

CHINO BASIN WATERMASTER

FISCAL YEAR 2013-14

37TH ANNUAL REPORT

REDUCING DEPENDENCE ON IMPORTED WATER

STEP-BY-STEP, WORKING TOGETHER TO PROTECT AND IMPROVE OUR JOINT WATER SUPPLIES

1970s

Conflicts over water threaten supply reliability, water quality, and the regional economy.

1973

Established a fund and implemented a pump tax to raise money to pay for studies that aid in implementing recharge programs in the Basin.

1978

Watermaster created. Water planning and funding are initiated to manage the Basin.

1999

Optimum Basin Management Program provides a detailed blueprint to ensure a reliable water supply and protect and enhance water quality.

2000 & 2007

Peace (I) and Peace II Agreements make effective collaboration possible, resulting in hundreds of millions of dollars in cost-savings and other benefits.

2004

Unique Maximum Benefit Salinity Management Program is Adopted. This enabled implementation of a massive Basin-wide recycled water reuse, stormwater and supplemental water recharge program, and expansion of the groundwater desalting program to achieve hydraulic control.

2008-2010

The **Recharge Master Plan Update (RMPU)** is a critical step to ensure long-term water quality and supply.

2011

Initiated Safe Yield redetermination process.

2013-2014

Completed the 2013 Amendment to the 2010 Recharge Master Plan Update (2013 RMPU), and is the new foundation to cost-effectively recharge stormwater, imported water and recycled water with the goal of improving water quality, and ensuring water supply reliability throughout the Basin into the future.

HIGHLIGHT OF A SUCCESSFUL YEAR: PROGRESS ON RECHARGE MASTER PLAN

A Message from Chino Basin Watermaster

SUCCESS IN REGIONAL WATER MANAGEMENT THROUGH OUTSTANDING TECHNICAL CAPABILITIES GUIDED BY COLLABORATIVE DECISION-MAKING

While we are justifiably proud of Chino Basin Watermaster's (CBWM) unmatched technical capabilities and understanding of the Basin, its biggest strength and source of success is our demonstrated ability to work together.

This has become more evident as the drought extends into a third year. Despite our location in a semi-arid desert, we have developed ample, high quality water supplies to meet the needs of citizens, public spaces, businesses and agriculture.

Our biggest priority for the second year in a row was to complete the 2013 Amendment to the Recharge Master Plan Update (2013 RMPU) on time. The work itself was immensely complex, technical, and time-consuming. But the results are concrete, forming the foundation of our comprehensive program to recharge local aquifers with stormwater, urban runoff, imported water and recycled water – and thereby ensuring ample water supplies into the future.

Another top priority for the year was to make progress on the multi-year effort to redetermine the Safe Yield. This complex effort began by recalibrating the groundwater model in 2011 and 2012. The Safe Yield was originally set by the Judgment at 140,000 acre-feet per year.

This redetermination poses special challenges for our parties since the Safe Yield is likely to decrease somewhat due to declining infiltration of stormwater into the ground, as the area is slowly developed and paved over. While it is never easy to accept decreases in water rights, I am confident that we will do it successfully and equitably – and then restore any reduction through our other programs.

Watermaster's extensive monitoring programs provide the data to produce a very well calibrated groundwater model. The model serves as a solid foundational tool for the Safe Yield redetermination, and was peer-reviewed by independent experts representing the Appropriative Pool.

This is further evidence that our strength lies in Watermaster's members' well-earned trust in each other, and our ability to work effectively together, to compromise where necessary, and collaborate.

Peter Kavounas, PE
General Manager, Chino Basin Watermaster

RECHARGE MASTER PLAN UPDATE TO BRING IMPROVED WATER SUPPLY, QUALITY AND COST SAVINGS

Victoria Groundwater Recharge Basin.

The 2013 Amendment to the 2010 Recharge Master Plan Update (2013 RMPU) was completed on schedule. It forms the foundation for Watermaster's comprehensive program to cost-effectively recharge stormwater, urban runoff, imported water, and recycled water with the goal of improving water quality, and ensuring water supply reliability throughout the Basin into the future.

2013 RECHARGE MASTER PLAN UPDATE AMENDMENT COMPLETED ON SCHEDULE

The Recharge Master Plan Update Steering Committee met on an accelerated schedule to complete the 2013 RMPU.

The 2013 RMPU report was approved by the Watermaster Board in September, filed with the Court in October, and approved by the Court in December 2013, with the exception of Section 5 of the Final Report that dealt with the accounting of new recharge from Municipal Separate Stormwater Sewer Systems (MS4). Approval was initially delayed due to a lawsuit seeking for individual entities to be able to earn credit for stormwater recharge. The challenges related to Section 5 were later resolved and approved by the court in April 2014.

Watermaster and the IEUA initiated a capital project to design and build a sound enclosure to maintain compliance with a local noise ordinance and reduce the impact of noise to nearby residents. The project budget is \$160,000.

2013 RMPU Projects Meet Criteria for Practicality and Cost-Effectiveness. Over 40 projects were considered in the 2013 RMPU using a variety of criteria that were customized based on the project type. The criteria include cost-effectiveness (with a preference for melded unit costs less than \$612 per acre-foot), magnitude of new recharge, implementation barriers, and the ability to meet specific needs in various parts of the Basin.

BEGAN IMPLEMENTING THE 2013 RMPU

Watermaster and the Inland Empire Utilities Agency (IEUA) began the process of developing agreements to construct the recommended storm and supplemental water recharge projects, and prioritizing construction based on grant funding, as well as other factors. The anticipated six-year timeframe for completion of the recommended projects will roughly coincide with the five-year timeframe for the next update or amendment to the 2013 RMPU.

JOINT RECHARGE IMPROVEMENT PROJECTS BRING ADDITIONAL BENEFITS BEYOND THE 2013 RMPU

Watermaster and IEUA continued to develop and jointly fund a series of cost-effective projects outside of the 2013 RMPU to increase stormwater, urban runoff, and supplemental water recharge.

Watermaster and IEUA set up regular meetings to provide a forum so that stakeholders could become fully informed, provide input, and have their questions answered.

Watermaster and IEUA continued work on the Turner Basins/Guasti Park Recharge Expansion Project. A cost-sharing agreement was completed with IEUA. This project is among the lowest-cost recharge improvements, and provides a significant recharge benefit. Following completion, anticipated in late 2014, the expansion project is projected to annually recharge an additional 300 acre-feet of stormwater.

Completed Wineville Proof-of-Concept Project with IEUA and City of Ontario. This is an investigative project designed to test and evaluate infiltration rates at strategic locations throughout the Basin. Infiltration testing for the Wineville Proof-of-Concept project was

completed in November 2013. The Final Report on the project, published in April 2014, concluded that the Wineville Basin has the potential to recharge up to 3,830 acre-feet per year of stormwater and recycled water, while also providing flood control benefits.

THE RECOMMENDED 2013 RMPU PROJECTS ARE PROJECTED TO INCREASE THE STORMWATER AND RECYCLED WATER RECHARGE IN THE CHINO BASIN BY APPROXIMATELY 11,700 ACRE-FEET PER YEAR AT A CAPITAL COST OF APPROXIMATELY \$57 MILLION.

ADDITIONAL RECHARGE PROJECTS

Lower Day Project Fast Tracked. Implementation of the Lower Day project began ahead of the 2013 RMPU process because Watermaster and IEUA received a \$750,000 grant through Proposition 84. The grant application was prepared in collaboration with the City of Ontario and the Santa Ana Watershed Project Authority (SAWPA). The total cost of the project is estimated at \$2.5 million and will provide 789 acre-feet per year of stormwater recharge.

Evaluating Improvements at San Sevaine Basins. San Sevaine consists of five basins covering about 93 acres. The improvements called for in the 2013 RMPU will increase the combined storm and recycled water recharge by about 2,600 acre-feet per year at a cost of about \$2.5 million. The project was awarded a \$750,000 grant to help fund its completion.

Completed the Hickory Basin Arizona Crossing Project. This project was initiated in 2012 and involved design and construction of a new soil-cement access road and culvert over the inlet channel at the Hickory Basin. The road provides immediate access for IEUA and San Bernardino County Flood Control District (SBCFCD) personnel to meet maintenance and operational needs without interrupting recharge or stormwater detention operations.

JURUPA PUMP STATION UPGRADE COST REDUCED BY HALF

The Jurupa Pump Station is a key recharge facility that directly conveys stormwater, local runoff, imported and recycled water. High temperatures at the Pump Station resulted in the failure and shut down of vital controls and switches. To resolve these issues, air conditioning, roof thermal insulation, and new electrical controls are being installed. Changes were made to the project implementation plan that cut the \$300,000 pre-design cost estimate by half. The cost will be split with IEUA.

INITIATED BASIN-WIDE PERMITTING FOR LONG-TERM COST SAVINGS

A Nationwide 404 Permit was issued this year by the US Army Corps of Engineers for 13 Chino Basin recharge facilities. Nationwide Permits automatically expire every five years and it takes about three years to reapply and obtain a new permit. Watermaster and IEUA are undertaking a more complex, but ultimately lower-cost, process to obtain an Individual or Regional General Permit that will last 15 years.

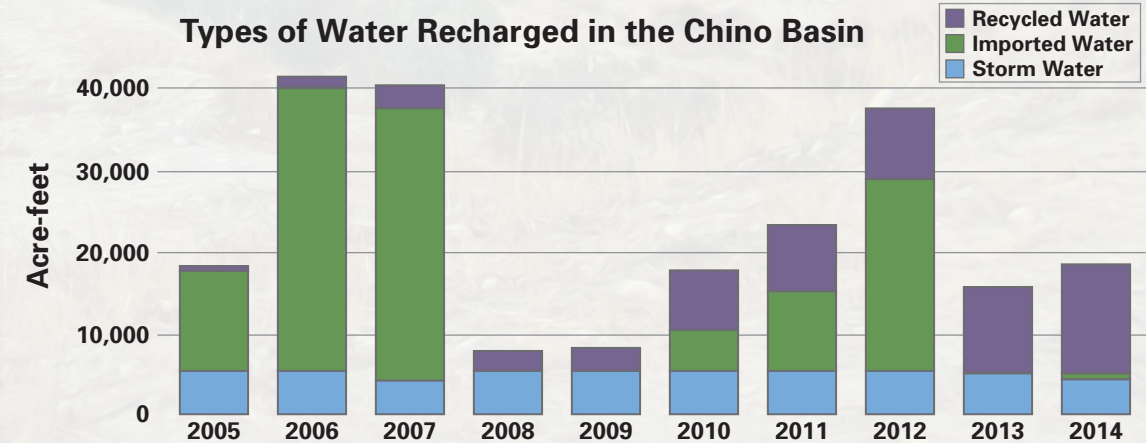

BEYOND THE COURT-APPROVED 2013 RMPU PROJECTS, WATERMASTER AND IEUA PURSUED ADDITIONAL RECHARGE PROJECTS DEEMED TO PROVIDE SUPERIOR BENEFITS IN TERMS OF WATER SUPPLY OR COST SAVINGS.

PROGRESS ON CHINO BASIN GROUNDWATER RECHARGE PROGRAM

Watermaster, IEUA, the Chino Basin Water Conservation District (CBWCD), and SBCFCD jointly sponsor the Chino Basin Groundwater Recharge Program. This comprehensive water supply program enhances water supply reliability and improves groundwater quality throughout the Chino Basin by increasing the recharge of stormwater, urban runoff, imported water, and recycled water.

Groundwater Recharge. This year, 18,687 acre-feet of water were recharged in 27 facilities across the Chino Basin: 4,299 acre-feet of stormwater and urban runoff, 13,593 acre-feet of recycled water, and 795 acre-feet of imported water. The amount of stormwater and imported water available for recharge was limited due to ongoing drought conditions, highlighting the importance of the recycled water recharge program.

Recharge at MZ1 Fell Short and Will Be Made Up in a Future Year. The Peace II Agreement requires Watermaster to recharge 6,500 acre-feet per year of supplemental water into Management Zone 1 (MZ-1) to improve water quality and production sustainability. The cumulative total recharge fell 1,054 acre-feet short of the cumulative requirement, and this amount will be made up in a future year.

This graph demonstrates the importance of the recycled water component of the recharge program, especially during times of drought, when imported water supplies are limited or unavailable, as was the case during the last two years.

REGULATOR AFFIRMS MODEL RESULTS THAT HYDRAULIC CONTROL WILL BE ACHIEVED

BENEFITS OF HYDRAULIC CONTROL AND THE DESALTERS:

Protects the Santa Ana River. The Chino Basin Desalter wells intercept high-salinity groundwater, thereby preventing it from flowing into the Santa Ana River and then downstream where it could degrade high-quality water supplies. The water is pumped and treated at the Desalter I and Desalter II treatment facilities, and served as potable water to members of the Chino Basin Desalter Authority.

Keeps Water in the Basin for Local Use. The Desalter wells pump and treat poor-quality water and put it to beneficial use. Untreated, the water would otherwise be unsuitable for drinking water and even non-potable uses.

Removes Contaminants. Salts, nutrients, and other contaminants are pumped and treated at the Desalters, and then exported from the Basin.

Allows Increased Recharge of Recycled Water. Through the maximum benefit commitment to achieve hydraulic control, the Regional Water Quality Control Board (RWQCB) allows Watermaster to implement its large-scale recycled water recharge program.

Saves Hundreds of Millions of Dollars. The hydraulic control program provides hundreds of millions of dollars in new water, treatment savings, and more.

Achieving hydraulic control is fundamental to achieving the goals of the Optimum Basin Management Program (OBMP) – one of the guiding plans of Watermaster – and complying with maximum benefit obligations. Hydraulic control is achieved by pumping groundwater in the southern portion of the Basin at the Chino Basin Desalter wells to prevent groundwater high in salt and nutrients from flowing out of the Chino Basin and into the Santa Ana River. Achieving hydraulic control maximizes the Safe Yield of the Chino Basin.

MAXIMUM BENEFIT PLAN APPROVED

In late 2013, Watermaster and IEUA submitted a revised Maximum Benefit Monitoring Program Work Plan and schedule for achieving hydraulic control. The plan describes how Watermaster will increase production capacity at the Desalter well field from 32,000 to 40,000 acre-feet per year in accordance with the OBMP, including the construction of three new wells. In June 2014, the RWQCB accepted the plan.

The RWQCB Confirmed Model Results that Hydraulic Control Will Be Achieved.

In January 2014, the RWQCB confirmed Watermaster's model results that demonstrated hydraulic control will be achieved under the projected range of pumping at the Chino Desalter Authority's Chino Creek Well Field (CCWF), reducing groundwater outflow to a de minimis level, which is defined as less than 1,000 acre-feet per year.

DESALTER PLANNING CONTINUES

The Chino Basin Desalter Authority (CDA) and Western Municipal Water District (WMWD) continued planning efforts to expand the Chino II Desalter by 10.5 MGD (11,800 acre-feet per year). To date, more than \$70 million in grant funds have been secured toward this expansion project.

Change in Course for the Desalter Expansion Will Speed Achievement of Hydraulic Control. CCWF Well-18 was constructed and planned for use in achieving hydraulic control. However, this well was found to be within a contamination plume, and incorporating additional treatment into the project would be costly and delay the achievement of hydraulic control. Watermaster demonstrated to the RWQCB that a revised pumping plan excluding Well-18 could still result in hydraulic control, thereby avoiding delays that would result from entangling the project in contamination evaluation and cleanup efforts being performed by the County of San Bernardino. This is evidence of the quality of Watermaster's technical evaluations and its ability to implement effective approaches to complex problems with the consensus of regulators and other stakeholders.

MONITORING AND EVALUATION TO DEMONSTRATE HYDRAULIC CONTROL

Obtained Hundreds of Groundwater-Level Measurements and Water Quality Samples. Watermaster collected groundwater-level measurements from hundreds of wells and collected groundwater and surface water quality samples. These data are used to support evaluations to determine if hydraulic control is being achieved.

Used the Re-Calibrated Model in Hydraulic Control Monitoring Program. The re-calibrated 2013 Watermaster groundwater model found that hydraulic control would be achieved under a projected range of CCWF production volumes. These model results were transmitted to the RWQCB in October 2013:

- hydraulic control east of Chino-I Desalter Well 5 has been achieved,
- hydraulic control west of Chino-I Desalter Well 5 has not been fully achieved, and
- currently, the impact of rising groundwater outflow from the Chino Basin on surface-water quality in the Santa Ana River is de minimis.

Maximum Benefit Annual Report Published. The 2013 Maximum Benefit Annual Report was prepared by Watermaster and IEUA, as required by the RWQCB to demonstrate compliance with the maximum-benefit commitments, provide the results of the monitoring program, and provide status updates on progress toward expanding the Chino Basin Desalters.

Graphic is conceptual and not to scale.

EFFECTIVE BASIN MANAGEMENT INCREASES LONG-TERM WATER SUPPLY RELIABILITY

CONTINUED MULTI-YEAR EFFORT TO REDETERMINE THE SAFE YIELD

The Peace Agreement and the OBMP Implementation Plan require that the Safe Yield be evaluated in 2011 and every ten years thereafter. As a result, continuing the Safe Yield redetermination effort was a top priority for the year. The Stipulated Agreement for the Chino Basin defines Safe Yield as: *the long-term average annual quantity of groundwater (excluding replenishment or stored water but including return flow to the basin from the use of replenishment or stored water) which can be produced from the Basin under cultural conditions of a particular year without causing an undesirable result.*

Progress on Redetermination. In 2011, Watermaster initiated the update of the computer model of the Basin to redetermine the Safe Yield. The model calibration was completed in 2012, and evaluation of the Safe Yield began in 2013. The effort is critical, technically demanding, and requires extensive review, input and coordination among technical experts and all the parties, since it plays a central role in determining the amount of water that is available to be produced and used.

The Safe Yield was originally set by the Judgment at 140,000 acre-feet per year. This update is made more challenging because the likely result is that the Safe Yield will be reduced for a variety of technical reasons, including the reduction in recharge of rainfall as the Basin develops and has increasingly more impervious surfaces, such as paved roads, and less open soil to allow recharge.

Despite the challenges, independent experts representing the Appropriative Pool agreed that the model is sound. With confidence in the work done to-date, the stakeholders are moving ahead with the redetermination.

REPLENISHMENT WATER OBLIGATION ON HOLD WITH DISCONTINUATION OF REPLENISHMENT RATE

In April 2014, due to water supply limitations, the Metropolitan Water District of Southern California (MWD) prohibited the purchase and use of imported water for groundwater recharge. In response, Watermaster put fulfilling the Replenishment Obligation on hold so that an alternative approach can be properly evaluated and implemented.

“EXHIBIT G” WATER SOLD FOR FIRST TIME

The Judgment does not normally allow for water to be transferred from parties in one Pool to another. However, there is a provision to annually offer Non-Agricultural Pool water to Appropriators through the “Exhibit G” Process. Watermaster developed a new structure to sell the water in the Peace II agreement. Last year, “Exhibit G” water was put up for sale for the first time but none sold. This year there were

a handful of sales, providing an example of how patient facilitation has broken another barrier, thereby improving water supply flexibility, this time by making it possible for Watermaster Parties in one Pool to sell to another.

MZ-1 MANAGED AREA GROUNDWATER LEVELS MAINTAINED WITHIN GUIDANCE LEVEL

Watermaster continued implementation of the MZ-1 Subsidence Management Plan. Groundwater levels stayed above the Guidance Level during the reporting period, and very little, if any, permanent compaction was recorded at the Ayala Park Extensometer.

Land Surface Monitoring. In order to monitor the stresses and strains related to the occurrence of subsidence and ground fissuring in the Managed Area and the Areas of Subsidence Concern, and to develop and implement additional mitigation to minimize future occurrences, Watermaster implements the Land Subsidence Monitoring Program in accordance with the MZ-1 Subsidence Management Plan. Annual reports are prepared to describe the results of the monitoring program, and to recommend monitoring adjustments, if warranted.

Land Subsidence Committee Annual Report Was Completed. The MZ-1 Subsidence Management Plan requires annual data analysis and reporting of data collected for the Land Subsidence Monitoring Program. The 2012 Annual Report of the Land Subsidence Committee, published during December 2013, was the first published report of the Land Subsidence Committee.

EXTENSIVE MONITORING PROVIDES DATA FOR BOTH MANAGING THE BASIN AND MEASURING OUTCOMES

GROUNDWATER LEVEL MONITORING SUPPORTS A WIDE RANGE OF CRITICAL ACTIVITIES:

Periodic reassessment of Safe Yield.
Analysis of desalter pumping impacts at private wells.
Triennial re-computation of ambient water quality as mandated by the Water Quality Control Plan.
Monitoring and management of land subsidence.
Understanding direction of groundwater flow.
Update and re-calibration of Watermaster's computer-simulation groundwater-flow model.
Assessment of hydraulic control.
Compute storage changes.
Identify areas of the Basin where recharge and discharge are not in balance.

Comprehensive monitoring of all aspects of water supply and quality provide the data needed to design and adapt sustainable water management plans. The data are the foundation of the information used by Watermaster, its many stakeholders, and regulators to evaluate and agree upon outcomes. Basin management strategies are continually refined and improved over time to reflect the most current understanding of the data. All data are uploaded to a centralized database accessible through HydroDaVESM.

GROUNDWATER PRODUCTION MONITORING

All active wells (except minimum user wells) are metered. The metered production data collected by well owners is provided to Watermaster on a quarterly basis. Watermaster staff visit hundreds of private wells in the field to manually read and record the production meters quarterly. All production data are entered into the relational database.

Crews installing meters for the groundwater monitoring program.

THE LAND SUBSIDENCE MONITORING PROGRAM INCLUDES MONITORING OF: HORIZONTAL STRAIN ACROSS THE AREA OF GROUND FISSURING, PIEZOMETRIC LEVELS, GROUNDWATER PRODUCTION AND RECHARGE, VERTICAL AQUIFER-SYSTEM DEFORMATION, INSAR DATA FROM SATELLITE IMAGERY, AND GROUND-LEVEL SURVEYS.

GROUNDWATER QUALITY MONITORING

Watermaster maintains a Basin-wide groundwater-quality monitoring program that is currently comprised of about 900 wells. All water-quality data are uploaded to a centralized database. Watermaster obtains groundwater-quality data through the following programs:

Annual Key-Well Water-Quality Monitoring Program. Watermaster performs monitoring at about 110 monitoring and private wells.

Maximum-Benefit Monitoring Program. Watermaster collects annual samples at nine multi-port hydraulic control monitoring wells that are strategically placed between the Chino Desalter well fields and the Santa Ana River. Watermaster also collects quarterly samples at four wells near the Santa Ana River to characterize the interaction between the Santa Ana River surface water and groundwater.

Chino Basin Data Collection (CBDC) program. Watermaster routinely and proactively collects all groundwater-quality data sampled by others in the Basin, such as municipal producers, IEUA, Department of Toxic Substances Control, County of San Bernardino, other government agencies, and various private companies and consulting firms.

Watermaster carries out extensive groundwater quality programs.

GROUNDWATER LEVEL MONITORING

Watermaster maintains a comprehensive Basin-wide groundwater-level monitoring program that comprises about 1,100 wells. At most of the wells, water levels are measured by others and reported to Watermaster. About 200 wells are measured using manual methods or with an automated pressure transducer that records water levels every 15 minutes.

SURFACE WATER MONITORING

Recharge Basin Monitoring: Watermaster and IEUA track the volume, type, and quality of water delivered to each recharge basin.

Monitoring of the Santa Ana River. To characterize surface water and groundwater interaction along the Santa Ana River, Watermaster collects quarterly water quality samples from two sites along the River. These data are compared to the groundwater sample data collected at the near-river wells.

COLLABORATION BOOSTS WATER QUALITY AND ENVIRONMENTAL MITIGATION

IMPROVING COMMUNICATION, COLLABORATION AND ADMINISTRATION

COLLABORATIVE UPPER SANTA ANA RIVER HABITAT CONSERVATION PLAN (HCP)

The HCP will develop a regional plan to offset the biological impacts of future water projects in the Upper Santa Ana River region. Nine water agencies are participating in the plan and sharing the costs. Without participation in the HCP, it would be difficult, and potentially more time-consuming and costly to obtain federal permits and complete any necessary mitigation.

HABITAT SUSTAINABILITY PROGRAM

Watermaster and IEUA are developing an Adaptive Management Plan (AMP) for the Prado Basin Habitat Sustainability Program (PBHSP). The objective of the AMP is to ensure that the riparian habitat in Prado Basin is not adversely impacted by changes in groundwater levels associated with the implementation of the Peace II Agreement. IEUA began the bidding process to acquire a contractor to initiate the program, and continued with property acquisition and permitting.

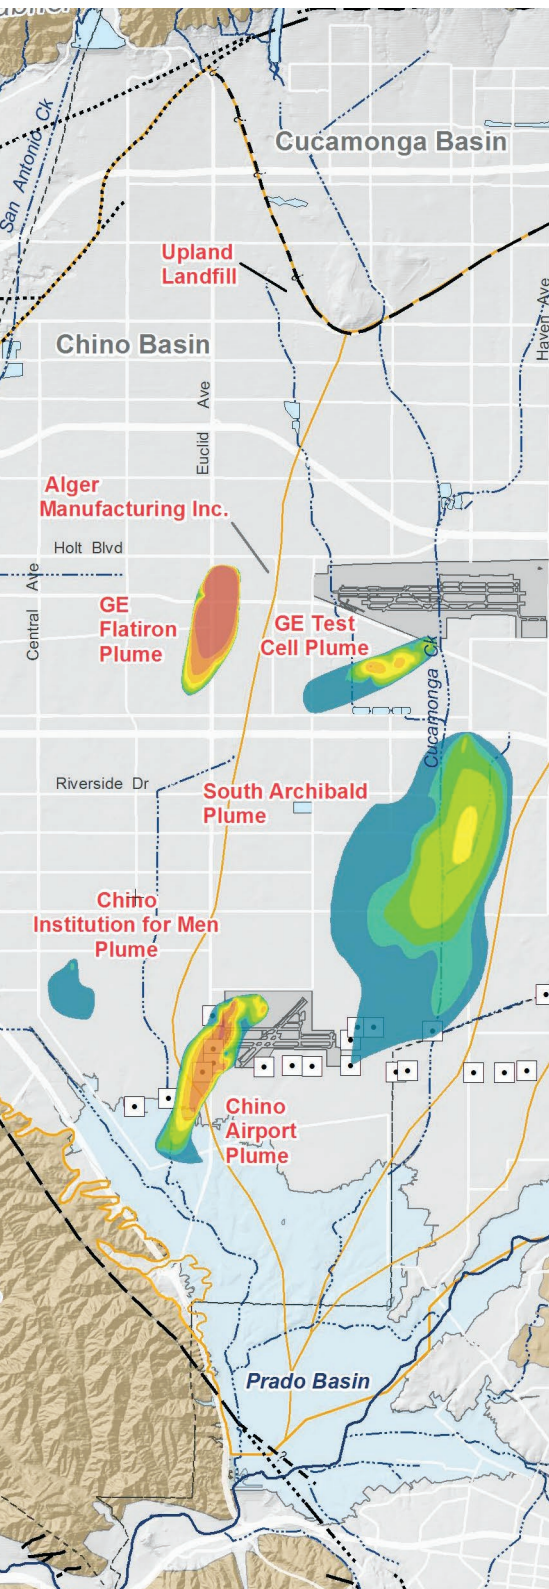

SUPPORTING CLEANUP OF CONTAMINATION IN THE BASIN

Watermaster utilizes its unique technical understanding of the Basin, as well as its extensive computer modeling expertise and data to help support those responsible for cleaning up groundwater contamination.

Supporting Chino Airport Cleanup. The County of San Bernardino is responsible for monitoring of the plume, defining the plume extent, and implementing a remediation strategy. Watermaster tracks progress of the monitoring and plume characterization by the County, collects groundwater-quality data, and uses that data, as well as data collected by others to delineate the plume extent every two years. Watermaster also uses its Groundwater Model to support the cleanup.

South Archibald Plume. Watermaster routinely samples for groundwater quality at private wells in the area, and uses data obtained from this monitoring to delineate the plume extent every two years. Watermaster has engaged with the potentially responsible parties and the RWQCB for years on the plume investigation and implementation of a remediation strategy, samples for groundwater quality at private wells, and uses data obtained from this monitoring to delineate the plume.

Tracking other Cleanups. Watermaster continues to track monitoring programs and mitigation measures associated with other point sources in the Chino Basin, including: Alumax Aluminum Recycling, the California Institution for Men, Crown Coach, GE Test Cell and Flatiron, Kaiser Steel Mill, Milliken Landfill, Upland Landfill, and the Stringfellow National Priorities List sites.

Every two years, Watermaster characterizes the extent of the contamination plumes within the Basin, some of which are shown here.

ENHANCING PLANNING AND GOVERNANCE

Conducted Organization Performance Assessment. An outcome of the March 2013 Refresh, Recharge and Reunite Planning Workshop was the development of the Watermaster Business Plan to set priorities for addressing issues that are critical to Watermaster Stakeholders. The Business Plan was used to evaluate the performance of the organization in October 2013 and April 2014.

Board Briefing on February 24, 2014. The Board Briefing was held as an introduction to incoming Directors and as a refresher for current Directors, and included topics on Watermaster's legal framework, role of the Board, Staff functions, major achievements, current topics, and future considerations.

ADMINISTRATIVE IMPROVEMENTS IMPLEMENTED

Watermaster evaluated and implemented administrative improvements to increase accuracy, efficiency and communication.

Improvements to Voluntary Agreements Forms and Processes. Substantial work was accomplished toward improving how Voluntary Agreements are carried out, including proposed changes to forms, how forms are submitted, handled by staff, and entered into the database. This project will be completed in the next fiscal year.

Non-Ag Pool Membership Clean-up and Change to Rules. Watermaster confirmed the interest, or not, of the parties to the Judgment in preparation to remove those that are not interested in remaining on the membership list. This will improve efficiency. The Non-Agricultural Pool quorum rules were also changed to allow the Pool flexibility to establish its own quorum requirement.

New Video Conferencing and Phone System. Watermaster is transitioning to increased use of video conferencing to reduce travel time to meetings. This has proven to save time, decrease travel costs, and improve overall communication effectiveness.

Other Improvements. Numerous other administrative improvements were made this year: began implementing a new file management system; relocated storage and field equipment from the warehouse to the annex building for improved security and access to archives; continued scanning and cataloging of old files in the transition to faster and more efficient full digital record keeping, and; improved the "request for information" process for accessing data.

RMPU Amendment Steering Committee Meeting.

Participating in the Water Fair.

WATERMASTER INCLUDES REPRESENTATION OF ALL KEY STAKEHOLDER GROUPS

To draw together in a single organization all the diverse interests in the Basin, a governing structure was formed that represents all stakeholder groups, including a Board, Advisory Committee and three Producer Pools:

- Agricultural Pool to represent dairymen, farmers, the State, and other property owners.
- Non-Agricultural Pool to represent commercial and industrial producers.
- Appropriative Pool to represent cities, water districts, and water companies.

THIRTY-SIXTH ANNUAL REPORT

FISCAL YEAR 2013-14

WATERMASTER STAFF

Appendices

A – AA

**COURT HEARINGS AND ORDERS
FISCAL YEAR 2013-2014**

During the fiscal year 2013-14, several hearings were held relating to implementation of the Optimum Basin Management Program (OBMP). Hearings and orders were as follows:

Hearing Date	Primary Subject Matter
April 25, 2014	• Order Approving Section 5 of Watermaster's 2013 Amendment to 2010 Recharge Master Plan Update; Order Regarding Watermaster's Safe Yield Recalculation
December 13, 2013	• Order Approving Watermaster's 2013 Amendment to 2010 Update to Recharge Master Plan and Intervention of TAMCO
August 30, 2013	• RULINGS AND ORDER: Motion of CCG Ontario for Leave to Sue Watermaster

RESOLUTIONS CALENDAR YEAR 2014

Resolution	Adopted	Summary of Resolution
14-03	June 26, 2014	<p><i>Acknowledging the Extraordinary Service by Joseph C. Scalmanini</i></p> <ul style="list-style-type: none"> • By this proclamation Joseph C. Scalmanini is recognized and thanked by the Watermaster for his fortitude and foresight in making the Chino Basin a model for sustainable management in California.
14-02	January 23, 2014	<p><i>Authorizing Investment of Monies in the Local Agency Investment Fund</i></p> <ul style="list-style-type: none"> • The Board of Directors does hereby authorize the deposit and withdrawal of Chino Basin Watermaster monies in the Local Agency Investment Fund in the State Treasury in accordance with the provisions of Section 16429.1 of the Government Code for the purpose of investment as stated therein, and verification by the State Treasurer's Office of all banking information provided in that record. • The following Chino Basin Watermaster officers and designated employees or their successors in office/position shall be authorized to order the deposit or withdrawal of monies in the Local Agency Investment Fund: Board Chair, Board Vice-Chair, Board Secretary/Treasurer, General Manager/Secretary, Assistant General Manager, and Chief Financial Officer.
14-01	January 23, 2014	<p><i>Establishing a Watermaster Investment Policy</i></p> <ul style="list-style-type: none"> • The authority to invest and reinvest funds of Watermaster is hereby delegated to the Watermaster General Manager (and his/her designees) subject to the provisions of said Investment Policy and the ongoing review and control of Watermaster and the Watermaster Advisory Committee. • This resolution shall take effect from and after its date of adoption and Resolution 2013-01 is rescinded in its entirety.

^A In 1990, Chino received a portion of San Bernardino County Water Works #8 (WW#8) OSY (363.790 AF) as a result of a permanent transfer.

^B City of Chino Hills incorporated in 1991 and assumed the responsibility for providing the public services formerly provided by WW#8. WW#8 acquired a portion of the rights of Park and Pomona Valley Water Companies in 1983.

^C CCWD acquired the rights to Etiwanda Water Company (upon dissolution) in 1986. CCWD changed its name to CVWD in 2004.

^D JCSD acquired the rights of Mira Loma Water Company in 1979 (776.940 AF OSY), Feldspar Gardens in 1988 (47.549 AF OSY) and Mutual Water Company of Glen Avon Heights in 1997 (467.974 AF OSY).

^E MVCWD changed its name to MVWD in 1980. In 1990, MVWD received 675.610 AF of WW#8 OSY as a result of a permanent transfer.

^F WSBCWD changed its name to WVWD in 2003.

^G In FY 01-02, 5,000 AF OSY was reassigned: 1,000 AF to FWC and 4,000 AF to the Nicholson Trust.

^H FWC intervened in 1989 and was assigned 1,000 AF OSY as a result of a permanent transfer of water rights from FUWC.

^I Los Serranos intervened into the Appropriative Pool in 1990 with 0.000 AF OSY, and it was later determined that they are not within the Basin.

^J Niagara Bottling intervened in FY 02-03 with 0.000 AF OSY.

^K Nicholson Trust intervened in FY 01-02 and was assigned 4,000 AF OSY as a result of a permanent transfer of water rights from FUWC.

^L GSWC permanently transferred 823.900 AF OSY to Park Water Company in 1980. Park Water Co was acquired by WW#8 which was subsequently acquired by the City of Chino Hills. SCWC changed its name to GSWC in 2005.

^M San Bernardino County Prado Tiro (now known as Prado Shooting Park) was involuntarily reassigned to the Appropriative Pool from the Agricultural Pool in 1985.

^N Arrowhead intervened in 1992 with 0.000 AF OSY.

^O City of Fontana intervened in 1996 with 0.000 AF OSY.

^A Ameron Steel Producers, Inc. changed its name to Ameron International Corp in 1996.

^B Conrock became Calmat and in FY 99-00 became Vulcan Materials Co. On July 23, 2009, Vulcan permanently transferred its 317.844 AF SY to Aqua Capital Management.

^C Kaiser Steel Corporation became Kaiser Resources and then Kaiser Ventures, Inc. Kaiser sold portions of its property to CSI & Speedway, then its last property holdings and all its remaining water rights to CCG Ontario, LLP on August 16, 2000.

^D The property and associated water rights owned by Red Star Fertilizer were transferred to Anaheim Citrus and then to West Venture Development Co. After subdividing and selling the property, West Venture went out of business in 91-92 and disclaimed any interest in the water rights, requesting that their disposition be determined by the Court.

^E A portion of SCE was sold in FY 98-99; SCE retained 27.959 AF SY. On March 24, 2011, SCE permanently transferred 27.959 AF SY to Ontario, City of (Non-Ag).

^F Mountain Vista Power Generating Company (MVPG) purchased the Etiwanda Generating Facility owned by SCE in FY 98-99. MVPG became Reliant Energy, Etiwanda with 954.540 AF SY. Reliant Energy, Etiwanda changed its name to RRI Energy West, Inc. in FY 08-09. RRI Energy West, Inc. changed its name to GenOn West, LP in FY 10-11.

^G Southern Service Company became Angelica Rental Service in FY 90-91, then later changed its name to Angelica Corp.

^H On May 22, 2008, Sunkist permanently transferred 22.000 AF SY to KCO/Koll. On October 23, 2008 Sunkist permanently transferred 1,873.402 AF SY to Ontario, City of (Non-Ag).

^I Carlsberg Mobile Home Properties became Mobile Community Management Co. and is known as Swan Lake Mobile Home Park.

^J Union Carbide Corp. became Praxair, Inc. On May 27, 2010, Praxair permanently transferred 426.446 AF SY to Ontario, City of (Non-Ag).

^K Quaker Chemical Company went out of business in FY 93-94.

^L California Steel Industries, Inc. (CSI) intervened in FY 91-92 after purchasing land from Kaiser. ACM and CSI settled their water rights dispute in February 2013. The settlement agreement allocates one half of the right in dispute's Assigned Share of Safe Yield to each, effective July 1, 2007, and the parties allocated among themselves the quantities of water in storage related to the right.

^M General Electric Company intervened in FY 95-96 with 0.000 AF SY.

^N California Speedway intervened in FY 96-97 after purchasing land from Kaiser. On August 16, 2000, Catellus permanently transferred 525.000 AF SY to Speedway. California Speedway changed its name to Auto Club Speedway in FY 07-08.

^O Loving Savior of the Hills Lutheran Church intervened in FY 00-01 with 0.000 AF SY.

^P CCG Ontario, LLC intervened in FY 00-01. Kaiser sold its last property holdings and all its remaining water rights to CCG Ontario, LLP on August 16, 2000.

On December 18, 2009, CCG Ontario permanently transferred its 630.274 AF SY to Aqua Capital Management.

^Q KCO/Koll intervened in FY 07-08 after purchasing land from Sunkist. On May 22, 2008, Sunkist permanently transferred 22.000 AF SY to KCO/Koll. On May 28, 2009, the 22.000 AF SY was permanently transferred to Ontario, City of (Non-Ag).

^R San Antonio Winery intervened in FY 07-08 with 0.000 AF SY.

^S Ontario, City of (Non-Ag) intervened in FY 08-09 after purchasing land from Sunkist. On October 23, 2008, Sunkist permanently transferred 1,873.402 AF SY to Ontario, City of (Non-Ag). On May 28, 2009, Koll's 22.000 AF SY was permanently transferred to Ontario, City of (Non-Ag). On May 27, 2010, Praxair permanently transferred 426.446 AF SY to Ontario, City of (Non-Ag). On March 24, 2011, SCE permanently transferred 27.959 AF SY to Ontario, City of (Non-Ag).

^T Aqua Capital Management LP (ACM) intervened in FY 08-09 after purchasing land from CCG Ontario. On December 18, 2008, CCG Ontario permanently transferred 630.274 AF SY to Aqua Capital. On July 23, 2009, Vulcan permanently transferred 317.844 AF SY to Aqua Capital. ACM and CSI settled their water rights dispute in February 2013. The settlement agreement allocates one half of the right in dispute's Assigned Share of Safe Yield to each, effective July 1, 2007, and the parties allocated among themselves the quantities of water in storage related to the right.

^U TAMCO intervened in FY 13-14 after purchasing land and water rights from Ameron International Corp. This resulted in a permanent transfer of 15.000 AF SY to TAMCO. Ameron's share of SY was reduced from 97.858 AF to 82.858 AF.

¹ Source: Watermaster Annual Reports and Assessment Packages.

² First-year reallocation occurred under the Judgment.

³ Appropriators agree to pay Ag Pool assessments. Reallocation procedure changed by agreement.

⁴ Peace Agreement signed. Appropriators agree to pay Ag Pool assessments for life of Peace Agreement. Procedure changed by agreement. Ag Pool Annual Safe Yield is 82,800 AF.

⁵ After duplication of conversion areas were identified, Jurupa's Pre-Peace Agreement acres were adjusted (337.6 acres), and Post-Peace Agreement acres were adjusted (846.4 acres).

¹The values reported herein represent the supplemental water supply used by each Party within its entire service area. Some Parties have service area boundaries which extend outside the adjudicated Chino Basin boundary.

²Represents the values reported in Appendix G-1, plus production by the Chino Basin Desalters and by the DTSC.

³Total does not include cyclic deliveries, water delivered by exchange, or water from direct spreading that was used for replenishment.

⁴Reflects corrected value.

¹ The values reported herein represent the supplemental water supply used by each Party within its entire service area. Some Parties have service area boundaries which extend outside the adjudicated Chino Basin boundary.

² Recycled water is supplied by IEUA unless stated otherwise.

³ Imported groundwater is produced from Cucamonga Basin. Surface water diversions are from Lloyd Michaels, Royer-Nesbit, and Arthur H. Bridge WTPs, and Deer Canyon.

⁴ IEUA provided 24,653 AF of recycled water as follows: 8,916 AF to the City of Chino, 2,002 AF to the City of Chino Hills, 1,652 AF to Cucamonga Valley Water District, 841 AF to IEUA, 336 AF to Monte Vista Water District, 8,427 AF to the City of Ontario, 1,611 AF to San Bernardino County, and 869 to the City of Upland. Additionally, groundwater recharge with recycled water in the amount of 13,593 AF is shown as allocated to each Party in proportion to its service area, as is done in the Assessment Package.

⁵ Imported groundwater is produced from Colton/Rialto, Lytle, and "unnamed" Basins. Surface water diversions are from Lytle Creek.

⁶ Imported groundwater is produced from Riverside Basin and Temescal.

⁷ Imported groundwater is produced from Six Basins and Spadra Basin. Surface water diversions are from San Antonio Creek. Recycled water is served from the Pomona Water Reclamation Plant.

⁸ Imported groundwater is produced from Six Basins, San Antonio Tunnel and Cucamonga Basin. Surface water diversions are from San Antonio Creek.

⁹ Recycled water is treated by CIM and reused on location for irrigation purposes.

¹⁰ Imported groundwater is produced from Six Basins.

¹¹ Surface water diversions are from Lytle Creek.

	5F	5G	5H	5I	5J

- p5: 1) "Re-Operation Offset: Pre-Peace II Desalters" had an original beginning balance of 225,000.000 AF. The account will need adjustment following the current modeling and Safe Yield Recalculation work (i.e. Santa Ana River Underflow New Yield - SARUNY) and will be adjusted in the next Assessment Package. The 29,070 AF correction required by Condition Subsequent 7 is included. (See Appendix B)
- 2) "Re-Operation Offset: Peace II Expansion" had an original beginning balance of 175,000.000 AF.
- 3) There is no loss assessed on the native Basin water allocated to offset Desalter production as a result of Basin Reoperation as approved in the Peace II Agreement.
- 4) Chino, Ontario, and JCSD Preemptive Replenishment Agreement water is shown. Per the Agreements, no losses are deducted against these accounts.

Board of Directors
Chino Basin Watermaster

Introduction

It is our pleasure to submit the Annual Financial Report for the Chino Basin Watermaster (Watermaster) for the fiscal years ended June 30, 2014 and 2013, following guidelines set forth by the Governmental Accounting Standards Board. Watermaster staff prepared this financial report. The Watermaster is ultimately responsible for both the accuracy of the data and the completeness and the fairness of presentation, including all disclosures in this financial report. We believe that the data presented is accurate in all material respects. This report is designed in a manner that we believe necessary to enhance your understanding of the Watermaster's financial position and activities.

This report is organized into three sections: (1) Introductory, (2) Financial, and (3) Supplemental. The Introductory section offers general information about the Watermaster's organization and current Watermaster activities and reports on a summary of significant financial results. The Financial section includes the Independent Auditor's Report, Management's Discussion and Analysis of the Watermaster's basic financial statements, and the Watermaster's audited basic financial statements with accompanying Notes. The Supplemental section includes combining revenue and expense schedules.

Generally Accepted Accounting Principles (GAAP) requires that management provide a narrative introduction, overview and analysis to accompany the financial statements in the form of the Management's Discussion and Analysis (MD&A) section. This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. The Watermaster's MD&A can be found immediately after the Independent Auditor's Report.

Watermaster Structure and Leadership

The Chino Basin Watermaster ("Watermaster") was established under a judgment entered in Superior Court of the State of California for the County of San Bernardino as a result of Case No. RCV 51010 (formerly Case No. SCV 164327) entitled "Chino Basin Municipal Water District v. City of Chino, et al.", signed by the Honorable Judge Howard B. Wiener on January 27, 1978. The effective date of this Judgment for accounting and operations was July 1, 1977. Pursuant to the Judgment, the Chino Basin Municipal Water District (CBMWD) five member Board of Directors was initially appointed as "Watermaster". Their term of appointment as Watermaster was for five years, and the Court, by subsequent orders, provided for successive terms or for a successor Watermaster. Pursuant to a recommendation of the Advisory Committee, the Honorable J. Michael Gunn appointed a nine-member board as Watermaster on September 28, 2000. Under the Judgment, three Pool committees were formed: (1) Overlying (Agricultural) Pool which includes the State of California and all producers of water for overlying uses other than industrial or commercial purposes; (2) Overlying (Non-Agricultural) Pool which represents producers of water for overlying industrial or commercial purposes; and (3) Appropriative Pool which represents cities, special districts, other public or private entities and utilities. The three Pools act together to form the "Advisory Committee".

The General Manager administers the day-to-day operations of the Watermaster in accordance with policies and procedures established by the Board of Directors. The Watermaster staff includes nine regular employees. The Watermaster's three Pools, the Advisory Committee, and the Board of Directors meet each month.

Watermaster Mission and Services

Chino Basin Watermaster's mission is "To manage the Chino Groundwater Basin in the most beneficial manner and to equitably administer and enforce the provisions of the Chino Basin Watermaster Judgment", Case No. RCV 51010 (formerly Case No. SCV 164327). The Watermaster provides the Chino Groundwater Basin service area with services which primarily include: accounting for water appropriations and components of acre footage of stored water by agency, purchase of replenishment water, groundwater monitoring and implementation of special projects. The Watermaster is progressively and actively implementing the Basin's Optimum Basin Management Program which includes extensive monitoring, further developing recharge capabilities, storage and recovery projects, managing salt loads, developing new yield such as reclaimed and storm water recharge and continuing to work with other agencies and entities to enhance this significant natural resource.

Watermaster expenditures are allocated to the pools based on the prior year's production volume (or the same percentage used to set the annual assessments).

Economic Condition and Outlook

The Watermaster's office is located in the City of Rancho Cucamonga in San Bernardino County which has experienced tempered economic growth within the region. The economic outlook for the Southern California region is one of cautious growth as the region recovers from a prolonged financial down turn.

Internal Control Structure

Watermaster management is responsible for the establishment and maintenance of the internal control structure that ensures the assets of the Watermaster are protected from loss, theft or misuse. The internal control structure also ensures adequate accounting data that is compiled to allow for the preparation of financial statements in conformity with generally accepted accounting principles. The Watermaster's internal control structure is designed to provide reasonable assurance that these objectives are met. The concept of reasonable assurance recognizes that (1) the cost of a control should not exceed the benefits likely to be derived, and (2) the valuation of costs and benefits requires estimates and judgments by management.

Budgetary Control

The Watermaster's Board of Directors annually adopts an operating budget prior to the new fiscal year. The budget authorizes and provides the basis for reporting and control of financial operations and accountability for the Watermaster's enterprise operations. The budget and reporting treatment applied to the Watermaster is consistent with the accrual basis of accounting and the financial statement basis.

Investment Policy

The Board of Directors has adopted an investment policy that conforms to state law, Watermaster's ordinance and resolutions, prudent money management, and the "prudent person" standards. The objectives of the Investment Policy are safety, liquidity and yield. Watermaster funds are invested in the State Treasurer's Local Agency Investment Fund and an institutional checking account.

Water Rates and Watermaster Revenues

The Judgment prescribes Watermaster's authority and specifies classes of water production assessments to be used to fund certain activities. Those assessment categories are: Administration, Optimum Basin Management Program, Special Projects and Replenishment. Each class of assessment has a prescribed purpose and water production base. Assessment revenue is Watermaster's principal source of income.

Audit and Financial Reporting

State Law requires the Watermaster to obtain an annual audit of its financial statements by an independent certified public accountant. The accounting firm of Charles Z. Fedak & Company, CPAs has conducted the audit of the Watermaster's financial statements. Their unmodified Independent Auditor's Report appears in the Financial Section.

Other References

More information is contained in the Management's Discussion and Analysis and the Notes to the Basic Financial Statements found in the Financial Section of the report.

Acknowledgements

Preparation of this report was accomplished by the combined efforts of Watermaster staff. We appreciate the dedicated efforts and professionalism that these staff members contribute to the Watermaster. We would also like to thank the members of the Board of Directors for their continued support in planning and implementation of the Chino Basin Watermaster's fiscal policies.

Respectfully submitted,

Peter Kavounas, P.E.

Independent Auditor's Report

Board of Directors
Chino Basin Watermaster
Rancho Cucamonga, California

Report on the Financial Statements

We have audited the accompanying financial statements of the Chino Basin Watermaster (Watermaster) as of and for the years ended June 30, 2014 and 2013, and the related notes to the financial statements, which collectively comprise the Watermaster's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the Watermaster, as of June 30, 2014 and 2013, and the respective changes in financial position, and, cash flows thereof for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Independent Auditor's Report, continued

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages 6 through 9 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Watermaster's basic financial statements. The introductory section on pages 1 through 3 and combining schedule of revenue, expenses and changes in net position on pages 27 and 28, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining schedule of revenue, expenses and changes in net position are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining schedules of revenue, expenses and changes in net position are fairly stated in all material respects in relation to the basic financial statements as a whole.

The introductory section has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance.

Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we have also issued our report dated November 20, 2014, on our consideration of the Watermaster's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the Watermaster's internal control over financial reporting and compliance. This report can be found on pages 30 and 31.

Chino Basin Watermaster
Management's Discussion and Analysis
For the Fiscal Years Ended June 30, 2014 and 2013

The following Management's Discussion and Analysis (MD&A) of activities and financial performance of the Chino Basin Watermaster (Watermaster) provides an introduction to the financial statements of the Watermaster for the fiscal years ended June 30, 2014 and 2013. The two year presentation is provided for comparative purposes. We encourage readers to consider the information presented here in conjunction with the transmittal letter in the Introductory Section and with the basic financial statements and related notes, which follow this section.

Financial Highlights

- The Watermaster's net position increased 9.99%, or \$614,606 to \$6,767,870, in fiscal year 2014, as the result of operations. In 2013, the Watermaster's position increased 7.13%, or \$443,818 to \$6,153,264, as the result of operations and the effect of a prior period adjustment to recognize future pension benefit liabilities in the amount of \$69,637.
- The Watermaster's operating revenues increased 46.50% or \$4,288,026 in 2014, primarily due to a \$4,368,587 increase in replenishment water revenues. In 2013, the Watermaster's operating revenues decreased 54.56%, or \$11,072,197 primarily due to a \$10,927,259 decrease in replenishment water revenues that was offset by a \$386,991 increase in administrative assessments.
- The Watermaster's operating expenses increased 61.54% or \$4,910,829 in 2014, primarily due to a \$4,549,366 increase in groundwater replenishment costs. In 2013, the Watermaster's operating expenses decreased 59.35%, or \$11,652,904 primarily due to a \$1,337,093 decrease in optimum basin management plan costs and a \$10,573,716 decrease in groundwater replenishment costs.

Required Financial Statements

This annual report consists of a series of financial statements. The Statement of Net Position, Statement of Revenues, Expenses, and Changes in Net Position and Statement of Cash Flows provide information about the activities and performance of the Watermaster using accounting methods similar to those used by private sector companies.

The Statement of Net Position includes all of the Watermaster's investments in resources (assets), deferred outflows of resources, obligations to creditors (liabilities), and deferred inflows of resources. It also provides the basis for computing a rate of return, evaluating the capital structure of the Watermaster and assessing the liquidity and financial flexibility of the Watermaster. All of the current year's revenue and expenses are accounted for in the Statement of Revenues, Expenses, and Changes in Net Position. This statement measures the success of the Watermaster's operations over the past year and can be used to determine if the Watermaster has successfully recovered all of its costs through its rates and other charges. This statement can also be used to evaluate profitability and credit worthiness. The final required financial statement is the Statement of Cash Flows, which provides information about the Watermaster's cash receipts and cash payments during the reporting period. The Statement of Cash Flows reports cash receipts, cash payments and net changes in cash resulting from operations, investing, non-capital financing, and capital and related financing activities and provides answers to such questions as where did cash come from, what was cash used for, and what was the change in cash balance during the reporting period.

Financial Analysis of the Watermaster

One of the most important questions asked about the Watermaster's finances is, "Is the Watermaster better off or worse off as a result of this year's activities?" The Statement of Net Position and the Statement of Revenues, Expenses and Changes in Net Position report information about the Watermaster in a way that helps answer this question.

Chino Basin Watermaster
Management's Discussion and Analysis
For the Fiscal Years Ended June 30, 2014 and 2013

Financial Analysis of the Watermaster, continued

These statements include all assets, deferred outflows of resources, liabilities, and deferred inflows of resources using the *accrual basis of accounting*, which is similar to the accounting method used by most private sector companies. All of the current year's revenues and expenses are taken into account regardless of when the cash is received or paid.

These two statements report the Watermaster's *net position* and changes in them. You can think of the Watermaster's net position – the difference between assets, deferred outflow of resources, and liabilities and deferred inflows of resources – as one way to measure the Watermaster's financial health, or *financial position*. Over time, *increases or decreases* in an organization's net position is one indicator of whether its *financial health* is improving or deteriorating. However, one will need to consider other non-financial factors such as changes in economic conditions, population growth, zoning, and new or changed government legislation, such as changes in federal and state water quality standards. Watermaster is funded on a year-by-year basis through a Court-mandated process.

Notes to the Basic Financial Statements

The notes provide additional information that is essential to a full understanding of the data provided in the basic financial statements. The notes to the basic financial statements can be found on pages 13 through 26.

Statement of Net Position

Condensed Statements of Net Position				
	2014	2013	Change	Percentage Change
Assets:				
Current assets	\$ 7,558,813	6,933,444	625,369	9.02%
Capital assets, net	16,832	10,339	6,493	62.80%
Total assets	7,575,645	6,943,783	631,862	9.10%
Liabilities:				
Current liabilities	547,116	635,182	(88,066)	-13.86%
Non-current liabilities	260,659	155,337	105,322	67.80%
Total liabilities	807,775	790,519	17,256	2.18%
Net position:				
Invested in capital assets	16,832	10,339	6,493	62.80%
Unrestricted	6,751,038	6,142,925	608,113	9.90%
Total net position	\$ 6,767,870	6,153,264	614,606	9.99%

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. In the case of the Watermaster, assets exceeded liabilities by \$6,767,870 and \$6,153,264 as of June 30, 2014 and 2013, respectively.

The Watermaster's investment in capital assets is comprised of capital assets (net of accumulated depreciation) less any related debt used to acquire those assets that is still outstanding. The Watermaster uses these capital assets to provide services to customers within the Watermaster's service area; consequently, these assets are not available for future spending.

Chino Basin Watermaster
Management's Discussion and Analysis
For the Fiscal Years Ended June 30, 2014 and 2013

Statement of Net Position, continued

At the end of fiscal years 2014 and 2013, the Watermaster showed a positive balance in its unrestricted net position of \$6,751,038 and \$6,142,925, respectively, which may be utilized in future years. See note 8 for further discussion.

Statement of Revenues, Expenses and Changes in Net Position

Condensed Statements of Revenues, Expenses and Changes in Net Position

	<u>2014</u>	<u>2013</u>	<u>Change</u>	<u>Percentage Change</u>
Revenues:				
Operating revenues	\$ 13,508,601	9,220,575	4,288,026	46.50%
Non-operating revenues	17,215	13,380	3,835	28.66%
Total revenues	<u>13,525,816</u>	<u>9,233,955</u>	<u>4,291,861</u>	<u>46.48%</u>
Expenses:				
Operating expense	12,891,136	7,980,307	4,910,829	61.54%
Depreciation	8,090	12,257	(4,167)	-34.00%
Non-operating expense	11,984	797,573	(785,589)	-98.50%
Total expenses	<u>12,911,210</u>	<u>8,790,137</u>	<u>4,121,073</u>	<u>46.88%</u>
Change in net position	614,606	443,818	170,788	38.48%
Net position, beginning of year	6,153,264	5,779,083	374,181	6.47%
Prior period adjustment	-	(69,637)	69,637	-100.00%
Net position, end of year	<u>\$ 6,767,870</u>	<u>6,153,264</u>	<u>614,606</u>	<u>9.99%</u>

The statement of revenues, expenses and changes of net position shows how the Watermaster's net position changed during the fiscal years. In the case of the Watermaster, net position increased by \$614,606 for the fiscal year ended June 30, 2014, and increased by \$443,818 less a prior period adjustment related to pension benefit obligations in the amount of \$69,637 for the fiscal years ended June 30, 2013.

A closer examination of the sources of changes in net position reveals that:

The Watermaster's operating revenues increased 46.50% or \$4,288,026 in 2014, primarily due to a \$4,368,587 increase in replenishment water revenues.

In 2013, operating revenues decreased 54.56%, or \$11,072,197 primarily due to a \$10,927,259 decrease in replenishment water revenues that was offset by a \$386,991 increase in administrative assessments.

The Watermaster's operating expenses increased 61.54% or \$4,910,829 in 2014 primarily due to a \$4,549,366 increase in groundwater replenishment costs.

In 2013, the Watermaster's operating expenses decreased 59.35%, or \$11,652,904, primarily due to a \$1,337,093 decrease in optimum basin management plan costs and a \$10,573,716 decrease in groundwater replenishment costs.

Management's Discussion and Analysis
For the Fiscal Years Ended June 30, 2014 and 2013

Capital Asset Administration

At the end of fiscal year 2014 and 2013, the Watermaster's investment in capital assets amounted to \$16,832 and \$10,339 (net of accumulated depreciation), respectively. This investment in capital assets includes leasehold improvements, office equipment, and vehicles. There were no major capital assets additions during the year ended June 30, 2014.

Conditions Affecting Current Financial Position

Management is unaware of any conditions which could have a significant impact on the Watermaster's current financial position, net assets or operating results based on past, present and future events.

Requests for Information

This financial report is designed to provide the Watermaster's funding sources, customers, stakeholders and other interested parties with an overview of the Watermaster's financial operations and financial condition. Should the reader have questions regarding the information included in this report or wish to request additional financial information, please contact the Watermaster's Chief Financial Officer at 9641 San Bernardino Road, Rancho Cucamonga, CA 91730.

For the Fiscal Years Ended June 30, 2014 and 2013**

(1) Reporting Entity and Summary of Significant Accounting Policies

A. Organization and Operations of the Reporting Entity

The Chino Basin Watermaster (“Watermaster”) was established under a judgment entered in Superior Court of the State of California for the County of San Bernardino as a result of Case No. RCV 51010 (formerly Case No. SCV 164327) entitled “Chino Basin Municipal Water District v. City of Chino, et al.”, signed by the Honorable Judge Howard B. Weiner on January 27, 1978. The effective date of this Judgment for accounting and operations was July 1, 1977.

Pursuant to the Judgment, the Chino Basin Municipal Water District (CBMWD) five member Board of Directors was initially appointed as “Watermaster”. Their term of appointment as Watermaster was for five years, and the Court, by subsequent orders, provided for successive terms, or for a successor Watermaster. Pursuant to a recommendation of the Advisory Committee, the Honorable J. Michael Gunn appointed a nine-member board as Watermaster on September 28, 2000.

Under the Judgment, three Pool committees were formed: (1) Overlying (Agricultural) Pool which includes the State of California and all producers of water for overlying uses other than industrial or commercial purposes; (2) Overlying (Non-Agricultural) Pool which represents producers of water for overlying industrial or commercial purposes; and (3) Appropriative Pool which represents cities, districts, other public or private entities and utilities. The three Pools act together to form the “Advisory Committee.”

The Watermaster provides the Chino Groundwater Basin service area with services which primarily include: accounting for water appropriations and components of acre-footage of stored water by agency, purchase of replenishment water, groundwater monitoring and implementation of special projects.

Watermaster expenditures are allocated to the pools based on the prior year’s production volume (or the same percentage used to set the annual assessments). Allocations for fiscal year 2013-2014 expenses are based on the 2012-2013 production volume.

	Fiscal Year 2014	
Production volume	Acre Feet	Percentage
Appropriative Pool	96,434	71.102%
Agricultural Pool	34,458	25.406%
Non-agricultural Pool	4,736	3.492%
Total production volume	135,628	100.000%

The Agricultural Pool members ratified an agreement with the Appropriative Pool at their meeting of June 16, 1988, wherein the Appropriative Pool assumes Agricultural Pool administrative expenses and special project cost allocations in exchange for an accelerated transfer of unpumped agricultural water to the Appropriative Pool. In addition the Agricultural Pool transferred all pool administrative reserves at June 30, 1988, to the Appropriative Pool effective July 1, 1988.

In July of 2000, the principal parties in the Basin signed an agreement, known as the Peace Agreement, which among other things formalized the commitment of the Basin parties to implement an Optimum Basin Management Program. The Peace Agreement was signed by all of the parties, and the Court has approved the agreement and ordered the Watermaster to proceed in accordance with the terms of the agreement. The Court has approved revisions to the Chino Basin Watermaster Rules and Regulations.

Notes to the Financial Statements
For the Fiscal Years Ended June 30, 2014 and 2013

(1) Reporting Entity and Summary of Significant Accounting Policies, continued

B. Basis of Accounting and Measurement Focus

The Watermaster reports its activities as an enterprise fund, which is used to account for operations that are financed and operated in a manner similar to a private business enterprise, where the intent of the Watermaster is that the costs of providing water to its service area on a continuing basis be financed or recovered primarily through user charges (water sales), capital grants and similar funding. Revenues and expenses are recognized on the full accrual basis of accounting. Revenues are recognized in the accounting period in which they are earned and expenses are recognized in the period incurred, regardless of when the related cash flows take place.

Operating revenues and expenses, such as replenishment water revenues and groundwater replenishment, result from exchange transactions associated with the principal activity of the Watermaster. Exchange transactions are those in which each party receives and gives up essentially equal values. Management, administration, and depreciation expenses are also considered operating expenses. Other revenues and expenses not included in the above categories are reported as non-operating revenues and expenses.

C. Financial Reporting

The Watermaster's basic financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP), as applied to enterprise funds. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. Watermaster solely operates as a special-purpose government which means it is only engaged in business-type activities; accordingly, activities are reported in the Watermaster's proprietary fund.

D. Assets, Liabilities and Net Position

1. Use of Estimates

The preparation of the basic financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported changes in net position during the reporting period. Actual results could differ from those estimates.

2. Cash and Cash Equivalents

Substantially all of the Watermaster's cash is invested in interest-bearing accounts. The Watermaster considers all highly liquid investments with a maturity of three months or less to be cash equivalents.

3. Investments

Changes in fair value that occur during a fiscal year are recognized as investment income reported for that fiscal year. Investment income includes interest earnings, changes in fair value, and any gains or losses realized upon the liquidation or sale of investments.

4. Accounts Receivable and Allowance for Uncollectible Accounts

The Watermaster extends credit to customers in the normal course of operations. Management has determined that all amounts are considered collectable. As a result, the Watermaster has not recorded an allowance for doubtful accounts at June 30, 2014.

Chino Basin Watermaster
Notes to the Financial Statements
For the Fiscal Years Ended June 30, 2014 and 2013

(1) Reporting Entity and Summary of Significant Accounting Policies, continued

D. Assets, Liabilities and Net Position, continued

5. Prepaid Expenses

Certain payments to vendors reflect costs or deposits applicable to future accounting periods and are recorded as prepaid items in the basic financial statements.

6. Compensated Absences

The Watermaster's policy is to permit eligible employees to accumulate earned vacation up to a total of 320 hours. Eligible employees accrue and accumulate sick leave based on Watermaster policy. Twice a year, employees may buy-back accrued sick leave at 50% of their current pay provided that at least 480 hours of accrued sick leave remain after the cash-out. Upon termination of employment, employees are paid all unused vacation, and unused sick time is paid out based on Watermaster policy.

7. Water Production Assessments

Water Production Assessment categories include: Administration, Optimum Basin Management Program, Special Projects, and Water Replenishment. Assessments are billed on a yearly basis.

8. Capital Assets

Capital assets acquired and/or constructed are capitalized at historical cost. Donated assets are recorded at estimated fair market value at the date of donation. Upon retirement or other disposition of capital assets, the cost and related accumulated depreciation are removed from the respective balances and any gains or losses are recognized. Depreciation is recorded on a straight-line basis over the estimated useful lives of the assets as follows:

Computer equipment and software	5 years
Office furniture and fixtures	7 years
Leasehold improvements	10 years
Automotive equipment	7 years

9. Budgetary Policies

The Watermaster adopts an annual operational budget for planning, control, and evaluation purposes. Budgetary control and evaluation are affected by comparisons of actual revenues and expenses with planned revenues and expenses for the period. Encumbrance accounting is not used to account for commitments related to unperformed contracts for construction and services.

10. Net Position

The financial statements utilize a net position presentation. Net position is categorized as follows:

- Net Investment in Capital Assets Component of Net Position – This component of net position consists of capital assets, net of accumulated depreciation and is reduced by any outstanding debt outstanding against the acquisition, construction or improvement of those assets. Deferred outflows of resources and deferred inflows of resources that are attributable to the acquisition, construction, or improvement of those assets or related debt is included in this component of net position
- Restricted Component of Net Position – This component of net position consists of constraints placed on net position use through external constraints imposed by creditors, grantors, contributors, or laws or regulations of other governments or constraints imposed by law through constitutional provisions or enabling legislation.

For the Fiscal Years Ended June 30, 2014 and 2013

(1) Reporting Entity and Summary of Significant Accounting Policies, continued

D. Assets, Liabilities and Net Position, continued

10. Net Position, continued

- Unrestricted Component of Net Position – This component of net position is the net amount of the assets, deferred outflows of resources, liabilities, and deferred inflows of resources that are not included in the determination of the net investment in capital assets or restricted component of net position.

(2) Cash and Investments

Cash and investments as of June 30, are classified in the Statements of Net Position as follows:

	<u>2014</u>	<u>2013</u>
Cash and cash equivalents	\$ 7,514,925	6,773,004

Cash and investments as of June 30, consist of the following:

	<u>2014</u>	<u>2013</u>
Cash on hand	\$ 500	500
Deposits with financial institutions	416,030	315,970
Investments	<u>7,098,395</u>	<u>6,456,534</u>
Total cash and investments	<u>\$ 7,514,925</u>	<u>6,773,004</u>

As of June 30, the Watermaster's authorized deposits had the following maturities:

	<u>2014</u>	<u>2013</u>
Deposits held with the California Local Agency Investment Fund	232 days	278 days

Investments Authorized by the California Government Code and the Watermaster's Investment Policy

The table below identifies the investment types that are authorized by the Watermaster in accordance with the California Government Code (or the Watermaster's investment policy, where more restrictive). The table also identifies certain provisions of the California Government Code (or the Watermaster's investment policy, where more restrictive) that address interest rate risk, credit risk, and concentration of credit risk.

<u>Authorized Investment Type</u>	<u>Maximum Maturity</u>	<u>Maximum Percentage of Portfolio</u>	<u>Maximum Investment in One Issuer</u>
U.S. Treasury obligations	5 years	None	None
Federal agency and bank obligations	5 years	None	None
Certificates-of-deposits (negotiable or placed)	5 years	30%	10%
Commercial paper (prime)	270 days	10%	10%
Money market mutual funds	N/A	20%	None
State and local bonds, notes and warrants	N/A	None	None
California Local Agency Investment Fund (LAIF)	N/A	None	None
Investment Trust of California (CalTRUST)	N/A	None	None

Chino Basin Watermaster
Notes to the Financial Statements
For the Fiscal Years Ended June 30, 2014 and 2013

(2) Cash and Investments, continued

Custodial Credit Risk

Custodial credit risk for *deposits* is the risk that, in the event of the failure of a depository financial institution, a government will not be able to recover its deposits, or will not be able to recover collateral securities that are in the possession of an outside party. The California Government Code and the Watermaster's investment policy does not contain legal or policy requirements that would limit the exposure to custodial credit risk for deposits, other than the following provision for deposits:

The California Government Code requires that a financial institution secure deposits made by state or local governmental units by pledging securities in an undivided collateral pool held by a depository regulated under state law (unless so waived by the governmental unit). The market value of the pledged securities in the collateral pool must equal at least 110% of the total amount deposited by the public agencies. Of the Watermaster's bank balances, up to \$250,000 at June 30, 2014 and 2013, were federally insured and the remaining balance is collateralized in accordance with the Code; however, the collateralized securities are not held in the Watermaster's name.

The custodial credit risk for *investments* is the risk that, in the event of the failure of the counterparty (e.g., broker-dealer) to a transaction, a government will not be able to recover the value of its investment or collateral securities that are in the possession of another party. The Code and the Watermaster's investment policy contain legal and policy requirements that would limit the exposure to custodial credit risk for investments. With respect to investments, custodial credit risk generally applies only to direct investments in marketable securities. Custodial credit risk does not apply to a local government's indirect investment in securities through the use of mutual funds or government investment pools (such as LAIF).

Investment in State Investment Pool

The Watermaster is a voluntary participant in the Local Agency Investment Fund (LAIF) that is regulated by the California Government Code under the oversight of the Treasurer of the State of California. The fair value of the Watermaster's investment in this pool is reported in the accompanying financial statements at amounts based upon the Watermaster's pro-rata share of the fair value provided by LAIF for the entire LAIF portfolio (in relation to the amortized cost of that portfolio). The balance available for withdrawal is based on the accounting records maintained by LAIF, which are recorded on an amortized cost basis.

Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment the greater the sensitivity of its fair value to changes in market interest rates. One of the ways that the Watermaster manages its exposure to interest rate risk is by purchasing a combination of shorter term and longer term investments and by timing cash flows from maturities so that a portion of the portfolio matures or comes close to maturity evenly over time as necessary to provide for cash flow requirements and liquidity needed for operations.

Credit Risk

Credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization. Presented below is the minimum rating required by (where applicable) the California Government Code, the Watermaster's investment policy, or debt agreements, and the actual rating as of year-end for each investment type.

Chino Basin Watermaster
Notes to the Financial Statements
For the Fiscal Years Ended June 30, 2014 and 2013

(2) Cash and Investments, continued

Concentration of Credit Risk

The Watermaster's investment policy contains no limitations on the amounts that can be invested in any one issuer as beyond that stipulated by the California Government Code. There were no investments in any one issuer (other than for U.S. Treasury securities, mutual funds, and external investment pools) that represented 5% or more of total Watermaster's investments at June 30, 2014 and 2013, respectively.

(3) Capital Assets

Changes in capital assets for 2014 were as follows:

	Balance 2013	Additions	Disposals/ Transfers	Balance 2014

\$ 105,015	98,375	(71,544)	131,846	46,146	85,700

(5) Defined Benefit Pension Plan

Plan Description

The Watermaster contributes to the California Public Employees Retirement System (CalPERS), a cost-sharing multi-employer defined benefit pension plan. CalPERS provides retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. CalPERS acts as a common investment and administrative agent for participating public agencies within the State of California. Benefit provisions and all other requirements are established by state statute and the Watermaster. Copies of CalPERS annual financial report may be obtained from their executive Office: 400 P Street, Sacramento, CA 95814.

Funding Policy

All regular and introductory employees hired before January 1, 2013 are enrolled in the 2.5% at 55 Risk Pool and Watermaster pays a portion of the employee contribution to PERS.

Participants are required to contribute 8% of their annual covered salary. The Watermaster makes the contributions required of the employees on their behalf and for their account. Benefit provisions and all other requirements are established by state statute and the Watermaster contract with employee bargaining groups.

As a part of an employee benefit, Watermaster pays the employer's contribution to CalPERS. With the adoption of Public Employees' Pension Reform Act of 2013 (PEPRA), Watermaster may pay a portion of the employee contribution to CalPERS or the employee could be responsible for the entire employee portion to CalPERS.

All regular and introductory employees hired after January 1, 2013 will be enrolled in the 2% at 62 Risk Pool and Watermaster does not pay the employee's contribution to PERS and the payment is the responsibility of the employee.

**Chino Basin Watermaster
Notes to the Financial Statements
For the Fiscal Years Ended June 30, 2014 and 2013**

(5) Defined Benefit Pension Plan, continued

Also, the Watermaster is required to contribute the actuarially determined remaining amounts necessary to fund the benefits for its members. The required employer contribution rates are equal to the annual pension costs (APC) percentage of payroll for fiscal years 2014, 2013 and 2012, as noted below. The contribution requirements of the plan members are established by State statute, and the employer contribution rate is established and may be amended by CalPERS. For fiscal years 2014, 2013 and 2012, the Watermaster's annual contributions for the CalPERS plan were equal to the Agencies required and actual contributions for each fiscal year as follows:

Three Year Trend Information:

Three Year Trend Information:

<u>Fiscal Year</u>	<u>Annual Pension Cost (APC)</u>	<u>Percentage of APC Contributed</u>	<u>Net Pension Obligation</u>	<u>APC Percentage of Payroll</u>
2012	\$ 184,073	100%	-	14.298%
2013	154,432	100%	-	14.978%
2014	150,977	100%	-	14.660%

(6) Other Post-Employment Benefits Payable

The Watermaster provides other post-employment benefits (OPEB) to qualified employees who retire from the Watermaster and meet the Watermaster's vesting requirements. During the fiscal year ended June 30, 2013, the Watermaster implemented GASB Statement No. 45, which changed the accounting and financial reporting used by local government employers for post-employment benefits. Previously, the costs of such benefits were generally recognized as expenses of local government employers on a pay-as-you-go basis. The new reporting requirements for these benefit programs as they pertain to the Watermaster are set forth below.

Background

The CalPERS Health Benefits Program is governed by the Public Employees' Medical and Hospital Care Act (PEMHCA) of the California Public Employees' Retirement Law. The program was established in 1962 to purchase health care for employees of the State of California. In 1976, legislation was passed to allow other public employers, such as cities, counties, and school districts to join the program.

Contracting Public Agencies must offer all eligible active and retired employees an opportunity to enroll in a CalPERS health plan of their choice. All employers are required by statute to contribute towards the cost of the health plan premium. Premiums and health plan benefits are approved annually by the CalPERS Board of Administration.

The CalPERS Health Benefits Program offers a choice of health plans to provide basic coverage to active employees and Supplement to Medicare and Managed Medicare coverage for retired members. Eligible enrollees can choose between a variety of Health Maintenance Organizations, Preferred Provider Organizations and employee association plans.

Plan Description – Eligibility

The Watermaster's Retiree Health Plan is a single-employer defined benefit healthcare plan administered by the California Public Employees Retirement System (CalPERS). The Plan provides medical insurance benefits to eligible retirees and their dependents.

In accordance with Public Employee Retirement Law (Article 2), the Public Employees Retirement System Board of Administration has the responsibility to approve health benefit plans and may contract with carriers offering health benefit plans.

**Chino Basin Watermaster
Notes to the Financial Statements
For the Fiscal Years Ended June 30, 2014 and 2013**

(6) Other Post-Employment Benefits Payable, continued

Plan Description – Eligibility, continued

The Board of Administration is responsible for adopting all rules and regulations, including scope and content of basic health plans. The California Government Code also defines certain rules for contract agencies to purchase health insurance benefits.

Membership in the OPEB plan consisted of the following members as of June 30:

	2014	2013	2012
Active plan members	9	7	-
Active employees' dependents	4	4	-
Retirees and dependents receiving benefits	1	1	-
Retirees and dependents not receiving benefits	-	-	-
Total plan membership	14	12	-

Funding Policy

There is no requirement imposed by CalPERS, to contribute any amount beyond the pay-as-you-go contributions. The cost of monthly insurance premiums is shared between the retiree and the Watermaster. The cost sharing varies depending upon: the dependent status and plan selected. A minimum employer monthly contribution requirement is established and may be amended by the CalPERS Board of Administration and applicable laws.

The Watermaster is required to contribute the *Annual Required Contribution (ARC) of the Employer*, an amount actuarially determined in accordance with the parameters of GASB Statement No. 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover the normal cost each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed thirty years. The current ARC rate is 1.4% of the annual covered payroll.

Annual Cost

For the years ended June 30, 2014 and 2013, the Watermaster's ARC cost is \$79,930 and \$71,017, respectively. The Watermaster's net OPEB payable obligation amounted to \$148,444 and \$69,637 for the years ended June 30, 2014 and 2013, respectively. The Watermaster contributed \$1,123 and \$1,380 in adjusted contributions for current retiree OPEB premiums for the years ended June 30, 2014 and 2013, respectively.

Chino Basin Watermaster
Notes to the Financial Statements
For the Fiscal Years Ended June 30, 2014 and 2013

(6) Other Post-Employment Benefits Payable, continued

Annual Cost, continued

The balance at June 30, consists of the following:

	<u>2014</u>	<u>2013</u>	<u>2012</u>
Annual OPEB expense:			
Annual required contribution (ARC)	\$ 79,930	71,017	-
Interest on net OPEB obligation	-	-	-
Adjustment to annual required contribution	-	-	-
Total annual OPEB expense	<u>79,930</u>	<u>71,017</u>	<u>-</u>
Change in net OPEB payable obligation:			
Age adjusted contributions made	<u>(1,123)</u>	<u>(1,380)</u>	<u>-</u>
Total change in net OPEB payable obligation	78,807	69,637	-
OPEB payable – beginning of year	<u>69,637</u>	<u>-</u>	<u>-</u>
OPEB payable – end of year	<u>\$ 148,444</u>	<u>69,637</u>	<u>-</u>

The Watermaster’s annual OPEB cost, the percentage of the annual OPEB cost contributed to the Plan, and the net OPEB obligation for fiscal year 2014 and the two preceding years were as follows:

<u>Three-Year History of Net OPEB Obligation</u>				
<u>Fiscal</u> <u>Year</u> <u>Ended</u>	<u>Annual</u> <u>OPEB</u> <u>Cost</u>	<u>Age</u> <u>Adjusted</u> <u>Contribution</u>	<u>Percentage</u> <u>of Annual OPEB</u> <u>Cost Contributed</u>	<u>Net OPEB</u> <u>Obligation</u> <u>Payable</u>
2014	\$ 79,930	1,123	1.40%	148,444
2013	71,017	1,380	1.94%	69,637
2012	-	-	-	-

(7) Prior Period Adjustment

In 2014, the Watermaster determined that healthcare benefits offered by the Watermaster to employees were subject to the provisions of GASB 45 – *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*. As a result, the Watermaster has recorded a prior period adjustment to net position in the amount of \$69,637 at June 30, 2013.

The adjustment to net position is as follows:

Net position at June 30, 2013, as previously stated	\$ 5,779,083
Effect of adjustment to record OPEB expense	(69,637)
Change in net position at June 30, 2013, as previously stated	<u>443,818</u>
Net position at June 30, 2013, as restated	<u>\$ 6,153,264</u>

**Chino Basin Watermaster
Notes to the Financial Statements
For the Fiscal Years Ended June 30, 2014 and 2013**

(8) Net Position

Calculation of net position as of June 30, were as follows:

	2014	2013
Net investment in capital assets:		
Capital assets, net	\$ 16,832	10,339
Total net investment in capital assets	16,832	10,339
Unrestricted net position:		
Non-spendable net position:		
Prepaid expenses and deposits	39,186	45,413
Total non-spendable net position	39,186	45,413
Spendable net position are designated as follows:		
Undesignated net position reserve	6,711,852	6,097,512
Total spendable net position	6,711,852	6,097,512
Total unrestricted net position	6,751,038	6,142,925
Total net position	\$ 6,767,870	6,153,264

(9) Risk Management

The Watermaster is exposed to various risks of loss related to torts, theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters. The Watermaster is insured for a variety of potential exposures. The following is a summary of the insurance policies carried by the Watermaster as of June 30, 2014:

- Commercial General Liability: \$2,000,000 General Aggregate Limit (Other than Products/Completed Operations); \$2,000,000 Products/Completed Operations Aggregate Limit (Any One Person or Organization); \$1,000,000 Personal and Advertising Injury Limit; \$1,000,000 Each Occurrence Limit; \$100,000 Rented To You Limit; \$5,000 Medical Expenses Limit (Any One Person).
- Commercial Excess Liability: Limits of Liability are \$10,000 Retained Limit, \$4,000,000 Each Occurrence, \$4,000,000 General Aggregate Limit, \$4,000,000 Products/Completed Operations to Aggregate.
- Automobile: \$1,000,000 Combined Bodily Injury and Property Damage Single Limit (Each Accident); \$500,000 Uninsured Motorists Single Limit. \$500 deductible for Comprehensive and \$1,000 deductible for Collision.
- Property: \$525,000 with liability limits varying by property type with a \$1,000 deductible.
- Crime coverage: \$50,000 per claim with a \$1,000 deductible.
- Director and Officer/Crisis Management: \$5,000 to \$50,000 with liability limits varying by type of coverage.
- Workers' compensation: \$2,000,000 each accident or each employee by disease.

Notes to the Financial Statements
For the Fiscal Years Ended June 30, 2014 and 2013

(10) Governmental Accounting Standards Board Statements Issued, Not Yet Effective

The Governmental Accounting Standards Board (GASB) has issued several pronouncements prior to June 30, 2014, that has effective dates that may impact future financial presentations.

Governmental Accounting Standards Board Statement No. 68

In June 2012, the GASB issued Statement No. 68 – Accounting and Financial Reporting for Pensions—an amendment of GASB Statement No. 27. The primary objective of this Statement is to improve accounting and financial reporting by state and local governments for pensions. It also improves information provided by state and local governmental employers about financial support for pensions that is provided by other entities. This Statement results from a comprehensive review of the effectiveness of existing standards of accounting and financial reporting for pensions with regard to providing decision-useful information, supporting assessments of accountability and inter-period equity, and creating additional transparency.

This Statement replaces the requirements of Statement No. 27, Accounting for Pensions by State and Local Governmental Employers, as well as the requirements of Statement No. 50, Pension Disclosures, as they relate to pensions that are provided through pension plans administered as trusts or equivalent arrangements (hereafter jointly referred to as trusts) that meet certain criteria. The requirements of Statements 27 and 50 remain applicable for pensions that are not covered by the scope of this Statement. The provisions of Statement 68 are effective for fiscal years beginning after June 15, 2014. The impact of the implementation of this Statement to the Watermaster’s financial statements has not been assessed at this time.

Governmental Accounting Standards Board Statement No. 69

In January 2013, the GASB issued Statement No. 69 – Government Combinations and Disposals of Government Operations. The objective of this Statement is to provide new accounting and financial reporting standards for government mergers and acquisitions and for government operations that have been transferred or sold. The provisions of this Statement are effective for financial statements for periods beginning after December 15, 2013. The impact of the implementation of this Statement to the Watermaster’s financial statements has not been assessed at this time.

Governmental Accounting Standards Board Statement No. 70

In April 2013, the GASB issued Statement No. 70 – Accounting and Financial Reporting for Non-exchange Guarantees. Provisions of this Statement require that governments that extend non-exchange financial guarantees to recognize a liability when qualitative factors and historic data, if any, indicate that it is more likely than not that the government will be required to make a payments on the guarantee. The amount of the liability to be recognized should be the discounted present value of the best estimate of the future outflows related to the guarantee expected to be incurred. When there is no best estimate, but a range of the estimated future outflows can be established, the amount of the liability to be recognized should be the discounted present value of the minimum amount within the range.

**Chino Basin Watermaster
Notes to the Financial Statements
For the Fiscal Years Ended June 30, 2014 and 2013**

(10) Governmental Accounting Standards Board Statements Issued, Not Yet Effective

Governmental Accounting Standards Board Statement No. 71

In November 2013, the GASB issued Statement No. 71 – *Pension Transition for Contributions made Subsequent to the Measurement Date – an amendment of GASB No. 68*. The objective of this statement is to address an issue regarding application of the transition provisions of Statement No. 68, *Accounting and Financial Reporting for Pensions*. The issue relates to amounts associated with contributions, if any, made by state or local government employer or non-employer contributing entity to a defined benefit pension plan after the measurement date of the government’s beginning net pension liability. The requirements of this Statement will eliminate the source of a potential significant understatement of restated beginning net position and expense in the first year of implementation of Statement No. 68 in the accrual-basis financial statements of employers and non-employer contributing entities. The provisions of this Statement are required to be applied simultaneously with the provisions of Statement No. 68.

The Governmental Accounting Standards Board (GASB) has issued several pronouncements prior to June 30, 2014, that has effective dates that may impact future financial presentations.

(11) Commitments and Contingencies

Grant Awards

Grant funds received by the Watermaster are subject to audit by the grantor agencies. Such an audit could lead to requests for reimbursements to the grantor agencies for expenditures disallowed under terms of the grant. Management of the Watermaster believes that such disallowances, if any, would not be significant.

Litigation

In the ordinary course of operations, the Watermaster is subject to claims and litigation from outside parties. After consultation with legal counsel, the Watermaster believes the ultimate outcome of such matters, if any, will not materially affect its financial condition.

(12) Subsequent Events

Events occurring after June 30, 2014, have been evaluated for possible adjustment to the financial statements or disclosure as of November 20, 2014, which is the date the financial statements were available to be issued.

Required Supplementary Information

**Chino Basin Watermaster
Schedule of Funding Status
For the Year Ended June 30, 2014**

Funded Status and Funding Progress of the Plan

Required Supplemental Information – Schedule of Funding Progress

Actuarial Valuation Date	Actuarial Value of Assets (a)	Actuarial Accrued Liability (b)	Unfunded Actuarial Accrued Liability (UAAL) (b-a)	Funded Ratio (a/b)	Covered Payroll (c)	UAAL as a Percentage of Covered Payroll ((b-a)/c)
6/30/2014	\$ -	381,010	381,010	-	858,882	44.36%
6/30/2013	-	354,220	354,220	-	707,444	50.07%
6/30/2012	-	-	-	-	-	-

The most recent valuation (dated June 30, 2014) includes an Actuarial Accrued Liability and Unfunded Actuarial Accrued Liability of \$381,010. The covered payroll (annual payroll of active employees covered by the plan) for the year ended June 30, 2014 was \$858,882. The ratio of the unfunded actuarial accrued liability to annual covered payroll is 44.36 %.

Actuarial Methods and Assumptions

Actuarial valuations involve estimates of the value of reported amounts and assumptions about the probability of events far into the future. Actuarially determined amounts are subject to continual revision as actual results are compared to past expectations and new estimates are made about the future. Calculations are based on the types of benefits provided under the terms of the substantive plan at the time of each valuation and the pattern of sharing of costs between the employer and plan members to that point. Consistent with the long-term perspective of actuarial calculations, actuarial methods and assumptions used include techniques that are designed to reduce short-term volatility in actuarial accrued liabilities for benefits.

The following is a summary of the actual assumptions and methods:

Valuation date	June 30, 2014
Actuarial cost method	Entry age normal cost method
Amortization method	Level percent of payroll
Remaining amortization period	20 years as of the valuation date
Actuarial assumptions:	15 year smooth market
Discount rate	5.00% (net of administrative expenses)
Projected salary increase	3.00%
Inflation - discount rate	5.00%
Individual salary growth	3.00%

Report on Internal Controls and Compliance

**Independent Auditor's Report on Internal Control over Financial Reporting
and on Compliance and Other Matters Based on an Audit of Financial Statements
Performed in Accordance with *Government Auditing Standards***

Board of Directors
Chino Basin Watermaster
Rancho Cucamonga, California

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the Chino Basin Watermaster (Watermaster) as of and for the years June 30, 2014 and 2013, and the related notes to the financial statements, which collectively comprises the Watermaster's basic financial statements, and have issued our report thereon dated November 20, 2014

Internal Control Over Financial Reporting

In planning and performing our audits of the financial statements, we considered the Watermaster's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Watermaster's internal control. Accordingly, we do not express an opinion on the effectiveness of the Watermaster's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Watermaster's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audits, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

**Independent Auditor's Report on Internal Controls Over Financial Reporting
And on Compliance and Other Matters Based on an Audit of Financial Statements
Performed in Accordance with *Government Auditing Standards*, (continued)**

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Watermaster's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Watermaster's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
