I.

NATURE OF ACTION

This action is a plenary adjudication of all rights in and to the ground waters of Chino Basin and its storage capacity. The case is predicated on the fact that the basin is, and since at least 1953 has been, in a condition of overdraft.

The Judgment adjudicated the rights of several hundred overlying landowners, producing in the aggregate over sixty percent of the basin supply for agricultural use, as well as several substantial industrial and commercial producers of water for use on their overlying lands, cities, public water districts, utilities, and mutual water companies all of whom produce water from the basin.

Each of the defendants named in the Judgment is a water producer or other water claimant or public water district within the Chino Basin. Each such defendant has been identified as a member of one of the following three groups:

a. Overlying (Agricultural) Producers -- A party entitled to possession of lands overlying Chino Basin producing water from such basin for overlying agricultural use on said lands.

b. Overlying (Non-Agricultural) Producers -- A party entitled to possession of lands overlying Chino Basin producing water from such basin for overlying use on said lands for other than agricultural purposes.

c. Appropriator -- A party producing water from Chino Basin pursuant to an appropriative or prescriptive right, which right is protected from loss or diminution by prescription by the provisions of Section 1007 of the California Civil Code.

1 II.

2 HIGHLIGHTS OF THE JUDGMENT

3 A. Declaration of Rights.

4 1. Overlying Agricultural Rights. Because of the nature
5 of the Physical Solution and the method of assessment proposed for
6 the exercise of overlying agricultural rights, it was not necessary
7 to declare individual overlying rights. This avoided a dual proble
8 First, the total number of parties in the category exceeded 1,200.
9 Second, the available records and measuring devices for precise
10 calculation of individual rights was less than adequate. Thus the
11 rights of all agricultural users have been declared in gross for
12 all necessary purposes of the Judgment.

13 2. State of California. Because of the several diverse
14 and complex interests of the State of California, and in view of
15 the willingness of the State to stipulate to be bound by the
16 Physical Solution of the Judgment, no attempt was made in the
17 Judgment to define or categorize the rights of the State of Cali-
18 fornia. The State and its agencies were subjected by Judgment, to
19 the Physical Solution, and their rights are treated in gross along
20 with the overlying agricultural rights.

21 3. Appropriative Rights. The twenty-two parties in the
22 "Appropriative Pool" have rights which are appropriative and pre-
23 scriptive in nature. Under full adjudication of such rights to
24 ground water each would have had differing priorities and quantitie
25 The complexity of such determination was avoided by resorting to
26 principles of mutual prescription in the Judgment. Thus, all of
27 the parties who are appropriators have been adjudged that their
28 rights have equal priority.

1 B. Continuing Jurisdiction of Watermaster Provisions.

2 1. Exemptions from Continuing Jurisdiction. The Court,
3 with limited exceptions, retained continuing jurisdiction of the
4 case. Exempted (either entirely or for a specific period of time)
5 from the Court's continuing jurisdiction was the re-determination
6 of Safe Yield and modifications of assessment formulas in the
7 appropriate pool for a period of ten years.

8 2. Watermaster Organization and Powers. The public
9 interests in the preservation of the water resource was protected
10 and assured in the sense that the Court's Watermaster is an over-
11 lying district, which holds no rights to produce ground water but
12 is the importing agency bringing supplemental water into the basin.
13 At the same time, the Watermaster Advisory Committee was created
14 and given broad powers to review, advise and consent to the action
15 of the Watermaster, subject to more detailed actions by pool com-
16 mittees formed to advise, consent and administer the affairs of th
17 several pools established under the Physical Solution. In these
18 many provisions, there is a balance created to assure the protection
19 of the private rights of the parties and the general public interest
20 in the preservation of the resource.

21 C. Physical Solution. The Physical Solution is the heart of
22 the Judgment. It is essential to understanding of the Physical
23 Solution that it be recognized that there is sufficient water to
24 meet the needs of all of the parties. This is because there are
25 significant imported water supplies available to supplement the
26 native Safe Yield of the basin. However, the supplemental waters
27 are significantly more expensive than local ground waters. Accord-
28 ingly, the function of the Judgment, and of its Physical Solution,

1 is to provide an equitable and feasible method of assuring that a
2 parties share in the burden of the costs of importing the necessa
3 supplemental water to achieve a hydrologic balance within Chino
4 Basin.

5 The Physical Solution provides the mechanics by which the
6 management plan is implemented. The basic concept of the Physical
7 Solution is similar to that adopted in the prior ground water
8 adjudications in Southern California, i.e., the parties are entitl
9 to produce their requirements for ground water from the basin,
10 provided that they contribute, by Watermaster assessments, suffici
11 money to assure purchase of supplemental water to replace any
12 aggregate production in excess of the Safe Yield. It is in the
13 detailed formulation of that Physical Solution that some of the
14 most interesting features of the Judgment were developed.

15 1. Multiple Pool Plans. All of the parties have been
16 categorized into three major pools. The total Safe Yield of the
17 basin has been allocated as between the three pools with each pool
18 assuming a level of reduction in aggregate rights below current
19 levels of production. Within each pool, by utilizing this format,
20 the Judgment grouped parties with distinct economic and social
21 concerns in a manner allowing them to provide the necessary funding
22 within their particular needs and requirements. For example, it is
23 of importance to agricultural operations that the total cost of
24 water be kept to a minimum. It is also important to the entire
25 area that the Physical Solution be structured so as to encourage
26 continued commitment of land to agricultural or "green belt" activi
27 Accordingly, approximately 60% of the Safe Yield of the basin is
28 committed, in gross, to the Overlying (Agricultural) Pool. Over

1 production by that pool, in the aggregate, is to be replaced by a
2 gross assessment on all production by all parties within the pool
3 The net effect of the use of this assessment technique, under cur-
4 rent conditions, is an assessment in the magnitude of \$5.00 per
5 acre foot for replenishment water.

6 On the other hand, overlying industrial and commercial
7 users do not find the cost of water to be as critical a factor.
8 Accordingly, the more traditional "net assessment" formula was
9 used with rights being allocated among the twelve members of the
10 Overlying (Non-Agricultural) Pool. In this assessment mode, over-
11 production is replenished on the basis of an assessment for the
12 full cost of excess water produced on an acre foot per acre foot
13 basis.

14 In the case of the Appropriators, the Judgment developed
15 formula whereby the total over-production by that pool is met by
16 a gross assessment as to 15% of the cost and a net assessment as to
17 the remaining 85% of the cost.

18 The Judgment then leaves the assessment pattern within
19 each pool under the continuing jurisdiction provisions subject to
20 review and modification by the Court. Thus, each category of
21 producers retains the maximum flexibility to meet future and
22 developing circumstances. In this regard, the Judgment specifically
23 recognizes the impact of social-economic conditions and provides
24 for continuing study of those factors.

25 2. Operating Safe Yield. The concept of operating Safe
26 Yield was applied with regard to the Appropriative Pool. The net
27 effect of the concept was to allow limited mining of water in
28 storage in excess of Safe Yield during the early period of the

1 Physical Solution in order to reduce the burden of assessment. As
2 a result, provision was made for limited extractions by the Approp-
3 priative Pool in excess of that pool's share of the Safe Yield.
4 Offsetting that right is the fact that the Appropriative Pool takes
5 the full burden of reductions in the Safe Yield if such reductions
6 should occur in the future. A maximum limit of 200,000 acre feet
7 has been placed upon the aggregate mining of water authorized under
8 this provision of the Judgment.

9 3. Ground Water Storage Contracts. The utilization of
10 excess ground water storage capacity has been recognized in the
11 Judgment. The administration of activities of storing water to
12 utilize that capacity are provided for in underground storage
13 agreements pursuant to Watermaster regulations. This is an enormous
14 significant aspect of the adjudication, in view of the existence of
15 approximately 2,000,000 acre feet of unused storage capacity within
16 the basin, the largest resource of its kind in Southern California.

17 4. In Lieu Areas. The element of water quality, hereto-
18 fore only peripherally approached in ground water adjudication, was
19 accommodated in the Judgment by provision for "in lieu areas."
20 Therein producers may obtain compensation for water left in the
21 ground in lieu of its production pursuant to adjudicated rights.
22 Provision is made within the Judgment for "in lieu areas" to be
23 established by action of the Court.

24 5. Facilities Equity Assessment. In the Appropriative
25 Pool, provision has been made for implementation of a "facilities
26 equity assessment" as an aid to a gross assessment if that was
27 ultimately adopted by the pool. These provisions are generally
28 patterned on the statutory solution involved in the Basin Equity

1 Assessment provisions of the Orange County Water District Act.

2 6. Agency Contracts for Exercise of Overlying (Non-
3 Agricultural) Rights. The overlying rights of the Non-Agricultura
4 Pool may be well exercised ultimately by municipal systems of
5 parties within the Appropriative Pool. Inasmuch as the overlying
6 right by its nature is appurtenant to the land and cannot be trans-
7 ferred, provision is made for an appropriator to enter into and
8 approve an agency agreement to produce water for delivery to the
9 overlying land pursuant to its overlying right.

10 7. Unallocated Safe Yield Water. It is contemplated tha
11 over a long period of years, agricultural production may well fall
12 substantially below the aggregate amount of the Safe Yield right
13 allocated to the pool. That Safe Yield right will remain availabl
14 for agricultural use, but in a given year or a series of years
15 there may be a substantial amount of Safe Yield water which is not
16 pumped by Overlying Agricultural Pool parties. The Judgment adopt
17 a formula for allocating that unpumped water among the members of t;
18 Appropriative Pool by first, replacing any reductions in Safe Yiel
19 (the full impact of which falls on the Appropriative Pool), and
20 then to recognize the conversion of agricultural land to municipal
21 and domestic purposes.

22 8. Use of Reclaimed Water. Reclaimed water is recognized
23 as part of supplemental water subject to use for replenishment by
24 Watermaster or for storage by any party.

25 9. Export. The Judgment did not limit or prohibit export
26 of ground water production, but such export over base export
27 quantities was made subject to a full net assessment. That is, a
28 party producing "new" water for export must pay an assessment

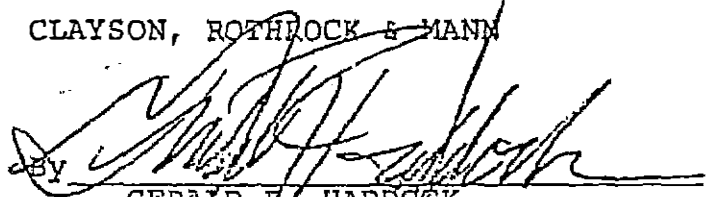

1 sufficient to buy or replenishment water to replace exported wa
2 acre foot for acre foot.

3 10. Unlawful Pumping Practices. The Judgment does not
4 preclude the prosecution of any cause of action which may arise
5 with relation to the location on the extent of pumping between
6 neighboring well owners which may constitute a wrongful interfer
7 The subject matter of the Judgment is the determination and allo
8 cation of rights in the gross quantity of water representing the
9 Safe Yield of the ground water basin.

BLOG POST · MARCH 22, 2022

What Every Californian Should Know About Groundwater

Sarah Bardeen

In honor of [World Water Day](#)—its theme is “Groundwater—making the invisible visible”—we asked a handful of PPIC Water Policy Center senior staff to discuss groundwater and drought in California.

What should every Californian know about groundwater?

Jeff Mount: Groundwater is our drought reserve, but we tend to treat it like a regular part of our water supply. It's usually 30% of our water supply, but during drought it's more than 60%. The problem is that we don't reserve enough for droughts and use too much during wetter periods.

Andrew Ayres: For a long time we treated groundwater like a property right, but it was a pretty lousy property right. A property right not only entitles you to access it but also excludes others from accessing it. That's not what groundwater rights do in California. That is the source of many, if not all, of our groundwater problems.

JM: Now we've got the Sustainable Groundwater Management Act (SGMA), which requires that you use that property right in a sustainable way. This is certainly the most important change to the water code in a generation, if not the last hundred years.

Alvar Escriva-Bou: Yes, and it comes a hundred years after the state's water code—which focused on surface water—was adopted. That code didn't address groundwater—precisely because it was invisible! We've mismanaged groundwater for a hundred years. There's a misperception that climate change is responsible for California's water challenges, but while warming is making things worse, California's groundwater problem started well before the climate began changing.

JM: The mismanagement started with the invention of more powerful groundwater pumps. We used to live on the water we had, which is why you had so much dryland farming in the San Joaquin Valley. Once we got new pumps, everything changed. From the 1920s on, we've managed groundwater unsustainably.

AEB: A California [Department of Public Works document from 1927](#) shows that hundreds of thousands of acres were relying on unsustainable groundwater back then.

Ellen Hanak: That's why we built the Central Valley Project, and then the State Water Project. Land was sinking! The San Joaquin Valley was a good place to farm if you could get water there, but the groundwater pumping got really unsustainable, really quickly.

Caity Peterson: I keep thinking about the World Water Day frame of “making the invisible visible.” One of the underlying reasons why groundwater's been managed poorly over the past hundred years is because we can't see it. One challenge is setting appropriate baselines for groundwater to know where our sustainable yields are. That's hasn't really been done very well in the past, except in basins that were adjudicated after everyone started suing each other. Measuring groundwater is a way of making it more visible.

AEB: Caity makes a great point. California has [vast groundwater basins that](#) can hold 20 times more water than our surface reservoirs, but most of this shouldn't be tapped. We've taken out a lot more water than we've replaced.

EH: That's how we've gotten to overdraft. There are places in the world that don't have our groundwater reserves, so you run out of steam pretty quickly. Whereas in California, if you sink a well a little deeper, in most places you can find more water. That's both a blessing and curse.

What do you wish for the future of California's groundwater?

CP: I wish that, rather than viewing our efforts to attain sustainable groundwater as a burden, water users would view this as a time to reevaluate how we manage water and look towards more creative and functional solutions going forward. Can we bite the bullet and do it now, or will we wait until later, when it'll really hurt?

AA: We need to account for water in the ground, monitor it, and understand what's there. But we also need to make the currently invisible costs of withdrawing groundwater visible. That means pricing it, creating groundwater markets, and having institutional mechanisms that signal when we're using too much.

JM: I wish we had the wet years of 1995-99 again. We need a breather. This has been such a brutal 22 years—climate change is hitting us so hard that it's making it very difficult to bring groundwater basins into balance.

EH: But maybe there's a silver lining here. Scarcity is going to push folks to put in place the formal mechanisms that make groundwater visible. It would have been impossible for local agencies to do that if we were in a really wet period. If they get groundwater allocation, monitoring, and pricing systems in place, and *then* we get some good wet years, so much the better. Those same tools will help agencies implement more effective groundwater recharge projects, too.

AEB: Eight years ago there was virtually no regulation of groundwater in California. Now we're in this big, bad drought, and a lot of folks are complaining that we've passed SGMA and nothing's been done. Actually, this is not correct. In just seven years, we've been able to put together groundwater sustainability agencies and develop and begin to implement groundwater plans. A few of these agencies even had groundwater pumping restrictions in 2021, and that's a big step.

CONVERSATION

Four decades of sustainable groundwater management

An interview with Peter Kavounas, General Manager, Chino Basin Watermaster

Peter Kavounas is the General Manager of Chino Basin Watermaster, the nine-person entity created in 1978 by a state Superior Court adjudication judgment. The Watermaster is charged by the Court to sustainably manage groundwater in the 235-square-mile Chino Basin in San Bernardino, Riverside and Los Angeles counties.

Under the oversight of a board that represents the basin's groundwater users, Watermaster monitors groundwater extraction so that it does not exceed the basin's safe yield. In some ways, the roles and responsibilities of the Watermaster are similar to those of the groundwater sustainability agencies (GSAs) formed recently around the state under the Sustainable Groundwater Management Act.

California Agriculture spoke with Kavounas about the challenges that the Chino Basin Watermaster has faced and potential lessons that the agency's experience may offer for GSAs around the state as they prepare and implement groundwater sustainability plans (GSPs).

What have been the key elements to making sustainable groundwater management work in the Chino Basin?

I would say that the most important element has been willingness and commitment to cooperate on the part of the stakeholders, starting with the 1978 judgment, which was a stipulation, an agreement by all, that was ordered by the Court. The basin experienced overdraft, and everybody recognized that some kind of allocation of water rights made more sense.

The second element is continuously getting everybody to the point of awareness and agreement about the issues — that takes political leadership. It is essential for long-term success that the stakeholders stay engaged. You have to have management and oversight systems that adapt and evolve over time.

One of the most interesting things about the Chino Basin judgment was that it looked at what was likely to happen in the future, which was that agricultural use was likely to decrease and urban development was likely to expand, and provided for an orderly transfer of unused rights from agriculture to appropriators. So, it needs to be more than “let's just manage for what's happening to today.” We have to ask whether and how cities and agriculture are likely to change, and plan for that.

How has the management of the basin changed over the years to respond to changing conditions?

The first step was to determine the safe yield in 1978 and adjust as the land use has changed. Also, the judgment ordered Watermaster to create an optimum basin management plan that drives data collection, better understanding of hydrology and water budget, development of water supply plans, storage management, and subsidence management. This plan was adopted in the year 2000 and has been actively implemented since.

In round numbers, the safe yield was originally set at 140,000 acre-feet per year; the overlying land owners' (agricultural and nonagricultural users) share is 90,000, and the appropriators' share is 50,000. Since then, because the basin has been so closely monitored and studied, our understanding has improved, particularly with respect to surface water-groundwater interactions. So, we are in the process of adopting a new safe yield of 135,000 acre-feet per year. That will mean that the appropriators' share drops from 50,000 to 45,000 acre-feet per year.

One of the reasons the safe yield has dropped is that, in the Chino Basin, land use has completely reversed. In 1978, more than 70% of the land overlying the groundwater basin was actively farmed. Now more than 70% of it is developed. Land has been paved over, stream channels have been lined with concrete — so we have less recharge from percolation. Because we have the advantage of decades of extensive data collection and very robust computer simulations, we can model how various scenarios of future land-use changes would affect recharge rates and the safe yield.

However, communicating this reduction in the safe yield has been hard — why it is happening, what methods we used to determine what the new safe yield should be. Our lesson learned is that it can be hard to communicate about groundwater models and other technical tools. We have decided that we are going to re-evaluate the safe yield every 10 years — and to address the issue of communication, we have already made clear to the basin water users exactly which methods are going to be used.

How are conflicts among water users resolved in the Chino Basin?

Traditionally, conflicts among users are resolved through discussion and negotiation, and on occasion

Peter Kavounas

litigation. In case there is a difference of opinion among users or with Watermaster about the judgment, the user can be in front of the judge within 30 days. There's a very appealing cleanliness to that. The Court is not affected by politics, and the procedures that have to be followed are clear.

What are the most important lessons you've learned about governing a groundwater management agency?

When I've been invited to speak on panels about SGMA implementation, the point I've made is that GSAs will be called on to produce GSPs, and many GSAs will hire staff to do that, as well as technical and legal consultants. Two points about that:

It's really critical for the governing members of the agency (the board members, the people empowered to make decisions) to be actively engaged in the issues and decisions. It shouldn't be treated as just another committee assignment. Also, the issues — technical, legal and political — are so complex that it can take a year or two for a new board member to get up to speed. So the people appointed to GSA boards should be given some stability — for instance, 5-year terms that are renewable.

Second, is the relationship between the GSA board and GSA management and staff. Inevitably, the staff are going to have to come back and say to the board members, "you can't pump as much as you used to." The staff can't be worried about the politics of that — simply giving the GSA unwelcome news should not be an offense. Groundwater management is a complicated problem — it has money, politics, all the dimensions. So it just has to be approached from a higher perspective.

What are some innovative engineering solutions the Watermaster has implemented?

Chino Basin has had one engineer for 30 years. His understanding of the basin has become almost supernatural, and he's been able to come up with great solutions — for instance for salinity management.

Our basin is a tilted, flow-through basin. The basin naturally empties into its southwest corner, where it connects with the Santa Ana River. We have a lot of high-salinity groundwater in that part of the basin, and as that infiltrated in the river it was increasing the salinity for downstream users of Santa Ana River water — like the Orange County Water District.

We have implemented a groundwater desalination system in that portion of the basin. Two treatment plants — capacity of 40,000 acre-feet per year — remove the salts, and the water goes into the municipal supply systems of water providers in our basin.

The [Santa Ana] Regional Water Quality Control Board was so satisfied with that as an overall salinity control plan that it allowed using recycled water upstream for direct use in farming or groundwater recharge. Flows in the Santa Ana River have remained above the levels required in the adjudication of that river (an adjudication separate from the Chino Basin adjudication). And Orange County is grateful for the reduced salinity.

Any closing thoughts?

In the Chino Basin, we have a plan that we call the Optimum Basin Management Program. It really corresponds to a GSP — and, having seen it work, I'm a believer in SGMA. It will help the state advance to

better groundwater management. Having said that, the ultimate goal is having the state look at water — surface water as well as groundwater — as a singular resource. There's a disconnect now. The existing projects — the State Water Project and the Central Valley Project — are magnificent surface water projects. In the future, their operation will have to be very much integrated with sustainable groundwater management. We'll have to shift from sustainable groundwater management in every basin to sustainable water management statewide. [CA](#)

The Chino Basin

One of the largest groundwater basins in Southern California, the Chino Basin has a total storage capacity of roughly 6 million acre-feet. It currently holds about 5 million acre-feet of water. A substantial fraction of the basin's land area has shifted from agricultural to urban uses in recent decades, and the population continues to grow rapidly.

In the 1960s and '70s, the basin was being overpumped by more than 50,000 acre-feet per year, and water levels were dropping rapidly, as much as 7 feet per year in some areas. This chronic overdraft, combined with disagreements about groundwater allocation, led to adjudication hearings in San Bernardino Superior Court. The adjudication judgment issued in January 1978 established a safe yield of 140,000 acre-feet per year, allocated among overlying agricultural users (82,800 acre-feet per year); overlying nonagricultural users, mainly industry (7,366 acre-feet per year); and appropriative users, mainly municipal water suppliers (49,834 acre-feet per year).

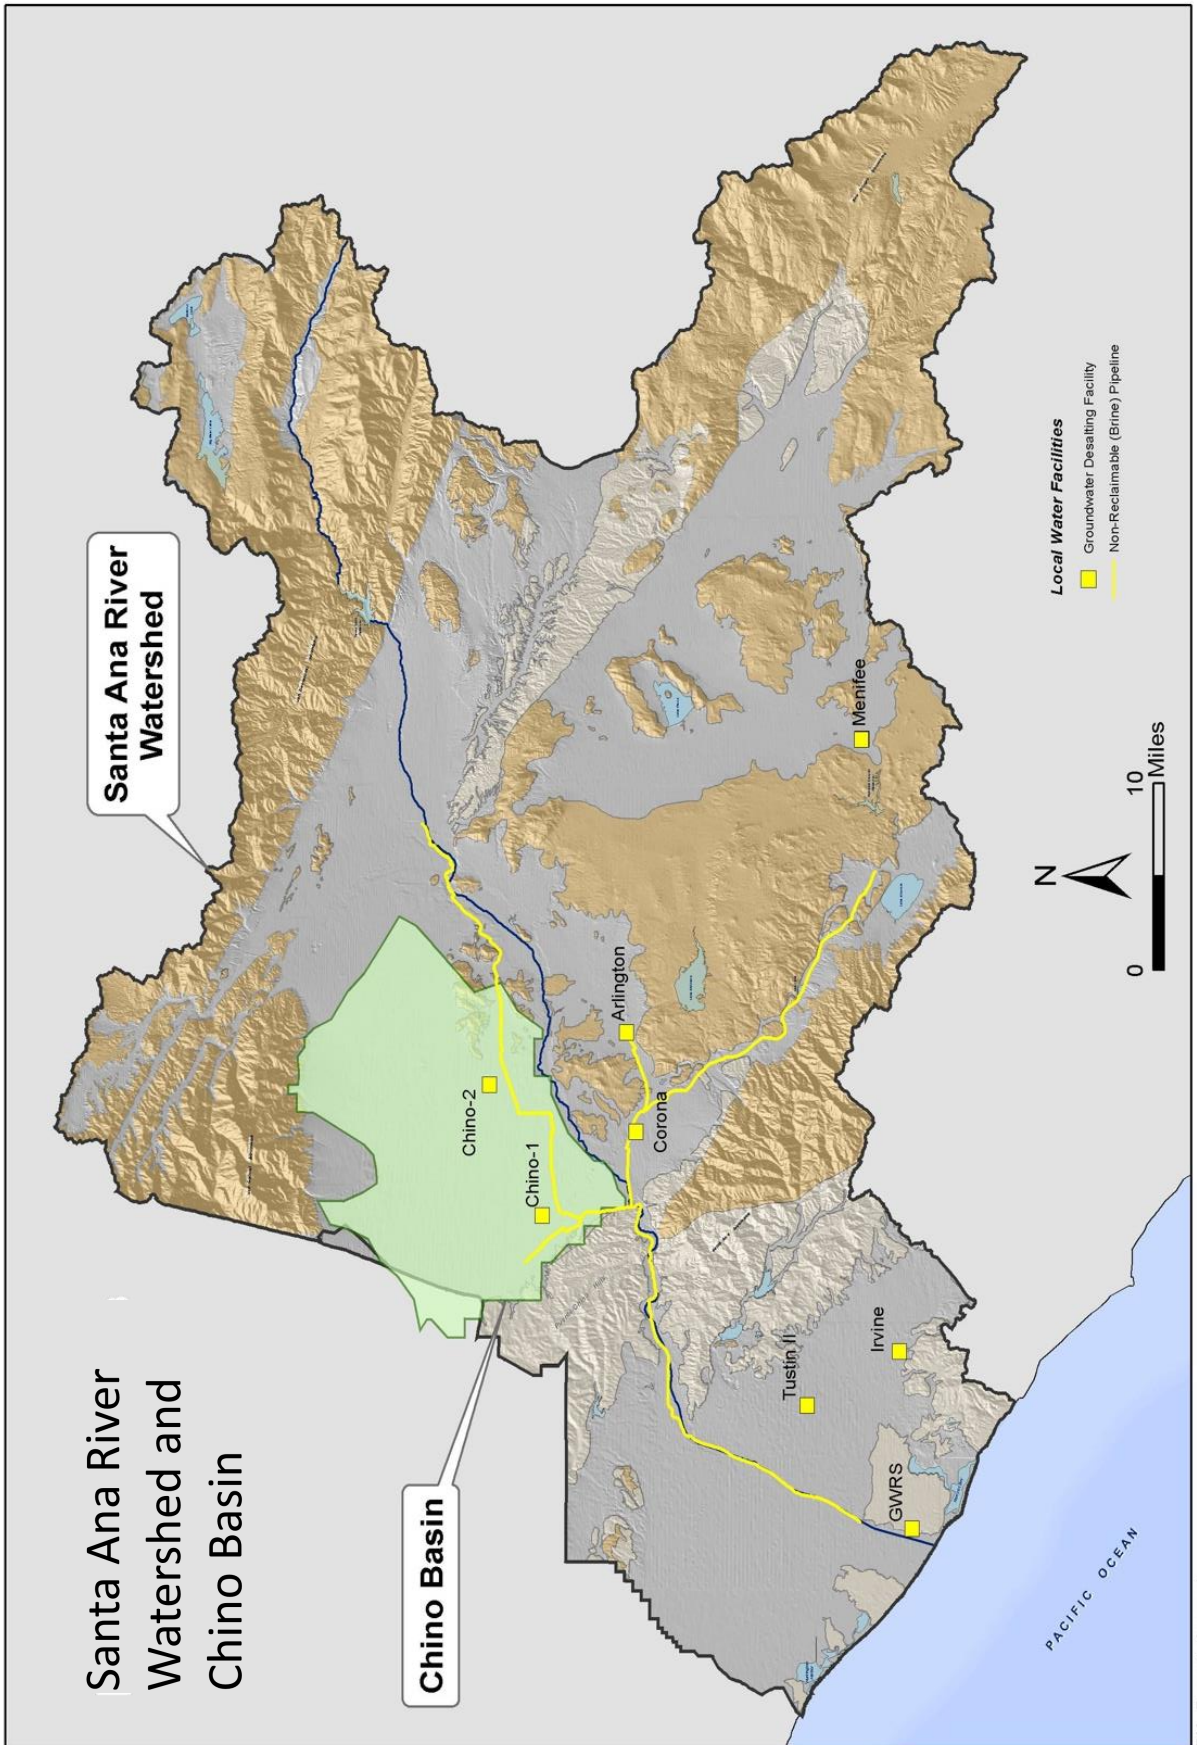

Today, multiple approaches are used in the basin to increase the amount of water available without exceeding the safe yield — including extensive groundwater recharge, water recycling (an increasingly important source of water for aquifer recharge), and desalination of groundwater (see article).

DISCUSSION

CURRENT MONTH – MARCH 2022

Year-To-Date (YTD) for the nine months ending March 31, 2022, all but two categories were at or below the projected budget.

The categories over budget were: (1) the Administration Salary/Benefits expenses (6010's) which were over budget by \$142,487 or 15.2% as a result of increased staff time and activities in the administrative functions. Please note that the overage is only in the administrative section, not with the entire consolidated staffing budget. (2) Watermaster Legal Services (6070s) were over budget by \$193,254 or 78.0% as a result of increased activities in the areas of Court Coordination; Rules and Regulations; the unbudgeted expenses for the Ely 3 Basin Investigation; and miscellaneous legal expenses during the last nine months. Please note that the overage is only in the administrative section, not the entire consolidated BHFS budget.

For the majority of the expense categories within the Watermaster budget for FY 2021/22, the individual line-item budgets are divided into 12-monthly amounts and allocated accordingly. As the fiscal year progresses, the category listed above could level out over time and be within the budget levels.

There are no Budget Transfers or Budget Amendments being proposed for FY 2021/22 at the current time.

Overall, the Watermaster (YTD) Actual Expenses were \$2,951,432 or 30.4% below the (YTD) Budgeted Expenses of \$9,694,284.

SALARIES EXPENSE

CURRENT MONTH – MARCH 2022

As of March 31, 2022, the total (YTD) Watermaster salary expenses were \$4,111 or 0.2% below the (YTD) budgeted amount of \$1,719,815. The overall staffing budget was developed with a staffing level of ten Full-Time Equivalents (FTE's), which is the current staffing level. However, the recruitment process to hire an Executive Assistant II/Board Clerk is underway and expected to take approximately 30-45 days before a new employee could start. With the overall salaries budget currently under budget as of March 2022 it is not expected that a Budget Amendment is currently required. As we get closer to the June 30th fiscal year-end, a Budget Amendment or Budget Transfer could be required. If a Budget Amendment is required, the funding would come from the Watermaster Administration Reserve which has a current available balance of \$117,514.88. A Budget Transfer could be used as of June 30, 2022 from other Administration accounts which are under budget.

Watermaster utilizes an in-house database time and attendance system to track and record staff's actual hours worked and records those hours to a specific project or activity. This time and attendance database of captured staff hours and activities is the basis for the bi-weekly payrolls which are processed using an external payroll processing service. Watermaster staff can record time to a large number of activities but the five most used categories are as follows (1) General Administrative activities; (2) Paid Leaves of vacation, sick or holiday; (3) Pools, Advisory or Board Meeting attendance; (4) OBMP activities; and (5) OBMP Implementation Program Elements 1 through 9 activities.

When the FY 2021/22 budget was developed, basic assumptions were used in allocating how staff's time would be spent and on which of the projects or activities. The staffing dollars were then allocated into those specific areas and budgeted on a 1/12 monthly budget. When actual staffing activities vary from the budgeted assumptions, a positive or negative variance can be created.

Currently the following actual allocations are tracking above the projected allocations due to Watermaster staff spending more time in these activities as follows: WM Staff Salaries for Administration (account 6011) above budget by \$120,404 or 14.2%; Watermaster Staff Overtime (account 6011.1) above budget by \$7,328 or 81.4%; Appropriative Pool-WM Staff Salaries (account 8301) above budget by \$1,631 or 4.8%; Groundwater Level-WM Staff Salaries (account 7104.1) above budget by \$13,445 or 25.2%; Comprehensive Recharge-WM Staff Salaries (account 7201) above budget by \$8,274 or 19.7%; PE 6&7 (account 7501) above budget by \$7,304 or 148.1%; and PE8&9-WM Staff Salaries (account 7601) above budget by \$9,132 or 49.3%.

The table summarizes the Year-To-Date (YTD) Actual Watermaster salary costs compared to the Year-To-Date (YTD) Budget as of March 31, 2022. Please be advised that the "\$ Over Budget" and the "% of Budget" columns are a comparison of the (YTD) Actual to the (YTD) Budget, not the 12-month Annual Budget. The 12-month Annual Budget column is presented only to provide the data in a full and complete format. The following details are provided:

PREVIOUSLY REPORTED ACTIONS (Descending Order)

January 2022:

On December 6, 2021 the newly created position of Executive Assistant/Board Clerk was filled, becoming the eleventh employee of Watermaster. Unfortunately, on February 2, 2022 that same employee left the employment of Watermaster. Watermaster is currently in the process of recruiting for a new Executive Assistant/Board Clerk. As noted above, the overall salaries budget is currently under budget as of January 2022 and it is not expected that a Budget Amendment is currently required to fund the new position. However, once the position is filled and we get closer to the June 30th fiscal year-end, a Budget Amendment may be required to fund the new position. If a Budget Amendment is required, the funding would come from the Watermaster Administration Reserve which has a current available balance of \$117,514.88.

October 2021:

On October 8, 2021, Vanessa Aldaz (Administrative Assistant) who has been with Watermaster since February 10, 2020, submitted her official notice of resignation effective Friday, October 22, 2021. On Monday, October 25, 2021, Ruby Favela started her employment with Watermaster as the new Administrative Assistant.

July 2021:

For FY 2021/22 the amount of \$21,000 was "Carried-Over" from the previous fiscal year's budget under the category of Temporary Services (6017). This expense is currently being used to fund one temporary employee who is scanning documents into the SharePoint system for the ongoing records management project.

OBMP ENGINEERING SERVICES AND LEGAL COSTS

CURRENT MONTH – MARCH 2022

Reviewing in total the OBMP Engineering Services and Legal Costs (consolidating the five categories of OBMP Watermaster Staff and SAWPA, OBMP Engineering Services, OBMP Legal Costs, OBMP Update Costs, and OBMP Other Expenses) for the nine months ending March 31, 2022, the actual expenses of \$485,063 were below the budgeted amount of \$999,013 by \$513,950 or 51.4%. For a detailed discussion, the following is provided.

For March 31, 2022, the accounts 6901-6903 (Optimum Basin Mgmt. Program) section was below the Year-To-Date (YTD) budget by \$27,005 or 14.9%. Watermaster utilizes an in-house database time and attendance system to record and document staff's actual hours worked and also allocates those hours to a specific project or activity. Watermaster staff time could be charged to Administrative, OBMP, or Implementation Project categories. Recently, Watermaster staff spent less time on specific OBMP related areas as budgeted. As a result, Watermaster staff allocated less actual time to the OBMP project as budgeted, which resulted in an under-budget variance of \$32,131 or 19.3%. The remaining expense was the Santa Ana Watershed Project Authority (SAWPA) FY 2020/21 Basin Monitoring Program Task Force Contribution which was budgeted at \$15,032 and actual expenses were \$20,158 or \$5,126 or 34.1% above budget as of March 31, 2022.

For March 31, 2022, the accounts 6906 (Optimum Basin Mgmt. Program Engineering Services) section was below the Year-To-Date (YTD) budget by \$162,794 or 35.2%. The majority of expenses within this OBMP category were under budget (YTD), however, the accounts over budget were the OBMP-Watermaster Model Update (6906.1) which were over budget by \$3,840 or 28.3%; Water Rights Compliance Reporting expenses (6906.22) which were over budget by \$4,485 or 33.3%; SGMA Reporting Requirements (6906.23) which were over budget by \$1,995 or 17.0%; OBMP-Other General Meetings expenses (6906.32) which were over budget by \$204 or 0.4%; and the OBMP-Engineering Services-Other expenses (6906) which were over budget by \$4,676 or 14.9%. Within the 6906 categories, two accounts had funding "Carried-Over" from the previous fiscal year. The OBMP-Watermaster Model Update expenses (6906.1) had \$9,000 brought forward from the previous year and the Integrated Model Meetings-IEUA Costs expenses (6906.15) had \$14,594 brought forward from the previous year. These two amounts are included in the FY 2021/22 budget.

Within the category 6907 (Optimum Basin Mgmt. Program Legal Fees) are the remaining Brownstein Hyatt Farber Schreck (BHFS) Watermaster's legal expenses. Within the legal expense category, there were no line item activities above the budget. The individual legal projects/activities that were below budget for the Year-To-Date (YTD) period were the Archibald South Plume of \$8,232; the Chino Airport Plume of \$8,232; the Desalter/Hydraulic Control of \$23,998; Santa Ana River Water Rights of \$12,640; the Santa Ana River Habitat of \$18,286; the Regional Water Quality Control Board of \$36,637; the Recharge Master Plan expenses of \$8,000; Storage Agreements of \$38,662; the Prado Basin Habitat Sustainability of \$8,031; SGMA Compliance of \$6,403; the OBMP Update of \$61,425; the 2020 Safe Yield Reset of \$11,052; the Ely Basin Investigation expenses of \$36,637; and the WM Unanticipated legal expenses of \$25,406. For the nine months ended March 31, 2022, the overall cumulative (YTD) budget was \$330,732 and the actual (BHFS) legal expenses totaled \$27,091 which resulted in an under-budget variance of \$303,641 or 91.8%.

The OBMP Update Costs (6908.1) were below the budget for the month. These expenses relate to the OBMP Update costs for the contract between Tom Dodson and Associates and CBWM to procure environmental review services for the 2020 OBMP Update. The contract had a remaining amount available

of \$17,065 as of the year-ended June 30, 2021 and that amount was "Carried-Over" into the FY 2021/22 budget. The budget has a remaining balance as of March 31, 2022 of \$17,065.

The OBMP Other Expenses (6909's) were below the budget for the month. These expenses are typically conference calls, meeting expenses, supplies, annual inspection fees, and other miscellaneous type expenses. As of March 31, 2022, this category of expenses was \$3,445 or 49.8% below the budgeted amount of \$6,918.

Overall, the Optimum Basin Management Program (OBMP) category was \$485,063 actual (YTD) compared to a budget (YTD) of \$999,013 for an under budget of \$513,950 or 51.4% as of March 31, 2022.

The table listed below summarizes the Optimum Basin Management Program (OBMP) expenses as of March 31, 2022 compared to the Year-To-Date (YTD) budget. Please be advised that the "\$ Over Budget" and the "% of Budget" columns are a comparison of the (YTD) Actual to the (YTD) Budget, not the 12-month Annual Budget. The Engineering Services budget was Amended with the addition of "Carry-Over" funding totaling \$573,765 which brought the Amended Budget amount to \$2,825,149.

The explanations regarding the Carry-Over amount of \$573,765 from FY 2020/21 to the FY 2021/22 budget is provided as follows:

Watermaster's function is to administer and enforce provisions of the Judgment and subsequent orders of the Court, and to develop and implement an Optimum Basin Management Program

1. Watermaster Model Update and Required Demonstrations (Account 6906.1): \$9,000. The requested Carry-Over is necessary to finalize the report on Model Update and Required Demonstrations, which was scheduled for completion in FY 2020/21.
2. IEUA - Integrated Model Meetings and Technical Review (Account 6906.15): \$29,188 (Watermaster's portion is \$14,594). The requested Carry-Over is necessary because this effort was planned for completion in FY 2020/21 but is now scheduled to be completed by December 2021.
3. Ground Level – SAR Imagery (Account 7107.3): \$85,000. The requested Carry-Over is necessary for the purchase and processing of satellite data by a subconsultant to estimate vertical ground motion. The work was completed in FY 2020/21, but the invoice has not yet been received from the subcontractor.
4. Ground Level – Capital Equipment (Account 7107.8): \$3,772. The requested Carry-Over is necessary for the of purchase materials and equipment for the Pomona Extensometer Facility. The work was started in FY 2020/21 but wasn't completed until August 2021.
5. Agriculture Production and Estimation (Account 7110.3): \$42,682. The requested Carry-Over is necessary to complete the Agriculture Production and Estimation work that was originally scheduled to be performed in FY 2019/20 and FY 2020/21 but was delayed to FY2021/22.
6. PE2: Engineering Services for Other Recharge Improvement Projects (Account 7202.2): \$120,000. The requested Carry-Over is necessary to finalize this work in FY 2021/22. The work includes conducting a life-cycle analysis at the San Sevaine 1 and Etiwanda Debris conservation berms, and finalizing a technical memorandum describing the analysis and conclusions. The scope and schedule for this work was fine-tuned with input from IEUA and Watermaster Staff in FY 2020/21. The work is to be completed in FY 2021/22.
7. 2023 RMPU Recharge Master Plan Scoping (Account 7210): \$37,732. The requested Carry-Over is necessary to complete the scope, budget and report outline the 2023 RMPU. In June, the Parties determined that they were not interested in pursuing capital improvement projects was part of the 2023 RMPU. A scope, budget and report outline the 2023 RMPU still needs to be developed based on the input from the Parties.
8. Management Zone Strategies – Northwest MZ-1 (Account 7402.10): \$89,096. The requested Carry-Over is necessary because this is a multi-year project to develop a subsidence management plan for the Northwest MZ-1, and not all tasks planned/budgeted in FY 2020/21 were completed in FY 2020/21.
9. IEUA – Update Recycled Water Permit – Salinity (Account 7510): \$189,341 (Watermaster's portion is \$73,975). The requested Carry-Over is necessary to complete the technical and regulatory compliance supportwork to update the Chino Basin Maximum Benefit Salt and Nutrient Management Plan. This multiyear project began FY 2017/18 and is scheduled to be completed by June 2022.
10. PE 8/9: Support Implementation of the 2020 Storage Management Plan (Account 7610): \$43,220. The requested Carry-Over is for as-requested technical support to Watermaster staff, updating the information required for a complete Storage and Recovery Program application, updating the Storage and Recovery Program application forms, and updating the process to evaluate an application. No implementation activities occurred in FY 2020/21. The entire budget is requested to be brought forward into FY 2021/22.
11. SB88 Specification to Ensure Compliance with Regulations (Account 7206.1) - GRCC and 50% IEUA Cost Share: \$54,694. The requested Carry-Over is necessary to (1) complete the technical memorandum evaluating the existing methodology to estimate stormwater diversions in the Chino Basin, and (2) provide as needed support to IEUA and Watermaster in implementing the

Watermaster's function is to administer and enforce provisions of the Judgment and subsequent orders of the Court, and to develop and implement an Optimum Basin Management Program

recommendations describes in the technical memorandum. The administrative draft technical memorandum was completed in June 2021 and comments were received on August 11, 2021.

PRADO BASIN HABITAT SUSTAINABILITY PROGRAM

Ongoing Costs

Program costs that are ongoing (Ongoing Costs) will be cost-shared between Watermaster and IEUA, split on a 50/50 basis, subject to the following limitation: in each fiscal year, neither Watermaster nor IEUA shall be obligated to reimburse the other for Ongoing Costs that exceed the amount that the reimbursing party has budgeted for Ongoing Costs in that fiscal year, except as agreed upon by both parties in writing or as amended during the fiscal year. The first year expenses (FY 2016/17) to be cost shared were approximately \$300,000, with projected future years (FY 2017/18 and forward) estimated at approximately \$150,000. For the purposes of the agreement, Ongoing Costs are defined as the costs associated with the following Program activities:

1. A Riparian Habitat Monitoring Program, including, but not limited to, the following sub-tasks:
 - a. Design and implement a site-specific vegetation monitoring program with the United States Bureau of Reclamation (USBR) and Orange County Water District, pursuant to which USBR will perform site-specific vegetation surveys.
 - b. Manage and perform custom flight to collect a high resolution air photo of the Prado Basin Region.
 - c. Collect, check, and upload historical air photos and vegetation survey data in the Prado Basin region.
 - d. Collect, check, and upload historical Landsat data in the Prado Basin region.
2. A Climate Monitoring Program, including, but not limited to, the following sub-task:
 - a. Collect, check, and upload climatic data on an annual basis
3. Preparation of the AMP Annual Report (Annual Report), including, but not limited to, the following sub-tasks:
 - a. Water level monitoring, vegetation survey, photo monitoring, landsat data, climate data and analysis of the components.
 - b. Analyze data and prepare an administrative draft of the Annual Report for Watermaster/IEUA.
 - c. Incorporate the Watermaster and IEUA comments and prepare a draft Annual Report for review by the PBHSC.
 - d. Meet with PBHSC to review draft Annual Report.
 - e. Incorporate PBHSC comments and finalize the Annual Report.
4. Annual license fees for monitoring wells.
5. Project management and administration activities associated with the Program undertaken by a Party's consultant, including, but not limited to, the following sub-tasks:
 - a. Ad-Hoc Meetings
 - b. Preparation of scope and budget for the Program
 - c. Project administration and financial reporting
6. Other costs required to fulfill the requirements of Peace II Subsequent EIR mitigation measure 4.4-3. Watermaster shall be responsible for the costs associated with the Groundwater Level Monitoring Program, Groundwater Quality Monitoring Program, and Surface Water Monitoring Program.

Watermaster and IEUA shall each have responsibility for its own administrative costs, excluding the tasks and expenses included under Set-Up Costs and Ongoing Costs. Watermaster and IEUA will meet to review the cost-sharing structure under this agreement and negotiate necessary adjustments in good faith on at least an annual basis.

Watermaster's function is to administer and enforce provisions of the Judgment and subsequent orders of the Court, and to develop and implement an Optimum Basin Management Program

The Peace II SEIR does not explicitly state a duration for the monitoring and mitigation program. It is logical to assume that the program will last until the drawdown impacts, if any, on the riparian habitat from Peace II activities are fully manifested and not predicated to worsen, and that mitigation measures, if any are required, are fully implemented. This is not a perpetual agreement. Upon termination of the monitoring and any necessary mitigation obligations, the parties may elect to terminate the cost share agreement.

September 2021:

On September 20, 2021, the Agricultural Pool unanimously passed an action to request that Watermaster staff immediately issue the Agricultural Pool Wellhead Production Assessment of Agricultural Pool wells. The Agricultural Pool further requested that the total amount to be assessed is equal to \$200,000 as apportioned among all wells based upon amount of water produced. Watermaster staff started to issue the invoices on September 20, 2021 and completed on September 21, 2021.

July 2021:

Per section VI.D.3 of the Groundwater Storage Program Funding Agreement No. 49960 in the Chino Basin with The Metropolitan Water District of Southern California, the FY 2021/22 annual administrative fee invoice was issued on July 6, 2021 in the amount of \$177,430.03 under invoice number 2021-07-CUP. Payment in the amount of \$177,430.03 was received and deposited on August 10, 2021.

POOL LEGAL SERVICES FUND ACCOUNTING

Each Pool has a Fund Account created to pay their own legal service invoices. The legal services invoices are funded and paid using the Fund accounts (8467 for the OAP, 8567 for the ONAP, and 8367 for the AP). These Fund Accounts are replenished at the direction of each Pool, and the legal service invoices are approved by the Pool leadership and when paid by Watermaster, are deducted from the existing Fund Account balances. If the Fund Account for any Pool reaches zero, no further payments can be paid from the Fund and a replenishment action must be initiated by the Pool. Along with the legal services Fund account for the OAP (8467), the OAP also has two other Fund accounts for Ag Pool Meeting Attendance expenses (8470), and Special Projects expenses (8471).

Watermaster's function is to administer and enforce provisions of the Judgment and subsequent orders of the Court, and to develop and implement an Optimum Basin Management Program

The FY 2021/22 Assessment invoices were approved by the Advisory Committee and the Board on November 18, 2021 and those invoices were issued the same day. In addition to the Assessment invoices, the Pool Administration, Legal Services, and Special Projects fundings were also included for all three Pools. The funding requests were approved by each Pool and directed Watermaster to issue the invoices.

For the Agricultural Pool, the invoiced amount was \$635,000 and payments to date total \$169,652.03 which leaves an outstanding balance due of \$465,347.97.

For the Non-Agricultural Pool, the invoiced amount was \$50,000 and payments to date total \$50,000 leaving no outstanding balance due.

For the Appropriative Pool, the invoiced amount was \$100,000 and payments to date total \$71,808.46 which leaves an outstanding balance due of \$28,191.54.

February 2022:

Normally, the Watermaster Admin Reserve would not be used to fund any of the Pool's legal services invoices. However, for the Agricultural Pool, the amount of \$102,557.12 was used from the Watermaster Admin Reserve to fund the shortfall created when the November 19, 2020 Assessment invoices (Pool related) totaling \$500,000 were not paid in full. In fact, \$115,263.88 was paid, leaving a balance due of \$384,736.12 ($\$115,263.88 + \$384,736.12 = \$500,000$) which still remains unpaid. Through November 2020, invoices totaling \$217,821.00 had been paid for the Agricultural Pool.

Please note the Assessment invoices issued on November 19, 2020 were due on December 21, 2020. The available cash of \$115,263.88 and payments issued of \$217,821.00 left a Fund balance shortfall of \$102,557.12 which was temporarily funded through Admin Reserves ($\$217,821.00 - \$115,263.88 = \$102,557.12$). The Admin Reserve amount of \$102,557.12 will need to be refunded back to Watermaster.

SUBJECT: Application: Water Transaction – Cucamonga Valley Water District to Fontana Water Company (Consent Calendar Item I.C.)

SUMMARY:

Issue: The purchase of 7,500 acre-feet of water from Cucamonga Valley Water District by Fontana Water Company. This purchase is made from Cucamonga Valley Water District's Annual Production Rights.

Recommendation: Approve the proposed transaction.

Financial Impact: None

Future Consideration

Watermaster Board – May 26, 2022: Approval [Within WM Duties and Powers]

ACTIONS:

Appropriative Pool – April 14, 2022: Unanimously Recommended Advisory Committee to recommend to the Watermaster Board to approve.

Non-Agricultural Pool – April 14, 2022: Unanimously recommended its representatives to support at Advisory Committee and Watermaster Board subject to changes they deem appropriate.

Agricultural Pool – April 14, 2022: Unanimously recommended Advisory Committee to recommend to the Watermaster Board to approve.

Advisory Committee – May 19, 2022: Unanimously recommended Watermaster Board to approve.

Watermaster Board – May 26, 2022:

Watermaster's function is to administer and enforce provisions of the Judgment and subsequent orders of the Court, and to develop and implement an Optimum Basin Management Program

BACKGROUND

The Court approved the Peace Agreement, the Implementation Plan, and the goals and objectives identified in the OBMP Phase I Report on July 13, 2000 and ordered Watermaster to proceed in a manner consistent with the Peace Agreement. Under the Peace Agreement, Watermaster approval is required for applications to store, recapture, recharge, or transfer water, as well as for applications for credits or reimbursements, and storage and recovery programs.

Where there is no material physical injury, Watermaster must approve the transaction. Where the request for Watermaster approval is submitted by a Party to the Judgment, there is a rebuttable presumption that most of the transactions do not result in material physical injury to a Party to the Judgment or the Basin (Storage and Recovery Programs do not have this presumption).

The date of this application is April 4, 2022. Notice of the transaction was transmitted electronically on April 8, 2022 along with the materials submitted by the requestor.

DISCUSSION

Beyond confirmation of the source of the water to be transferred (Supplemental Water or Excess Carryover), Watermaster will evaluate the eventual disposition of the transferred water (e.g., production, storage, etc.) at the end of the production year and account for the same consistent with the Watermaster Guidance Documents.

Water transactions occur each year and are included as production by the respective entity (if produced) in any relevant analyses conducted by West Yost pursuant to the Peace Agreement and the Rules & Regulations. There is no indication that additional analysis regarding this transaction is necessary at this time. As part of the OBMP Implementation Plan, measurement of groundwater levels and ground level changes are ongoing and based on current data, we cannot conclude that the proposed water transaction will cause material physical injury to a Party to the Judgment, or to the Basin.

At their Pool Committee meetings held on April 14, 2022, the Appropriative and Overlying (Agricultural) Pools unanimously recommended the Advisory Committee to recommend to the Watermaster Board to approve the proposed transaction; the Overlying (Non-Agricultural) Pool unanimously recommended its representatives to support at Advisory Committee and Watermaster Board subject to changes they deem appropriate.

On May 19, 2022, the proposed transaction was presented to the Advisory Committee for consideration. The Advisory Committee unanimously recommended Watermaster Board to approve the proposed transaction.
