding to combat the Zika virus, emergency supplemental funding in the form of Community Development Block Grants for flood relief in Louisiana, West Virginia, and Maryland, and the conferenced full-fiscal year 2017 Military Construction and Veterans Affairs Appropriations Act. The inclusion of the Military Construction and Veterans Affairs Appropriations bill marks the first time since 2006 that a full year appropriations bill has been passed by Congress before the beginning of the fiscal year.

President Obama signed the continuing resolution package into law on Thursday, September 29. Though the White House had initially expressed some concerns over the legislation, the administration put out a Statement of Administration Policy supporting the package after lawmakers reached an agreement to address water contamination in Flint, Michigan.

Outlook for October

All is quiet at the Capitol building as lawmakers have left town for a 6-week recess leading up to the election. Both the House and Senate are scheduled to return on Monday, November 14 after Veterans Day.

The Senate is scheduled to hold pro-forma sessions every few days during the recess to block President Obama from making recess appointments, but no legislative activity will take place during those sessions.

Looking forward toward the lame duck session, lawmakers will have several high profile items to address before the end of the year. Those items include:

- Addressing federal government funding beyond December 9 when the current continuing resolution expires;
- Conferencing the National Defense Authorization Act;
- Conferencing the Water Resources Development Act;
- Conferencing the Energy Policy Modernization Act; and
- Passing other non-controversial bills that have been backlogged in the Senate.

Date: October 19, 2016

To: The Honorable Board of Directors

Through: Public, Legislative Affairs and Water Resources Committee (10/12/16)

From: P. Joseph Grindstaff
General Manager

Submitted by: Kathy Besser
Manager of External Affairs

Subject: Public Outreach and Communication

RECOMMENDATION

This is an informational item for the Board of Directors to receive and file.

BACKGROUND

October

- October 13, Water Association Leadership Breakfast (Speaker: Charles Wilson, Southern California Water Committee), IEUA HQB, 7:30 a.m.
- October 20, Battery Storage Project Dedication, RP-5, 11 a.m.
- October 29, Landscape and Water Conservation Festival, Chino Basin Water Conservation District - 4594 San Bernardino St, Montclair, CA 91763, 9 a.m. – 2 p.m.

December

- December 8, Water is Life Student Recognition Event, MWD Headquarters, 9:30 a.m.
- December 21, IEUA Holiday Luncheon, Los Serranos Country Club, 15656 Yorba Avenue, Chino Hills, 11:30 a.m.

Outreach/Education - Civic Publications Newspaper Campaign

- IEUA is working with Civic Publications to update the KickWaterWaste.com micro-site.
- IEUA is working with Civic Publications to create and distribute a fall email blast focused on not “falling back” into water wasting habits.
- IEUA will run two ads in the Daily Bulletin for the Landscape and Water Conservation Festival.
- IEUA will run an ad in the sustainability section of the Daily Bulletin on October 30.

Media and Outreach

- IEUA is continuing to run banner ads through Fontana Herald News and La Opinión newspapers.
- Staff has developed fall messages for the season that align with the *Kick the Habit* brand and include a fall theme. The tips focus on the State Water Resources Control Board's permanent restrictions following the Governor's Executive Order.
- A *Kick the Habit* ad will run in the *Champion Newspaper's* Connection magazine on November 5.
- In September, 27 items were posted to Facebook and 28 tweets were sent under the @IEUAWater Twitter handle.
- Staff is working on developing/updating all facility brochures.

Education and Outreach Updates

- Staff has begun working on marketing and scheduling Water Discovery field trips for program year 2016/17. To date, staff has scheduled 11 field trips and one educator's field trip with teachers from Fontana Unified School District.
- Staff has begun scheduling outreach/program meetings with principals within the service area for school year 2016/17. To date, staff has presented at principal meetings at Etiwanda School District on August 30 and Chaffey Joint Union High School District on September 22 to communicate IEUA's free education programs.
- IEUA will be sponsoring four teams this year for MWD's 2017 Solar Cup: Chino High School (Chino), Chino Hills High School (Chino Hills), Los Osos High School (Rancho), Henry J. Kaiser High School (Fontana). Schools will attend the first boat building workshop on November 6th and 7th.
- Staff is working in cooperation with Chino Basin Water Conservation District and member agency representatives to plan the Landscape Water Conservation Festival held annually in October. The Water Conservation Festival will be held Saturday, October 29, 2016.
- Staff has awarded four schools the Garden in Every School® water-wise grant for program year 2016/17. Schools awarded include: Arroyo Elementary in Ontario, Rolling Ridge Elementary in Chino Hills, Townsend Junior High School in Chino Hills, and Montclair High School in Montclair. Staff has begun conducting site inspections to determine prep-work, establish a design and schedule an installation timeline.

PRIOR BOARD ACTION

None.

IMPACT ON BUDGET

The above-mentioned activities are budgeted in the FY 2016/17 Administrative Service Fund, External Affairs Services budget.

IEUA WATER FORUM

SEPTEMBER/OCTOBER 2016

Local Initiatives for Drought Response

- IEUA is participating in a Water Data Summit at Stanford University Sept. 9. Other participants include agencies from southern and northern California, universities, State officials and technology companies.
- IEUA is monitoring State meetings on implementation of the Governor's Executive Order B-37-16, Making Conservation a Way of Life. The State will present and take comment on the Executive Order at a meeting Sept. 8 at MWD, 10:00-3:00 pm

Recycled Water Annual Report

- The 2015/16 Recycled Water Annual Report will be presented to the IEUA Board on September 21. The report highlights demands by use type, retail demands, customer demands and summarizes capital projects. FY 15/16 had 32,619 acre-feet of recycled water usage, which was 19,397 acre-feet of direct use and 13,222 acre-feet of recharge. The report is available on IEUA's website.

SARCCUP

- The Santa Ana River Conservation & Conjunctive Use Program (SARCCUP) is being implemented by the five member agencies of SAWPA with \$55 million in grant funding from California Department of Water Resources' (DWR). Total cost for SARCCUP is \$100 million with SAWPA member agencies each adding \$9 million in matching funds. The DWR grant contract should be finalized with SAWPA in September. Subagreements to member agencies will follow thereafter. CEQA evaluation for the program is in progress and will culminate in a programmatic EIR, to be completed by spring 2017.

WUE Programs Snapshot

- The annual FY 15/16 Water Use Efficiency Programs Report has been completed and will be presented to the Board for approval on October 19, 2016. The regional water use for FY 15/16 was 156,973 AFY, a record low. This is the lowest recorded water use for the region since 1995.
- MWD Turf Removal Rebate Program: In June, MWD activated approvals for customers who had been "wait listed" in July/August 2015. To date, 284 residential and 33 commercial, industrial, and institutional applicants have been approved to move forward with their projects. There are currently a total of 68 applications on hold pending additional information needed from the customers.
- The Agency launched a new Pilot Home Pressure Regulation Program in June. The Program proposes to reach 500 residential sites in high pressure zones throughout the service area and correct high pressure problems either by making adjustments or installing a new regulator. Many colleague agencies are very interested in the results of this program, and MWD has offered to provide additional funding to increase augmentation of program costs and to evaluate the program results.

Water Resources Planning Activities

- Integrated Resources Plan: The 2015 IRP Phase 1 report has been finalized and is available on the IEUA website. Conceptual projects identified through the Phase 1 IRP will be incorporated into the IEUA Regional Programmatic Environmental Impact Report to ensure that projects are grant eligible. Phase 2 of the IRP, which will address additional detailed project level analysis, including project scopes, costs, prioritization and implementation scheduling began in July. Discussion with member agencies will begin in the fall.

Regional Water Use

MWD Dashboard

- **Notice for Rialto Pipeline Shutdown:** MWD will inspect the pipeline to determine the condition of the pre-stressed rings. The shutdown is scheduled for November 14-19, 2016 and will commence at 12:01am. Pending results of the inspection, MWD could schedule another shutdown for repair work during first quarter of CY2017.
- **Regional RW Supply Program Update:** MWD to complete demo plant design, infrastructure feasibility and financial evaluation studies by November 2016. At this time, MWD staff will provide recommendation to the Board on pursuing the full-scale program.

Calendar of Upcoming Meetings & Events

September 21, 2016	Water Managers Meeting
October 11, 2016	Regional Conservation Partnership Workgroup Meeting
October 26, 2016	Water Managers Meeting
October 29, 2016	10th Annual Landscape & Water Conservation Festival

CHINO BASIN WATERMASTER

IV. INFORMATION

2. RMPU Status Report

2013 Amendment to 2010 RMPU Implementation Status Report – October 2016

Schedule:

STATUS

In April 2015, the 2013 Amendment to 2010 Recharge Master Plan Update Steering Committee was merged with the IEUA/Watermaster Joint Projects Committee meeting and later renamed the Recharge Investigations and Projects Committee (RIPCom), and meets monthly. This was done so that progress on all recharge projects, including prior projects, RMPU Sustainability and Yield Enhancement projects, and potential new projects could be reviewed by all Pool representatives before making a recommendation to their respective Pools. Progress on all projects are reported separately.

Year 1-2014

Yield Enhancement Projects: Contact Sand and Gravel Companies

IEUA, with the help of Watermaster stakeholders, has developed a list of haulers who may be interested in the dirt removal. Following the approval of a project's Preliminary Design Report (PDR), contact with the Sand and Gravel companies will be made. There are a few concerns to be addressed. Most companies prefer not to be tied to an IEUA/Watermaster schedule, rather, they would prefer to be driven by the needs of development-related construction projects. IEUA estimates having 12 potential companies interested in dirt hauling, however, the number may fluctuate as demands and future schedules change.

Yield Enhancement Projects: Develop Watermaster and IEUA Yield Enhancement Project Implementation Agreement

This was completed, and the Master Agreement and Task Orders have been signed by both IEUA and Watermaster Boards.

Yield Enhancement Projects: Consider Appropriative Pool New Yield Cost Allocation Agreement

Within the Safe Yield Reset effort, it was determined that the stormwater yield from the RMPU projects will initially be part of the New Yield allocation. The cost sharing will be based on the Operating Safe Yield percentage, with an opt-out provision that would allow Fontana Water Company the first chance at that water. Section 5.1 of the 2015 Safe Yield Reset Agreement further describes the mechanisms for accounting and allocation among the Appropriative Pool Parties.

Yield Enhancement Projects: Develop Flood Control and Water Conservation Agreement

IEUA and Watermaster have met and exchanged correspondence with the San Bernardino County Flood Control District (SBCFCD) to expand the Four Party Agreement to include all facilities necessary for RMPU Implementation. IEUA, Watermaster, and SBCFCD have also met to discuss SBCFCD's anticipated permit conditions for the RMPU projects so that there would be minimal or no impact to the RMPU projects scope, budget, or schedule. IEUA and Watermaster have also met with Chino Basin Water Conservation District (CBWCD) to discuss the CBWCD facilities that are involved in the RMPU Implementation. As of October 2016, negotiations are ongoing.

Yield Enhancement Projects: Agreement with Property Owners

Contact with SBCFCD and CBWCD has been made through the above-mentioned process. The Sierra Basin is no longer considered a potential project due to the City of Fontana's intent to repurpose that property in the future. The Lower San Sevine (PID 17) property was sold at auction; status is "ongoing due diligence by potential buyer" until May 2017. IEUA is working with California Steel Industries (CSI) on a wastewater issue and is discussing the terms of using that recharge basin for the project contemplated in the RMPU. CSI has expressed

interest in recharging the basin with stormwater, recycled water, and other sources of supplemental water. As of October 2016, discussions are ongoing.

Years 2 and 3 -2015 and 2016

Yield Enhancement Projects: Prepare Preliminary Design of Recommended Yield Enhancement Projects

The Preliminary Design effort has begun and is reported separately for each individual project and has been posted on Watermaster's FTP site and also accessible at this link:

[http://www.cbwm.org/FTP/Recharge%20Investigations%20and%20Projects%20Committee%20\(RIPCom\)/Project%20PDRs/](http://www.cbwm.org/FTP/Recharge%20Investigations%20and%20Projects%20Committee%20(RIPCom)/Project%20PDRs/)

The most recent report for the RMPU projects is being presented to the Pools in October 2016 for information and discussion. The report will be presented to the Pools, Advisory, and the Board in November for final selection/approval.

Yield Enhancement Projects: Prepare Environmental Documentation for Yield Enhancement Projects

The required environmental documents for the San Sevaine Basin RMPU Project was completed on January 2016, through an IEUA Board adoption of a mitigated negative declaration on the proposed project. The required environmental documents for Lower Day Basin RMPU Project will have a similar find and action. The IEUA Board adopted the findings on April 20, 2016. The remaining RMPU projects will be addressed separately through a programmatic environmental impact report on the proposed planning level projects within the RMPU document. A report is scheduled to be completed by March 2017.

Financing Plan

The 2013 RMPU Master Plan Update Financing Plan was approved on May 26, 2016 by the Watermaster Board. The Plan is posted on Watermaster's FTP site and also accessible at this link:

[http://www.cbwm.org/FTP/Recharge%20Investigations%20and%20Projects%20Committee%20\(RIPCom\)/RMPU%20Agreements/20160512%20Financing%20Plan%20for%20the%202013%20RMPU.pdf](http://www.cbwm.org/FTP/Recharge%20Investigations%20and%20Projects%20Committee%20(RIPCom)/RMPU%20Agreements/20160512%20Financing%20Plan%20for%20the%202013%20RMPU.pdf)

Years 3 and 4-2016 and 2017

Prepare Final Designs and Acquire Necessary Permits for Yield Enhancement

As of July 2016, the Final Designs for the RMPU projects will be completed by the end of 2017. San Sevaine and Lower Day projects are on an accelerated schedule; Final Design will be completed by August 2016 and April 2017, respectively.

Years 5 and 6- 2018 and 2019

Construct 2013 RMPU Amendment Yield Enhancement Projects

Construction of the selected RMPU projects after Final Design are anticipated to be completed by the end of 2019.

Monitoring, Reporting, and Accounting Long-Term Average Net New Stormwater Recharge

The due date for the third round of requests for Water Quality Management Plan (WQMPs), Design Reports, and As-Built drawings for new projects and projects built between Fiscal Years 2011 and 2016 is October 31, 2016. As of October 2016, Watermaster is working with WEI to analyze the data received.

Sustainability Projects:

Effort is underway. JCSD is the lead on this and is working with IEUA, Ontario, MVWD, and FWC to refine sustainability project opportunities. JCSD began receiving water from the City of Ontario in April 2015 per the Ontario-Jurupa In lieu Sustainability Project Agreement. With this agreement, JCSD will receive 2,000 acre-feet of Ontario's CDA allotment of water in exchange for the purchase of an equal quantity of imported water from the WFA plant for use by the City of Ontario. JCSD is also exploring other sources of imported water beyond Metropolitan Water District to diversify its water source portfolio.

The joint Vulcan/FWC project at the Vulcan Recharge Basin anticipated recharge in the Basin in early September 2015, however, due to some logistical issues it was delayed until December 21, 2015. In February 2016, Vulcan/FWC completed its 100 acre-feet recharge project. The exact amount recharged was 100.006 acre-feet. Further recharge is not anticipated until the winter of 2017.

CHINO BASIN WATERMASTER

IV. INFORMATION

3. Ground-Level Monitoring Status Report

Quarterly Status Report

Ground-Level Monitoring Committee

July – September 2016

This quarterly status report describes the background of the Ground-Level Monitoring Program (GLMP), the main activities conducted for the GLMP and by the Ground-Level Monitoring Committee (Committee) for the period July-September 2016, and the main activities planned for the period October-December 2016.

Background

Historically, the utilization of the Chino Basin has inadvertently resulted in land subsidence and ground fissuring. Pursuant the OBMP Implementation Plan, the Watermaster developed and implements the Chino Basin Subsidence Management Plan (SMP). The objective of the SMP is to minimize or abate the occurrence of land subsidence and ground fissuring.

The SMP identifies four “Areas of Subsidence Concern” and the MZ-1 Managed Area within the Chino Basin. Figure 1 shows the locations of these areas. These are areas where land subsidence and ground fissuring have historically occurred or where the underlying hydrogeologic conditions makes these areas susceptible to land subsidence and ground fissuring. In the MZ-1 Managed Area, the Watermaster has conducted monitoring and testing programs, and has developed Management Criteria for the groundwater producers within the area to minimize or abate the future occurrence of land subsidence and ground fissuring. The Management Criteria consists of the following main elements:

- a list of production wells in the MZ-1 Managed Area that are subject to the SMP.
- an index water level measured in Watermaster’s PA-7 piezometer at Ayala Park. The index level is called the Guidance Level.
- a Watermaster recommendation that the well owners collectively manage their production so that the water level in the PA-7 piezometer remains above the Guidance Level.

The SMP also calls for:

1. an ongoing monitoring and reporting program to verify the protective nature of the SMP and identify new threats or occurrences of land subsidence.
2. a process to adjust the SMP to minimize or abate land subsidence and ground fissuring.

Since the initial SMP was adopted by the Watermaster in 2007, Watermaster has conducted the annual GLMP to implement the monitoring and reporting program (No. 1 above).

The main activities of the GLMP include:

- Setup and Maintenance of Monitoring Facilities
- Monitoring and Testing
- Data Analysis and Reporting
- Ground-Level Monitoring Committee (Committee) Meetings

The main results of the GLMP have been:

- Very little permanent land subsidence has occurred in the MZ-1 Managed Area, which indicates that subsidence is being successfully managed in this area.

Quarterly Status Report

Ground-Level Monitoring Committee

July – September 2016

- Land subsidence has been occurring in the Northwest MZ-1 Area (Northwest MZ-1). Of particular concern is that subsidence in Northwest MZ-1 has occurred differentially across the San Jose Fault and in other areas—the same pattern of differential subsidence that occurred in the MZ-1 Managed Area during the time of ground fissuring.

Based on these results, the Watermaster determined that the SMP needs to be updated to include a *Subsidence Management Plan for the Northwest MZ-1 Area* with the long-term objective to minimize or abate the occurrence of the differential land subsidence. To assist in this update, the GLMP has been expanded in Northwest MZ-1. The SMP was updated in 2015 to include the *Work Plan to Develop a Subsidence Management Plan for the Northwest MZ-1 Area* (Work Plan). The Work Plan includes eleven tasks that include investigations, construction of monitoring facilities, monitoring and testing programs, modeling, and reporting. Tasks 1 through 5 and 11, or portions thereof, are planned for FY 2016-17. These Tasks include:

- Task 1: Describe the Initial Hydrogeologic Conceptual Model and the Monitoring and Testing Program
- Task 2: Implement the Initial Monitoring and Testing Program
- Task 3: Develop and Evaluate the Baseline Management Alternative
- Task 4: Develop and Evaluate the Initial Subsidence-Management Alternative
- Task 5: Design and Install the Pomona Extensometer Facility
- Task 11: Meetings and Administration

Activities Performed from July - September 2016

Setup and Maintenance of Monitoring Facilities

- Performed monthly routine maintenance, data collection, and verification at the Ayala Park Extensometer and Chino Creek Extensometer facilities.
- Repaired a transducer in PC-4 at Ayala Park that was malfunctioning.
- *Northwest MZ-1 Area Investigation:*
 - Coordinated with the Monte Vista Water District and the City of Pomona to determine the modifications needed for collection of groundwater-level and production data from their wells for the monitoring program.

Monitoring and Testing

- Performed quarterly collection, processing, checking, and storing of piezometric and aquifer-system deformation data from the wells and the Ayala Park and Chino Creek extensometer facilities shown on Figure 1.
- Collected InSAR data for western Chino Basin from the German Aerospace Center's TerraSAR-X satellite.
- *Long-Term Pumping Test in the MZ-1 Managed Area.* The Long-Term Pumping Test, described in

Quarterly Status Report

Ground-Level Monitoring Committee

July – September 2016

the SMP, was developed by the Committee to test and refine the Guidance Level for the Managed Area. The test requires that the City of Chino Hills simultaneously pump wells CH-15B and CH-17 to cause water levels at PA-7 to decline below the Guidance Level. The recovery phase of the Long-Term Pumping Test includes groundwater injection cycles at the City of Chino Hills' well CH-16. Both CH-15B and CH-16 require physical improvements to function in the Long-Term Pumping Test. The following work was performed for the Long-Term Pumping Test during the reporting period:

- The City of Chino Hills cleaned and reinstalled the resin into the vessels at CH-15B. No significant pumping occurred at the wells in the MZ-1 Managed Area that resulted in water levels to decline below the Guidance Level at PA-7.
- *Northwest MZ-1 Area Investigation:*
 - Collected, processed and checked groundwater level data and production data from wells in the study area.

Data Analysis and Reporting

- *2015 Annual Report of the Ground-Level Monitoring Committee:*
 - Distributed the draft-final Annual Report to the Committee for review and comments on August 19, 2016.
 - Discussed the main results, conclusions and recommendations, and comments received from the Committee, and the responses to those comments, at the Appropriative Pool Committee meeting on September 8, 2016.
 - Discussed the comments received from the Committee, and the responses to those comments, at the Committee meeting on September 22, 2016.
 - *Prepared red-line and clean versions of the final Annual Report for distribution with the October Pool meeting packet.*
- *Northwest MZ-1 Area Investigation:*
 - Prepared text, tables, and figures and performed internal review for the draft report titled, *Initial Hydrogeologic Conceptual Model and the Monitoring and Testing Program for the Northwest MZ-1 Area*. The report describes the hydrogeological information that is known and required to develop a SMP for Northwest MZ-1.
 - Prepared, text, tables, and figures for the draft technical memorandum titled, *Development and Characterization of the Baseline Management Alternative for the Northwest MZ-1 Area*.

Meetings of the Ground-Level Monitoring Committee

A meeting of the Committee was conducted on September 22, 2016. The meeting agenda included the following items:

- Reviewed the main results and conclusions from the 2015 Annual Report.
- Reviewed comments and responses on the 2015 Annual Report.

Quarterly Status Report

Ground-Level Monitoring Committee

July – September 2016

- Discussed the scope and schedule for the Ground-Level Monitoring Program for FY 2016-17.

Activities Planned for October - December 2016

Setup and Maintenance of Monitoring Facilities

- Perform monthly routine maintenance, data collection, and verification at the Ayala Park Extensometer and Chino Creek Extensometer facilities.
- *Northwest MZ-1 Area Investigation:*
 - Coordinate with the Monte Vista Water District and the City of Pomona to determine necessary modifications to facilitate collection of groundwater levels and production data from wells in the study area.

Monitoring and Testing

- Perform quarterly collection, processing, checking, and storing of piezometric and aquifer-system deformation data from the wells and extensometers shown on Figure 1.
- Collect InSAR data across the western Chino Basin from the German Aerospace Center's TerraSAR-X satellite.
- *Long-Term Pumping Test in the MZ-1 Managed Area:*
 - The City of Chino Hills plans to install new wellhead-treatment filters at well CH-15B in an effort to prepare this well to pump groundwater.
 - The City of Chino Hills plans to release an RFP for modifications to the water delivery pipeline to the CH-16 well.
- *Northwest MZ-1 Area Investigation:*
 - Continue to implement the Initial Monitoring Program at wells in and around Northwest MZ-1. Pressure transducers are used to monitor groundwater levels in wells. Production data is collected and includes on/off times and production rates at production wells.
 - Utilize the one-dimensional aquifer-system compaction model with the Chino Basin Groundwater Model and Baseline Management Alternative to estimate future subsidence in the Northwest MZ-1 if the Chino Basin Parties operate without an SMP for the Northwest MZ-1. The estimate of future subsidence using the one-dimensional aquifer-system compaction model and Chino Basin Groundwater Model will be finalized during FY 2016/17.

Data Analysis and Reporting

- The *2015 Annual Report of the Ground-Level Monitoring Committee* will be presented through the Watermaster Pool process for approval during October 2016 and, when approved, submitted to the Court.
- Perform analysis of the DHX and electronic distance measurement (EDM) data collected in the Managed Area to date with respect to local groundwater levels and vertical ground motion

Quarterly Status Report
Ground-Level Monitoring Committee
July – September 2016

to assess the usefulness of the horizontal extensometer as a tool to measure ground motion and, if deemed useful, to determine a potential location for the re-installation of the DHX in the Managed Area.

- *Northwest MZ-1 Area Investigation:*
 - The draft technical memorandum titled *Initial Hydrogeologic Conceptual Model and the Monitoring and Testing Program for the Northwest MZ-1 Area* will be submitted to the Committee for review in October 2016. The final technical memorandum is scheduled to be published in November 2016.
 - Conduct a siting study to identify potential site(s) for the Pomona Extensometer facility. The potential sites(s) will be reviewed with the Committee.

Meetings of the Ground-Level Monitoring Committee

Two Committee meeting are anticipated during the period October through December 2016.

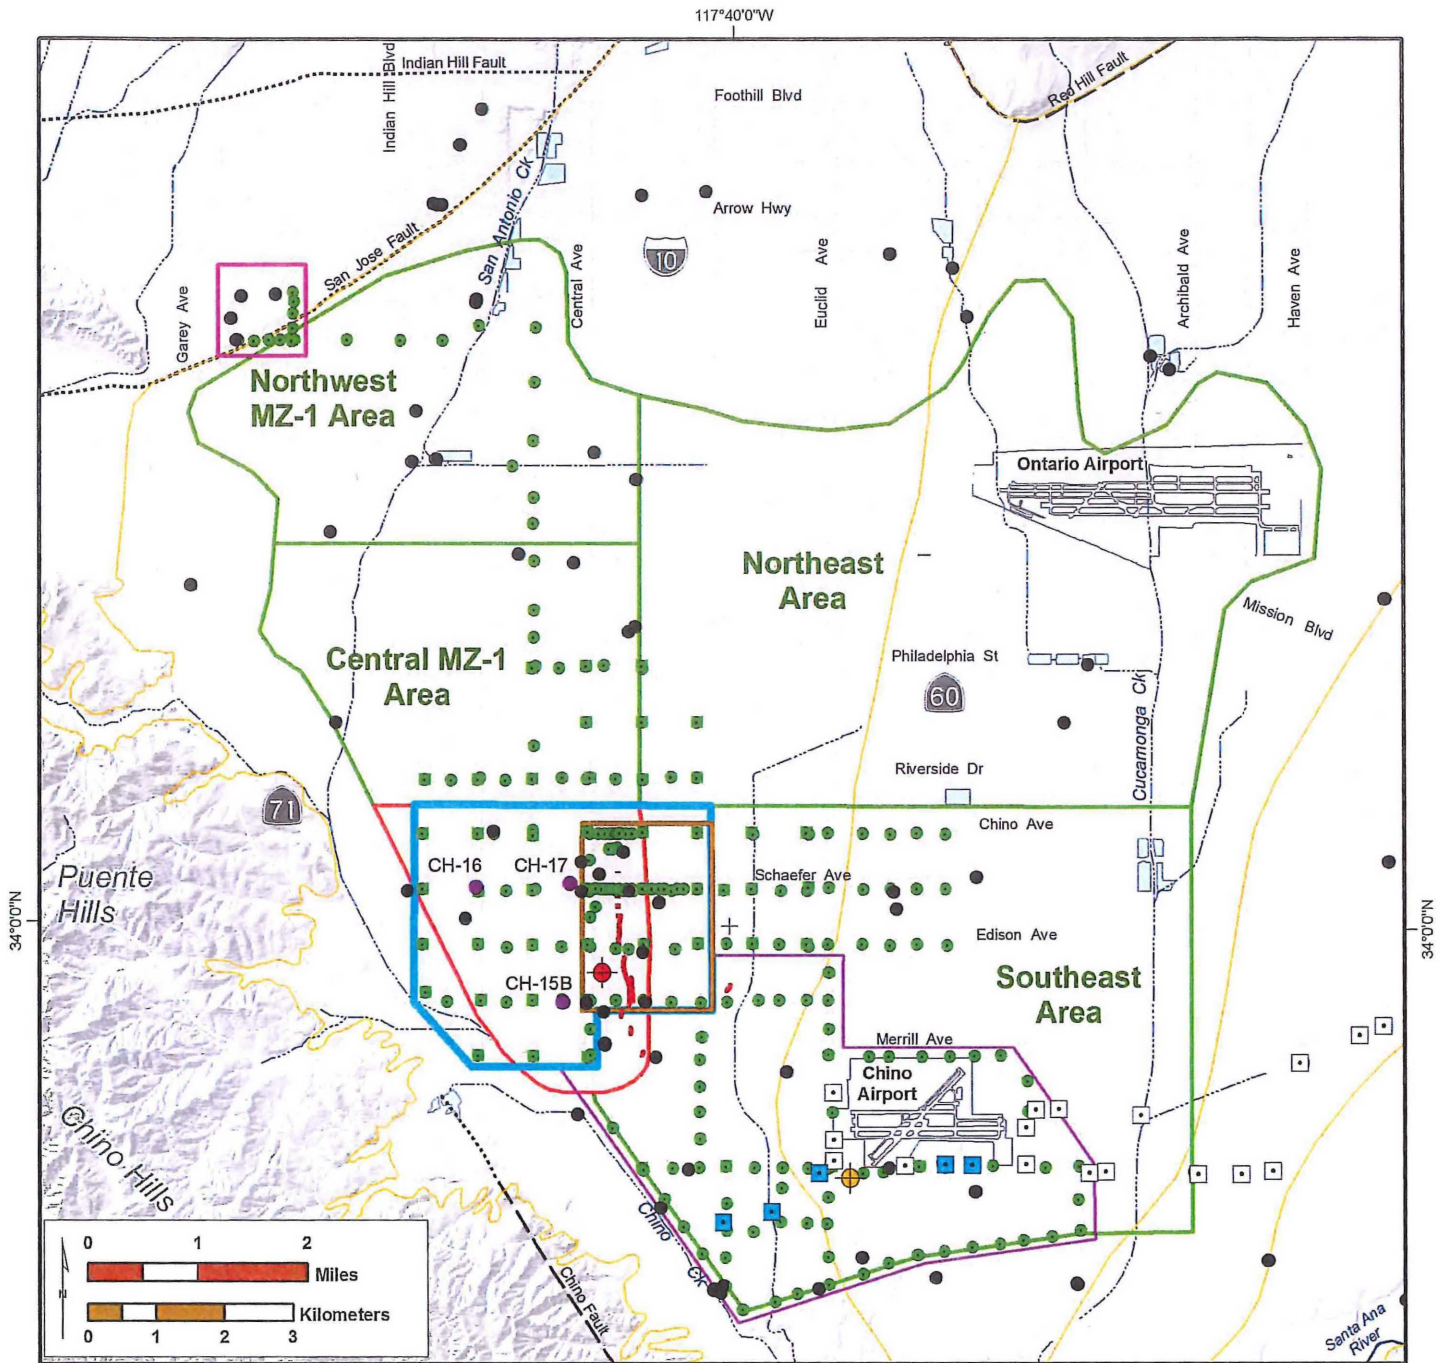

A meeting of the Committee is scheduled for *October 27, 2016 at 9:00 am*. The meeting agenda will include the following items:

- Review and discuss the results and conclusions from the draft *Initial Hydrologic Conceptual Model and Monitoring and Testing Program*.

A meeting of the Committee is scheduled for *December 1, 2016 at 10:30 am*. The meeting agenda will include the following items:

- Review and discuss the potential site(s) for the Pomona Extensometer facility.
- Review and discuss the draft task memorandum with the results, conclusions, and recommendations from the Initial Monitoring Program.

CHINO BASIN WATERMASTER

IV. INFORMATION

4. South Archibald and Chino Airport Plumes Status Report

Quarterly Status Report on the South Archibald TCE Plume – October 2016

Contaminant: The primary contaminant is Trichloroethene (TCE). The maximum contaminant level (MCL) for TCE is 5 micrograms per liter ($\mu\text{g/L}$). The maximum TCE concentration detected in a groundwater sample collected from wells within the plume during the last five years (2011 to 2015) is 90 $\mu\text{g/L}$.

Location: The South Archibald TCE plume is located in the southern Chino Basin within the City of Ontario. As delineated by the Chino Basin Watermaster (Watermaster) in 2015¹, the extent of the plume with detectable TCE concentrations is about 11,000 feet wide and 23,000 feet long, and extends from State Route 60 on the north to Bellegrave Ave. to the south, between Haven and Turner Avenues on the east, and Grove Avenue on the west. In 2014, several parties² delineated the extent of the plume area with TCE concentrations greater than or equal to 5 $\mu\text{g/L}$. Both plume delineations are shown in Exhibit 1.

Cleanup and Abatement Orders (CAOs): In 2005, the Santa Ana Regional Water Quality Control Board (Regional Board) issued six Draft CAOs to the Aerojet-General Corporation, The Boeing Company, Northrop Grumman Corporation, Lockheed Martin Corporation, General Electric Corporation and the United States Department of Defense; and in 2012 issued one Draft CAO jointly to the City of Ontario, City of Upland, and Inland Empire Utilities Agency (IEUA).

In 2016, the Regional Board issued final language for the Stipulated Settlement and CAO No. R8-2016-0016³ to the parties listed above, with the exception of Northrop Grumman Corporation. The final CAO will become effective pending all identified parties' signatures.

Regulatory and Monitoring History: In the mid-1980s, the Metropolitan Water District of Southern California determined that TCE was present in private wells in the southern Chino Basin as part of the work associated with the Chino Basin Storage Program. The Regional Board confirmed this with subsequent rounds of sampling.

The Regional Board issued Draft CAOs in 2005 for six different parties who were tenants on the Ontario Airport property. On a voluntary basis, four of the parties—Aerojet-General Corporation, The Boeing Company, General Electric Company, and Lockheed Martin Corporation, collectively ABGL parties, worked together, along with the U.S. Department of Defense, to investigate the source of the contamination. Part of the investigations included collecting water-quality samples from private wells and taps at residences, and the construction and sampling of four triple-nested monitoring wells. Alternative water systems were provided at private residences in the area where groundwater was contaminated with TCE.

In 2008, Regional Board staff conducted research pertaining to the likely source of the TCE contamination and identified discharges of wastewater that may have contained TCE to the RP-1 treatment plant and

City of Ontario, City of Upland and Inland Empire Utilities Agency, Aerojet Rocketdyne Inc., The Boeing Company, General Electric Company, Lockheed Martin Corporation and the United States of America, Former Ontario-Upland Sewage Treatment Plant (Regional Recycling Plant No. 1) City of Ontario.

Quarterly Status Report on the South Archibald TCE Plume – October 2016

associated disposal areas to be a potential source. The Regional Board identified several industries, including some previously identified tenants of the Ontario Airport property, that likely used TCE solvents before and during the early-1970s, and discharged wastes to the Cities of Ontario and Upland sewage systems tributary to the RP-1 treatment plant and disposal areas. In 2012, an additional Draft CAO was issued by the Regional Board jointly to the City of Ontario, City of Upland, and the IEUA as the previous and current operators of the RP-1 treatment plant and disposal area (collectively RP-1 parties).

Under the Regional Board's oversight, sampling at private residential wells and taps has been conducted approximately every two years (2007-08, 2009, 2011 and 2013-14) by multiple parties in the region where groundwater is potentially contaminated with TCE. As of 2014, all private wells and/or taps in the area of the plume have been sampled at least once since 2007. The most recent monitoring report with all this data was published in November 2014⁴. Alternate water systems (tanks) have been installed at residences in the area where well water contains TCE at or above 80 percent of the MCL for TCE (e.g. equal to or greater than 4 µg/L). Residents who declined tank systems are being provided bottled water.

Watermaster routinely samples private wells in the plume area for water quality. Watermaster also conducted two rounds of split sampling with ABGL parties: one in 2009 at the four multi-port ABGL monitoring wells, and one in 2011 at private residences' wells and taps. Watermaster uses data obtained from their own monitoring efforts to delineate the plume. The most recent characterization of the plume was completed by Watermaster in 2015 for the 2014 State of the Basin Report¹ (see Exhibit 1).

Recent Activity:

The RP-1 parties completed the Draft Feasibility Study Report for the South Archibald Plume (Feasibility Study) in July 2015⁵. The Feasibility Study establishes clean-up objectives for both domestic water supply and plume remediation, and evaluates alternatives to accomplish these objectives. A Draft Remedial Action Plan (RAP) was concurrently prepared by the RP-1 parties⁶ and published in August 2015. A public review period followed along with two community meetings convened in September 2015 to educate the public about the plume, the Feasibility Study and the RAP, and to solicit comments on these reports. A public repository of all pertinent documents is available online at <http://tceplumecleanup.com>. In November 2015 a revised Draft Feasibility Study⁷, RAP⁸, and Responses to Comments were completed to address input from the public, ABGL, and other parties.

The preferred plume remediation alternative identified in the Draft Feasibility Study and RAP involves the use of existing and proposed Chino Basin Desalter Authority (CDA) production wells and treatment

Quarterly Status Report on the South Archibald TCE Plume – October 2016

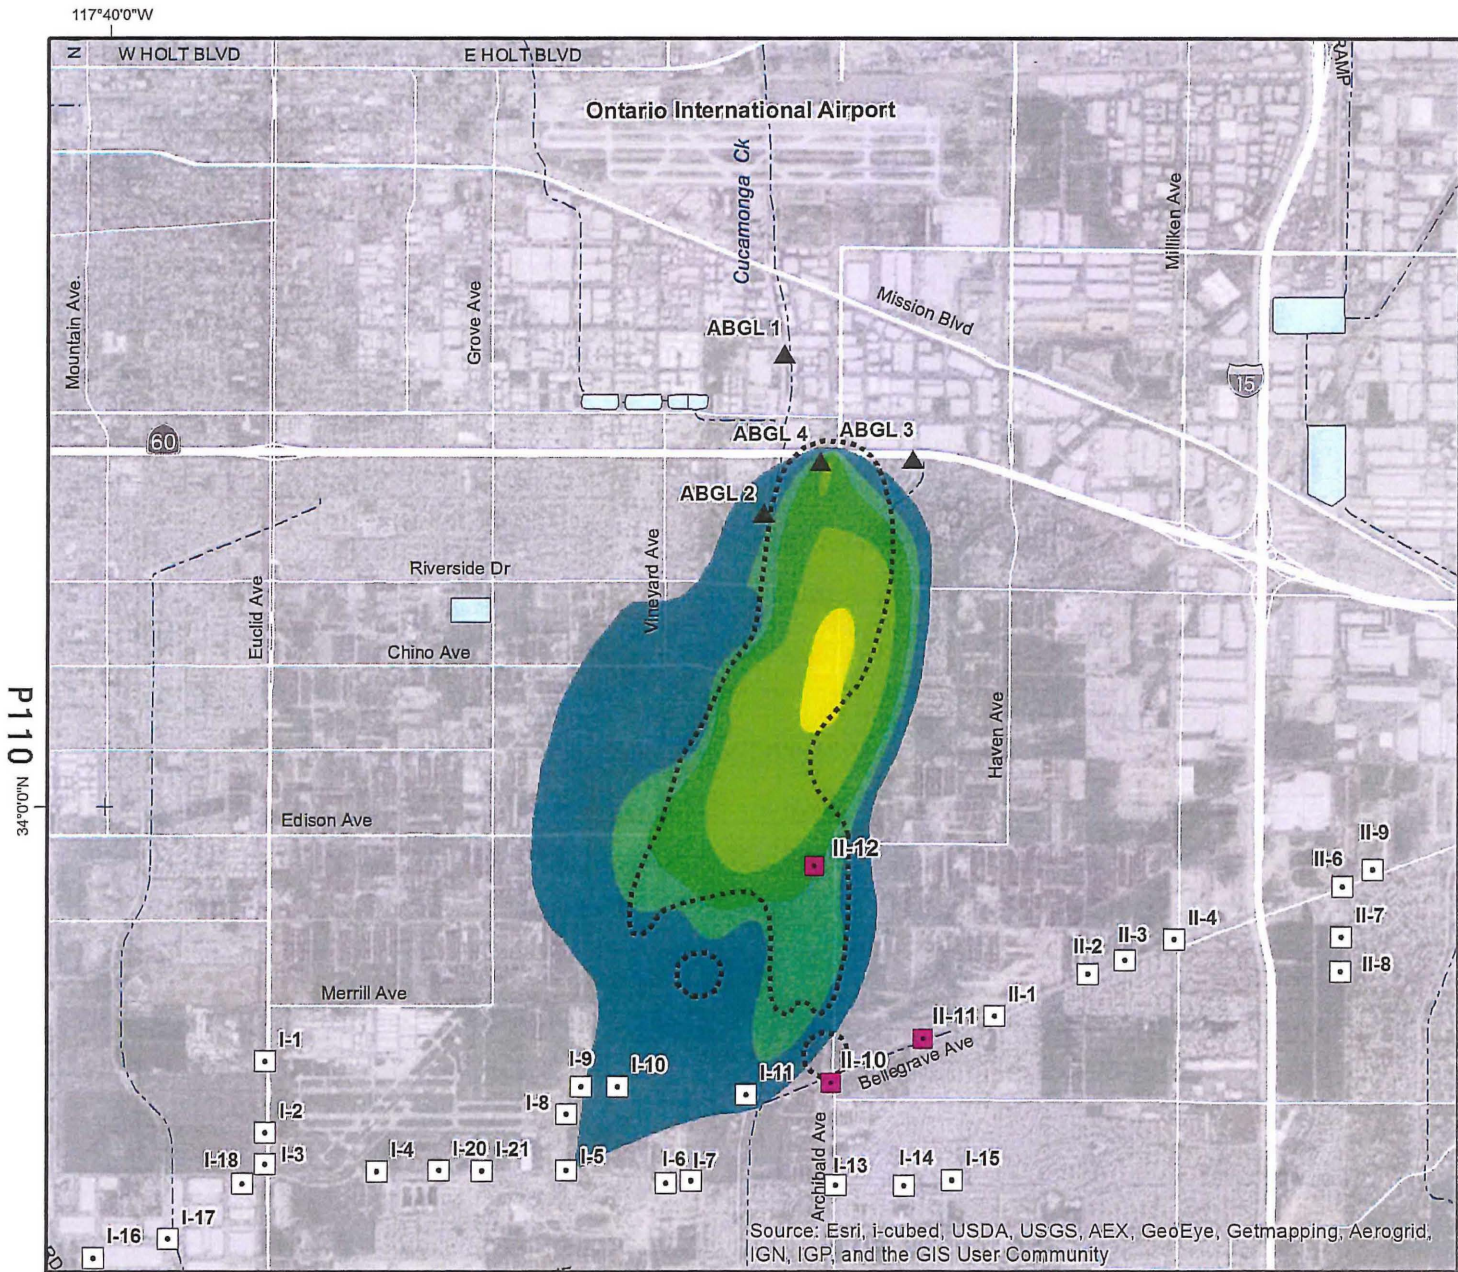

facilities. The RP-1 parties and the CDA reached a Joint Facility Development Agreement⁹ for implementation of a project designed to remediate the South Archibald Plume. The proposed project includes the construction and operation of three new CDA production wells, and a dedicated pipeline to convey groundwater produced from the three new wells and the existing CDA well I-11 to the Desalter II treatment facility.

The preferred domestic water supply alternative identified in the Feasibility Study and RAP for those residences affected by TCE contamination of groundwater associated with the plume, is a hybrid between the installation of tank systems for some residences, where water is delivered from the City of Ontario potable supply via truck deliveries, and installing a temporary pipeline to connect some residences to the City of Ontario potable water system. With the adoption of the Final CAO, the City of Ontario will assume the responsibility of implementing the preferred domestic water supply alternative.

The Regional Board issued the Final CAO in September 2016 collectively to the RP-1 parties and the ABGL parties except the Northrop Grumman Corporation. Settlement discussions are ongoing between the parties to whom the Final CAO has been issued. These discussions are near resolution, and a settlement agreement is anticipated in the last quarter of 2016. The adoption of the Final CAO by all identified parties will approve the preferred plume remediation and domestic water supply alternatives selected in the RAP. With the adoption of the Final CAO, the identified parties will authorize funding to initiate implementation of the preferred plume remediation alternative. Project design for the preferred plume remediation alternative is expected to begin in the first quarter of 2017.

CBWM Quarterly Status Report

South Archibald TCE Plume

Quarterly Status Report on the Chino Airport TCE Plume – October 2016

Contaminants: The primary contaminant is Trichloroethene (TCE). The maximum contaminant level for TCE is 5 micrograms per liter ($\mu\text{g/L}$). The maximum TCE concentration detected in a groundwater sample collected from wells within the plume area during the last five years (July 2011 to June 2016) is 830 $\mu\text{g/L}$. Other contaminants of concern include 1,2,3-trichloropropane, 1,2-dichloroethane, 1,1-dichloroethene, cis-1,2-dichloroethene, carbon tetrachloride, and 1,4-dioxane.

Location: The Chino Airport TCE Plume is located in the southwestern portion of the Chino Basin within the City of Chino (Exhibit 1). As delineated by the Chino Basin Watermaster (Watermaster) in 2015¹, the extent of the plume with detectable TCE concentrations greater than 0.5 $\mu\text{g/L}$ is about 3,500 feet wide and 12,500 feet long, extending from the Chino Airport towards the southwest to just below Pine Avenue. The County's most recent (2016) delineation of the extent of the plume with TCE concentrations greater than or equal to 5 $\mu\text{g/L}$ is also shown in Exhibit 1. Since 2015, the County recognizes two plumes originating from the Chino Airport; the West Plume and East Plume.

Cleanup and Abatement Orders (CAOs): The Santa Ana Regional Water Quality Control Board (Regional Board) issued CAO No. 90-134 and CAO No. R8-2008-0064 to the County.

Regulatory and Monitoring History: In 1990, the Regional Board issued CAO No. 90-134 to address groundwater contamination originating from the Chino Airport. From 1991 to 1992, ten inactive underground storage tanks and 310 containers of hazardous waste were removed, and 81 soil borings were drilled and sampled on the airport property. During 2003 to 2005, nine onsite monitoring wells were installed and used to collect groundwater quality samples. In 2007, the County conducted its first offsite monitoring effort, which included 22 cone penetrometer tests (CPT) and direct push borings from which water quality samples were collected. In 2008, the Regional Board issued CAO No. R8-2008-0064 requiring the County to define the lateral and vertical extent of the plume and to prepare a remedial action plan. From 2009 to 2012, 33 offsite monitoring wells were installed at 15 locations to characterize the extent of the contamination downgradient from the airport property.

From 2013 to 2014 the County conducted an extensive investigation of several areas identified for additional characterization of the soil and groundwater contamination associated with the Chino Airport. The investigative work included: piezocone-penetrometer tests; vertical-aquifer-profiling (VAP) borings with depth-discrete groundwater sampling; soil-gas probe sampling; high-resolution soil sampling and analysis; real-time data analysis; and three-dimensional contaminant distribution modeling. At the conclusion of this work, 33 groundwater monitoring wells were installed in 17 locations on and adjacent to the Airport property from September 2014 through February 2015.

The County conducts quarterly, annual, or biennial water-quality monitoring, and quarterly water-level monitoring at their 75 monitoring wells constructed to date. Conclusions from the monitoring program can be found in reports posted on the Regional Board's GeoTracker website². The most recent monitoring

Quarterly Status Report on the Chino Airport TCE Plume – October 2016

report submitted to the Regional Board was in September 2016³. The County characterizes the extent of the plume vertically in multiple cross-sectional views, and laterally in an areal view, using the data collected from their monitoring program. The most recent characterization of the TCE plume prepared by the County was in a 2016 monitoring report³. Exhibit 1 shows the areal extent of the plume as recently delineated by the County. No groundwater remediation activities have been performed yet by the County.

The Watermaster collects groundwater-quality samples from private wells in the plume area, and at its HCMP-4 monitoring well located in the southern portion of the plume. The Chino Basin Desalter Authority (CDA) collects groundwater-quality samples from its production wells located in the plume area. Watermaster uses data from the County, CDA, and their own sampling to perform an independent characterization of the areal extent and concentration of the TCE plume. The most recent characterization of the plume completed by Watermaster was in 2015 for the 2014 State of the Basin Report¹ and is shown on Exhibit 1.

Recent Activity: The County completed a Draft Feasibility Study⁴ for the Chino Airport in August 2016. The Feasibility Study identifies remedial action objectives for contaminated groundwater originating from the Chino Airport and evaluates remediation alternatives for mitigation. The recommend remediation alternative in the Feasibility Study is a groundwater pump-and-treat system to provide hydraulic containment and treatment of both the West Plume and East Plume originating from the Chino Airport. The system consists of seven extraction wells that will produce approximately 650 gallons per minute of groundwater for treatment onsite using carbon adsorption. An air stripper may be added to the system if found necessary. The preferred option for discharge of treated groundwater is to construct a pipeline to the onsite CDA Chino-I Desalter influent pipeline. If this discharge option is not available at the time of system construction the backup options are to discharge to the local surface waters or treatment plants, or to six injection wells at the northeast corner of the Chino Airport. Additionally, the County has proposed an interim remediation plan to construct a granular activated carbon wellhead treatment system at CDA well I-18 located at the center of the plume, which is currently not being used by the CDA for groundwater production for the Chino Desalters. The CDA is currently reviewing the proposed design and operations plan for this well-head treatment system. The Draft Feasibility Study will be finalized after comments from the Regional Board are received and adequately addressed.

CHINO BASIN WATERMASTER

IV. INFORMATION

5. FY 2016/17 First Interim Organization Performance Report

Chino Basin Watermaster: FY 2016-17 First Interim Organization Performance Report

Specific Goals from GM Performance Evaluation

- [1] Complete the Safe Yield Reset
In Progress; assisting the Court in finalizing Order.
- [2] Address Chino Basin storage issues
In light of the delay in the Court's decision on the 2015 SYRA and the referenced Storage Management Plan, staff and Counsel will evaluate storage issues and start processing these in the near term.
- [3] Implement the Recharge Master Plan Update according to the approved schedule
Ongoing. PDRs have been completed for the selected projects.
- [4] Support stakeholders, including Board Member education & training and support Pools collaboration
September Workshop was held to discuss roles and responsibilities.
- [5] Expand Watermaster presence in regional forums
SARCCUP is being developed and will provide a great forum for broader regional participation by Watermaster.
- [6] Catch up on delayed Annual Reports
In Progress; FY 2014/15 report is under preparation.
- [7] Effectively recruit for positions #9 and #10
In Progress; actively searching and interviewing for Position #9.
- [8] Create an Administrative Policies Manual (internal to the organization; not related to the Committees).
One Section adopted; reviewing the remaining sections over time.

GM activities

- Continuing outreach to Board and stakeholders
- Attended SARCCUP presentations
- Review and assist the Sustainable Water Management effort assessment
- Held regular coordination meetings with IEUA and CDA

Other activities

Safe Yield Reset: analyzed Tentative Order regarding the 2015 SYRA, and prepared clarification questions per the Court's direction. Preparing responses to questions as directed by the Judge.

Appropriative Pool Request: responded to AP concerns and held a workshop to discuss Committee and Board Roles and Responsibilities.

Supplemental Water Recharge Procedures: developed procedures to improve planning, coordination, and documentation of supplemental water recharge.

2015 Ground Level Monitoring Committee Report: the 2015 annual report of the Ground Level Monitoring Committee was prepared and presented for approval; this will be filed with the Court as required.

Prado Basin Adaptive Management Plan: the Prado Basin Habitat Sustainability Committee prepared the Prado Basin Adaptive Management Plan, and was approved by the Watermaster Board and the IEUA Board.

SGMA Compliance: the first annual report was filed with DWR, as required by SGMA. Discussions are continuing to address fringe areas that are created by the difference in the basin boundary as defined in Bulletin 118 and the Chino Basin Judgment.

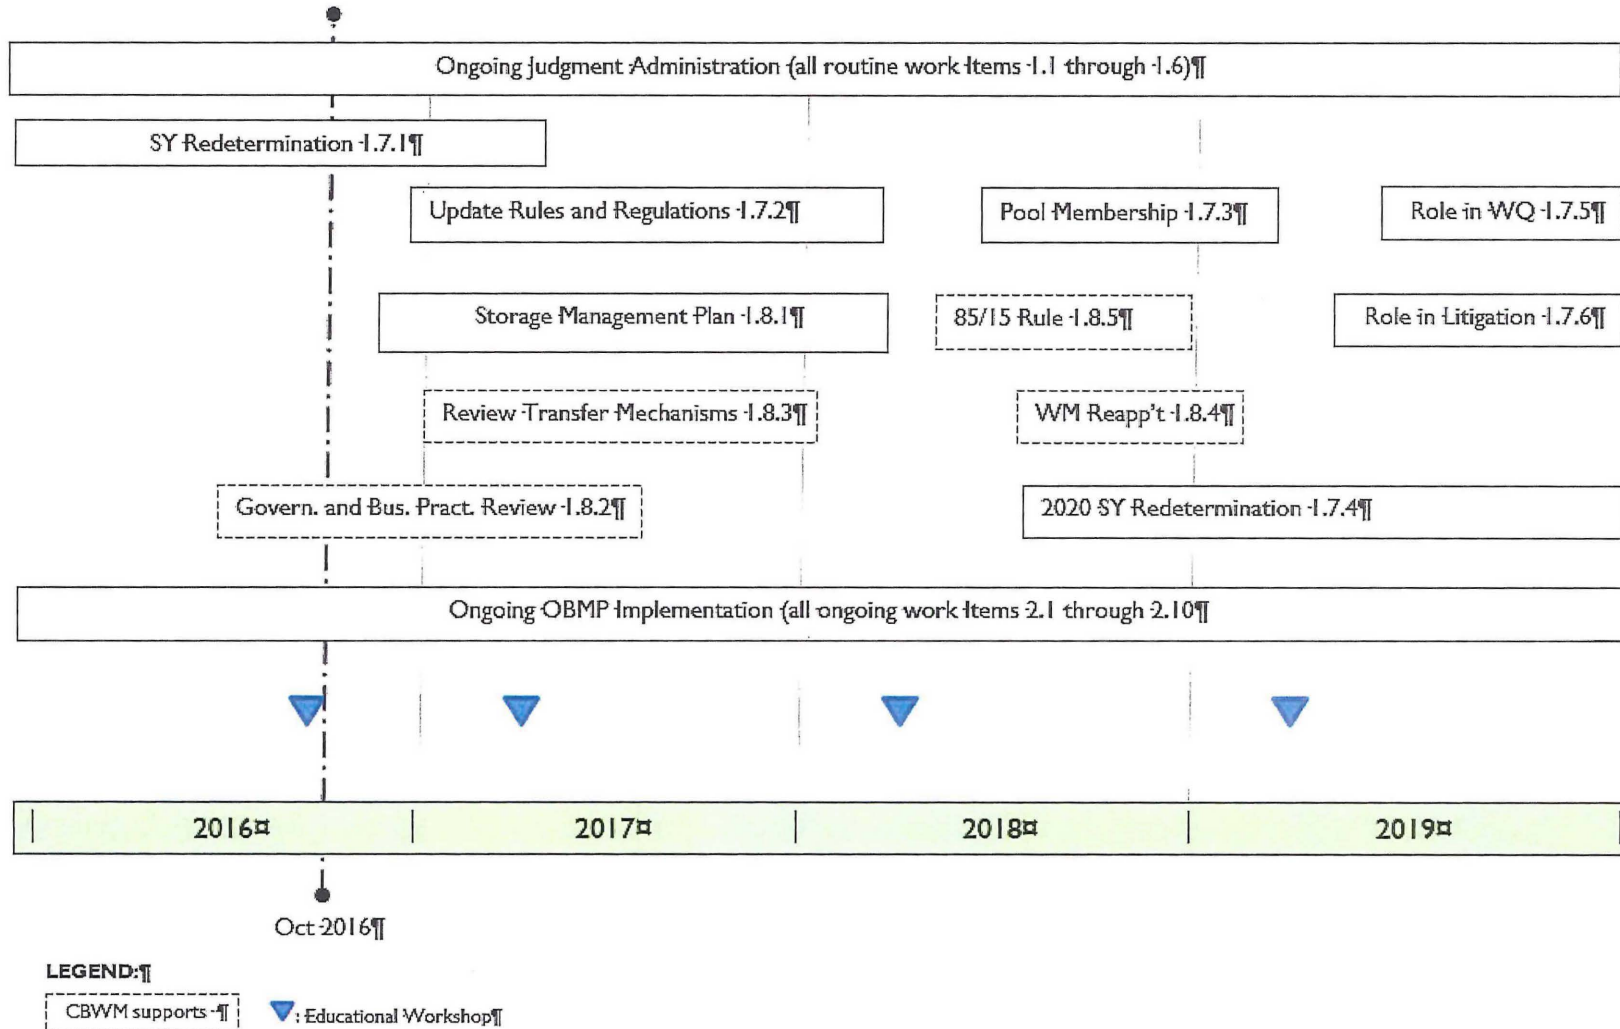

Pulse of the Organization

Personnel: Position #9 recruitment is ongoing; held job-related and CPR/AED/First Aid training for staff; continuing monthly all-hands meetings; team-building exercise in September.

Processes: evaluating contract management software; implementing Tasks & Obligations database; compiling procedures manual for all Watermaster internal procedures.

CBWM Business Plan Timeline

P116

October 2016
