CALL TO ORDER

Chair Diggs called the Appropriative Pool Committee meeting to order at 9:00 a.m.

ROLL CALL

(0:00:11) Ms. Moore conducted the roll call and announced that a quorum was present.

AGENDA - ADDITIONS/REORDER

(00:04:24) Mr. Tellez Foster suggested the Fiscal Year 2024/25 budget be presented as an informational item under Business Items.

I. CONSENT CALENDAR

All matters listed under the Consent Calendar are considered to be routine and non-controversial and will be acted upon by one motion in the form listed below. There will be no separate discussion on these items prior to voting unless any members, staff, or the public requests specific items be discussed and/or removed from the Consent Calendar for separate action.

A. MINUTES

Approve as presented:

Minutes of the Appropriative Pool Committee Meeting held on March 14, 2024

B. FINANCIAL REPORTS

Receive and file as presented:

Monthly Financial Report for the Period Ended February 29, 2024

C. APPLICATION: RECHARGE – FONTANA WATER COMPANY (MAR)

Recommend to the Advisory Committee to recommend to the Watermaster Board to approve Fontana Water Company's Application for Recharge and direct Watermaster staff to account for this supplemental water recharge in Fontana Water Company's existing Local Supplemental account.

(00:04:04)

Motion by Mr. Marty Zvirbulis, seconded by Mr. Justin Scott-Coe, there being no dissent, the item passed unanimously.

Moved to approve the Consent Calendar as presented.

II. BUSINESS ITEMS

A. FISCAL YEAR 2024/25 BUDGET PRESENTATION (INFORMATION ONLY)

(00:04:43) Mr. Tellez Foster and Ms. Uriarte gave a presentation. A discussion ensued.

III. REPORTS/UPDATES

A. WATERMASTER LEGAL COUNSEL

- 1. May 31, 2024 Court Hearing (Watermaster 46th Annual Report)
- 2. Court of Appeal Case No. E079052 (City of Chino, MVIC, MVWD, City of Ontario appeal re OAP Expenses and Attorney Fees)
- 3. Court of Appeal Consolidated Cases No. E080457 and E082127 (City of Ontario appeal re 2021- 22 and 2022-23 Assessment Packages)
- 4. Court of Appeal Case No. E080533 (Cities of Chino, Ontario appeal re 2022-23 Watermaster budget expenses to support CEQA analysis)
- 5. Kaiser Permanente Lawsuit

(00:56:08) Mr. Herrema gave a report.

B. ENGINEER

TODD M. CORBIN General Manager

STAFF REPORT

DATE: May 2024

TO: Watermaster Committees & Board

SUBJECT: Monthly Financial Reports (For the Reporting Period Ended March 31, 2024) (Consent

Calendar Item I.B.)

SUMMARY

<u>Issue</u>: Record of Monthly Financial Reports for the reporting period ended March 31, 2024) [Normal Course of Business]

<u>Recommendation</u>: Receive and file Monthly Financials Reports for the reporting period ended March 31, 2024) as presented.

Financial Impact: None.

Future Consideration

Appropriative Pool – May 9, 2024: Receive and File Non-Agricultural Pool – May 9, 2024: Receive and File Agricultural Pool – May 9, 2024: Receive and File Advisory Committee – May 16, 2024: Watermaster Board – May 23, 2024:

ACTIONS:

Appropriative Pool – May 9, 2024: Non-Agricultural Pool – May 9, 2024: Agricultural Pool – May 9, 2024: Advisory Committee – May 16, 2024: Watermaster Board – May 23, 2024: Page 2 of 2 May 2024

BACKGROUND

A monthly reporting packet is provided to keep all members apprised of Watermaster revenues, expenditures, and other financial activity. Monthly reports include the following:

- 1. Cash Disbursements Summarized report of all payments made during the reporting month.
- 2. Credit Card Expense Detail Detail report of all credit card activity during the reporting month.
- 3. Combining Schedule of Revenues, Expenses & Changes in Net Assets Detail report of all revenue and expense activity for the fiscal YTD, summarized by pool category.
- 4. Treasurer's Report Summary of Watermaster investments holdings and anticipated earnings as of month end.
- 5. Budget to Actual Report Detail report of actual revenue and expense activity, shown for reporting month and YTD, comparatively to the adopted budget.
- Monthly Variance Report & Supplemental Schedules Supporting schedule providing explanation for major budget variances. Also provides several additional tables detailing pool fund balance, salaries expense, legal expense, and engineering expense.

DISCUSSION

Detailed explanation of major variances and other additional information can be found on the "Monthly Variance Report & Supplemental Schedules."

Watermaster staff is happy to provide additional explanation or respond to any questions on these reports.

Chino Basin Watermaster

Monthly Variance Report & Supplemental Schedules For the period July 1, 2023 to March 31, 2024

Budget to Actual

The Budget to Actual report summarizes the operating and non-operating revenues and expenses of Chino Basin Watermaster for the fiscal year-to-date (YTD). Columns are included for current monthly and YTD activity shown comparatively to the FY 24 adopted budget. The final two columns indicate the amount over or under budget, and the YTD percentage of total budget used. As of March 31st, the target budget percentage is generally 75%.

Revenues

Lines 1-5 Administration Revenue – Includes local agency subsidies and administrative assessment for the appropriative, agricultural and non-agricultural pools. Below is a summary of notable account variances at month end:

- Line 2 Local Agency Subsidies is at 100% of budget due to annual administrative assessment received from Metropolitan Water District.
- Lines 3-4 Administrative Assessments for the Agricultural and Non-Agricultural pools include annual assessment invoices issued in November of each year, as well as special assessments issued at the direction of the respective pools. The Appropriative pool line is over budget due to changes in actual versus projected production, and special assessments issued.

Lines 6-11 Other Revenue – Includes pool replenishment assessments, interest income and other miscellaneous income.

Expenses

Lines 13-34 Judgment Administration Expense – Includes Watermaster general administrative expenses, contract services, insurance, office and other administrative expenses. Below is a summary of notable account variances at month end:

- Line 15 Admin Salary/Benefit Costs includes wages and benefits for Watermaster administrative staff. YTD is over budget due to vacation, sick time, and severance payouts.
- Line 20 Contract Services includes outside services for the annual audit report, HR consulting, court filings, and accounting consulting. YTD is over budget due to increased consulting services not anticipated in the budget. These increased consulting service costs should be offset by savings in administrative salaries and benefits.
- Line 22 Insurance includes general liability insurance, directors' and officers' liability, municipalities coverage, environmental pollution liability and other various insurance policies. YTD is at 92% of budget due to the timing of annual renewals for the directors' and officers' policy and municipalities coverage.
- Line 23 Dues and Subscriptions is at 93% of budget due to the timing of annual dues for ACWA, SHRM, and CA Groundwater Coalition.
- Line 24 Watermaster Administrative Expenses include meeting expenses and supplies for admin, committee, and other meetings. YTD is at 89% due to increased meeting activity.
- Line 27 Training, Conferences, Seminars is at 78% of budget due to the timing of conferences and increased employee training expenses not anticipated in the budget.

Lines 35-46 Optimum Basin Management Plan (OBMP) Expense – Includes legal, engineering, groundwater level monitoring, allocated administrative expenses, and other expenses.

Lines 47-53 Pool Administration Expenses – Includes expense activity relating to pool specific fund balances. These include legal services for each pool, Ag pool meeting compensation, and Ag pool special projects.

Monthly Variance Report & Supplemental Schedules For the period July 1, 2023 to March 31, 2024

Lines 55-58 Other Expense – Includes groundwater replenishment, and various refunds as appropriate. YTD activity includes refunds for prior year recharge basin O&M expenses and excess reserves.

Monthly Variance Report & Supplemental Schedules For the period July 1, 2023 to March 31, 2024

Pool Services Fund Accounting

Each Pool has a fund account created to pay their own legal service invoices. The legal services invoices are funded and paid using the fund accounts (8467 for the Overlying Agricultural Pool (OAP), 8567 for the Overlying Non-Agricultural Pool (ONAP), and 8367 for the Appropriate Pool (AP)). Along with the legal services fund account for the OAP (8467), the OAP also has two other fund accounts for Ag Pool Meeting Attendance expenses (8470), and Special Projects expenses (8471). The ONAP also have a meeting compensation fund account (8511) Additionally, the OAP has a reserve fund that is held by Watermaster and spent at the direction of the OAP. The AP also has an account 8368 relating to the Tom Harder contract. These fund accounts are replenished at the direction of each Pool, and the legal service invoices are approved by the Pool leadership and when paid by Watermaster, are deducted from the existing fund account balances. If the fund account for any pool reaches zero, no further payments can be paid from the fund and a replenishment action must be initiated by the pool.

The following tables detail the fund balance accounts as of March 31, 2024 (continued next page):

CHINO BASIN WATERMASTER

9641 San Bernardino Road, Rancho Cucamonga, CA 91730 Tel: 909.484.3888 www.cbwm.org

TODD M. CORBIN General Manager

STAFF REPORT

DATE: May 9, 2024

TO: AP/ONAP/OAP Committee Members

SUBJECT: Application: Local Storage Agreement - ONAP (Consent Calendar Item I.C.)

SUMMARY:

<u>Issue</u>: Consideration of an application for a Local Storage Agreement – Storage of Excess Carryover water by members of the Overlying (Non-Agricultural) Pool in amounts to be determined as of the close of Fiscal Year 2023/24 (June 30, 2024). [Within WM Duties and Powers]

<u>Recommendation:</u> Recommend to the Advisory Committee to recommend to the Watermaster Board to approve the proposed agreements.

Financial Impact: None.

Future Consideration

Appropriative Pool – May 9, 2024: Advice and Assistance Non-Agricultural Pool – May 9, 2024: Advice and Assistance Agricultural Pool – May 9, 2024: Advice and Assistance Advisory Committee – June 20, 2024: Advice and Assistance Watermaster Board – June 27, 2024: Approval

ACTIONS:

Appropriative Pool – May 9, 2024: Non-Agricultural Pool – May 9, 2024: Agricultural Pool – May 9, 2024: Advisory Committee – June 20, 2024: Watermaster Board – June 27, 2024: Page 2 of 2

BACKGROUND

The Court approved the Peace Agreement, the Implementation Plan and the goals and objectives identified in the OBMP Phase I Report on July 13, 2000 and ordered Watermaster to proceed in a manner consistent with the Peace Agreement. Under the Peace Agreement, Watermaster approval is required for applications to store, recapture, recharge, or transfer water, as well as for applications for credits or reimbursements and storage and recovery programs.

Where there is no material physical injury, Watermaster must approve the transaction. Where the request for Watermaster approval is submitted by a party to the Judgment, there is a rebuttable presumption that most of the transactions do not result in Material Physical Injury to a party to the Judgment or the Basin (Storage and Recovery Programs do not have this presumption).

Pursuant to the Peace Agreement §5.2; Restated Judgment, Exhibit G, Non-Agricultural Pool Pooling Plan ¶7; Restated Judgment Exhibit H, and Appropriative Pool Pooling Plan ¶12, parties are required to have approved Local Storage Agreements for the amounts in their stored water accounts.

The following application for Local Storage Agreements was noticed to stakeholders on May 3, 2024:

 Consideration of Local Storage Agreements – Storage of Excess Carryover Water by the Non-Agricultural Pool in amounts to be determined, and as of the close of Fiscal Year 2023/24 (June 30, 2024).

DISCUSSION

At its April 11, 2024 meeting, the Overlying (Non-Agricultural) Pool directed its Chair and Counsel to submit a "universal" application (Form 1) for Overlying (Non-Agricultural) Pool Excess Carryover "for each member, a quantity equal to the surplus carryover of such member as of midnight on the evening of June 30, 2024" (Attachment 1).

The 500,000 acre-feet Safe Storage Capacity threshold analyzed in the OBMP Implementation PIAN PEIR was re-examined and revised to 600,000 acre-feet, through June 30, 2021. On May 27, 2021, the Watermaster Board adopted Resolution 2021-03 (Implementation of the Local Storage Limitation Solution), finding that a proposed order should be filed with and adopted by the Court regarding the management and administration of volumes of stored water exceeding 500,000 acre-feet up to a maximum of 700,000 acre-feet. On June 25, 2021, the Court approved the Implementation of the Local Storage Limitation Solution, Increasing the Safe Storage Capacity threshold to 700,000 acre-feet through June 30, 2030, and thereafter 620,000 acre-feet through June 30, 2035.

Pursuant to the Peace Agreement, standard losses will be applied to all water placed into Local Supplemental Storage Accounts in a manner consistent with all other water held in storage.

The application for Local Storage Agreements considered today will be brought to the Advisory Committee and the Board for consideration in June 2024. The quantities in the Parties' stored water accounts will be finalized at the time the 2024/25 Assessment Package is adopted (generally in November each year).

ATTACHMENT

This is an application for storage agreements authorized by the Non-Agricultural Pool Committee on behalf of the members of the Non-Agricultural Pool for surplus carryover of such members as of June 30, 2024.

In Section 8 of the Judgment, the Court determined that the members of the Non-Agricultural Pool were owners of an overlying water right. [Judgment, Section 8.] The allocation of Safe Yield to members of the Non-Agricultural Pool is not subject to adjustment for changes in Safe Yield. [Judgment, Section 44.]

If a member of the Non-Agricultural Pool produces less than its assigned share of Operating Safe Yield in any year, such unproduced water is considered "carryover," and may be produced by such member in a subsequent year. [Judgment, Exhibit G, Section 7.] The first water produced by such member during any such subsequent year is deemed to be produced from any such carryover. [Judgment, Exhibit G, Section 7.] If the quantity of carryover of any member of the Non-Agricultural Pool in a year exceeds its production in such year, then such unproduced water is considered "surplus carryover." [Judgment, Exhibit G, Section 7.] Section 7 of Exhibit G provides that members of the Non-Agricultural Pool shall execute storage agreements with Watermaster "as a condition of preserving such surplus carryover."

The applicant understands that, at least in some instances, and for reasons unknown to the applicant, the term "surplus carryover" is referred to as "excess carryover." For that reason, the applicant has checked the box marked "excess carryover" on this form.

The applicant understands that Watermaster reports the quantity of carryover and excess carryover of each member of the Non-Agricultural Pool in the annual assessment packages. The most recent annual assessment package is available on Watermaster's website. http://www.cbwm.org/rep_finance.htm. Based on Section 7 of Exhibit G to the Judgment, as described in the preceding paragraph, the quantity added to the surplus carryover of each member of the Non-Agricultural Pool for the year ended June 30, 2024 is equal to or less than the carryover of such member for the year ended June 30, 2023.

Carryover becomes surplus carryover on June 30 of each year. In order to "preserve such surplus carryover," the Non-Agricultural Pool Committee desires that members of the Non-Agricultural Pool have storage agreements in place on or prior to June 30 of each year, or, where doing so prior to June 30 is not feasible, as soon as practicable thereafter.

CHINO BASIN WATERMASTER

NOTICE

OF

APPLICATION(S)

RECEIVED FOR

LOCAL STORAGE AGREEMENT

Date of Notice:

May 3, 2024

This notice is to advise interested persons that the attached application(s) will come before the Watermaster Board on or after 30 days from the date of this notice.

APPLICATION FOR LOCAL STORAGE AGREEMENT

The attached staff report will be included in the meeting package at the time the transfer begins the Watermaster process.

NOTICE OF APPLICATION(S) RECEIVED

Date of Application: April 11, 2024 Date of this notice: May 03, 2024

Please take notice that the following Application has been received by Watermaster:

 Notice of Application for a Local Storage Agreement – Storage of Excess Carryover Water by members of the Overlying (Non-Agricultural) Pool in amounts to be determined as of the close of Fiscal Year 2023/24 (June 30, 2024).

This *Application* will first be considered by each of the respective pool committees on the following dates:

Appropriative Pool: May 09, 2024

Non-Agricultural Pool: May 09, 2024

Agricultural Pool: May 09, 2024

This *Application* will be scheduled for consideration by the Advisory Committee *no* earlier than thirty days from the date of this notice and a minimum of twenty-one calendar days after the last pool committee reviews it.

After consideration by the Advisory Committee, the *Application* will be considered by the Board.

Unless the *Application* is amended, as *Contests* must be submitted a minimum of fourteen (14) days prior to the Advisory Committee's consideration of an *Application*, parties to the Judgment may file *Contests* to the *Application* with Watermaster *within* seven calendar days of when the last pool committee considers it. Any *Contest* must be in writing and state the basis of the *Contest*.

STAFF REPORT

DATE: May 9, 2024

TO: AP/ONAP/OAP Committee Members

SUBJECT: Third Amendment to Task Order No. 9 Under the Master Agreement for Collaborative

Recharge Projects (Project 23a) (Business Item II.A.)

SUMMARY:

<u>Issue</u>: Task Order No. 9, under the Master Agreement for Collaborative Recharge Projects with Inland Empire Utilities Agency, needs to be amended to reflect an increase in construction costs due to delays and scope changes to complete the project. [Advisory Committee Approval Required]

<u>Recommendation:</u> Recommend Advisory Committee approval of the Third Amendment to Task Order No.9 to increase the total budgeted cost.

<u>Financial Impact:</u> None for this fiscal year. The total cost of the project is anticipated to increase from \$25,296,340 to \$28,846,016 which is projected to have a budget impact during Fiscal Year 2025/26.

Future Consideration

BACKGROUND

Section 6 of the 2013 Amendment to the 2010 Recharge Master Plan Update (RMPU), which was approved on November 12, 2013, listed potential projects that could increase recharge to Chino Basin. To manage costs associated with the projects, Chino Basin Watermaster and Inland Empire Utilities Agency (IEUA) agreed to a Master Cost Sharing Agreement on July 24, 2014. Under the Master Cost Sharing Agreement, Task Order No. 9 (RMPU Improvement Project 23a) (Attachment 1) was created to manage the proposed Stormwater Distribution System, Wineville Basin Improvements, Jurupa Basin Improvements, and RP-3 Basin Improvements, collectively known as Project 23a. When completed, this important project in the southern portion of the Basin will divert and recharge an additional 2,921 AFY of stormwater and dryweather runoff from the area and 2,905 AFY of recycled water from IEUA's distribution system. The following is an overview of the four components of Project 23a:

- 1. Stormwater Distribution System Hydraulically connects Wineville, Jurupa, and RP3 Basins to effectively capture and store stormwater. Add a new pump station at Wineville, provide an additional pump at Jurupa, and lay over 2-miles of new conveyance pipe to provide stormwater conveyance from Wineville Basin to Jurupa Basin.
- 2. Wineville Basin Improvements Convert an existing flood control basin into a multipurpose use where new basin activities will include groundwater recharge of stormwater and dry-weather runoff. The conversion will include adding spillway gate structure to raise storage volume; gating existing outlet with motorized actuators, and re-grade basin floor to effectively manage silts.
- 3. Jurupa Basin Improvements Improve Jurupa Basin's stormwater capture by replacing the existing diversion with a higher capacity diversion.
- 4. RP-3 Basin Improvements Increase conservation storage with added new RP3 Cell, and new pipes and gate to connect the new cell to stormwater.

On June 16, 2021, an amendment to Task Order No. 9 was approved by Watermaster and IEUA. This was the first amendment to change the Project's total budget from \$16.48 million to \$22.04 million, to reflect additional awarded grant funds for the Project, and to adjust the reimbursement schedule under which Watermaster provides its share of the costs to IEUA. (Attachment 2)

The Second Amendment to Task Order No. 9 was entered into by Watermaster and IEUA on August 25 2022, effective September 21, 2022, which increased the available funds for the Wineville/Jurupa/Force Main Conveyance from \$22,040,252 to \$25,296,340. This raised the construction contingencies budget from \$1,548,088 to \$4,804,176, a \$3,256,088 increase, to address unforeseen conditions, changes in scope, and extended delays. (Attachment 3)

DISCUSSION

On June 16, 2021, IEUA awarded the construction contract for the Stormwater Distribution System, Wineville Basin and Jurupa Basin improvements (a portion of the 23a Project) to MNR Construction Inc. in the amount of \$15,480,880. While, separately, the 23a recharge improvements at RP3 Basin were awarded to multiple contractors. On May 19, 2021, IEUA approved a construction contract for the new groundwater diversion structure at RP3 Basin to Metro Builders & Engineers Group, Ltd. for the amount of \$634,881. On June 20, 2018 IEUA awarded the excavation of a new groundwater recharge basin at RP3 to James McMinn, Inc. in the amount of \$677,805.

The construction efforts at the RP3 Basin are completed while the construction for the Stormwater Distribution System, Wineville Basin and Jurupa Basin improvements is 85-percent complete. Currently, unforeseen Project modifications, and adjustments to MNR's scope of work near Project completion have caused construction costs to increase and a delay in project completion. The explanation of the circumstances that resulted in the aforementioned are the following:

- Delays with electrical utility provider on the new service connection
- Contractor's inability to provide specified pumps
- Additional time and cost to modify the rubber dam design

During the design phase of the project, the Engineering Consultant prepared electrical construction plans to show the approximate location where Southern California Edison (SCE), the electrical provider in the area, would tie into the new improvements at Wineville and Jurupa Basins. These plans were based on earlier discussions and coordination with SCE. When construction began, IEUA received notice from SCE that detailed plans for SCE's service connections were to be received by February 11, 2022. Unfortunately, this initial deadline was not met and was postponed multiple times by SCE due to limited staffing and continued impacts from the COVID-19 pandemic. IEUA communicated the urgency to SCE to provide requested electrical plans. Unfortunately, SCE was non-responsive to IEUA's continued requests. This delay prevented the Contractor from scheduling the critical electrical work at Wineville Basin and Jurupa Basin.

With SCE's full responses received by November 7, 2023, IEUA and the Contractor negotiated the extended time and compensation to implement and complete the electrical improvements at Wineville Basin which included additional construction requirements and cost escalation. The new date for the completion of the electrical is anticipated to be September 2024.

Since July 13, 2021, the Contractor failed to meet the requirements in providing a complete pump station for the Project. The Contractor has submitted 10 revisions to their proposed pump and motors at the Wineville Basin and Jurupa Basin. Within these revisions came multiple changes and clarifications by the Contractor which delayed and prolonged the pump submittal approval. On August 8, 2023, the Contractor issued a deviation which requested a price increase to pumps and a revised timeline to order and receive the new pumps. The initial price increase was \$264,599 but later increased to \$585,050 due to the market's higher material cost. After several meetings and discussions, it was mutually agreed that the pumps would be removed from the contract. IEUA had no confidence the Contractor's pump supplier could meet requirement and maintain pump performance. Instead, IEUA decided to rebid the new pumps with another qualified Contractor to purchase, install, and test. Under this approach, the current Contractor would only continue work on the remaining tasks less the pumps.

Due to these changes in the acquisition, installation and testing of the new pumps, the Project will require additional cost due to cost escalation and the cost to manage the pump completion to July 2025.

Lastly, during the submittal review in construction IEUA requested an urgent change to the mechanical design on the new Rubber Dam to eliminate a confined space condition when operating the dam. Unfortunately, the Project's detailed requirement for the new rubber dam did not prohibit any confined space conditions with the new equipment. To correct this safety concern, IEUA requested an immediate redesign of the auto-deflate system. This effort delayed the Contractor for 223 calendar days in order to research and resubmit for different rubber dam mechanical components. This was further extended to allow the manufacturer to re-create new controls and programing for the system. Due to these changes the Project costs will increase given the extended schedule and escalation in material cost.

IEUA has been giving regular updates to the Recharge Investigations and Projects Committee (RIPComm), which meets quarterly. At the January 18th, 2024 RIPComm meeting, IEUA gave a detailed status report and gave notice of the increase in cost and project delays. After IEUA concluded contract negotiations with the Contractor, IEUA reported to RIPComm on April 18, 2024 the proposed steps resulting in an increase to the overall project cost.

With the delays, unforeseen Project modifications, and adjustments to MNR's scope of work near Project completion, the proposed increase for the project budget is \$3,549,676, bringing the total to \$28,846,016. With this increased cost for the Project, the updated melded unit cost for all stormwater improvements under the 2013 RMPU project is estimated to rise from \$514 to \$557 per acre-feet annually which remains

below the threshold unit cost of \$612 per acre-feet per year as established by the 2013 RMPU Steering Committee. The unit cost remains under this threshold due to the grants of \$10,833,381 secured from state and federal funds.

The final cost share from IEUA and Watermaster (less grants) with the Project increase is \$803,255 and \$17,209,380, respectively. With \$26,200,809 available in grants and SRF loans (\$10.8 in grants and \$15.4 in SRF), \$2,645,207 is not within the available grant or loans. Based on the current estimated construction completion date of July 2025, repayment for this cost not covered by grants and SRF loan is expected in the Fiscal Year 2025/26 where Watermaster and IEUA's projected pay-go share is \$2,397,090 and \$248,117 respectively.

IEUA staff continues to seek extension of existing funding sources or identification of new grant opportunities to mitigate the fiscal impacts the requested project amendment.

- 4. Third Amendment to Task Order No. 9 RMPU Improvement Project 23a (Draft)

MASTER AGREEMENT BETWEEN CHINO BASIN WATERMASTER AND INLAND EMPIRE UTILITIES AGENCY REGARDING THE MANAGEMENT OF COLLABORATIVE RECHARGE PROJECTS

TASK ORDER NO. 9 RMPU IMPROVEMENT PROJECT 23a

This Task Order is made and entered into as of the day of May, 2017 by and between the Chino Basin Watermaster, hereinafter referred to as "Watermaster," and the Inland Empire Utilities Agency, hereinafter referred to as "IEUA" (each a "Party" and collectively, the "Parties").

In consideration of the mutual promises, covenants, and conditions as addressed in the Master Agreement dated July 24, 2014, as amended thereafter, and as specifically hereinafter set forth, the Parties do hereby agree as follows:

1. PURPOSE

The purpose of this Task Order is to govern the project management, planning, permitting, bid/award of construction, design and construction of the 2013 RMPU Proposed Wineville PS to Jurupa, Expanded Jurupa PS to RP3 Basin, and 2013 Proposed RP3 Improvements Project (RMPU Improvements Project ID 23a) ("Project").

The Project consists of four major recharge improvement components and, when completed, will divert and recharge an additional 2,921 acre-feet per year ("AFY") of stormwater and dry-weather runoff from the area and 2,905 AFY of recycled water from IEUA's distribution system. The following is an overview of the Project's four components:

- 1. Stormwater Distribution System Hydraulically connect the Wineville, Jurupa, and RP3 basins to effectively capture and store stormwater. Add a new pump station at Wineville, provide an additional pump at Jurupa, and lay over two miles of new conveyance pipe to provide stormwater conveyance from Wineville Basin to Jurupa Basin.
- 2. Wineville Basin Improvements Convert an existing flood control basin into a multipurpose recharge basin where new activities will include groundwater recharge of stormwater and dry-weather runoff. The conversion will include adding a spillway gate structure to raise storage volume, gating an existing outlet with motorized actuators, and re-grading the basin floor to effectively manage silts.
- 3. Jurupa Basin Improvements Improve Jurupa Basin's stormwater capture by replacing the existing diversion with a higher capacity diversion.

1

Task Order No. 9
Project ID 23a of the RMPU Improvement Project

4. RP-3 Basin Improvements – Increase conservation storage by adding a new RP3 Cell, and new pipes and a gate to connect the new cell to stormwater. The project assumes the reduction of hauling costs by 90% by working with local contractors/haulers to remove soil at no or low cost.

On November 17, 2016, the Watermaster Board approved the "Post 2014 Stormwater Recharge Program" as part of the results and findings presented from the completed preliminary design report on the agreed upon 2013 RMPU projects. Under the "Post 2014 Stormwater Recharge Program," the Project was recommended for final design, bidding, and construction.

2. SCOPE

The activities to be undertaken pursuant to this Task Order include project development to properly establish the Project's scope and schedule, preliminary design evaluation to define the extent of the upgrades of each site, design for the preparation of the construction plans and specifications for the upgrades, permitting and California Environmental Quality Act ("CEQA") review for each site proposed for upgrades, bid/award of the construction contract to the lowest responsible/responsive bidder, and the construction of the basin upgrades. The following is the projected cost breakdown and schedule for each of the Project phases:

Phase	Start	Finish	Projected Cost
Project Development	07/01/14	12/17/14	\$14,600
Pre-Design	12/18/14	11/16/16	\$407,900
Environmental Impact	12/18/14	04/20/16	\$179,500
Permits	12/18/14	01/08/18	\$52,400
Design	06/22/17	03/12/18	\$1,372,500
Bid and Award	03/13/18	06/20/18	15,000
Construction	03/22/18	06/28/19	\$14,441,000
		Total	\$16,482,900

As of the date upon which the Parties enter into this. Task Order, the Project development, pre-design and environmental impact phases of the Project have been completed and the Parties acknowledge that all funds for these phases have been expended and reimbursed, as applicable. The Task Order does not create any further rights or responsibilities for either of the Parties with respect to these phases of the Project.

3. <u>IEUA RESPONSIBILITIES</u>

IEUA agrees to provide Project management and contract administration services that include, but are not limited to:

- Engagement of consulting services as needed for:
 - Preliminary design and design engineering services;
 - CEQA compliance and permitting;
 - Bid and award efforts; and,
 - Engineering support during construction
- Management of consultants for the above;
- Approval of progress payments for consultants;
- Recommendations as to change orders for consultants; and,
- Payment of consultant invoices

During construction, IEUA agrees to provide construction management and contract administration services that include, but are not limited to:

- Engagement of construction contract services for:
 - Construction work to implement the upgrades
- Management of contractors for the above;
- Approval of progress payments for contractors;
- Recommendations as to change orders for contractors; and,
- Payment of contractor invoices

IEUA will supply all personnel and equipment required to perform the assigned services.

4. WATERMASTER RESPONSIBILITIES

Watermaster agrees that it and its employees and consultants will cooperate with IEUA and its contractors in the performance of services under this Task Order and will provide any necessary documentation and information in Watermaster's possession.

5. BUDGET AND COST ALLOCATION

Unless the scope of work is changed and an increase is authorized by the Parties, the budget for the activities to be undertaken pursuant to this Task Order is sixteen million

3

Task Order No. 9
Project ID 23a of the RMPU Improvement Project

four hundred eighty-two thousand nine hundred dollars (\$16,482,900) ("Budget"), of which \$8,541,450 is available in grant funds. The grant funds available for each phase of the Project are as follows:

Available Grants	Stormwater Distribution System	Wineville Basin	Jurupa Basin	RP-3 Basin	Total
State Water Resources Control Board - Storm Water Grant Program	\$5,192,120	\$1,895,530	\$741,730	\$412,070	\$8,241,450
United States Department of Interior Bureau of Reclamation – Drought Resiliency	-	-	-	\$300,000	\$300,000
Total	\$5,192,120	\$1,895,530	\$741,730	\$712,070	\$8,541,450

The Parties agree that the Budget less the grant funds is shared consistent with the methodology described in Peace II Agreement Section 8.1(b), and that IEUA's share of the costs is based on a 50% allocation of the costs of those portions of the project for which there is a recycled water component. The Budget includes IEUA capital, administrative, and overhead expenses associated with IEUA's provision of the services described in Section 3 above. The total budget allocation by Party and project component is as follows:

Project	Stormwater Distribution System	Wineville Basin	Jurupa Basin	RP-3 Basin	Total
Watermaster	\$4,792,080	\$1,692,470	\$682,270	\$387,315	\$7,554,135
IEUA	-	-	-	\$387,315	\$387,315
Grants	\$5,192,120	\$1,895,530	\$741,730	\$712,070	\$8,541,450
Total	\$9,984,200	\$3,588,000	\$1,424,000	\$1,486,700	\$16,482,900

The Parties shall budget, pursuant to their own budget mechanism, such that each is able to expend the amounts shown in the Fiscal Years shown in the table below.

PID 23a	Prior Fiscal Years (FY)	FY 17/18	FY 18/19	FY 19/20	FY 20/21	Total
Watermaster	\$903,553	\$953,803	\$1,663,701	\$3,968,249	\$64,829	\$7,554,135
IEUA	\$250,250	\$100,000	\$37,065	-	-	\$387,315
SWRCB Grant	\$0	-	\$7,000,000	\$1,141,450	\$100,000	\$8,241,450
USBR Grant	\$0	\$100,000	\$200,000	-	-	\$300,000
Total	\$1,153,803	\$1,153,803	\$8,900,766	\$5,109,699	\$164,829	\$16,482,900

4

Task Order No. 9

Project ID 23a of the RMPU Improvement Project

6. TOTAL BUDGETED COST

The Parties agree to pay their respective portion of the Budget, less the available grant funding. The Parties shall not be required to pay more than \$7,941,450 ("Total Budgeted Cost").

7. MAXIMUM COSTS TO WATERMASTER

The costs to be required of Watermaster shall not exceed its share of the Total Budgeted Cost, as shown in Section 5 above, or \$7,554,135.

8. MAXIMUM COSTS TO IEUA

The costs to be required of IEUA shall not exceed its share of the Total Budgeted Cost, as shown in Section 5 above, or \$387,315.

9. TERM

The Project has been underway since FY 14-15. This Task Order shall not create any new responsibilities or obligations for either Party for phases of the Project completed prior to the entrance into this Task Order. The terms of this Task Order shall remain effective until IEUA's receipt of Watermaster's share of costs expended pursuant to the Budget shown above, so that IEUA may close out the activities.

10. REIMBURSEMENT

Watermaster's reimbursement of IEUA for work performed under this Task Order shall be as provided in Article 3 of the July 24, 2014 Master Agreement and as amended thereafter.

11. EFFECTIVE DATE

This Task Order No. 9 will be deemed effective as of August 28, 2014. The Task Order will apply retroactively and govern all work undertaken on the Project from August 28, 2014 until the Project is completed and this Task Order expires.

IN WITNESS WHEREOF, the Parties have executed this Agreement on the day and year and at the place first above written.

TASK ORDER NO. 9
RMPU IMPROVEMENT PROJECT 23a
under the
MASTER AGREEMENT REGARDING THE
MANAGEMENT OF COLLABORATIVE RECHARGE PROJECTS
between
INLAND EMPIRE UTILITIES AGENCY
and
CHINO BASIN WATERMASTER

This First Amendment to Task Order No. 9 is made and entered into as of the 16 day of June, 2021 by and between the Inland Empire Utilities Agency (IEUA) and the Chino Basin Watermaster (Watermaster) (each a "Party" and collectively, the "Parties").

RECITALS

- A. Task Order No. 9 for the RMPU IMPROVEMENT PROJECT 23a (the "Task Order") was approved by IEUA and Watermaster on May 25th, 2017.
- B. The recently received, higher bid prices for the construction of the RMPU IMPROVEMENT under PROJECT ID 23a, the proposed Wineville Pumps Station to Jurupa, the expansion of the Jurupa's Pumps stations to RP-3, and the approved recharge improvements at Wineville, Jurupa and RP3 Basins (collectively, the "Project") necessitates a change to the Project's total budget from \$16.48 million to \$22.04 million.
- C. United States Department of Interior's Bureau of Reclamation awarded the proposed Wineville Pumps Station to Jurupa, the expansion of the Jurupa's Pumps stations to RP-3, and the recharge improvements at Wineville and Jurupa with a grant of \$740,000 through Section 9504(a) of the Secure Water Act, Public Law 111-11 (Agreement Number R18AP000777).
- C. IEUA and Watermaster wish to amend that Task Order to reflect the necessary budget increase and the grant award, and to adjust the reimbursement schedule under which Watermaster provides its share of the costs to IEUA.

NOW THEREFORE IT IS AGREED TO AMEND THE TASK ORDER AS FOLLOWS:

1. Section 2 of the Task Order titled SCOPE shall be amended to read:

The activities to be undertaken pursuant to this Task Order include project development to properly establish project's scope and schedule, preliminary design evaluation to define the extent of the upgrades of each site, design for the preparation of the construction plans and specifications for the upgrades, permitting and CEQA review for each site proposed for

upgrades, bid/award of the construction contract to the lowest responsible/responsive bidder, and the construction of the improvements. The following is projected cost breakdown and schedule for each of the project phases:

Phase	Start	Finish	Projected Cost
Project Development	7/1/2014	12/17/2014	\$14,600
Pre-Design	12/18/2014	11/16/2016	\$407,900
Environmental Impact	12/18/2014	4/20/2016	\$179,500
Permits	12/18/2014	1/8/2018	\$52,400
Design	6/22/2017	12/31/2020	\$1,372,500
Bid and Award	1/1/2021	6/15/2021	\$15,000
Construction	6/22/2021	8/21/2022	\$19,998,352
	\$22,040,252		

As of the date upon which the Parties enter into this Task Order, the project development, pre-design and environmental impact phases of the Project have been completed and the Parties acknowledge that all funds for these phases have been expended and reimbursed, as applicable. The Task Order does not create any further rights or responsibilities for either of the Parties with respect to these phases of the Project.

2. Section 5 of the Task Order titled BUDGET AND COST ALLOCATION shall be amended to read:

Unless the scope of work is changed and an increase is authorized by the Parties, the budget for the activities to be undertaken pursuant to this Task Order is twenty-two million forty thousand two hundred fifty-two dollars (\$22,040,252) ("Budget"), of which \$10,833,381 is available in grant funds. The grant funds available for each phase of the Project are as follows:

Available Grants	Stormwater Distribution System/Winevill e Basin/Jurupa Basin	RP-3 Basin	Total
State Water Resources Control Board - Storm Water Grant Program	\$8,994,167	\$809,214	\$9,803,381
United States Department of Interior Bureau of Reclamation - Drought Resiliency	-	\$290,000	\$290,000
United States Department of Interior Bureau of Reclamation - Secure Water Act	\$740,000	-	\$740,000
Total	\$9,734,167	\$1,099,214	\$10,833,381

The Parties agree that the Budget less the grant funds is shared consistent with the methodology described in Peace II Agreement Section 8.I(b), and that IEUA's share of the costs is based on a 50% allocation of the costs of those portions of the project for which there is a recycled water component. The Budget includes IEUA capital, administrative, and overhead expenses associated with IEUA's provision of the services described in Section 3 above. The total budget allocation by Party and project component is as follows:

CBWM/IEUA/Grant	Stormwater Distribution System/Wineville Basin/Jurupa Basin	RP-3 Basin	Total	
Watermaster	\$10,486,785	\$360,043	\$10,846,828	
IEUA	-	\$360,043	\$360,043	
Grants	\$9,734,167	\$1,099,214	\$10,833,381	
Total	\$20,220,952	\$1,819,300	\$22,040,252	

The Parties shall budget, pursuant to their own budget mechanism and in accordance with the May 26th, 2016 First Amendment to the Master Agreement Regarding the Management of Collaborative Recharge Projects between IEUA and Watermaster.

3. Section 6 of the Task Order titled TOTAL BUDGETED COST shall be amended to read:

The Parties agree to pay their respective portion of the Budget, less the available grant funding. The parties shall not be required to pay more than \$11,206,871 ("Total Budgeted Cost").

4. Section 7 of the Task Order titled MAXIMUM COSTS TO WATERMASTER shall be amended to read:

The costs to be required of Watermaster shall not exceed its share of the Total Budgeted Cost, as shown in Section 5 above, or \$10,846,828.

5. Section 8 of the Task Order titled MAXIMUM COSTS TO IEUA shall be amended to read:

The costs to be required of IEUA shall not exceed its share of the Total Budgeted Cost, as shown in Section 5 above, or \$360,043.

(The remaining balance of this page is left intentionally blank)

ALL OTHER PROVISIONS SHALL REMAIN UNCHANGED.

IN WITNESS WHEREOF, the parties hereby have caused this Amendment to be entered into as of the day and year written above.

General Manager General Manager

SECOND AMENDMENT to TASK ORDER NO. 9 RMPU IMPROVEMENT PROJECT 23a under the MASTER AGREEMENT REGARDING THE MANAGEMENT OF COLLABORATIVE RECHARGE PROJECTS between INLAND EMPIRE UTILITIES AGENCY and CHINO BASIN WATERMASTER

This Second Amendment to Task Order No. 9 is made and entered into as of the ____ day of September 2022 by and between the Inland Empire Utilities Agency (IEUA) and the Chino Basin Watermaster (Watermaster) (each a "Party" and collectively, the "Parties").

RECITALS

- A. Task Order No. 9 for the RMPU IMPROVEMENT PROJECT 23a (the "Task Order") was approved by IEUA and Watermaster on May 25, 2017, to govern the project management, planning, permitting, bid/award of construction, design and construction of the 2013 RMPU Proposed Wineville PS to Jurupa, Expanded Jurupa PS to RP3 Basin, and 2013 Proposed RP3 Improvements Project (RMPU Improvements Project ID 23a) ("Project").
- B. The First Amendment to Task Order No. 9 was entered into by Watermaster and IEUA, effective June 16, 2021, which changed the total budget for the Project's total budget from \$16.48 million to \$22.04 million due to higher than anticipated bid prices for the Project and additional awarded grant funds for the Project. The First Amendment to Task Order No. 9 adjusted the reimbursement schedule under which Watermaster provides its share of the costs to IEUA accordingly.
- C. On June 16, 2021, IEUA awarded a \$15,480,480 construction contract for a portion of the Project, the Wineville/Jurupa/Force Main Conveyance, to MNR Construction, Inc (MNR).
- D. The budget for the Project includes \$1,548,088 for contingencies during the construction of the Wineville/Jurupa/Force Main Conveyance to address unforeseen conditions, changes in scope, and delays. However, current project field conditions, extended delays, and ongoing market concerns require additional contingency funds. IEUA and Watermaster staff are recommending increasing the available contingency funds for the Wineville/Jurupa/Force Main Conveyance to \$4,804,176, a \$3,256,088 increase.
- E. IEUA and Watermaster wish to amend Task Order No. 9 to reflect the necessary budget increase for the recommended increase of the available continency funds for the construction of the Wineville/Jurupa/Force Main Conveyance and adjustment of the reimbursement schedule under which Watermaster provides its share of the costs to IEUA.

NOW THEREFORE IT IS AGREED TO AMEND THE TASK ORDER AS FOLLOWS:

1. Section 2 of the Task Order titled SCOPE shall be amended to read:

The activities to be undertaken pursuant to this Task Order include project development to properly establish project's scope and schedule, preliminary design evaluation to define the extent of the upgrades of each site, design for the preparation of the construction plans and specifications for the upgrades, permitting and CEQA review for each site proposed for upgrades, bid/award of the construction contract to the lowest responsible/responsive bidder, and the construction of the improvements. The following is projected cost breakdown and schedule for each of the project phases:

Phase	Start	Finish	Projected Cost
Project Development	7/1/2014	12/17/2014	\$14,600
Pre-Design	12/18/2014	11/16/2016	\$407,900
Environmental Impact	12/18/2014	4/20/2016	\$179,500
Permits	12/18/2014	1/8/2018	\$52,400
Design	6/22/2017	12/31/2020	\$1,372,500
Bid and Award	1/1/2021	6/15/2021	\$15,000
Construction	6/22/2021	12/31/2023	\$23,254,440
	\$25,296,340		

As of the date upon which the Parties enter into this Task Order, the project development, pre-design and environmental impact phases of the Project have been completed and the Parties acknowledge that all funds for these phases have been expended and reimbursed, as applicable. The Task Order does not create any further rights or responsibilities for either of the Parties with respect to these phases of the Project.

2. Section 5 of the Task Order titled BUDGET AND COST ALLOCATION shall be amended to read:

Unless the scope of work is changed and an increase is authorized by the Parties, the budget for the activities to be undertaken pursuant to this Task Order is twenty-five million two hundred ninety-six thousand three hundred forty dollars (\$25,296,340) ("Budget"), of which \$10,833,381 is available in grant funds. The grant funds available for each phase of the Project are as follows:

(The remaining balance of this page is left intentionally blank)

Available Grants	Stormwater Distribution System/Winevill e Basin/Jurupa Basin	RP-3 Basin	Total	
State Water Resources Control Board - Storm Water Grant Program	\$8,994,167	\$809,214	\$9,803,381	
United States Department of Interior Bureau of Reclamation - Drought Resiliency	-	\$290,000	\$290,000	
United States Department of Interior Bureau of Reclamation - Secure Water Act	\$740,000	-	\$740,000	
Total	\$9,734,167	\$1,099,214	\$10,833,381	

The Parties agree that the Budget less the grant funds is shared consistent with the methodology described in Peace II Agreement Section 8.I(b), and that IEUA's share of the costs is based on a 50% allocation of the costs of those portions of the project for which there is a recycled water component. The Budget includes IEUA capital, administrative, and overhead expenses associated with IEUA's provision of the services described in Section 3 above. The total budget allocation by Party and project component is as follows:

CBWM/IEUA/Grant	Stormwater Distribution System/Wineville Basin/Jurupa Basin	RP-3 Basin	Total
Watermaster	\$13,742,873	\$360,043	\$14,102,916
IEUA	-	\$360,043	\$360,043
Grants	\$9,734,167	\$1,099,214	\$10,833,381
Total	\$23,477,040	\$1,819,300	\$25,296,340

The Parties shall budget, pursuant to their own budget mechanism and in accordance with the May 26th, 2016, First Amendment to the Master Agreement Regarding the Management of Collaborative Recharge Projects between IEUA and Watermaster.

3. Section 6 of the Task Order titled TOTAL BUDGETED COST shall be amended to read:

The Parties agree to pay their respective portion of the Budget, less the available grant funding. The parties shall not be required to pay more than \$14,462,959 ("Total Budgeted Cost").

4. Section 7 of the Task Order titled MAXIMUM COSTS TO WATERMASTER shall be amended to read:

The costs to be required of Watermaster shall not exceed its share of the Total Budgeted Cost, as shown in Section 5 above, or \$14,102,916.

ALL OTHER PROVISIONS SHALL REMAIN UNCHANGED.

IN WITNESS WHEREOF, the parties hereby have caused this Amendment to be entered into as of the day and year written above.

CHINO BASIN WATERMASTER:	INLAND EMPIRE UTILITIES AGENCY:
Peter Kavounas, P.E.	Shivaji Deshmukh, P.E.
General Manager	General Manager

THIRD AMENDMENT to TASK ORDER NO. 9 RMPU IMPROVEMENT PROJECT 23a under the MASTER AGREEMENT REGARDING THE MANAGEMENT OF COLLABORATIVE RECHARGE PROJECTS between INLAND EMPIRE UTILITIES AGENCY and CHINO BASIN WATERMASTER

This Third Amendment to Task Order No. 9 is made and entered into as of the _____ day of May 2024 by and between the Inland Empire Utilities Agency ("IEUA") and the Chino Basin Watermaster ("Watermaster") (each a "Party" and collectively, the "Parties").

RECITALS

- A. Task Order No. 9 for the RMPU IMPROVEMENT PROJECT 23a (the "Task Order") was approved by IEUA and Watermaster on May 25, 2017, to govern the project management, planning, permitting, bid/award of construction, design and construction of the 2013 RMPU Proposed Wineville PS to Jurupa, Expanded Jurupa PS to RP3 Basin, and 2013 Proposed RP3 Improvements Project (RMPU Improvements Project ID 23a) ("Project").
- B. The First Amendment to Task Order No. 9 was entered into by Watermaster and IEUA, effective June 16, 2021, which changed the total budget for the Project's total budget from \$16,482,900 to \$22,040,252 due to higher than anticipated bid prices for the Project and additional awarded grant funds for the Project. The First Amendment to Task Order No. 9 adjusted the reimbursement schedule under which Watermaster provides its share of the costs to IEUA accordingly.
- C. On June 16, 2021, IEUA awarded a \$15,480,480 construction contract for a portion of Project, the Wineville/Jurupa/Force Main Conveyance, to MNR Construction, Inc (MNR).
- D. The Second Amendment to Task Order No. 9 was made effective September 21, 2022, which increased the available funds for the Wineville/Jurupa/Force Main Conveyance from \$22,040,252 to \$25,296,340. This raised the construction contingencies budget from \$1,548,088 to \$4,804,176, a \$3,256,088 increase, to address unforeseen conditions, changes in scope, and extended delays.
- E. Further unusual delays, unforeseen Project modifications, and adjustments to MNR's scope of work near Project completion have caused construction costs to increase. Therefore, IEUA and Watermaster staff are recommending increasing the funds available for the Wineville/Jurupa/Force Main Conveyance from and RP3 from \$25,296,340 to \$28,846,016, a \$3,549,676 increase.

F. IEUA and Watermaster wish to amend Task Order No. 9 to increase the budget to cover higher than expected construction costs of the Project and to revise the reimbursement schedule under which Watermaster and IEUA provide its share of the costs.

NOW THEREFORE IT IS AGREED TO AMEND THE TASK ORDER AS FOLLOWS:

1. Section 2 of the Task Order titled SCOPE shall be amended to read:

The activities to be undertaken pursuant to this Task Order include project development to properly establish project's scope and schedule, preliminary design evaluation to define the extent of the upgrades of each site, design for the preparation of the construction plans and specifications for the upgrades, permitting and CEQA review for each site proposed for upgrades, bid/award of the construction contract to the lowest responsible/responsive bidder, and the construction of the improvements. The following is projected cost breakdown and schedule for each of the project phases:

Phase	Start	Finish	Projected Cost
Project Development	7/1/2014	12/17/2014	\$14,600
Pre-Design	12/18/2014	11/16/2016	\$407,900
Environmental Impact	12/18/2014	4/20/2016	\$179,500
Permits	12/18/2014	1/8/2018	\$52,400
Design	6/22/2017	12/31/2020	\$1,372,500
Bid and Award	1/1/2021	6/15/2021	\$15,000
Construction	6/22/2021	12/31/2025	\$26,804,116
		Total	\$28,846,016

As of the date upon which the Parties enter into this Task Order, the project development, pre-design and environmental impact phases of the Project have been completed and the Parties acknowledge that all funds for these phases have been expended and reimbursed, as applicable. The Task Order does not create any further rights or responsibilities for either of the Parties with respect to these phases of the Project.

2. Section 5 of the Task Order titled BUDGET AND COST ALLOCATION shall be amended to read:

Unless the scope of work is changed and an increase is authorized by the Parties, the budget for the activities to be undertaken pursuant to this Task Order is twenty-eight million eight hundred forty-six thousand sixteen dollars (\$28,846,016) ("Budget"), of which \$10,833,381 is available in grant funds. The grant funds available for each phase of the Project are as follows:

Available Grants	Stormwater Distribution System/Winevill e Basin/Jurupa Basin	RP-3 Basin	Total	
State Water Resources Control Board - Storm Water Grant Program	\$8,994,167	\$809,214	\$9,803,381	
United States Department of Interior Bureau of Reclamation - Drought Resiliency	-	\$290,000	\$290,000	
United States Department of Interior Bureau of Reclamation - Secure Water Act	\$740,000	-	\$740,000	
Total	\$9,734,167	\$1,099,214	\$10,833,381	

The Parties agree that the Budget less the grant funds is shared consistent with the methodology described in Peace II Agreement Section 8.I(b), and that IEUA's share of the costs is based on a 50% allocation of the costs of those portions of the project for which there is a recycled water component. The Budget includes IEUA capital, administrative, and overhead expenses associated with IEUA's provision of the services described in Section 3 above. The total budget allocation by Party and project component is as follows:

CBWM/IEUA/Grant	Stormwater Distribution System/Wineville Basin/Jurupa Basin	RP-3 Basin	Total
Watermaster	\$16,406,125	\$803,255	\$17,209,380
IEUA	-	\$803,255	\$803,255
Grants	\$9,734,167	\$1,099,214	\$10,833,381
Total	\$26,140,292	\$2,705,724	\$28,846,016

The Parties shall budget, pursuant to their own budget mechanism and in accordance with the May 26th, 2016, First Amendment to the Master Agreement Regarding the Management of Collaborative Recharge Projects between IEUA and Watermaster.

3. Section 6 of the Task Order titled TOTAL BUDGETED COST shall be amended to read:

The Parties agree to pay their respective portion of the Budget, less the available grant funding. The parties shall not be required to pay more than \$18,012,635 ("Total Budgeted Cost").

4. Section 7 of the Task Order titled MAXIMUM COSTS TO WATERMASTER shall be amended to read:

The costs to be required of Watermaster shall not exceed its share of the Total Budgeted Cost, as shown in Section 5 above, or \$17,209,380.

5. Section 8 of the Task Order titled MAXIMUM COSTS TO IEUA shall be amended to read:

The costs to be required of IEUA shall not exceed its share of the Total Budgeted Cost, as shown in Section 5 above, or \$803,255.

ALL OTHER PROVISIONS SHALL REMAIN UNCHANGED.

IN WITNESS WHEREOF, the parties hereby have caused this Amendment to be entered into as of the day and year written above.

STAFF REPORT

DATE: May 9, 2024

AP/ONAP/OAP Committee Members TO:

SUBJECT: Watermaster Fiscal Year 2024/25 Proposed Budget (Business Item II.B.)

SUMMARY:

Issue: Fiscal Year 2024/25 Budget consideration

Recommendation: Recommend Advisory Committee approval of the Watermaster Fiscal Year 2024/25 Proposed Budget as presented.

Financial Impact: The Fiscal Year 2024/25 Proposed Budget is \$10,503,350 (excluding any Carryover Funds).

Future Consideration

Appropriative Pool – May 9, 2024: Review and recommend Non-Agricultural Pool - May 9, 2024: Review and recommend Agricultural Pool – May 9, 2024: Review and recommend

Advisory Committee - May 16, 2024: Approval

Watermaster Board - May 23, 2024: Adoption (Advisory Committee Approval Required)

ACTIONS:

Appropriative Pool - May 9, 2024: Non-Agricultural Pool - May 9, 2024: Agricultural Pool - May 9, 2024: Advisory Committee - May 16, 2024: Watermaster Board - May 23, 2024:

BACKGROUND

To prepare a budget of anticipated expenses each year, Watermaster conducts meetings with internal staff and consultants to discuss upcoming projects and anticipated work. As the budget is developed, the related budgeted expenses are continually refined based on feedback of the stakeholders. The following budget-related meetings were held during the past few months:

- Watermaster staff met with the West Yost staff on February 16, 2024 for an Engineering Services budget overview to discuss the ongoing engineering-related activities required by the Judgment, the Peace Agreements, Court orders, the Basin Plan, as well as other upcoming engineering activities.
- During the period of February through April 2024, Watermaster staff held numerous additional meetings and discussions with staff from West Yost to discuss questions and feedback regarding the Engineering Services budget and expected engineering activities for FY 2023/24.
- Watermaster staff has also had numerous meetings and discussions with staff from Brownstein Hyatt Farber Schreck regarding the Legal Services budget and expected legal activities for FY 2024/25 during the period of March through April 2024.
- In March 2024, the Treasurer of Inland Empire Utilities Agency, Mr. Alex Lopez, provided Watermaster's share of the Debt Service figures to be included in the budget for FY 2024/25.
- The Groundwater Recharge Coordinating Committee has met on a quarterly basis to review the
 anticipated costs of operations and maintenance activities and develop the scope of activities for
 the upcoming FY 2024/25 budget as recommended by IEUA. The last meeting was held on
 February 27, 2024.
- The Ground-Level Monitoring Committee met on March 7, 2024 to review and recommend a scope and budget for the Ground-Level Monitoring Program for FY 2024/25. The Technical Memorandum regarding the proposed recommendation for the scope and budget for the Ground-Level Monitoring Committee for FY 2024/25 was issued on April 22, 2024.
- The Prado Basin Habitat Sustainability Committee met on March 21, 2024 to review and recommend a scope and budget for the Prado Basin Habitat Sustainability Program for FY 2024/25.
 The Technical Memorandum regarding the proposed recommendation for the scope and budget for the Prado Basin Habitat Sustainability Program for FY 2024/25 was issued on March 7, 2024.
- The Recharge Investigations and Projects Committee meets quarterly and the most recent meeting was held on April 18, 2024. The purpose of these meetings is to review ongoing capital projects and future years' capital expense projections, and SRF loan and other financing activities.

Based on the above-mentioned activities of the various committees, along with other input from staff and consultants, Watermaster developed the Proposed FY 2024/25 Budget version dated May 3, 2024 in the amount of \$10,503,350. Attachment 1 provides the Proposed FY 2024/25 Budget Detail and can be accessed at the following link:

Attachment 1: https://cbwm.syncedtool.com/shares/file/DLu20g3cJ8O/

DISCUSSION

On Tuesday, March 26, 2024, Watermaster conducted the Budget Release meeting and provided an overview of the Proposed FY 2024/25 Budget of \$10,587,620 and provided information on the highlights of the proposed budget. The presentation provided the budget drivers and how those drivers become expenses, additional commitments, how the budget is developed, various budget comparison tables, the estimated assessment calculation, and future actions required. Representatives from West Yost and Brownstein Hyatt Farber Schreck presented their own proposed budgets and provided information on new

efforts, projects with narrowed and reduced budgets, and/or projects that are being completely removed for FY 2024/25.

Attendees at the meeting were requested to submit their budget-related questions using the FY 2024/25 Budget Questions portal located on the home page of Watermaster's website. By April 9, 2024, there were 20 questions submitted to the portal, and all responses were posted to the portal by April 23, 2024.

The Watermaster Budget Workshop #1 was held on Tuesday, April 16, 2024. Representatives from West Yost, Brownstein Hyatt Farber Schreck, and IEUA were available during the meeting to answer questions related to their specific areas of focus as contained within the proposed budget.

The majority of the workshop focused on addressing the questions submitted through the portal, specifically on the following topics: (1) Administrative expenses (meetings, office building, office supplies and equipment, accounting consulting services, travel expenses, conferences and seminars, board briefings/workshops, and rules and regulations rewrite); (2) Legal services for Archibald South Plume, Chino Airport Plume, and Santa Ana River Habitat Conservation Plan – accounts 6907.31, 6907.32, and 6907.36; (3) OBMP Update – account 6907.45; (4) Water Quality Management Program (WQMP) and Emerging Contaminants Monitoring Plan (EMCP) – accounts 7505 and 7520; (5) Safe Yield Court Order – accounts 6907.47 and 7614; (6) Ag Production Estimation – account 5925; (7) Storage and Recovery Master Plan – account 7610; (8) Salaries and Benefits – accounts 5901.7, 6901.3, 6901.9, 7301.1, and 60182.4; (9) Legal fees for OBMP update – account 6907.45; and (10) Recharge Water Program Debt Service and O&M – accounts 7690.1 and 7206. The West Yost team then presented additional information pertaining to the engineering budget, focusing on the major engineering tasks for FY 2024/25: (1) Water Quality Management Program, (2) Support Implementation of the Safe Yield Court Order, and (3) Develop 2025 Storage Management Plan.

An opportunity was provided at the end of the workshop for attendees to ask any questions. Parties were instructed on how to navigate to the Watermaster website portal to submit their questions, and the workshop was concluded with future required actions and next steps.

The Watermaster Budget Workshop #2 was held on Tuesday, April 23, 2024. Representatives from West Yost and Brownstein Hyatt Farber Schreck were available during the meeting to answer any questions related to their specific areas of focus within the proposed budget. The workshop focused on addressing the remaining questions submitted pertaining to carryover budget. In addition, supplemental schedules were provided to the parties: (1) Proposed Detail Budget of \$10,550,970; (2) Carryover Budget Detail as of June 30, 2023; and (3) Updated Engineering Budget Tables with corresponding footnotes. An opportunity was provided for those in attendance to ask questions and/or obtain clarification on any item within the FY 2024/25 budget. There were no new topics raised for discussion, and the meeting was concluded with future required actions and next steps.

The Watermaster Budget Workshop #3 was held on Tuesday, April 30, 2024. Representatives from West Yost and Brownstein Hyatt Farber Schreck were available during the meeting to answer any questions related to their specific areas of focus within the proposed budget. The workshop focused on introducing updated documents: (1) Proposed Detail Budget of \$10,481,920; (2) Carryover Budget Detail as of June 30, 2023; (3) Updated Engineering Budget Tables; (4) Updated Engineering Budget Summary. In addition, the workshop provided information pertaining to the Operating Reserves and the following documents were also provided to the parties: (5) Draft Calculation of Operating Cash Reserves, and (6) Cash Reserve Policy 4.17. An opportunity was provided for those in attendance to ask questions and/or obtain clarification on any item within the FY 2024/25 budget. There were no new topics raised for discussion, and the meeting was concluded with future required actions and next steps.

In addition to the budget workshops described above, Watermaster provided presentations at the three Pool Committee meetings on April 11, 2024, and gathered further advice and assistance from members of the three Pools.

Watermaster presented the proposed budget at the regular Advisory Committee meeting on April 18, 2024. The Advisory Committee took unanimous action to receive the budget consistent with the Advisory Committee recommendation for budget process adopted in 2021.

The Watermaster presented the proposed budget to the Watermaster Board at the regular meeting of April 25, 2024.

Since the budget release, the following changes have occurred:

- The budget for conferences (account 6191) was decreased by \$36,650 due to a formula error that
 was allocating a level of funding not originally intended. This miscalculation was identified thanks
 to the feedback submitted by parties.
- Brownstein Hyatt Farber Schreck reduced the miscellaneous legal services (account 6078) budget by \$81,946.
- West Yost reduced the ECMP monitoring budget (account 7505) by \$61,257 and added \$25,000 of estimated carryover to the Storage and Recovery Master Plan task (account 7610), reducing the proposed Watermaster engineering budget.
- Watermaster reduced the budget for building interior renovations (account 6025) by \$1,360.
- Watermaster increased the budget for database services (account 6052.2) by \$40,000.

The budget total at the budget release was \$10,587,620 and the total amount at the time of this report is at \$10,503,350, a total reduction of \$84,270.

The carryover budget detail as of June 30,2023 is located below in Attachment 2 as follows:

Attachment 2: https://cbwm.syncedtool.com/shares/file/7QP7NLfKQ8L/

The expense sections below highlight the Proposed Fiscal Year 2024/25 budget.

	FY 2023/24 Approved Budget		FY 2024/25 Proposed Budget		Budget Variance (\$)	Budget Variance (%)
Expenses						
Watermaster Expenses & Salaries	\$	3,601,520	\$	3,578,186	\$ (23,334)	(1)%
Engineering Services		2,884,954		3,215,108	330,154	11%
Legal Services		1,385,829		1,349,679	(36,150)	(3)%
Debt Service and Recharge Basin 0&M		1,941,521		2,360,377	418,856	22%
Total Expenses	\$	9,813,825	\$	10,503,350	\$ 689,525	7%

WATERMASTER EXPENSES AND SALARIES - #1

The first section of the Proposed FY 2024/25 budget relates to Watermaster Expenses, Labor, and Burden. The Watermaster expenses for FY 2024/25 are \$753,038 or 5% below the previous year's Approved Budget of \$791,243. Labor and Burden for FY 2024/25 are \$2,760,860 which is \$49,417 or 2% below the previous year's Approved Budget of \$2,810,277. The Full Time Equivalent (FTE) number of Watermaster employees for the Proposed FY 2024/25 Budget is currently at 12 FTE.

	FY 2023/24 Approved Budget		FY 2024/25 Proposed Budget		Budget Variance (\$)		Budget Variance (%)
Watermaster Expenses							
Total Expenses	\$	791,243	\$	753,038	\$	(38,205)	(5)%
Total Payroll		1,801,007		1,721,950		(79,057)	(4)%
Total Payroll Burden		1,009,270		1,038,910		29,640	3%
Total Watermaster Expenses	\$	3,601,520	\$	3,513,898	\$	(87,622)	(2)%

All proposed adjustments to the Labor and Burden expense category are routine and follow past Watermaster practices and policy. Watermaster is using the approved Salary Schedule from FY 2023/24 with a 3.0% Cost of Living adjustment included. There are no new employee benefits being proposed that create additional costs for Watermaster. The FY 2024/25 Proposed Pay Schedule is located below in Attachment 3 as follows:

Attachment 3: https://cbwm.syncedtool.com/shares/file/MQBMZKYiC2c/

ENGINEERING SERVICES - #2

The second section of the Proposed FY 2024/25 budget relates to Watermaster Engineering Services. The Engineering Services budget is proposed at \$3,215,108 which is \$330,154 or 11% above the Approved FY 2023/24 Budget of \$2,884,954 (which excludes Carry-Over funding for ongoing projects).

The Engineering Services documents are provided below in Attachment 4, Tables 1 through 4 and Attachment 5, a 61-page detailed narrative including Rationale, Scope of Work, and Deliverables for each budget category.

Attachment 4: https://cbwm.svncedtool.com/shares/file/UO9fWiFcX42/

Attachment 5: https://cbwm.syncedtool.com/shares/file/ygVjBH7HUF1/

Incorporated within the Engineering Services budget of \$3,215,108 is the Ground-Level Monitoring Committee recommendations for FY 2024/25. The GLMC recommended a proposed budget of \$393,647 less anticipated "Carry-Over" funding of \$0 for a budget amount of \$393,647 for FY 2024/25. Based on the discussions at meetings held by the Ground-Level Monitoring Committee, the recommendations and associated budget are shown below in Attachment 6.

Attachment 6: https://cbwm.syncedtool.com/shares/file/WHO1h0HCxjx/

The following chart details the proposed Engineering Services budget for FY 2024/25 categorized by Watermaster account number. The comparison is between the FY 2024/25 Proposed Budget of \$3,215,108 and the FY 2023/24 Amended Budget of \$2,884,954.

Watermaster's function is to administer and enforce provisions of the Judgment and subsequent orders of the Court, and to develop and implement an Optimum Basin Management Program

As with the past practice for the last ten plus years, the Brownstein Hyatt Farber Schreck Legal Services budget has been developed using a formula of assumed hours to complete a specific task multiplied by the hourly rate. Brownstein Hyatt Farber Schreck hourly rates for some staff did slightly increase for the FY 2024/25 period. Brownstein has provided a detailed memorandum and worksheet which is provided below in Attachment 7 dated March 25, 2024.

Attachment 7: https://cbwm.syncedtool.com/shares/file/xJfbk2jtMvf/

DEBT SERVICE AND RECHARGE BASIN O&M COSTS - #4

The fourth section of the Proposed FY 2024/25 budget relates to Watermaster's Debt Service and Recharge Basin O&M. The Debt Service is based upon principal and interest on the (1) 2020A Refunding (2008B Variable Revenue Rate Bonds) totaling \$5.7M for 11 years @ 0.849% and matures in 2032; (2) San Sevaine Improvement (SRF Loan) totaling \$1.5M for 30 years @1.8% and matures in December 2049; (3) Lower Day Improvement (SRF Loan) totaling \$2.9M for 20 years @ .55% and matures in January 2044; (4) Montclair Basin Improvement (SRF Loan) totaling \$2.06M for 20 years @ .55% and matures in February 2044; and (5) FY 2021 \$933,000 and FY 2022 \$7.0M Inter-Fund Loan to Recharge Water. IEUA and Watermaster share the principal and interest expenses on a 50/50 basis.

The Proposed FY 2024/25 Debt Service budget is \$772,770. The FY 2023/24 budget for this category was \$746,765.

Summary Debt Service

Debt Type	FY 2024/25 Budget	Funding from CBWM	Funding from IEUA
2020A Refunding Bonds (2008B Variable)	\$759,649	\$379,825	\$379,824
San Sevaine Improvement (SRF loan)	\$101,947	\$50,973	\$50,974
Lower Day Basin Improvement (SRF Loan)	\$54,550	\$54,550	\$0
Montclair Basin Improvement (SRF Loan)	\$97,446	\$97,446	\$0
Interfund loan supporting RMPU projects (interest only)**	\$202,100	\$189,974	\$12,126
Total Debt service	\$1,215,692	\$772,768	\$442,924

The current budget details regarding the Debt Service are shown below in Attachment 8.

Attachment 8: https://cbwm.syncedtool.com/shares/file/zLLcdkSakf3/

The Recharge Basin O&M expenses are shared costs between IEUA and Watermaster and are based upon the Agreement for Operations and Maintenance of Facilities to Implement the Chino Basin Recharge Master Plan. The pro-rata cost-sharing methodology is based on the relative proportion of recycled water to the total water recharged in the basins.

The total FY 2024/25 budget for the Watermaster's portion of the shared costs for Recharge Basin O&M expenses is \$1,587,607. The 2023/24 budget for this category was \$1,194,756.

The detailed worksheets provided by IEUA for the FY 2024/25 budget are shown below in Attachment 9.

Attachment 9: https://cbwm.syncedtool.com/shares/file/LLP18wKKZnz/

7200 Program Elemer	nt 2: Comprehensive Recharge Program	(\$174,759)	
7202.2	PE2: Comprehensive Recharge Program	(\$26,418)	The scope of work in FY 2024/25 is less than in FY 2023/24 and includes tasks recommended in the 2023 RMPU.
7208	SB88 Specification to Ensure Compliance with Regulations - GRCC/IEUA Cost Share	(\$54,013)	This task has been deferred indefinitely.
7210	2023 Recharge Master Plan Update	(\$94,328)	The 2023 RMPU was completed in September 2023.
	nts 3 & 5: Water Supply Plan - Desalter	\$548	
	PE3-5: Engineering Support for Desalters t 4: Mgmt Zone Strategies	\$548 (\$293,117)	
7402	PE4/MZ-1: Data Analyses, Reports, Meetings, and Administration	(\$38,070)	The scope of work in FY 2024/25 is similar to FY 2023/24. The 2023/24 cost estimate included carryover from the prior year that accounts for
7402.1	PE4: Subsidence Management Plan for Northwest MZ-1	(\$255,047)	the variance. The scope of work in FY 2024/25 is less than in FY 2023/24.
7500 Program Elemer 7502	nts 6 & 7: Coop Efforts/Salt Mgmt PE6-7: As-needed consulting for Plumes and Maximum Benefit	(\$105,792) (\$9,670)	
7302	Annual Reporting	(77,070)	
7510	Update IEUA's Recycled Water Permits/Maximum Benefit Salinity Management Plan for the Chino Basin - IEUA Cost Share	(\$24,101)	This is a multi-year project and the level of effort in FY 2024/25 is less than prior years.

Table 3: Variance Explanations for Engineering Costs FY 2024/25 versus FY 2023/24

FY 2024/25 Account No(s).	Task	Change from FY 23/24	Variance Explanation
7511	As Requested Services to Review of Work Performed by Santa Ana Watershed BMPTF	\$2,458	
7512	Follow-on work for the mitigation plan for the temporary loss of Hydraulic Control - IEUA Cost Share	(\$10,703)	
7517	Implementation of Chino Creek Monitoring Program - IEUA Cost Share	(\$36,247)	The scope for FY 2024/25 is less than the prior year. The FY 2023/24 scope included the development of the monitoring program, including Work Plan and QAPP preparation. The scope of work for FY 2024/25 includes the implementation of the monitoring Work Plan.
7520	Water Quality Management Program	(\$27,528)	The scope in FY 2024/25 is less than the prior year because the concept of a water quality management plan was re-envisioned into a simpler, more adaptable WQMP led by the WQC, feedback received through the WQC, and cost have been reduced.
7600 Program Elemei	nts 8 & 9: Storage Mgmt/Conj Use	\$84,996	
7610	Develop Storage and Recovery Master Plan	(\$11,722)	
7614	Support Implementation of the Safe Yield Court Order	\$105,216	This is a multi-year project. The scope in FY 2024/25 is greater than the prior year to include work to complete the 2025 Safe Yield Reevaluation, including modeling and reporting.
7620	Evaluation of Extreme Future Planning Scenarios	(\$51,130)	This is a multi-year task that has been deferred until the completion of the 2025 Safe Yield Reevaluation.
7615	Develop 2025 Storage Management Plan	\$42,632	This is a new task in FY 2024/25.

EXECUTIVE SUMMARY

This document summarizes West Yost's proposed scope-of-work and cost estimate for Watermaster Engineering Services in fiscal year (FY) 2024/25. For each engineering task in this summary, the following information is provided:

Cost Estimate. This is the estimated cost to complete the task in FY 2024/25, which includes all costs for Watermaster Engineer labor, equipment rentals, laboratory analyses, travel, other subcontractors, etc. Subcontractor costs are passed through with no additional "markup." The cost estimates include costs that will be covered by cost sharing partners (e.g., IEUA) and/or carryover budget from the prior FY. Hence, the cost to the Watermaster Parties in 2024/25 will be less than the costs stated herein for those tasks with cost share and/or carryover funding.

Rationale. This is a description of why the task is being proposed for FY 2024/25, including references to associated regulatory requirements, Court Orders, CEQA requirements, or agreements.

Scope. This is a summary description of the scope of work required to complete the task.

Deliverables. This is a summary of the task deliverables.

There are two new tasks that are proposed to start in FY 2024/25 that have not been performed in past years. The new tasks are:

- Prepare Updated Groundwater and Surface Water Monitoring Work Plan
- Develop 2025 Storage Management Plan

This summary is accompanied by four tables that describe the cost estimates in more detail and compare the cost estimates to the prior year Watermaster budget:

- Table 1. This is a detailed line-item cost estimate for each proposed task. It includes totals for the following:
 - Total Engineering Cost Estimate. The total cost to complete the task in 2024/25, including Watermaster Engineer labor, equipment rentals, laboratory analyses, travel, other subcontractors, etc.
 - IEUA Cost Share. The amount of Total Engineering Cost Estimate covered by IEUA under cost sharing agreements.
 - Watermaster Engineering Cost Estimate. The Total Engineering Cost Estimate minus the IEUA Cost Share.
 - **Expected Carryover**. The estimated amount of unspent approved budget for work planned for FY 2023/24 that is now expected to be performed in FY 2024/25.
 - Proposed Watermaster Budget for Engineering Services 2024/25. The Watermaster Engineering Cost Estimate minus the Expected Carryover. This is the estimated costs that would be assessed to the Watermaster parties for 2024/25.

- **Table 2**. This table compares the Watermaster Engineering Cost Estimates for FY 2024/25 versus 2023/24.
- **Table 3**. This table explains the variances between the Watermaster Engineering Cost Estimates for FY 2024/25 versus 2023/24 for the tasks with variances greater than \$15,000.
- **Table 4**. This table breaks down the Total Engineering Cost Estimate into the various expense categories of labor and other direct costs.

The total proposed cost estimate for engineering services in FY 2024/25 is about \$3,493,119. Cost sharing contributions by IEUA (~\$123,909) reduces the estimated costs for Watermaster engineering services to about \$3,369,209, which is about \$385,972 less than the Watermaster engineering costs for FY 2023/24. Currently, it is estimated that about \$135,530 of the Watermaster engineering costs will be funded via carryover funds from the FY 2023/24 budget.

8306, 8506, 8406, 6206, 6306 – OBMP/JUDGMENT ADMIN GENERAL ENGINEERING Pool, Advisory, Watermaster Meetings

Total	\$117,551
Other Direct Costs	\$2,447
Consultant Labor	\$115,104
	Cost Estimate

Rationale

The Watermaster General Manager and/or the Watermaster Board may direct West Yost to prepare for and attend the following meetings:

- Watermaster Pool meetings (Appropriative, Agricultural, and Overlying Non-Agricultural)
- Watermaster Advisory Committee meetings
- Watermaster Board meetings

Watermaster meetings are assumed to occur in all months except December.

Scope of Work

For each meeting, West Yost will prepare engineering updates with supporting maps, charts, tables, handouts, and PowerPoint presentations, as appropriate. West Yost shall also participate in conference calls with Watermaster's General Manager and staff to prepare for the meetings and may be asked by Watermaster staff to help prepare staff reports for business items.

Deliverables

West Yost will deliver the following to Watermaster:

- Maps, charts, tables, handouts, and PowerPoint presentations prepared by West Yost for the meetings.
- Other as-requested deliverables.

6901.8, 5901.8 - OBMP/JUDGMENT ADMIN GENERAL ENGINEERING

Other General Meetings as Requested

Total	\$74,132
Other Direct Costs	\$1,780
Consultant Labor	\$72,352
	Cost Estimate

Rationale

The Watermaster General Manager and/or the Watermaster Board may direct West Yost to prepare for and attend the following meetings:

- Other general meetings as requested by Watermaster's General Manager or Board.
- Coordination conference calls with Watermaster's General Manager and staff.

Work on this task will be performed only upon request by Watermaster's General Manager or the Board.

Scope of Work

For each meeting, West Yost will prepare supporting maps, charts, tables, handouts, and PowerPoint presentations, as appropriate, and may participate in conference calls to coordinate with Watermaster staff prior to or following the meetings.

Deliverables

West Yost will deliver the following to Watermaster:

- Maps, charts, tables, handouts, and PowerPoint presentations prepared by West Yost for the meetings.
- Other as-requested deliverables.

5935 - OBMP/JUDGMENT ADMIN GENERAL ENGINEERING

Material Physical Injury Requests, Others

Total	\$39.452
Other Direct Costs	\$0
Consultant Labor	\$39,452
	Cost Estimate

Rationale

At the direction of the Watermaster General Manager, West Yost will conduct a material physical injury analysis for each transfer application, storage application, and recharge application, or as otherwise directed by Watermaster and pursuant to the Peace Agreement and the Rules and Regulations. Specifically, Article 10 of the Watermaster Rules and Regulations (paragraph 10.10) requires that:

"[...] Watermaster prepare a written summary and analysis (which will include an analysis of the potential for material physical injury) of the Application and provide the Parties with a copy of the written summary and advanced notice of the date of Watermaster's scheduled consideration and possible action on any pending Applications."

Per the Peace Agreement (page 8), material physical injury is defined as:

"[...] material injury that is attributable to Recharge, Transfer, storage and recovery, management, movement or Production of water or implementation of the OBMP, including, but not limited to, degradation of water quality, liquefaction, land subsidence, increases in pump lift and adverse impacts associated with rising groundwater."

Scope of Work

This task provides engineering services to assist Watermaster staff in the evaluation of transfer, storage, and recharge applications. Occasionally, Watermaster staff requires engineering services in the evaluation of such transfers. Material physical injury analyses anticipated for FY 2024/25 will cover water transfers among the parties, recharge applications, and storage application, as directed by Watermaster.

Deliverables

The deliverables for this work will be defined by specific Watermaster direction for projects requiring MPI analyses.

5906.71 – OBMP/JUDGMENT ADMIN GENERAL ENGINEERING

Miscellaneous General Manager and Data Requests – from Watermaster Staff

Total	\$101,048
Other Direct Costs	\$300
Consultant Labor	\$100,748
	Cost Estimate

Rationale

The Watermaster General Manager and/or Watermaster staff may direct West Yost to perform specific technical analyses and/or respond to miscellaneous data requests related to Chino Basin optimum management. The recommended budget estimate is based on prior years' experience.

Scope of Work

West Yost shall perform the following tasks:

- Perform ad hoc analyses and review of documents requested by the Watermaster General Manager and/or Watermaster staff.
- Fulfill requests from the Watermaster General Manager and/or Watermaster staff, including the preparation of PowerPoint presentations, maps, charts, and technical reports.
- Fulfill requests for hydrologic data, model files, PowerPoint presentations, maps, charts, technical reports, etc., as requested by Watermaster staff.

Deliverables

West Yost shall deliver to Watermaster data-request deliverables as well as PowerPoint presentations, maps, charts, and technical reports, as requested.

5906.72 - OBMP/JUDGMENT ADMIN GENERAL ENGINEERING

Miscellaneous Data Requests – from Non-Watermaster Staff, Watermaster Parties, and Non-Watermaster Entities

Total	\$37,008
Other Direct Costs	\$0
Consultant Labor	\$37,008
	Cost Estimate

Rationale

The Watermaster General Manager and/or Watermaster staff may direct West Yost to perform specific technical analyses and/or respond to miscellaneous data requests from Watermaster parties, non-Watermaster staff, and non-Watermaster entities. The recommended budget estimate is based on prior years' experience.

Scope of Work

West Yost shall perform the following tasks:

- Perform ad hoc analyses requested by Watermaster parties, non-Watermaster staff, and non-Watermaster entities, as directed by the Watermaster General Manager and/or Watermaster staff.
- Fulfill requests for hydrologic data, model files, PowerPoint presentations, maps, charts, technical reports, etc. requested by Watermaster parties, non-Watermaster staff, or non-Watermaster entities, as directed by Watermaster staff.

Deliverables

West Yost shall deliver to Watermaster the data-request deliverables as well as PowerPoint presentations, maps, charts, and technical reports, as requested by the Watermaster General Manager and/or Watermaster staff.

6901.95 - OBMP/JUDGMENT ADMIN GENERAL ENGINEERING

Annual Streamflow Monitoring Report for Water Rights Permit 21225

Total	\$22,416
Other Direct Costs	\$0
Consultant Labor	\$22,416
	Cost Estimate

Rationale

This work is required in Watermaster's permit issued by the State Water Resources Control Board (Permit No. 21225).

Scope of Work

This task includes engineering services to prepare a specialized hydrologic assessment of the relative impacts of the diversions of storm water for recharge by Watermaster pursuant to Watermaster's Permit 21225 issued by the State Water Resources Control Board. A report summarizing the analysis is due each year by October 1st. This work involves estimating the discharge to the Santa Ana River from its tributaries that flow across the Chino Basin and where storm water is diverted for recharge. The discharge from these tributaries to the Santa Ana River is estimated with and without the Watermaster diversions for recharge, and the relative changes in discharge are computed. The latest version of the Chino Basin surface water model that was developed for the 2020 Safe Yield Recalculation will be used for this effort.

Deliverables

West Yost shall deliver the following to Watermaster:

- A letter report entitled, Annual Streamflow Monitoring Report for Water Rights Permit 21225, Fiscal 2023/24, which Watermaster and its attorney will review and forward to the State Water Resources Control Board by October 1, 2023.
- The draft report will be delivered to Watermaster and its Attorney for review and comment by September 15, 2023.
- The final report will be delivered to Watermaster and its Attorney by September 27, 2023.

6901.95 – OBMP/JUDGMENT ADMIN GENERAL ENGINEERING

SGMA Reporting Requirement for April 1, 2025 WC Section 10720.8 (f).

Total	\$21,926
Other Direct Costs	\$0
Consultant Labor	\$21,926
	Cost Estimate

Rationale

The Sustainable Groundwater Management Act (SGMA) has a requirement that the Watermaster or a local agency of an adjudicated basin identified in WC Section 10720.8(a) submit specific data, information, and reports for the previous water year annually to the California Department of Water Resources (DWR) by April 1 of each year. Pursuant to SGMA WC Section 10720.8(f), Watermaster is required to submit:

- (A) Groundwater elevation data unless otherwise submitted pursuant to WC Section 10932
- (B) Annual aggregated data identifying groundwater extraction
- (C) Surface water supply used for or available for use for groundwater recharge or in-lieu use
- (D) Total water use
- (E) Change in groundwater storage
- (F) The annual report submitted to the court

Scope of Work

The reporting period is water year 2023/24. Item (A) has already been submitted for the California Statewide Groundwater Elevation Monitoring (CASGEM) Program, so no further data will be reported pursuant to the SGMA. Items (B) through (D) and (F) will be compiled from the appropriators, the IEUA, and Watermaster. Item (E) is a result from the Chino Basin groundwater model that will be updated with data through September 30, 2024. The change in storage will be estimated from the resulting water budget table for water year 2023/24.

The DWR has implemented an Adjudicated Basin Annual Reporting System, which is an on-line submission system that consists of specialized reporting templates for entering all the required information and provides the capability to upload supporting documents and reports. A Technical Memorandum will be prepared for Watermaster, explicitly documenting the information for Items (A) through (F) that will be populated into the reporting templates for the April 1 submittal.

Deliverables

West Yost shall deliver the following to Watermaster:

A draft memorandum that documents the information submitted to the DWR Adjudicated Basin Annual Reporting System.

- The draft Memorandum will be submitted to Watermaster in February 2025 for Watermaster review and comment.
- The final Memorandum will be submitted to Watermaster by March 6, 2025 for review and approval by the Watermaster Pools, Advisory Committee, and Board.
- The required information and documents will be submitted to the DWR using the Adjudicated Basin Annual Reporting System by April 1, 2025.

6906 – OBMP/JUDGMENT ADMIN GENERAL ENGINEERING

Project Management

Total	\$51,440
Other Direct Costs	\$0
Consultant Labor	\$51,440
	Cost Estimate

Rationale

This task is for routine project management and the preparation of quarterly estimated-costat- completion reports.

Scope of Work

West Yost shall perform routine project management services, including:

- Update the Integrated Schedule Budget Management (ISBM) system.
- Analyze staffing requirements and make assignments for various tasks.
- Review the schedules of deliverables.
- Prepare monthly budget summary tables.
- Prepare the Estimated Cost at Completion (ECAC) and Earned Value (EV) estimates.
- Attend joint Watermaster/West Yost senior staff meetings.
- Attend Watermaster budget workshops.

Deliverables

West Yost shall deliver the following to Watermaster:

- Quarterly summary of costs to date, ECACs, and estimates of progress on a task-by-task basis.
- Monthly budget summary tables.

6906.1 – OBMP/JUDGMENT ADMIN GENERAL ENGINEERING

Watermaster Model Update and Required Demonstrations

Total	\$59,864	\$7,732	\$67,596
Other Direct Costs	<u></u> \$0	\$0	\$0
Consultant Labor	\$59,864	\$7,732	\$67,596
	Task 1	Task 2	Total

Rationale

Watermaster updated its groundwater models in 2007, 2013, 2020, and 2024. Watermaster applies its groundwater model to estimate net recharge and Safe Yield, to assess the state of hydraulic control, to assist with SGMA compliance, to conduct material physical injury assessments, to assist in the development of a storage framework and Storage Management Plan, and to support the development of TDS and nitrate concentration changes in the basin.

Activities historically performed in this task have included: the assessment of the adequacy of supplemental water recharge capacity pursuant to Section 7.3 of the Peace II Agreement; the evaluation of the balance of recharge and discharge; and the evaluation of the cumulative effects of transfers. Each year since 2012, a technical assessment of the adequacy of supplemental water recharge capacity was completed and reported to the Watermaster pursuant to Section 7.3 of the Peace II Agreement. The evaluation of the balance of recharge and discharge and the cumulative effects of transfers will be required in FY 2024/25.

The work anticipated for this line item in FY 2024/25 includes the evaluation of the balance of recharge and discharge and the cumulative effect of transfers and the preparation of annual finding of compliance with Section 7.3 of the Peace II Agreement.

Scope of Work

The consultant shall perform the following tasks:

- Task 1 Evaluate the Balance of Recharge and Discharge and the Cumulative Effects of **Transfers**
 - Task 1.1—Collect, Compile, and Review Data to Update Historical Hydrology and Prepare Annual Estimate of Balance of Recharge and Discharge. The evaluation of the balance of recharge and discharge is a retrospective analysis of the water budgets in each of the five OBMP management zones (MZs) from the period of July 1, 2020 through June 30, 2024. The consultant will collect and/or compile the necessary data to replace the projection data in the 2025 Chino Valley Model (CVM) for this period, including hydrologic data, pumping data, and recharge data.

¹ The 2025 CVM includes multiple calibrated realizations that represent plausible sets of parameters that characterize the Basin. Only one calibrated realization will be chosen to use for this study. The 2025 CVM is expected to contain historical hydrologic data through Water Year 2023.

- Task 1.2—Compile the Historical Transfers in the Chino Basin and Determine the Annual Avoided Wet-Water Replenishment. The consultant will use the Watermaster Assessment Packages to calculate the avoided wet-water replenishment by Party by year.
- Task 1.3—Evaluate Basin Response to the Water Replenishment That Would Have Occurred in the Absence of Transfers. In this task, the consultant will create a new scenario that will be identical to the calibration run of the 2025 CVM, with imported water recharge increased to the volume that would have occurred in the absence of transfers for the period of July 1, 2000 through June 30, 2024. This scenario will be simulated and compared to the 2025 CVM calibration run (extended through June 30, 2024 in Task 1.1) and to determine the cumulative effect of transfers on the basin.
- Task 1.4—Prepare Report. In this task, the consultant will document the work in Tasks 1.1 through 1.3.
- Task 2 Prepare Finding of Substantial Compliance. The work required for this task includes review and update of planning information, testing the adequacy of existing wet-water recharge capacity to meet future wet-water replenishment obligations, and preparation of a technical memorandum to document substantial compliance as required by Section 7.3 of the Peace II Agreement.

Deliverables

For Task 1, West Yost will prepare a report for Watermaster documenting the evaluation of the balance of recharge and discharge and the cumulative effects of transfers.

For Task 2, West Yost will deliver a technical memorandum to Watermaster documenting the annual finding of substantial compliance.

6901.95 – OBMP/JUDGMENT ADMIN GENERAL ENGINEERING

Compliance with SWRCB Regulations Regarding Measurement and Reporting Diversion of Surface Water (Title 23 Chapters 2.7 and 2.8)

Total	\$18,264
Other Direct Costs	\$0
Consultant Labor	\$18,264
	Cost Estimate

Rationale

Watermaster holds three diversion permits, issued by the SWRCB, that provide authorization to Watermaster to divert and recharge storm and dry-weather discharge. Presently, the amount of water diverted is estimated by the IEUA and reported to the Watermaster. Watermaster subsequently reports the amount of water recharged to the SWRCB pursuant to its permits and SWRCB regulations in Title 23, Chapter 2.7.

SB88 was signed into law by Governor Brown on June 24, 2015. Sections 15 through 18 of that law add new measurement and reporting requirements for a substantial number of diverters, including the Chino Basin Watermaster. Pursuant to the regulations, Watermaster must annually report the following in addition to prior reporting requirements:

- Information on the device or method used to calculate the amount of water diverted.
- Water diversion measurement, either direct diversion or diversion to storage, including the type of device(s) used, additional technology used, who installed the device(s), and any alternative method(s) used in measuring water diversion.

Pursuant to the regulations, Watermaster is required to provide a description of its measuring scheme, determine if it meets the specific accuracy requirements provided for in the regulations, and if it can't meet the accuracy requirements, to implement an improved diversion measuring scheme.

Scope of Work

West Yost shall perform the following tasks:

- Task 1.1 Collect WY 2023 stormwater data from IEUA, including transducer information and stage measurements.
- Task 1.2 Provide as-needed assistance to Watermaster staff to update the "Water Diversion Measurement" section of progress reports for Watermaster's water rights permits. For one of the permitted points of diversion, modeling is needed to estimate diversions. The latest version of the Chino Basin surface water model that was developed for the 2020 Safe Yield Recalculation will be used for this effort.

Deliverables

West Yost shall deliver the following to Watermaster:

Estimates of stormwater recharge, including maximum daily diversions by month by permit.

- The "Water Diversion Measurement" section of Watermaster's annual progress reports to the SWRCB.
- Electronic data files required by SWRCB at time of filing.

5945 - OBMP/JUDGMENT ADMIN GENERAL ENGINEERING

Assist Watermaster in Preparing the 47th Annual Report

Total	\$16,924
Other Direct Costs	\$0
Consultant Labor	\$16,924
	Cost Estimate

Rationale

This work is required by the Chino Basin Judgment and the Sustainable Groundwater Management Act.

Scope of Work

This task includes support services to assist Watermaster staff in the preparation of the Watermaster's 47th Annual Report documenting Watermaster's activities and water accounting for FY 2023/24. West Yost will work closely with Watermaster staff and their contractor Martin Rauch to provide as-requested support to collect data and prepare content for the Annual Report.

Deliverables

West Yost's deliverables and associated schedule will be defined by Watermaster upon project kick-off in July 2024.

6906.21 – OBMP/JUDGMENT ADMIN GENERAL ENGINEERING

2024 State of the Basin Report

Total	\$195,188
Other Direct Costs	\$2,200
Consultant Labor	\$192,988
	Cost Estimate

Rationale

Pursuant to the November 15, 2001 Court Order, Watermaster prepares a State of the Basin report every two years. The State of the Basin reports are used to document how the state of the basin has changed since the implementation of the Peace Agreement in September 2000. The scope of the report includes a characterization of the time histories of groundwater levels and quality, storage, production, recharge (replenishment and other recharge), ground level, state of hydraulic control, desalter planning and engineering, and production meter installation.

Scope of Work

The consultant shall perform the following tasks:

- Compile and analyze production data for FY 2022/23 and FY 2023/24 and prepare exhibits showing production activities by pool and historical trends in production.
- Compile and analyze recharge and recycled water reuse data for FY 2022/23 and FY 2023/24 and prepare exhibits showing groundwater recharge trends.
- Compile and analyze surface water, climate, and land use data and prepare exhibits that show general hydraulic conditions in the Basin.
- Analyze basin-wide water quality and prepare maps that show five-year maximum concentrations for constituents of concern, and historical trends in TDS and nitrate by management zone.
- Prepare rasters depicting the current extent of the VOC plumes and prepare a series of associated exhibits with maps and text.
- Analyze basin-wide groundwater levels and prepare exhibits that show historical trends in groundwater levels by management zone.
- Analyze water-level data and create groundwater elevation contours for spring 2024 for the entire basin and the HCMP area and prepare a series of associated maps.
- Perform raster calculations and comparisons of groundwater-elevation changes that occurred between spring 2000 and spring 2024 and spring 2022 and spring 2024 and prepare maps showing these changes.
- Compile and analyze ground-level monitoring data for 2021 through 2022 and prepare
 exhibits showing trends in vertical ground motion in MZ1 and MZ2, and time histories of
 groundwater pumping, aquifer recharge, groundwater levels, and ground motion in
 these areas.

Deliverables

The West Yost will deliver a draft report in digital format for Watermaster's review by June 5, 2025 and a final report in digital format by June 30, 2025 for Watermaster's general use, filing for the court, and for posting on Watermaster's website. In addition, up to 20 hard copies of the final State of the Basin Report will be prepared and provided to Watermaster.

Watermaster is considering changing the format of the State of the Basin Report to a more modern format that is online and interactive. Prior to kick-off of the preparation of the report, West Yost will meet with Watermaster staff to consider and potentially develop a revised format. Depending on the new format and scope to develop the report there could be cost savings from the cost estimate scoped to develop the report for FY 2024/25.

7502, 7505 – PE1: COMPREHENSIVE MONITORING PROGRAM

Groundwater and Surface Water Quality Monitoring Program

Total	\$310,968
Other Direct Costs	\$79,403
Consultant Labor	\$231,565
	Cost Estimate

Rationale

The OBMP, Peace Agreements, and Implementation Plan all call for a key-well monitoring program for groundwater quality as part of Program Element 1.² The data generated in Program Element 1 are used for the Biennial State of the Basin Report, the Groundwater Model update and calibration, material physical injury assessments, the evaluation of non-point source groundwater contamination and plumes associated with point-source discharge, the evaluation of emerging contaminants in groundwater³, Hydraulic Control demonstrations, the Triennial Ambient Water Quality Recomputation⁴, and evaluation of groundwater/surface water interaction near riparian habitat in the Prado Basin. The groundwater-quality and surface water monitoring programs, as currently implemented, meets the minimum requirements for all the above uses.

² OBMP Program Element 1—Develop and Implement Comprehensive Monitoring Program.

³ The Water Quality Management Program (WQMP) that is part of Program Element 6 conducted through the Water Quality Committee (WQC) includes the development and implementation of an Emerging Contaminants Monitoring Plan (EMCP) to collect data to characterize contaminant occurrence in the Chino Basin where data is not available and inform implications of potential water quality regulations on Chino Basin groundwater operations and management. The draft ECMP was developed in February 2024. For efficiency the Watermaster portion of the ECMP sampling will be done during the routine Watermaster monitoring for FY 2024/25 at various monitoring wells and private wells.

⁴ The Hydraulic Control demonstrations and the Triennial Ambient Water Quality Recomputation are salt-management requirements of the Basin Plan: http://www.swrcb.ca.gov/santaana/water issues/programs/basin_plan/docs/chapter5.pdf

The Hydraulic Control Monitoring Program (HCMP)⁵ and the Prado Basin Habitat Sustainability Program (PBHSP)⁶ are regulatory monitoring programs with groundwater and surface water monitoring components. Data collected for the HCMP and PBHSP are also used for all other basin-wide uses.⁷

Scope of Work

West Yost shall perform the following tasks:

- Assist Watermaster staff in conducting annual sampling at approximately 30 private wells and 11 monitoring wells between July and October 2023. Samples are sent to Clinical Laboratories for analysis. Sub-tasks include:
 - Annual re-evaluation of wells to sample for the key-well monitoring program.
 - Perform field work to sample a portion of the wells on an as-needed basis.⁸
 - Process, perform quality assurance/quality control (QA/QC), review all field and laboratory data, and upload to HydroDaVE.
- Obtain groundwater-quality and surface water-quality data routinely for about 1,100 wells and 50 surface water sites and from all appropriators and cooperators in and immediately adjacent to the Chino Basin. This includes collecting data from about 35 open investigation clean-up sites in the Chino Basin with data available on the GeoTracker⁹ and EnviroStor¹⁰ websites and checking for any new sites on GeoTracker and EnviroStor with confirmed or

_

⁵ The HCMP surface water and groundwater monitoring programs are maximum-benefit requirements are salt-management requirements of the Basin Plan: http://www.swrcb.ca.gov/santaana/water_issues/programs/basin_plan/docs/chapter5.pdf and are more specifically described in 2014 HCMP Work Plan.

⁶ Pursuant to Mitigation Measure 4.4-3 in the Peace II CEQA SEIR, the PBHSP adaptive monitoring program includes groundwater and surface water monitoring components to ensure that Peace II Agreement activities to not adversely impact Prado Basin riparian habitat. The PBHSP is an adaptive monitoring program that is implemented under the guidance of the Prado Basin Habitat Sustainability Committee (PBHSC) with an annual process of evaluating results and interpretations of the monitoring data and adjusting the monitoring as needed. In FY 2024/25 the proposed PBHSP groundwater and surface water monitoring includes utilization of 15-minute temperature and specific conductance (EC) data measured in the transducers at the PBHSP monitoring wells, and the collection of field water quality parameters quarterly at four surface water sites along Mill and Chino Creeks. For efficiency, the work to download, process, and upload the 15-minute temperature and EC data at the wells is included with the PBHSP transducers in the Groundwater Level Monitoring Program 7104.3.

⁷ Watermaster's groundwater quality monitoring program includes annual sampling at the 21 HCMP monitoring wells and triennial monitoring at the 17 PBHSP wells as part of the basin-wide monitoring program to be used for Watermaster's various purposes and characterization of water quality.

⁸ An as-needed field budget is provided in the event that Watermaster staff needs assistance in completing the water quality sampling program during the target monitoring period of July 2024 through October 2024. The field work will be performed on an as-needed basis, as directed by Watermaster staff.

⁹ http://geotracker.waterboards.ca.gov/

⁹ http://www.envirostor.dtsc.ca.gov/public/

potential impacts to groundwater quality. All data collected are checked for reasonableness and compiled into HydroDaVE's centralized database. Subtasks include:

- Place phone calls, send emails, and attend meetings with the water quality staff of appropriators and other cooperating parties.
- Collect, process, review, and upload hardcopy, spreadsheet, database, and laboratory electronic data deliverables to HydroDaVE.
- Obtain groundwater and surface water quality data for the HCMP. West Yost shall perform the following tasks:
 - Collect and analyze annual groundwater-quality samples from the 21 HCMP monitoring wells, and quarterly groundwater-quality samples from the two USGS National Water-Quality Assessment Program (NAWQA), and two Santa Ana River Water Company (SARWC) wells. Samples are sent to Babcock Laboratories for analysis. Subtasks include:
 - Schedule field work and coordinate with analytical laboratory.
 - Perform field work. Field work follows the SOPs defined in the 2014 HCMP Work Plan.
 - Process, QA/QC, and upload field and laboratory data to HydroDaVE.
- Obtain groundwater-quality samples for the emerging contaminants in the February 2024 ECMP at about 26 monitoring wells. West Yost shall perform the following tasks¹¹:
 - Schedule field work and coordinate with analytical laboratory.
 - Process, QA/QC, and upload field and laboratory data to HydroDaVE.
- Collect and analyze quarterly surface-water quality grab samples at two specified surface-water stations on the Santa Ana River. Samples are sent to Eurofins Eaton Analytical Laboratories for analysis. Subtasks include:
 - Schedule field work and coordinate with analytical laboratory.
 - Perform field work, Field work follows the SOPs defined in the 2014 HCMP Work Plan.
 - Process, QA/QC, and upload field and laboratory data to HydroDaVE.
- Collect, compile, review, and upload the following surface water data to HydroDaVE twice per year:
 - Daily discharge and water quality data from POTW discharge locations upstream of Prado Dam.
 - Surface water discharge at six USGS gaging stations along the Santa Ana River and tributaries upstream of Prado Dam.

Chino Basin Watermaster **WEST YOST** April 2024 N-C-941-CM-ADM-B-2024-25 BUDGET

 $^{^{11}}$ Given that the private wells and monitoring wells will already be sampled as part of the routine monitoring efforts, the additional labor cost for the ECMP sampling and data management is nominal. The primary costs for the ECMP in task 7502 is for the laboratory analysis of the samples.

- Perform quarterly downloads of data logger at one site in Chino Creek of 15-minute measurements of level and temperature.
- As-needed support subtasks to characterize water quality, which may include:
 - Create time-history charts of water-quality constituents (e.g., total dissolved solids [TDS] and nitrate-nitrogen).
 - Create maps showing the spatial distribution of water-quality constituents from sampling or point-sources of concern.
 - Perform analysis of water-quality exceedances of Maximum Contaminate Levels (MCLs) at private wells.

Deliverables

West Yost shall deliver the following to Watermaster no later than the date or dates indicated:

- All groundwater-quality data from the key well sampling program will be uploaded to HydroDaVE by December 31, 2024.
- All available groundwater-quality data collected from Chino Basin appropriators and cooperators for the January 1, 2024 to June 30, 2024 period will be uploaded to HydroDaVE by October 31, 2024.
- All available groundwater-quality data collected from Chino Basin appropriators and cooperators for the July 1, 2024 to December 31, 2024 period will be uploaded to HydroDaVE by April 30, 2025.
- All annual groundwater-quality data collected at the 21 HCMP monitoring wells, during August 2024 will be uploaded to HydroDaVE by September 30, 2024.
- All quarterly groundwater-quality data collected at the two NAWQA and two SARWC wells during July 2024, October 2024, January 2025, and April 2025, will be uploaded to HydroDaVE by August 31, 2024, November 30, 2024, February 28, 2025, and May 31, 2025, respectively.
- All quarterly surface water-quality data collected at the two Santa Ana River sites during July 2024, October 2024, January 2025, and April 2025, will be uploaded to HydroDaVE by August 31, 2024, November 30, 2024, February 28, 2025, and May 31, 2025, respectively.
- All POTW surface water quality and discharge data for POTWs, and discharge data for the USGS gaging stations for January 2024 through September 2024 will be uploaded to HydroDaVE by November 30, 2024, and for October 2024 through December 2024 will be uploaded to HydroDaVE by February 28, 2025.

7104.3, 7104.8, 7104.9 – PE1: COMPREHENSIVE MONITORING PROGRAM

Groundwater-Level Monitoring Program

Total	\$297,801
Other Direct Costs	\$44,860
Consultant Labor	\$252,941
	Cost Estimate

Rationale

The OBMP, the Peace Agreements, and the Implementation Plan all call for a key well monitoring program for groundwater levels as part of Program Element 1. The data generated in Program Element 1 are used for the Biennial State of the Basin Report, Hydraulic Control demonstrations, land-subsidence monitoring, Groundwater Model development and recalibration, material physical injury assessments, the periodic assessment of Safe Yield, the estimation of storage change, evaluating the impacts of desalter production on nearby private wells, the California Statewide Groundwater Elevation Monitoring (CASGEM) Program, the Triennial Ambient Water Quality Recomputation, and the monitoring of water levels near riparian habitat in Prado Basin to evaluate potential impacts from Peace II Agreement activities. Hydraulic Control demonstrations and the Triennial Ambient Water Quality Recomputation are required by the Basin Plan. The groundwater-level monitoring program, as currently implemented, meets the minimum requirements for all the above uses.

Scope of Work

West Yost shall perform the following tasks:

• Collect and compile groundwater-level measurements from about 1,200 wells. Of the 1,200 wells, about 130 wells are equipped with transducers that measure water levels every 15-minutes that are visited and downloaded quarterly by West Yost and Watermaster field staff. At about 50 wells groundwater-level measurements are measured by Watermaster staff monthly. At about 1,000 wells in and immediately adjacent to the Chino Basin, groundwater-level measurements are measured by appropriators and cooperators, and the data are collected by West Yost or are provided to West Yost from the Watermaster. All data are checked for reasonableness regarding historical data at the well, converted from

¹² The California Department of Water Resources (DWR) developed the CASGEM Program in accordance with California State Senate Bill SB 6, which was passed in November 2009. CASGEM is a comprehensive groundwater-elevation monitoring program that utilizes locally implemented monitoring programs to track seasonal and long-term groundwater elevations in the state's alluvial groundwater basins and subbasins, as defined in DWR Bulletin 118. Pursuant to California Water Code Section 10927, Watermaster submitted an application to the DWR in the fall of 2010 to become the monitoring entity for the Chino and Cucamonga Groundwater Subbasins.

¹³ Pursuant to Mitigation Measure 4.4-3 in the Peace II CEQA SEIR, monitoring described in the Adaptive Management Plan for the PBHSP is implemented to ensure that Peace II Agreement activities to not adversely impact Prado Basin riparian habitat.

¹⁴ The Hydraulic Control demonstrations and the Triennial Ambient Water Quality Recomputation are salt-management requirements of the Basin Plan: http://www.swrcb.ca.gov/santaana/water issues/programs/basin_plan/docs/chapter5.pdf

depth-to-water to groundwater-level elevation, and compiled into the centralized HydroDaVE database. Sub-tasks include:

- Schedule field work for West Yost field staff.
- Perform field work to download and maintain approximately 100 transducers for various monitoring wells in Watermaster's monitoring network. (Field work follows the Standard Operating Procedures [SOPs] defined in the 2014 HCMP Work Plan.)
- Purchase and install replacement transducers and direct-read cables as needed for all wells in the transducer monitoring programs.
- Perform field work on an as-needed basis¹⁵ to download transducer data from 30 wells routinely downloaded by Watermaster staff.
- Review and upload manual groundwater-level measurements collected by Watermaster staff monthly to HydroDaVE.
- Process, review, and upload transducer data downloaded quarterly by West Yost staff into HydroDaVE.
- Process, review, and upload cooperator groundwater-level measurements collected by West Yost to HydroDaVE.
- Review and upload transducer data downloaded quarterly by Watermaster staff, and
 Appropriative pool water-level measurements collected by Watermaster staff to HydroDaVE.
- Annual re-evaluation of the key well program due to abandoned and destroyed wells.
- Submittal of groundwater-level data collected at 46 wells to the Chino and Cucamonga CASGEM program¹⁶ on a biennial basis (fall and spring).
- Help coordinate and contract as-needed well maintenance and rehabilitation services for wells in the monitoring network.

Deliverables

West Yost shall deliver the following to Watermaster no later than the date or dates indicated:

 All available groundwater-level data collected manually in the field or downloaded from transducers for the period of July 1, 2024 through September 31, 2024 will be uploaded to HydroDaVE by October 15, 2024.

N-C-941-CM-ADM-B-2024-25 BUDGET

¹⁵ An as-needed budget is provided in the event that Watermaster staff needs assistance in completing the transducer downloads during the target monitoring period for each quarterly download event. The quarterly download of all wells should be completed during the first month at the beginning of each FY quarter—July 2024; October, 2024; January 2025; and April, 2025. Field work will be performed on an as-needed basis, as directed by Watermaster staff.

¹⁶ Watermaster is the designated Monitoring Entity for the Chino and Cucamonga Basins CASGEM program. CASGEM is a mandated statewide monitoring and reporting program for the entire State of California, per the amended California State Water Code SBx7-6 in November 2009.

- All available groundwater-level data collected manually in the field or downloaded from transducers for the period of October 1, 2024 through December 31, 2024 will be uploaded to HydroDaVE by January 15, 2025.
- All available groundwater-level data collected manually in the field or downloaded from transducers for the period of January 1, 2025 through March 31, 2025 will be uploaded into HydroDaVE by April 7, 2025.
- All available groundwater-level data collected manually in the field or downloaded from transducers for the period of April 1, 2025 through June 10, 2025 will be uploaded to HydroDaVE by June 30, 2025.
- All available groundwater-level data collected from appropriators in the Chino Basin for the April 1, 2024 through June 30, 2024 period will be uploaded to HydroDaVE by September 15, 2024.
- All available groundwater-level data collected from appropriators in the Chino Basin for the July 1, 2023 through September 30, 2023 period will be uploaded to HydroDaVE by December 15, 2023.
- All available groundwater-level data collected from appropriators in the Chino Basin for the October 1, 2024 through December 31, 2024 period will be uploaded to HydroDaVE by March 15, 2025.
- All available groundwater-level data collected from appropriators in the Chino Basin for the January 1, 2025 through March 31, 2025 period will be uploaded to HydroDaVE by May 31, 2025.
- The fall 2024 CASGEM data submittals will be provided to the DWR by December 31, 2024.
 The spring 2025 CASGEM data submittals will be provided to the DWR by June 30, 2025.

7402, 7403, 7406, 7408 – PE1: COMPREHENSIVE MONITORING PROGRAM MZ-1 Ground-Level Monitoring Program

Total	\$231.971
Other Direct Costs	\$87,002
Consultant Labor	\$144,969
	Cost Estimate

Rationale

Program Element 4 of the OBMP states that land subsidence and ground fissuring in MZ-1 are not acceptable and, to the extent that the cause is pumping in MZ-1, should be managed to tolerable levels. Watermaster conducts a ground-level monitoring program to support Program Element 4 per the requirements of the Peace Agreement, the subsequently developed and Court-approved Chino Basin Subsidence Management Plan, and the monitoring and mitigation requirements of the Peace II California Environmental Quality Act (CEQA) Supplemental Environmental Impact Report (SEIR).

Scope of Work

West Yost shall perform the following tasks:

- Maintain and replace (if necessary) the existing monitoring equipment at extensometer and well facilities in the MZ-1 Managed Area and the Areas of Subsidence Concern.
- Download, check, and store monitoring data from extensometers, wells, and recharge activities in the MZ-1 Managed Area and Areas of Subsidence Concern.
- Conduct ground-level surveys across:
 - Northwest MZ-1 Area. A vertical survey is recommended in FY 2024/25 because of the ongoing subsidence that is occurring in Northwest MZ-1 and will support the development of a subsidence management plan in Northwest MZ-1.
- Conduct InSAR monitoring of ground motion across western Chino Basin from March 2024 to March 2025 using information collected by the TerraSAR-X satellite.

Deliverables

West Yost shall deliver the following to Watermaster no later than the date or dates indicated:

 All ground-level monitoring data, available as of May 1, 2025, will be uploaded into Watermaster's database by June 30, 2025.

7302, 7306 – PE1: COMPREHENSIVE MONITORING PROGRAM

Prado Basin Habitat Monitoring, Data Analysis and Reporting – 50% IEUA Cost Share

Total	\$159,610
Other Direct Costs	\$13,450
Consultant Labor	\$146,160
	Cost Estimate ¹⁷

Rationale

Mitigation Measure 4.4-3 of the Peace II CEQA SEIR (Biological Resources/Land Use & Planning) calls for the IEUA, Watermaster, and the Orange County Water District to form the Prado Basin Habitat Sustainability Committee (PBHSC). The purpose of the PBHSC is to ensure that the Peace II Agreement actions will not significantly or adversely impact the Prado Basin riparian habitat. The responsibilities of the PBHSC are to develop and implement an adaptive monitoring program for the Prado Basin Habitat Sustainability Program (PBHSP) and to prepare annual reports that include recommendations for ongoing monitoring and any adaptive management actions required to mitigate any measured or prospective loss of riparian habitat that is attributable to the Peace II Agreement.

Scope of Work

The PBHSP is implemented as described in the Adaptive Management Plan and the recommendations in the 2022 Annual Report. The PBHSP includes the implementation of a monitoring program and the preparation of an annual report. The monitoring program includes monitoring of riparian habitat and all factors that can affect the riparian habitat such as changes in groundwater levels, surface water discharge, climate, and other factors.¹⁸ This work includes the following:

- Collect, compile, and review the following riparian habitat data:
 - High-resolution air photo of the Prado Basin region in July 2024.
 - Landsat remote sensing data in the Prado Basin region over the 2024 water year.
- Collect, compile, review, and upload the 2024 climatic data to HydroDaVE.
- Analyze data and prepare a draft and final 2024 Annual Report of the PBHSC.
- Prepare a Recommended Scope and Budget of the PBHSP for FY 2025/26.
- Prepare for and participate in PBHSC meetings.

Deliverables

West Yost shall deliver the following to Watermaster no later than the date or dates indicated:

 $^{^{17}}$ IEUA cost share of \$79,805 will partially fund the completion of this task.

¹⁸ The groundwater and surface water monitoring components of the PBHSP are included with Tasks 7103.3 and 7104.3 because the data collected are also used for basin-wide monitoring efforts such as for the Biennial State of the Basin report, groundwater modeling, demonstration of Hydraulic Control, and the triennial Ambient Groundwater Quality Recomputation.

- All riparian habitat and climatic data through water year 2024 uploaded to HydroDaVE by November 30, 2024.
- A Recommended Scope and Budget memorandum for the PBHSP for FY 2025/24 by March 15, 2025
- Draft Annual Report of the PBHSC by May 10, 2025.
- Final Annual Report of the PBHSC by June 10, 2025.

7202 – PE1: COMPREHENSIVE MONITORING PROGRAM

Recharge and Well Monitoring Program: Review Documents for Chino Basin Recycled Water GW Recharge Program

Total	\$23,496
Other Direct Costs	\$0
Consultant Labor	\$23,496
	Cost Estimate

Rationale

The IEUA and Watermaster are required to submit specific reports as part of the Chino Basin Recycled Water Groundwater Recharge Program (RWGRP). The RWGRP is being implemented by the IEUA and Watermaster as co-permittees. Annual reporting is performed pursuant to the requirements of the following orders:

- California Regional Water Quality Control Board, Santa Ana Region. Order No. R8-2007-0039.
 Water Recycling Requirements for Inland Empire Utilities Agency and Chino Basin
 Watermaster. Chino Basin Recycled Water Groundwater Recharge Program: Phase I and
 Phase II Projects, San Bernardino County, June 29, 2007.
- California Regional Water Quality Control Board, Santa Ana Region. Monitoring and Reporting Program No. R8-2007-0039 for Inland Empire Utilities Agency and Chino Basin Watermaster. Chino Basin Recycled Water Groundwater Recharge Program: Phase I and Phase II Projects, San Bernardino County, June 29, 2007.
- California Regional Water Quality Control Board, Santa Ana Region. Order No. R8-2009-0057 Amending Order No. R8-2007-0039 for Inland Empire Utilities Agency and Chino Basin Watermaster. Chino Basin Recycled Water Groundwater Recharge Program: Phase I and Phase II Projects, San Bernardino County, October 23, 2009.
- California Regional Water Quality Control Board, Santa Ana Region. Revised Monitoring and Reporting Program No. R8-2007-0039 for Inland Empire Utilities Agency and Chino Basin Watermaster. Chino Basin Recycled Water.

Watermaster prepares reports pertaining to the HCMP with IEUA review. IEUA prepares reports pertaining to the RWGRP with Watermaster review.¹⁹

Scope of Work

West Yost will review quarterly and annual reports prepared by the IEUA for the RWGRP as well as other reports prepared by the IEUA pursuant to the recharge permit. West Yost will also review other reports or as needed analyses prepared by IEUA per the direction of the Regional Board and the California Department of Drinking Water (DDW), such as five-year engineering reports, and additional monitoring

WEST YOST 27 Chino Basin Watermaster
April 2024

¹⁹ This is a component of the "Bright-Line Agreement" between Watermaster and the IEUA.

orders or required analyses to demonstrate compliance. West Yost will provide comments and recommendations to the IEUA through the Watermaster as the co-permittee.

Deliverables

West Yost will provide comments on the aforementioned reports and analyses within ten days of their receipt.

5925 – PE1: COMPREHENSIVE MONITORING PROGRAM

Agricultural Production Estimation

Total	\$31.096
Other Direct Costs	\$20,000
Consultant Labor	\$11,096
	Cost Estimate

Rationale

The Court's April 28, 2017 order regarding the 2011 Safe Yield reset (Court Order) contains a requirement to "[e]nsure that, unless a Party to the Judgment is excluded from reporting, all production by all Parties to the Judgment is metered, reported, and reflected in Watermaster's approved Assessment Packages (Court Order p. 16-17).

In FY 2021/22 through FY 2022/23, West Yost worked with Watermaster staff to document Watermaster's process to comply with the Court Order. This documentation included efforts to ensure that all active wells are metered, and if wells cannot be metered, explain why, and describe the alternative methodology used to estimate pumping at these wells. This documentation includes exhibits that, for every known pumping well in the Basin, characterize its attributes (owner, location) and the pumping estimate method (metering or other methods). Annually, the document characterizes existing and new wells added during the reporting year, wells that went out of service, and a list of challenges in obtaining information on wells (access to well site for inspection and meter testing, failure by Parties to report pumping, others).²⁰

With approval from Watermaster staff, West Yost hired a subconsultant (Land IQ) in FY 2021/22 to assist with crop surveys and water use estimation for the irrigated crop areas in the Chino Basin to support the development of a water duty method. In FY 2022/23, West Yost developed and documented updated water duty methods to estimate pumping in the Agricultural Pool. Watermaster staff implemented several of West Yost's recommendations in FY 2023/24, including surveying Agricultural Pool wells for power meters as an option to estimate pumping using electricity use. Watermaster staff hired Well Tec Services in FY 2023/24 to inspect, install, and calibrate meters for Agricultural Pool wells in the Chino Basin over the next two years. Watermaster staff will continue efforts to implement West Yost's recommendations and a water duty method for FY 2024/25 to apply to non-minimal producing wells for which production is not metered and reported.

Scope of Work

In FY 2024/25, West Yost will continue to assist Watermaster staff in the development of new information and collection of data from Watermaster parties, Land IQ, and other sources required to estimate Agricultural Pool parties' pumping to implement the water duty method documented in FY 2022/23. This will involve meetings, as-needed consulting, and coordination with Land IQ to implement the water duty estimating procedure, and review of Watermaster staff pumping estimates. West Yost will

²⁰ This documentation can be found in the annual Data Collection and Evaluation Reports.

also provide as-requested support to Watermaster staff to facilitate the installation and calibration of meters. The scope of this task does not include the data collection review meetings that will be conducted as part of Watermaster's work to implement the April 28, 2017 Court Order.

Deliverables

West Yost will provide guidance and support to Watermaster staff on implementing the water duty computing procedure, attend meetings, reviewing Watermaster staff pumping estimates and meter calibration information as they are produced, and prepare either written or oral comments as directed by Watermaster staff. West Yost's deliverables for as-need requests will be determined with each request.

5965 – PE1: COMPREHENSIVE MONITORING PROGRAM

Support for Implementation of Improved Data Collection and Development of **Data Visualization**

Total	\$39,659
Other Direct Costs	\$0
Consultant Labor	\$39,659
	Cost Estimate

Rationale

Watermaster collects and manages multiple datasets from the Watermaster Parties (Parties) and the IEUA to support the management of the Chino Basin pursuant to the 1978 Judgement, the ongoing implementation of the OBMP, and the regulatory requirements of State and local agencies. Additionally, the IEUA requests and collects analogous datasets from some of the Parties located within IEUA's service area. As such, the Parties sometimes receive duplicate requests for data and information, and the datasets collected separately by Watermaster and the IEUA can contain discrepancies.

In FY 2019/20, Watermaster requested West Yost to develop a recommendation for an improved data collection and management process to eliminate duplicate data requests, avoid discrepancies between collected datasets, and create a centralized location for Watermaster and IEUA to access the data. The recommended process included a centralized portal and database where data are collected and managed by Watermaster monthly or annually using data templates customized for each Party. IEUA would have access to the portal and database to download and review information on its member agencies. From FY 2020/21 through 2023/24, Watermaster began development and implementation of the improved process by developing an online Data Portal for data collection and management, developing data templates for Parties to upload monthly data (production, water levels, water supply), and working with Jurupa Community Services District to beta test the Data Portal. In FY 2023/24, Watermaster and IEUA initiated collaboration with the California Data Collaborative to advance the development of the Data Portal.

For FY 2024/25, West Yost will continue to provide support to Watermaster and the California Data Collaborative in the development of the Data Portal. Additionally, West Yost will evaluate options to develop an online tool to visualize the monthly data that will be loaded into the Data Portal and/or other databases, which is also a request from Watermaster. The objective of this tool is to improve the ability of Watermaster, IEUA, and the Parties to review, verify, and analyze monitoring data.

Scope of Work

West Yost shall perform the following tasks:

Providing as-needed support to Watermaster staff for the continued development and implementation of the Data Portal and data collection process, including development and review of data-collection templates, provide solutions to potential issues, and assist in describing the new process to the Parties.

- Develop recommendations for the online data visualization tool, refine recommendations with Watermaster staff, and initiate the recommended approach in FY 2024/25. To implement the recommendation, WY will:
 - Attend one meeting with Watermaster staff to discuss the concept for the data visualization tool
 - Develop recommendation for the visualization tool based on Watermaster's inputs
 - Attend one meeting with Watermaster staff to discuss comments on the recommendation for the data visualization
 - Implement the recommended approach

Deliverables

The deliverables and associated schedule will be defined by Watermaster staff upon task kick-off.

7202.2 – PE2: COMPREHENSIVE RECHARGE PROGRAM

General Engineering Services

Total	\$175,944
Other Direct Costs	\$600
Consultant Labor	\$175,344
	Cost Estimate ²¹

Rationale

Watermaster and the IEUA began implementing the 2013 Amendment to the 2010 Recharge Master Plan (RMPU) in FY 2014/15. The services anticipated in FY 2024/25 include technical support (numerical model simulations, hydraulic calculations, project refinement, conceptual integrity review, etc.) to assist Watermaster and the IEUA in the start-up of the 2013 RMPU projects and evaluate non-2013 RMPU projects, monthly meetings with IEUA and Watermaster staff to review the progress of the RMPU projects, and supporting the implementation of the 2023 RMPU. At Watermaster's request, West Yost will attend quarterly GRCC and RIPComm meetings.

Scope of Work

- Attend GRCC, RIPComm and other meetings with Watermaster and IEUA staffs.
- Support the implementation of the 2023 RMPU, including:
 - Perform as-requested technical support for the start-up of the 2013 RMPU projects
 - Continue the implementation of the Board-requested recharge project analysis
 - Collect MS4 project implementation data from the Parties
 - Annually review the time and effort involved in the collection of information on MS4 project implementation and reassess the value this effort provides
 - Develop a plan to collaborate with MS4 permittees to ensure MS4-compliance projects prioritize recharge
 - Refine and implement of the Renewal and Replacement Plan
- Complete the analysis of the San Sevaine and Etiwanda Debris berms:
 - Documentation of the operation of the two basins and the condition of the existing conservation berm in each basin.
 - Figures illustrating the range of flows/storage/water levels at the Etiwanda and San Sevaine basins.
 - Figures showing alternative cross sections for new or improved conservation berms.
 - Evaluation of the advantages and disadvantages of the alternative berm cross sections, including a no-project alternative.

N-C-941-CM-ADM-B-2024-25 BUDGET

²¹ Carryover funds of will partially fund the completion of this task.

- Preliminary construction and life cycle costs for berm alternatives, including a no-project alternative.
- Recommendation of a preferred alternative for the conservation berms.
- Recommendation of next implementation steps.

Deliverables

Identified in rationale and scope-of-work above.

7303 - PE3/5: WATER SUPPLY PLAN - DESALTERS

Engineering Services

Total	\$16,180
Other Direct Costs	\$0
Consultant Labor	\$16,180
	Cost Estimate

Rationale

The 2004 Basin Plan Amendment approved by the Regional Board and the State Water Resources Control Board established the "maximum benefit" objectives and established certain milestones that must be achieved by Watermaster and the IEUA. To demonstrate compliance with the Regional Board order, Watermaster and the IEUA agreed to achieve Hydraulic Control. The well fields of the Chino Basin Desalter Authority (CDA) are critical to the achievement and maintenance of Hydraulic Control and the demonstration of maximum benefit. The CDA periodically requests from the Watermaster technical assistance, data, information, and attendance at meetings with regulators to support desalter expansion and operations, and the development and implementation of a monitoring and reporting plan for the CDA clean-up project funded by Prop 1 Grant Agreement No. D1712507.

Scope of Work

West Yost shall perform the following tasks at the discretion of the Watermaster General Manager:

- Review and prepare comments on CDA status reports.
- Perform ad hoc analyses requested by the Watermaster General Manager or the CDA.
- Fulfill requests for hydrologic data, model files, PowerPoint presentations, maps, charts, technical reports, etc., as requested by the CDA or its consultants.
- Attend meetings and conference calls, as requested by the CDA or its consultants.

Deliverables

West Yost shall deliver the following, at the discretion of the Watermaster General Manager:

- Written comments on the CDA status reports, as requested by the Watermaster general manager.
- PowerPoint presentations, maps, charts, model files, data, technical reports, and recommendations as requested by the CDA.
- Written summaries of meetings.

7402 – PE4: MANAGEMENT ZONE STRATEGIES

MZ-1: Data Analyses, Reports, Meetings, and Administration

Total	\$145,021
Other Direct Costs	\$10,375
Consultant Labor	\$134,646
	Cost Estimate

Rationale

Program Element 4 of the OBMP states that land subsidence and ground fissuring in MZ-1 are not acceptable and, to the extent that the cause is pumping, should be managed to tolerable levels. Watermaster conducts a ground-motion monitoring program to support this Program Element per the requirements of the Peace Agreement, the subsequently developed Court-approved MZ-1 Subsidence Management Plan (MZ-1 Plan) and its revisions (2015 Chino Basin Subsidence Management Plan), and the monitoring and mitigation requirements of the Peace II CEQA SEIR. The Subsidence Management Plan calls for the annual evaluation of data derived from the monitoring program and revisions to the Subsidence Management Plan and/or the monitoring program if necessary.

Scope of Work

West Yost shall perform the following tasks:

- Prepare the draft FY 2023/24 Annual Report for the Ground Level Monitoring Program (GLMP).
- Finalize the FY 2023/24 Annual Report for the GLMP based on comments received from the Ground Level Monitoring Committee (GLMC).
- Analyze all data collected during FY 2024/25 under the GLMP to support the preparation of the FY 2024/25 Annual Report for the GLMP. These data include groundwater levels, groundwater production, aquifer recharge, aquifer-system deformation, tectonic deformation, pumping test results, ground-level surveys, horizontal strain, and InSAR.
- Conduct meetings with the GLMC to review the data and analyses and develop a list of potential activities and cost estimates for FY 2025/26.

Deliverables

West Yost will deliver the following to Watermaster no later than the date or dates indicated:

- The FY 2023/24 Annual Report for the GLMP by November 1, 2024, featuring charts and
 maps of monitoring data, conclusions regarding the protective nature of the Subsidence
 Management Plan, the Watermaster-approved activities for the next fiscal year
 (FY 2025/26), and the revised Subsidence Management Plan, if revisions are necessary.
- Recommended scope of services and budget for the GLMP in FY 2025/26 by April 1, 2025 to support the Watermaster's budgeting process.

7402.1 – PE4: MANAGEMENT ZONE STRATEGIES

MZ-1: Develop a Subsidence Management Plan for Northwest MZ-1

Total	\$16,656
Other Direct Costs	<u>\$0</u>
Consultant Labor	\$16,656
	Cost Estimate

Rationale

The MZ-1 Subsidence Management Plan (MZ-1 Plan) states that if data from existing monitoring efforts in the Areas of Subsidence Concern indicate the potential for adverse impacts due to subsidence, Watermaster will revise the MZ-1 Plan in an attempt to avoid adverse impacts. Land subsidence in Northwest MZ-1 was first identified as a concern in the MZ-1 Summary Report (2006) and in the MZ-1 Plan (2007). Since then, Watermaster has been monitoring subsidence in this area via InSAR, leveling surveys, and groundwater-levels with pressure transducers at selected wells. Of particular concern, subsidence in Northwest MZ-1 has occurred differentially across the San Jose Fault—the same pattern of differential subsidence that occurred in the MZ1 Managed Area during the time of ground fissuring. Watermaster, consistent with input from the Ground Level Monitoring Committee (GLMC), determined that the MZ-1 Plan needs to be updated to include a *Subsidence Management Plan for Northwest MZ-1* with the long-term objective of minimizing or abating the occurrence of the differential land subsidence.

Developing a Subsidence Management Plan for Northwest MZ-1 is a multi-year effort. The GLMC oversees a work plan²² to execute this effort. The scope of work below describes the next year of the work plan.

Scope of Work

West Yost shall perform the following tasks to implement the work plan to develop a Subsidence Management Plan for Northwest MZ-1:

• Monitoring. The established monitoring program of piezometric levels and pumping at wells in Northwest MZ 1 will continue through various techniques, including: (i) SCADA based monitoring by the Monte Vista Water District; (ii) monitoring of piezometric levels via sonar; (iii) monitoring of piezometric levels via pressure transducers at City of Pomona production wells; and (iv) manual measurements of piezometric levels. These data, along with data collected from the PX, will improve the understanding of the hydrogeology in Northwest MZ 1, will be used to develop the Subsidence Management Plan for Northwest MZ 1, and in the future, will be used to adapt the Chino Basin Subsidence Management Plan, as appropriate.

²² CBWM. 2015. Workplan to Develop a Subsidence Management Plan for the Northwest MZ-1 Area.

In this subtask, all data is collected, compiled, checked, and analyzed every three months. Charts and data graphics of pumping, piezometric levels, and aquifer system deformation will be updated to support the data collection and analysis.

- Construct and Calibrate Additional 1D Models Across Western Chino Basin. The ongoing 2025 SYR involves the development of multiple projection scenarios of future hydrology, pumping, managed recharge, and use of managed storage in the Chino Basin. These projection scenarios will be simulated with an updated CVM. The CVM results will be evaluated for MPI and then used to evaluate the current Safe Yield of the Chino Basin. The evaluation of MPI associated with land subsidence will be performed using the 1D Models in Northwest MZ-1 and in other Areas of Subsidence Concern. In FY 2024/25, the GLMC can provide the Watermaster with valuable advice on the following:
 - The development of the 2025 SYR scenarios to ensure a plausible range of future conditions are simulated.
 - Interpretation of the 1D Model results re: potential subsidence-related MPI associated with the Safe Yield estimates.
 - How the model results can be used to evaluate the minimum recharge quantity of supplemental water in MZ-1 as required by the Peace II Agreement.

Providing GLMC advice will be conducted in conjunction with the 2025 SYR and can be discussed at regularly scheduled GLMC meetings at no additional cost.

Deliverables

West Yost shall deliver the following to Watermaster no later than the date or dates indicated:

 All monitoring data, available as of May 1, 2025, will be uploaded into Watermaster's database by June 30, 2025.

7502 - PE6/7: COOPERATIVE EFFORTS/SALT MANAGEMENT

As-needed consulting for water quality under PE6/7

Total	148,582
Other Direct Costs	\$3,600
Consultant Labor	\$144,982
	Cost Estimate

Rationale

In the Judgment, Watermaster is provided with discretionary powers to address water quality issues in the basin: "Watermaster, with the advice of the Advisory and Pool Committees, is granted discretionary powers in order to develop an optimum basin management program for Chino Basin, including both water quantity and quality considerations." In the Implementation Plan of the Peace Agreement, Watermaster committed to certain responsibilities under Program Elements 6 and 7.

Program Element 6 - Develop and Implement Cooperative Programs with the Regional Board and Other Agencies to Improve Basin Management. Pursuant to Program Element 6, Watermaster has committed resources to managing water quality contaminants as follows:

- Identify water-quality anomalies through monitoring and analysis.
- Assisting the Santa Ana Water Board in determining sources of the water quality anomalies.
- Establishing priorities for clean-up jointly with the Regional Board; and seeking funding from outside sources to accelerate detection and cleanup efforts.
- Identifying opportunities to remove organic contaminants through regional groundwater treatment projects in the southern half of the Basin; and collaborating with the Chino Desalter Authority to implement such solutions.
- Conducting investigations to assist the Regional Board in accomplishing mutually beneficial objectives.

Much of the work listed above was started by the Chino Basin Water Quality Committee (WQC) from 2003 through 2010. Since 2010, Watermaster has supported ongoing monitoring and analysis to ensure the efforts to manage water quality contamination under PE6 are achieving the intended outcomes and identify any outcomes that may be of concern. This primarily involves analyzing water quality data to assess the movement of identified plumes in the Basin, but also includes as-needed work to support the Regional Board or others in assessing groundwater quality conditions in and around the plumes.

Program Element 7 – Salt Management Program. Pursuant to Program Element 7, the Watermaster and IEUA implement the Chino Basin maximum-benefit salt and nutrient management plan (Maximum Benefit SNMP). Compliance with the Maximum Benefit SNMP is explicitly required by the Water Quality Control Plan for the Santa Ana River Basin²³ (Basin Plan). The Maximum Benefit SNMP was developed to enable maximum beneficial reuse of recycled water in the Chino Basin. The Basin Plan states provides

WEST YOST 39 Chino Basin Watermaster
April 2024
Page 131

²³http://www.swrcb.ca.gov/santaana/water_issues/programs/basin_plan/docs/chapter5.pdf

that if the Santa Ana Water Board determines that the maximum benefit commitments are not being implemented effectively in accordance with the schedule shown in Table 5-8a of the Basin Plan, then maximum benefit is not demonstrated, and the 'antidegradation' TDS and nitrate-nitrogen objectives for the Chino 1, 2, and 3 and Cucamonga Management Zones apply." In this situation, the Santa Ana Water Board would require mitigation for TDS and nitrate-nitrogen discharges to these management zones that took place in excess of the antidegradation limits, retroactively to January 2004. In other words, all salt loading to the Basin that has occurred to the Chino Basin from recycled water use and imported water recharge would have to be offset. The commitments include:

- 1. The implementation of a surface-water monitoring program.
- 2. The implementation of a groundwater monitoring program.
- 3. The expansion of the Chino-I Desalter to a capacity of 10 million gallons per day (mgd) and the construction of the Chino-II Desalter with a design capacity of 10 mgd.
- 4. The additional expansion of desalter capacity (to 40 mgd) pursuant to the OBMP and the Peace Agreement, the timing for which is tied to the IEUA's agency-wide effluent concentration)²⁴
- 5. The completion of the groundwater recharge facilities included in the 2001 Watermaster Recharge Master Plan.
- 6. The management of recycled water quality to ensure that the IEUA agency-wide, 12-month running average volume-weighted effluent TDS concentration does not equal or exceed 550 mgl and the TIN concentration does not equal or exceed 8 mgl.
- The management of basin-wide, volume-weighted TDS and nitrate concentrations in artificial recharge to less than or equal to the maximum-benefit objectives on a five-year volume-weighted basis.
- 8. The achievement and maintenance of the "hydraulic control" of groundwater outflow from the Chino Basin, specifically from the Chino-North GMZ, in order to protect Santa Ana River water quality and downstream beneficial uses.
- The determination of ambient TDS and nitrate concentrations of Chino and Cucamonga GMZs every three years.

The majority of the ongoing work to comply with the nine commitments is performed under other program elements, or by IEUA and the CDA.

To demonstrate compliance, Watermaster prepares the Maximum Benefit Annual Report. The report describes the status of compliance with each of the nine maximum benefit commitments defined in the Basin Plan. The annual report is due by April 15th each year.

-

²⁴ The expansion to provide an additional 20 mgd of desalter pumping capacity was initially required to occur when the 12-month running average for the IEUA agency-wide effluent TDS concentration exceeded 545 mgl for three consecutive months. The expansion has occurred even though this water quality condition has never been triggered and has instead been driven by the implementation of the Peace II Agreement and achieving hydraulic control.

This task is utilized to prepare the Maximum Benefit Annual Report and perform annual compliance demonstrations and provide other as-needed support on Maximum Benefit SNMP implementation or compliance. In FY 2024/25, the Watermaster needs to update the monitoring program work plan. The update is required by the Regional Board to address a planned amendment to the Maximum Benefit SNMP (see below description for task 7510) and to address updated requirements of the region-wide SNMP in the Basin Plan to address data gaps. The work plan update must be completed by December 2025 to meet the regulatory deadline. The goal for FY 2024/25 is to complete the draft 2025 Maximum Benefit Workplan.

Scope of Work

For FY 2024/25, West Yost shall perform the following tasks:

- Consulting for Program Element 6 to continue efforts to track identified contaminant plumes in the Chino Basin.
 - South Archibald Plume and Chino Airport Plume. Subtasks include:
 - Prepare semi-annual plume status reports for the Watermaster Pools, Advisory Committee, and Board meetings.
 - Assist Watermaster with coordination and negotiation with the plume responsible parties and Regional Board.
 - Provide technical oversight and review of plume investigation and remediation reports.
 - Prepare as-requested technical analyses, such as analyze groundwater-elevation and quality data, develop revised VOC plume maps, and/or perform groundwater model runs to demonstrate the capture of the plume by the desalter well fields.
 - Other point sources of concern. Other point sources of concern include but are not limited to, the General Electric Flatiron Facility, General Electric Test Cell Facility, Rialto-Colton perchlorate plume, the Alumax Recycling Facility, Kaiser Steel Mill, Milliken Landfill, and the Stringfellow site. Subtasks could include:
 - Provide technical oversight and review of investigations and remediation reports.
 - Prepare annual plume status report for the Watermaster Pools, Advisory Committee, and Board meetings.
 - Prepare as-requested technical analyses, such as analyze groundwater-elevation and quality data, review potential impacts to Chino Basin water quality, and/or develop revised plume delineations.
- Support for implementation of Program Element 7
 - Prepare the 2024 Maximum Benefit Annual Report. This includes:
 - Analyze and interpret the data and compare with metrics. All data required for reporting in the 2024 Maximum Benefit Annual Report shall be analyzed by West Yost and used to support the demonstration of compliance with the Maximum-Benefit commitments contained in the Basin Plan.

- Reporting. West Yost shall prepare a draft 2024 Maximum Benefit Annual Report. This report will be submitted to Watermaster and the IEUA for review. Comments will be incorporated, and West Yost shall prepare the final 2024 Maximum Benefit Annual Report for submittal to the Regional Board. West Yost will respond to comments from the Regional Board and other stakeholders, as necessary.
- Ad-hoc meetings. Prepare for and attend meetings with Watermaster staff, IEUA staff, and/or Regional Board staff, as requested, to present the draft and final 2024 Maximum Benefit Annual Reports.
- Prepare the 2025 Maximum Benefit Monitoring Program Workplan Update, which includes:
 - Review and analyze current monitoring network and data to address data gaps identified as part of 2021 Ambient Water Quality study; address data gaps identified as part of study to support the Basin Plan amendment to update the Maximum Benefit SNMP; and assess anticipated data gaps from loss of private wells in southern Chino Basin.
 - Define approaches to fill data gaps
 - Prepare recommendations, cost, schedule to fill data gaps
 - Update monitoring work plan
 - Coordinate, as needed, with the Santa Ana Water Board to ensure acceptance for the workplan.
- As-needed support for implementation of PE-6 and PE-7:
 - Prepare as-requested technical analyses
 - Prepare for and attend as-requested meetings with the Regional Board and others

Deliverables

West Yost will deliver the following to Watermaster:

- Semi-annual status reports for the Archibald and Chino Airport plumes in October 2024 and April 2025.
- Annual status reports for the remaining identified plumes in October 2024.
- Draft and final 2024 Maximum Benefit Annual Report by April 2025.
- Draft 2025 Maximum Benefit Workplan by June 2025
- Other as-needed deliverables

7510 - PE6/7: COOPERATIVE EFFORTS/SALT MANAGEMENT

Update IEUA's Recycled Water Permits/Maximum Benefit Salinity Management Plan for the Chino Basin – IEUA Cost Share

Total	\$21,060
Other Direct Costs	\$2,076
Consultant Labor	\$18,984
	Cost Estimate ²⁵

Rationale

In 2004, The Regional Board amended the Basin Plan to incorporate the maximum benefit SNMP for the Chino Basin to incorporate numerically higher, maximum-benefit-based TDS and nitrate objectives for the Chino-North groundwater management zone. The maximum benefit objectives created assimilative capacity for TDS and increased the nitrate objective to enable the cost-efficient, maximum reuse of recycled water for irrigation and recharge. The SNMP includes nine maximum benefit commitments that Watermaster and the IEUA must implement to obtain continued access to the maximum-benefit objectives. Maximum benefit commitment number 6, specifies:

"Within 60 days after the IEUA 12-month running average effluent concentration (measured as an average for all IEUA wastewater treatment facilities) for TDS exceeds 545 mg/L for 3 consecutive months, or the 12-month running average total inorganic nitrogen (TIN) concentration (measured as an average for all IEUA wastewater treatment facilities) exceeds 8 mg/L in any month, the IEUA shall submit to the Regional Board a plan and time schedule for implementation of measures to insure that the 12-month running average agency wastewater effluent quality does not exceed 550 mg/L and 8 mg/L for TDS and TIN, respectively. The Plan and schedule are to be implemented upon Regional Board approval."

In 2015, the TDS concentration in recycled water produced by the IEUA approached but did not reach the regulatory limits that would require the IEUA and Watermaster to submit a plan and schedule to manage recycled water TDS concentrations. Although the TDS concentration declined from the 2015 peak before exceeding the regulatory limit, it was an important indicator that the TDS concentration of recycled water is likely to approach or exceed the discharge limitation and trigger the planning for recycled water quality improvements during the next prolonged dry period. Given the potential cost of implementing recycled water quality improvements for what might only be short-term exceedances of the 12-month running average limitation, the IEUA and Watermaster petitioned the Regional Board to modifying the recycled water permits and the Basin Plan to allow for a longer-term averaging period for TDS concentrations.

Beginning in 2017, to obtain approval from the Santa Ana Water Board for the Basin Plan modifications, and any associated permit modifications, the IEUA and Watermaster began a detailed evaluation of the TDS and nitrate concentration impacts to Chino Basin by developing the 2020 Chino Basin Water Quality Model. The Technical work was completed in December 2021 and the results were used to develop a

WEST YOST 43 Chino Basin Watermaster
April 2024

 $^{^{25}}$ IEUA cost share of \$10,530 and Carryover funds of \$10,530 will fund the completion of this task.

proposed regulatory compliance plan. A Regulatory Compliance Proposal was completed and delivered to the Santa Ana Water Board in March 2022. The Santa Ana Water Board staff approved the Regulatory Compliance Proposal in July 2022 and requested that Watermaster and IEUA partner with the Jurupa Community Services District (JCSD) who had also completed a regulatory compliance proposal in 2022 that would also require amendments to the Chino Basin Maximum Benefit SNMP in Basin Plan. The extra costs to combine the Basin Plan efforts into one amendment are being covered directly by the JCSD.

Since the approval of the Regulatory Compliance Proposal in 2022, Watermaster and IEUA have been working with the Santa Ana Water Board staff to prepare documents to support the Basin Plan amendment. The schedule to complete the Basin Plan amendment has been delayed by availability of Santa Ana Water staff to advance and complete the work, including expanded efforts to address new stakeholder outreach regulations. Based on the latest progress, West Yost anticipates that most of the work to prepare the Basin Plan amendment documents for the Santa Ana Water Board can be completed by June 2024. However, those documents will be in draft form only and will still need to go through full review by the Santa Ana Water Board staff (including their legal counsel) and the State Water Resources Control Board (State Board) peer review process. Thus, additional work will be required in FY 2024/25 to address comments from the Santa Ana Water Board and/or State Board peer reviewers, finalize and ensure that these documents are accessible to those with disabilities including those who are visually impaired (as required by the Americans with Disabilities Act [ADA]).

It is anticipated that the Santa ana water board will adopt the Basin Plan amendment between December 2024 and March 2025. Following adoption, Santa Ana Water Board staff will also request support through completion and adoption of the Basin plan amendment by the State Board and the Office of Administrative Law (OAL). Adoption by the State Board and approval by the OAL is not likely to occur until sometime December 2025, though limited is expected in FY 25/26 to support the State Board and OAL process.

Scope of Work

West Yost shall perform the following tasks in FY 2024/25:

- Update the draft Basin Plan amendment documents (Staff Report, Substitute Environmental Document, Economic Analysis, Resolution, Resolution, Peer Review Package) based on comments received from Santa Ana Water Board staff and selected State Board scientific peer reviewers.
- Ensure that all Basin Plan amendment documents are in compliance with the ADA, including selecting and coordinating with an ADA subconsultant.
- Prepare draft PowerPoint presentation for Santa Ana Water Board staff to present the Basin Plan amendment to their Board.
- Support development of the Administrative Record.
- Regular coordination with Santa Ana Water Board staff to keep the process moving forward.
- Stakeholder outreach, as needed.
- Perform monthly project management activities, including participate in progress status calls with Watermaster and IEUA staff.

Deliverables

The FY 2024/25 deliverables for this work include:

- Final Basin Plan amendment support documents, including the SED, Staff Report, Economic Analysis, and other supporting documentation. Including, ADA compliant Basin Plan amendment documents.
- PowerPoint presentations and handout materials for any project team, Santa Ana Water Board, and stakeholder meetings.

7511 – PE6/7: COOPERATIVE EFFORTS/SALT MANAGEMENT

As-needed services to support Watermaster in its participation in Santa Ana **Watershed Project Authority Task Forces**

Total	\$27,067
Other Direct Costs	\$581
Consultant Labor	\$26,486
	Cost Estimate

Rationale

The Santa Ana Watershed Project Authority (SAWPA) administers various multi-stakeholder efforts to monitor and analyze water quality in the Santa Ana River Watershed in collaboration with the Santa Ana Regional Water Quality Control Board (Santa Ana Water Board). Two of the task forces that generate information relevant to Chino Basin OBMP efforts under PE6 and PE7 are the Basin Monitoring Program Task Force (BMPTF) and the Emerging Constituents Task Force (ECTF). The BMPTF is focused on compliance with watershed-wide the salt and nutrient plan defined in the Water Quality Control Plan for the Santa Ana River Basin (Basin Plan), such as computing ambient water quality and performing the Wasteload Allocation analysis. These activities have the potential to impact permitting for recycled water use. The ECTF focuses on the investigation of emerging constituents, tracking regulations, and implementing collaborative approaches to compliance and water quality protection. IEUA and Watermaster are members of these Task Forces.

Some of the key activities performed by the Task Forces include:

- Collection and compilation of data used to support the management of water quality in the Santa Ana River Watershed.
- Preparation of the Annual Report of Santa Ana River water quality.
- Preparation of the Annual EC Sampling Report.
- Periodic recomputation of ambient water quality for the Santa Ana River Watershed groundwater management zones (GMZs).
- Periodic review and evaluation of the wasteload allocation for recycled water discharges to the Santa Ana River and its tributaries.
- Periodic assessment of monitoring gaps in the Watershed.
- Periodic assessment and/or review of proposed changes to the Basin Plan SNMP.
- Monthly Task Force meetings.

SAWPA contracts with technical and policy consultants to support the BMPTF and ECTF to implement various studies and activities. The technical and policy work is reviewed at monthly Task Force meetings. The outcomes of the work performed by the Task Forces have direct implications for the planning activities of the Watermaster and IEUA parties.

During FY 2024/25, the BMPTF will be performing the following activities:

- Periodic (monthly to quarterly) meetings to review and discuss current and future Basin Plan SNMP implementation activities.
- Implement groundwater and surface water monitoring plans.
- Develop tools in support of performing annual data collection.
- Collect and review 2022 through 2024 groundwater data.
- Update storage models for selected groundwater management zones.
- Other as-needed work to support the Task Force's mission and objectives.

During FY 2024/25, the ECTF will be performing the following activities:

- Quarterly meetings to review and discuss current and future Basin Plan SNMP implementation activities.
- Implementation of EC monitoring program.
- Advancing discussions on PFAS regulations, and other emerging contaminant regulations.

Scope of Work

West Yost will perform as-requested services to support the Watermaster and IEUA's participation in the Task Force activities. The budget anticipates the following as-requested services for FY 2024/25:

- Attendance at up to 12 monthly Task Force meetings.
- Preparation of Task Force meeting summaries for information relevant to Watermaster.
- Review and comment on interim and final project deliverables prepared by the Task Forces or its consultants.
- Attendance at as-needed meetings with Watermaster and IEUA staff to discuss Task Force draft project deliverables.
- As-needed coordination with Watermaster and IEUA staff on Task Force activities that arise during the year.

Deliverables

The FY 2024/25 deliverables for this work could include:

- Task Force meeting summaries.
- Draft and final review comments on interim and final deliverables prepared by the Task Force or its consultants.
- Other as-requested deliverables defined by Watermaster.

7517 – PE6/7: COOPERATIVE EFFORTS/SALT MANAGEMENT

Implement Chino Creek Monitoring Program – IEUA Cost Share

Total	\$67,149
Other Direct Costs	\$2,654
Consultant Labor	\$64,495
	Cost Estimate

Rationale

Pursuant to the Federal Clean Water Act (CWA) Section 303(d) and 305(b), the Santa Ana Regional Water Quality Control Board (Santa Ana Water Board) is required to periodically assess the water quality of the surface water bodies in the Santa Ana Watershed and publish a list of surface waters that do not meet the water quality standards for beneficial uses and objectives defined in the Santa Ana River Basin Plan (Basin Plan). The current assessment and listing determinations for the Santa Ana Watershed are included in the 2024 California Integrated Report (2024 Integrated Report).

Based on the results of the assessment in the 2024 Integrated Report, the team responsible for the 2024 Integrated Report determined that there is insufficient data to determine water quality conditions within reach 1B of Chino Creek (Chino Creek 1B). Specifically, there is insufficient data to make beneficial use support determination, but the limited data indicates that beneficial uses may be potentially threatened (305[b] Category 3). Without more data, Chino Creek 1B could be listed as impaired in future Integrated Reports, which will require an extensive, multi-stakeholder effort to develop and implement a Total Maximum Daily Loads (TMDL) program and could impact recycled water permits and uses in the Chino Basin. The Santa Ana Water Board expressed that more data is needed to assess water quality conditions compared to objectives in future Integrated Reports. Recognizing the TMDL impact on IEUA and Watermaster recycled water activities, the Santa Ana Water Board requested Watermaster and IEUA to develop a surface water monitoring program to characterize conditions along Chino Creek. Watermaster and IEUA understand that it is crucial to implement a monitoring program to improve understanding of existing conditions in Chino Creek 1B and upstream reaches, and drivers of these water quality conditions.

During FY 2022/23, Watermaster and IEUA collaborated with Santa Ana Water Board staff to develop the Chino Creek Monitoring Program Work Plan and the Quality Assurance Project Plan (QAPP) that will satisfy the requirements of the California Clean Water Act Section 303 (d) List (Listing Policy) for Chino Creek. The next steps are to implement the recommended Chino Creek Monitoring Program in FY 2024/25 through FY 2026/27.

Scope of Work

In FY 2024/25, West Yost will perform the following tasks in accordance with the Chino Creek Monitoring Program Workplan:

- Perform 12 monthly surface water sampling events at the recommended surface water sites.
- Coordinate with the IEUA operation and laboratory teams on sampling.

- Perform quality assurance/quality control (QA/QC) check, compile, and process laboratory results into centralized project database.
- Review data and prepare figures to characterize surface water conditions.
- Upload surface water quality data into the California Environmental Data Exchange Network (CEDEN) annually.
- Conduct as-needed meetings with Watermaster, IEUA, Basin Monitoring Program Task Force, and the Santa Ana Regional Board on project status and sampling results.

Deliverables

Figures characterizing surface water quality conditions

Cost Estimate for FY 2025/26 and Beyond

The Class 3 cost estimate²⁶ to continue this work over FY 2025/26 through 2026/27 is about \$181,000 total.

N-C-941-CM-ADM-B-2024-25 BUDGET

²⁶ Class 3 cost estimates have an expected accuracy of between -20% and +30% of the actual costs.

7520 – PE6/7: COOPERATIVE EFFORTS/SALT MANAGEMENT

Water Quality Management Program

Total	\$130,164
Other Direct Costs	\$500
Consultant Labor	\$129,664
	Cost Estimate

Rationale

As part of the 2020 OBMPU, the stakeholders identified several management activities necessary to achieve the goals of the 2020 OBMPU. Two of the 2020 OBMPU activities address groundwater quality:

- Develop and implement a water-quality management plan to address current and future water quality issues and protect beneficial uses."
- Develop strategic regulatory-compliance solutions that achieve multiple benefits in managing water quality.

The specific action defined to encapsulate these activities within the 2020 OBMPU was the development of a Water Quality Management Plan that addresses emerging contaminants to better prepare the parties for addressing compliance with new State and Federal drinking water regulations and provides for the long-term maximum beneficial use of the basin. It was identified that reconvening the Watermaster's Water Quality Committee (WQC) would be the ideal approach to guide the development and implementation of such a management plan to guide the activities over the next several years.

As first envisioned in the OBMPU (and presented in the FY 2023/24 Engineering Budget), developing the water quality management plan would be a multi-year effort with an initial two-year budget of \$382,692, inclusive of convening and running the WQC, developing and implementing an initial Emerging Contaminants Monitoring Plan (ECMP), performing an assessment of emerging contaminants in the Chino Basin based on historical monitoring and results of the ECMP, and scoping the groundwater quality monitoring plan.

In FY 2023/24 Watermaster reconvened the WQC in October 2023. The objectives of the first WQC meeting were to educate the participants on historical water quality activities performed by Watermaster pursuant to the 2000 OBMP, review the successes of the WQC's past work, and obtain feedback from the stakeholders on the opportunity and proposed scope and objectives for developing a water quality management plan, including development of an initial ECMP for implementation in FY 2024/25. A second WQC meeting was held in January 2024 to obtain additional stakeholder feedback and review the methods to develop the initial ECMP.

Based on feedback received through the WQC, the concept of a water quality management plan was reenvisioned into a simpler, more adaptable Water Quality Management Program (WQMP) led by the WQC, following the approach used from 2003 to 2010 under Program Element 6 of the 2000 OBMP. As re-envisioned, the WQMP is an ongoing process where the focus of the work performed each year will be defined/refined based on stakeholder input received through the WQC. Under the WQMP, the WQC would meet up to four times a year to address some or all the following objectives:

- Informing stakeholders on the available data and information on water quality in the Chino Basin
- Regularly educating and sharing information on potential future water quality regulations
- Implementing an ECMP to monitor and characterize contaminant occurrence in the Chino Basin where data is not available to assess potential impacts of regulations
- Tracking available grant funding and loan opportunities to advance water quality programs and projects
- Identifying opportunities for multi-agency and/or multi-benefit projects
- Enhancing the ability to characterize potential impacts to the Chino Basin as a result of Parties' operational/management responses to water quality regulations (e.g., impacts to Safe Yield or recycled water recharge program)
- Conducting other activities of interest to the stakeholders to address water quality management or concerns.

Each year going forward the WQC will recommend a scope of work and budget for WQC activities in the subsequent year (or years) to the Watermaster Pools, Advisory Committee, and Board.

Based on the revised approach to addressing water quality challenges through a WQMP, the initial two-year cost has been reduced by about \$75,000.

Scope of Work

N-C-941-CM-ADM-B-2024-25 BUDGET

For FY 2024/25, West Yost will support Watermaster Staff in implementing the WQMP by supporting the WQC process. The work will include:

- Prepare for and conduct up to four meetings of the WQC, including preparing supporting materials, such as agendas, handouts, meeting summaries, etc.
- Coordinate and implement the ECMP (note the ECMP labor and laboratory costs for performing the monitoring of Watermaster monitoring wells and private wells pursuant to the ECMP is captured in PE 1, under task 7505 Groundwater and Surface Water Quality Monitoring Program).²⁷
- Characterizing the emerging contaminants in the Basin after sampling for the initial ECMP is completed.
- Review and update the ECMP for FY 2025/26.
- Prepare an estimated scope of work and budget for the WQMP activities in FY 2025/26.

WEST YOST 51 Chino Basin Watermaster
April 2024

²⁷ Note that, as described in the ECMP, there are limited labor costs associated with ECMP implementation as the work will be performed at the same time that West Yost if performing routine monitoring for other OBMP and regulatory purposes. The significant additional cost is the laboratory costs for testing the water quality samples for the identified emerging contaminants. This additional cost is about \$80,000. This cost was part of the initial two-year estimate for implementing a water quality management plan and was considered in the stated cost savings of the revised WQMP concept.

This proposed scope and budget allows for flexibility to address topics based on the WQC discussions and outcomes.

Deliverables

- Meeting agendas, handouts, presentations, and meeting summaries for the WQC meetings
- Maps characterizing the extent of emerging contaminants in the Basin
- Scope of work and budget for implementing the WQMP in FY 2025/26
- Other as-needed deliverables determined by the WQC to support the implementation of the WQMP

7610 - PE8/9: STORAGE MANAGEMENT/CONJUNCTIVE USE

Develop Storage and Recovery Master Plan

Total	\$57,584
Other Direct Costs	\$400
Consultant Labor	\$57,184
	Cost Estimate ²⁸

Rationale

As part of the 2020 OBMPU, the stakeholders identified several management activities necessary to achieve the goals of the 2020 OBMPU. Activity B of the 2020 OBMPU was to "develop, implement, and optimize Storage and Recovery Programs to increase water-supply reliability, protect or enhance Safe Yield, and improve water quality." Activity B falls under Program Element 9 of the 2020 OBMPU. Exhibit 7 of the 2020 OBMPU defined a multi-year scope of work to execute this activity:

- 1. Convene the Storage and Recovery Program Committee (Committee), define objectives, and refine scope of work.
- 2. Develop conceptual alternatives for Storage and Recovery Programs at various scales.
- 3. Describe and evaluate reconnaissance-level facility plans and costs for Storage and Recovery Program alternatives.
- 4. Prepare Storage and Recovery Master Plan.

Watermaster staff began implementing Task 1 in FY 2023/24.

Scope of Work

The work required in FY 2024/25 is to provide as-needed support to Watermaster in conducting Committee meetings and developing information to support the execution of Tasks 1 through 3 noted above. The precise scope of work will be defined by the Committee in late FY 2023/24 and early FY 2024/25. The Storage and Recovery Master Plan is a multi-year effort that is expected to be completed in FY 2025/26. The initial meeting for Task 2 will take place in FY 2024/25, rather than FY 2023/24 as originally scoped. This meeting will be funded by carryover funds from FY 2023/24.

Deliverables

West Yost's deliverables will be determined by the Committee and Watermaster staff.

WEST YOST 53 Chino Basin Watermaster
April 2024

N-C-941-CM-ADM-8-2024-25 BUDGET 59

Page 145

²⁸ About \$25,000 of this task will be funded by carryover funds from FY 2023/24.

Cost Estimate for FY 2025/26

The Class 3 cost estimate²⁹ of the effort in FY 2025/26 is about \$45,000. The actual cost estimate for FY 2025/26 will depend on the level of stakeholder involvement, the desired level of detail in the Storage and Recovery Master Plan, and the need for any additional groundwater modeling.

7614 - PE8/9: STORAGE MANAGEMENT/CONJUNCTIVE USE

Support Implementation of the Safe Yield Court Order

Total	\$110.108	\$658.855	\$768.963
Other Direct Costs	\$0	\$1,400	\$1,400
Consultant Labor	\$110,108	\$657,455	\$767,563
	Task 1	Task 2	Total

Rationale

The Safe Yield of the Chino Basin was recalculated in May 2020 pursuant to the methodology approved by the Court on April 28, 2017. The Court adopted a Safe Yield of 131,000 acre-feet per year for the period of fiscal year 2020/21 through 2029/30. The Court-approved methodology was outlined in a Court Order from April 28, 2017 (2017 Court Order). The Court Order also included the following requirements, listed below verbatim (p. 16-17):

- 4.5 Annual Data Collection and Evaluation. In support of its obligations to undertake the reset in accordance with the Reset Technical Memorandum and this order, Watermaster shall annually undertake the following actions:
 - a. Ensure that, unless a Party to the Judgment is excluded from reporting, all production by all Parties to the Judgment is metered, reported, and reflected in Watermaster's approved Assessment Packages;
 - b. Collect data concerning cultural conditions annually with cultural conditions including, but not limited to, land use, water use practices, production, and facilities for the production, generation, storage, recharge, treatment, or transmission of water;
 - c. Evaluate potential need for prudent management discretion to avoid or mitigate undesirable results including, but not limited to, subsidence, water quality degradation, and unreasonable pump lifts. Where evaluation of available data suggests that there has been or will be a material change from existing and projected conditions or threatened undesirable results, then a more significant evaluation, including modeling, as described in the Reset Technical Memorandum, will be undertaken; and,
 - d. As part of its regular budgeting process, develop a budget for the annual data collection, data evaluation, and any scheduled modeling efforts, including the methodology for the allocation of expenses among the Parties to the Judgment. Such budget development shall be consistent with section 5.4(a) of the Peace Agreement.

WEST YOST

54

Chino Basin Watermaster

April 2024

N-C-941-CM-ADM-B-2024-25 BUDGET

Page 146

²⁹ Class 3 cost estimates have an expected accuracy of between -20% and +30% of the actual costs.

- 4.6 Modeling. Watermaster shall use the Basin Model to be updated and a model evaluation of the Safe Yield, in a manner consistent with the Reset Technical Memorandum, to be initiated no later than January 1, 2024, in order to ensure that the same may be completed by June 30, 2025.
- 4.7 Peer Review. The Pools shall be provided with reasonable opportunity, no less frequently than annually, for peer review of the collection of data and the application of data collected in regard to the activities described in Paragraphs 4.4, 4.5, and 4.6 above.

West Yost began the work to implement the 2017 Court Order in fiscal year 2021/22. This work included updating the Safe Yield Reset methodology, developing annual data collection and evaluation reports covering the periods through FY 2020/21, FY 2021/22, and FY 2022/23, and initiating the model update to implement the updated Safe Yield Reset methodology, including the required peer review. In FY 2023/24, West Yost completed the update of Watermaster's groundwater model, known as the 2025 Chino Valley Model (2025 CVM), and completed a recalibration and uncertainty analysis.

Scope of Work

The work required in FY 2024/25 will include completing the annual data collection and evaluation, completing the 2025 Safe Yield Reevaluation, and facilitating the associated peer review. This scope is broken down into the following tasks:

- Task 1 Annual data collection and evaluation. Pursuant to pages 16 and 17 of the Court Order, Task 1 includes collecting data from the Parties and other sources and analyzing the data in the context of West Yost's groundwater modeling. Data collection will begin in July 2024 for fiscal year 2023/24. The scope of Task 1 assumes the following:
 - Existing data collection efforts (e.g., groundwater pumping measurements) will be collected via other Watermaster efforts and are not included in this scope.
 - West Yost will follow the data collection and evaluation process that was conducted in FY 2023/24, incorporating the feedback from the Parties.
 - West Yost will develop exhibits to compare the collected data to previous historical and modeling data as necessary to document the data collection in an annual report and present the data to the Peer Review committee.
 - West Yost will prepare a draft and final data collection report. The draft report will be reviewed with the Peer Review committee, comments will be incorporated, and the final report will be submitted to the Court no later than June 30, 2025.@
- Task 2 2025 Safe Yield Reevaluation. Pursuant to page 17 of the 2017 Court Order, Task 2 is the work to use the updated version of Watermaster's groundwater model (i.e., the 2025 Chino Valley Model) to reevaluate the Safe Yield by June 30, 2025. The complete scope of the model update and reevaluation of the Safe Yield through FY 2024/25 includes the following subtasks:
 - 2.1 Update Hydrogeologic Conceptual Model
 - 2.2 Update Model Input Data for Historical Period

- 2.3 Recalibrate Groundwater Model to Generate Calibrated Realizations
- 2.4 Develop Planning Scenarios
- 2.5 Conduct Planning Simulations to Update Projections of Net Recharge, Identify Undesirable Results and Associated Mitigation Measures, and Reevaluate Safe Yield
- 2.6 Prepare Safe Yield Reevaluation Report

The scope of work in FY 2024/25 includes completing subtasks 2.5 and 2.6. West Yost will conduct at least two workshops in FY 2024/25 to review the preliminary results of subtask 2.5 and 2.6.

Deliverables

West Yost's primary deliverables will be the following draft technical memoranda/reports:

- A draft and final report documenting the data collection process and the data collected for FY 2023/24.
- A draft and final report documenting the 2025 Safe Yield Reevaluation.
- West Yost will prepare other deliverables as needed to support the technical workshops and meetings in Tasks 1 and 2.

7615 – PE8/9: STORAGE MANAGEMENT/CONJUNCTIVE USE

Develop 2025 Storage Management Plan

Total	\$42,632
Other Direct Costs	\$0
Consultant Labor	\$42,632
	Cost Estimate

Rationale

The Judgment established a Watermaster to administer the decree under the court's continuing jurisdiction and empowered it to manage and control available storage capacity and to enter into agreements for the storage of water. As a prerequisite to implementing the 2000 OBMP, the Parties executed the Peace Agreement, providing direction and guidance to Watermaster on how storage should be prioritized and managed. The 2000 OBMP included the original plans for storage management, including groundwater pumping, recharge, storage and recovery, and the transfer of water. The 2020 OBMPU involved the review and refinement of the original storage management planning work and included the development of the 2020 Storage Management Plan (SMP).

The 2020 SMP described the existing and projected uses of storage by parties, agencies engaged in Storage and Recovery Programs, the need for recharge capacity for replenishment obligations, the parties' storage management activities, guidance for Storage and Recovery Programs, and the Storage Agreement application process.

The SMP is required to be reviewed and updated (1) at no less than a five-year frequency, (2) when the Safe Yield is recalculated, or (3) when Watermaster determines a review and update is warranted based new information and/or the needs of the parties or the Basin. As the 2020 SMP was completed in October 2020, it must be updated no later than October 2025.

Scope of Work

The work required in FY 2024/25 is to begin developing the 2025 SMP with the latest planning information, understanding, and guidance related to the use and management of storage. As some of this work requires the use of the latest version of Watermaster's groundwater model (now the 2025 Chino Valley Model), some of this work will be initiated in FY 2025/26. The scope of work for the development of the 2025 SMP will be interrelated but not duplicative of the scope of work to develop the Storage and Recovery Master Plan.

Deliverables

West Yost's deliverables will include drafts of the sections of the SMP that document the current planning information and its uncertainty, the current guidance on storage management, and other sections for which information is available.

Cost Estimate for FY 2025/26

The Class 3 cost estimate³⁰ of the effort in FY 2025/26 is about \$60,000. The actual cost estimate for FY 2025/26 will depend on the findings of the 2025 Safe Yield Reevaluation.

 $^{^{30}}$ Class 3 cost estimates have an expected accuracy of between -20% and +30% of the actual costs.

TECHNICAL MEMORANDUM

DATE: April 22, 2024 Project No.: 941-80-22-26

TO: Ground-Level Monitoring Committee

FROM: West Yost Associates

REVIEWED BY: Andy Malone, PG

SUBJECT: Recommended Scope of Work and Budget for the Ground-Level Monitoring Program

for Fiscal Year 2024/25 (FINAL)

BACKGROUND AND PURPOSE

Pursuant to the Optimum Basin Management Program Implementation Plan and the Peace Agreement, the Chino Basin Watermaster (Watermaster) implements a Subsidence Management Plan (SMP) for the Chino Basin to minimize or stop the occurrence of land subsidence and ground fissuring. The Court approved the SMP and ordered its implementation in November 2007 (2007 SMP). The 2007 SMP was updated in 2015 (2015 SMP) and can be downloaded from the Watermaster website. The SMP outlines a program of monitoring, data analysis, and annual reporting. A key element of the SMP is its adaptive nature—Watermaster can adjust the SMP as warranted by the data.

The Watermaster Engineer, with the guidance of the Ground-Level Monitoring Committee (GLMC), prepares annual reports which include: the results of the monitoring program; interpretations of the data; recommendations for the Ground-Level Monitoring Program (GLMP) for the following fiscal year (FY); and recommendations for adjustments to the SMP, if any.

This Technical Memorandum (TM) describes the Watermaster Engineer's recommended activities for the GLMP for FY 2024/25 in the form of a proposed scope of services and budget.

Members of the GLMC were asked to:

- Review the draft TM prior to March 7, 2024.
- Attend a meeting of the GLMC at 10:00 am on March 7, 2024 to discuss the proposed scope of services and budget for FY 2024/25.
- Submit comments and suggested revisions on the proposed scope of services and budget for FY 2024/25 to the Watermaster by April 4, 2024.

This final scope of services and budget that addresses the comments and suggested revisions of the GLMC will be included in the Watermaster's proposed budget for FY 2024/25. The final scope of services, budget, and schedule for FY 2024/25 will be included in Section 4 of the 2023/24 Annual Report for the GLMP.

RECOMMENDED SCOPE OF SERVICES AND BUDGET - FY 2024/25

A proposed scope of services for the GLMP for FY 2024/25 is shown in Table 1 as a line-item cost estimate. The proposed scope of services is summarized below.

Task 1. Setup and Maintenance of the Monitoring Network

The Chino Basin extensometer facilities are key monitoring facilities for the GLMP. They require regular and as-needed maintenance and calibration to remain in good working order and to ensure the recording of accurate measurements.

Task 1.1. Maintain Extensometer Facilities

This subtask includes performing monthly visits to the Ayala Park, Chino Creek, and Pomona extensometer (PX) facilities to ensure functionality and calibration of the monitoring equipment and data loggers. Two staff members are required for these visits due to safety concerns.

Non-routine efforts to be performed during FY 2024/25 under this subtask include:

- Monthly adjustments to the PX extensometers to improve the accuracy of the measurements of aquifer-system deformation.
- Purchase and install two metal covers for Ayala Park PA vault and PX 2 vault.
- Construct French drains around the PA vault to convey surface-water runoff away from the vault.

Task 1.2. Annual Lease Fees for the Chino Creek Extensometer Site

The County of San Bernardino (County) owns the land the Chino Creek extensometer facility is located on. As such, the Watermaster entered into a lease agreement with the County in 2012 and pays the County and annual rental payment of \$1,596.

Task 2. Aquifer-System Monitoring and Testing

This task involves the collection, compilation, and checking of hydraulic head and aquifer-system deformation data from the Ayala Park, Chino Creek, and PX extensometer facilities.

Task 2.1. Conduct Quarterly Monitoring at Extensometer Facilities

This subtask involves the routine quarterly collection, processing, and checking of data from the three extensometer facilities in the Chino Basin. Quarterly data collection is necessary to ensure that the monitoring equipment is in good working order and to minimize the risk of losing data because of equipment malfunction. For this subtask, the complete extensometer and piezometer records from the Ayala Park, Chino Creek, and PX facilities are loaded to HydroDaVESM (Hydrologic Database and Visual Explanations), the annual report figures are updated, and all the new data are checked for accuracy. If the data indicated malfunctioning equipment or inaccurate measurements, then any necessary adjustments to the monitoring equipment are made. Two staff members are required for these visits due to safety concerns.

Task 3. Basin-Wide Ground-Level Monitoring Program (InSAR)

This task involves the annual collection and analysis of Synthetic Aperture Radar (SAR) scenes to estimate the vertical ground motion across the western portion of Chino Basin from March 2024 to March 2025.¹

In this subtask, five SAR scenes that are acquired by the TerraSAR-X satellite from March 2024 to March 2025 are purchased from the German Aerospace Center. West Yost will use the SAR scenes to prepare 12 interferograms (InSAR) that describe the incremental and cumulative vertical ground motion that occurred from March 2024 to March 2025 and since 2011. The associated costs to task, acquire, purchase, and process the InSAR data is as follows:

- Task TerraSAR-X for five SAR acquisitions for the western Chino Basin (\$1,000)
- Purchase TerraSAR-X data (\$10,000)
- Prepare and check InSAR results, including the interferograms and GIS-generated rasters (\$62,000)

In addition, West Yost purchased and maintains the GAMMA software that is necessary to process the SAR data and prepare the InSAR estimates of vertical ground motion. The one-time initial cost for the software was \$44,000. Since the Watermaster is the only West Yost client that utilizes InSAR services, the Watermaster is paying for the GAMMA software over a three-year period (\$11,000 in FY 2023/24, \$22,000 in FY 2024/25, and \$11,000 in FY 2025/26). The annual maintenance cost is \$6,600. Therefore, in FY 2024/25 the Watermaster's costs for the GAMMA software is: \$22,000 + \$6,600 = \$28,000.

Task 4. Perform Ground-Level Surveys

This task involves conducting elevation surveys at benchmark monuments across defined areas of western Chino Basin to estimate the vertical ground motion that occurred since the prior survey. Figure 1 shows the location of the benchmark monuments surveyed across the western Chino Basin. Electronic distance measurements (EDM surveys) are also performed periodically between monuments to estimate horizontal ground motion in areas where ground fissuring due to differential land subsidence is a concern. Table 2 documents the areas surveyed over the last six years as part of the GLMP.

¹ West Yost is now performing this task internally instead of subcontracting the work, as was done in the past. This was made possible by West Yost hiring the InSAR subconsultant directly and purchasing/maintaining the necessary hardware and software.

Table 2. History o	Ground-Level	Surveys
--------------------	---------------------	---------

	Ground-Level Survey Completed (Y/N)?										
Ground-Level Survey Area	2018	2019	2020	2021	2022	2023	2024 ^(b)				
Managed Area	Υ	N	N	N	N	N	Y				
Fissure Zone Area ^(a)	Y	N	N	N	N	N	N				
Central Area	N	N	N	N	N	N	N				
Northwest Area	Y	Υ	Y	Υ	Υ	Υ	Y				
San Jose Fault Zone Area ^(a)	Y	Υ	Y	Υ	Υ	N	N				
Southeast Area	Y	N	N	N	Υ	N	N				
Northeast Area	Y	Υ	Y	N	N	N	N				

⁽a) Denotes EDM survey area (measurements of horizontal strain).

The ground-level surveys recommended for FY 2024/25 include the following:

Task 4.1. Conduct Spring-2025 Elevation surveys in Northwest MZ-1

In this subtask, the surveyor conducts elevation and EDM surveys at the established benchmarks in Northwest MZ-1 in Spring 2025. The elevation survey will begin at the Pomona Extensometer Facility and includes benchmarks across Northwest MZ-1. The elevation survey will be referenced to the Ayala Park elevation datum at the Ayala Park Extensometer via a GPS survey performed at both Ayala Park and the Pomona Extensometers.

The vertical elevation survey is recommended in Spring 2025 because of the recent subsidence that has occurred in Northwest MZ-1 and because the survey will support the development of a subsidence management plan in Northwest MZ-1. The EDM survey is **not** recommended to be performed across the San Jose fault zone because past surveys (2013-2021) have demonstrated that the horizontal strain measured between benchmark pairs appears to behave elastically. The EDM surveys should be conducted less frequently than annual (e.g., once every five years).

Ground-Level Surveys Not Recommended for Spring 2025

Ground-level surveys are **not** recommended for Spring 2025 in the other Areas of Subsidence Concern (*i.e.*, Managed, Central, Southeast, and Northeast Areas). This recommendation is justified because:

- InSAR is proving to be an accurate, more efficient, higher-resolution method to monitor vertical ground motion across the western Chino Basin.
- Hydraulic heads and vertical ground motion in some of these areas are stable or increasing.

Ground-level surveys should be conducted in these areas less frequently than annual (e.g., once every five years).

Task 4.5. Replace Destroyed Benchmarks (if needed)

In this subtask, the surveyor replaces benchmark monuments that have been destroyed since the last survey, if any.

⁽b) The 2024 ground-level surveys are scheduled to begin in March 2024.

Task 4.6. Process, Check, and Update Database

In this subtask, the Watermaster Engineer receives and catalogs the survey results provided by the surveyor, prepares the data for display as a GIS layer, and performs checks against InSAR and extensometer data for reasonableness and accuracy.

Task 5. Data Analysis and Reporting

Task 5.1. Prepare Draft 2023/24 Annual Report for the Ground-Level Monitoring Program

Prepare the text, tables, and figures for a draft 2023/24 Annual Report for the GLMP and submit the report to the GLMC by September 20, 2024 for review and comment.

Task 5.2. Prepare Final 2023/24 Annual Report for the Ground-Level Monitoring Program

Update the text, tables, and figures based on the comments received from the GLMC and prepare a final 2023/24 Annual Report for the GLMP by November 1, 2024. Responses to GLMC comments will be included as an appendix to the final report. The report will be included in the agenda packet for the November 2024 Watermaster meetings for approval.

Task 5.3. Compile and Analyze Data from the 2024/25 Ground-Level Monitoring Program

In this subtask, monitoring data generated from the GLMP during 2024/25 is checked, mapped, charted, and analyzed as the first step in the preparation of the subsequent annual report. Some of the maps, charts, and tables are shared with the GLMC at its meetings in early 2025 during the development of a recommended scope of services and budget for FY 2025/26.

Task 5.4. Conduct Whispering Lakes Subsidence Investigation of the Northeast Area

In the Northeast Area, the long-term and short-term InSAR estimates indicate that persistent downward ground motion has occurred in a concentrated area south of the Ontario International Airport between Vineyard Avenue and Archibald Avenue in the vicinity of Whispering Lakes Golf Course. The western edge of this subsiding area exhibits a steep subsidence gradient or "differential subsidence."

In FY 2021/22, the Watermaster Engineer conducted a Reconnaissance-Level Investigation that included the review and analysis of readily-available borehole and lithologic data, historical air photos, pumping and recharge data, hydraulic head data, and InSAR estimates of vertical ground motion. Figures and charts were prepared and analyzed to derive interpretations and recommendations for future investigations and monitoring. The investigation and recommendations were included in the FY 2021/22 Annual Report of the GLMC. Plausible mechanisms for this subsidence feature include pumping-induced aquitard drainage and shallow soil consolidation associated with historical land uses. The investigation identified data gaps in available site-specific hydrogeologic data.

Potential next steps presented to the GLMC at its December 13, 2022 meeting included:

 Aquifer-system monitoring (e.g., collecting existing hydrogeologic data; installing transducers at wells in the study area; constructing an aquifer-system monitoring facility within the subsidence feature)

- Further investigation of the historical land use practices in the vicinity of the Whispering Lakes
 Golf Course (e.g., agricultural disturbance and augmentation of soils; historical sewage disposal
 and spreading of solids; golf course construction and maintenance activities)
- Perform field studies of shallow soil consolidation (i.e., develop a dataset of site-specific shallow soil compaction that could be compared to the rates of subsidence estimated by InSAR).

The GLMC has recommended a stepwise, process-of-elimination approach to identify the subsidence mechanism(s). The GLMC approved a \$10,000 budget for FY 2023/24 to implement the recommendations derived from the Reconnaissance-Level Investigation. This budget is being used to collect and evaluate existing data (e.g., hydrogeologic data, well information, reports, historical land use data) and install transducers at nearby pumping wells. The results of these efforts will be documented in the GLMC Annual Report for 2023/24 along with recommendations for follow-on work.

The GLMC should consider dedicating contingency budget for FY 2024/25 (\$10,000) to continue the implementation of the recommendations derived Reconnaissance-Level Investigation and future recommendations based on results of work performed in 2023/24.

Task 6. Develop a Subsidence-Management Plan for Northwest MZ-1

The 2007 SMP called for ongoing monitoring and data analysis of the Managed Area; including annual reporting and adjustments to the SMP, as warranted by the data. The 2007 SMP also called for expanded monitoring of the aquifer-system and land subsidence in other areas of subsidence and ground fissuring concern. Figure 1 shows the location of these so-called Areas of Subsidence Concern: Central MZ-1, Northwest MZ-1, Northeast Area, and Southeast Area. The expanded monitoring efforts outside of the Managed Area are consistent with the requirements of OBMP Program Element 1 and its implementation plan contained in the Peace Agreement.²

The 2007 SMP stated that if data from existing monitoring efforts in the Areas of Subsidence Concern indicate the potential for adverse impacts due to subsidence, the Watermaster would revise the SMP to avoid those adverse impacts. The 2014 Annual Report of the GLMC recommended that the 2007 SMP be updated to better describe the Watermaster's land subsidence efforts and obligations, including areas outside of MZ-1. As such, the update included a name change to the 2015 Chino Basin Subsidence Management Plan (2015 SMP) and a recommendation to develop a subsidence management plan for Northwest MZ 1.

The Watermaster had been monitoring vertical ground motion in Northwest MZ-1 via InSAR during the development of the 2007 SMP. Land subsidence in Northwest MZ-1 was first identified as a concern in 2006 in the MZ-1 Summary Report and again in 2007 in the 2007 SMP. Of particular concern was the occurrence of concentrated differential subsidence across the San Jose Fault in Northwest MZ-1—the same spatial pattern of differential subsidence that occurred in the Managed Area during the time of ground fissuring. Ground fissuring is the main subsidence-related threat to infrastructure. The issue of differential subsidence, and the potential for ground fissuring in Northwest MZ-1, has been discussed at prior GLMC meetings, and the subsidence has been documented and described as a concern in the Watermaster's State of the Basin Reports, the annual reports of the GLMC, and in the *Initial Hydrologic*

WEST YOST Page 156 tm - 941 - 2024-25 g/mc cost proposal_final.docx

² http://www.cbwm.org/docs/legaldocs/Peace Agreement.pdf.

Conceptual Model and Monitoring and Testing Program for the Northwest MZ-1 Area (WEI, 2017). The Watermaster increased monitoring efforts in Northwest MZ-1 beginning in FY 2012/13 to include ground elevation surveys and electronic distance measurements (EDM) to monitor ground motion and the potential for fissuring.

In 2015, the Watermaster's Engineer developed the *Work Plan to Develop a Subsidence Management Plan for the Northwest MZ-1 Area* (Work Plan; WEI 2015b).³ The Work Plan is characterized as an ongoing Watermaster effort and includes a description of a multi-year scope-of-work, a cost estimate, and an implementation schedule. The Work Plan was included in the 2015 SMP as Appendix B. Implementation of the Work Plan began in July 2015. On an annual basis, the GLMC analyzes the data and information generated by the implementation of the Work Plan. The results and interpretations generated from the analysis are documented in the annual report for the GLMP and used to prepare recommendations for future activities.

Progress to Implement Work Plan through FY 2023/24

The progress that has been made to implement the Work Plan through FY 2023/24 is described below:

- An initial hydrogeologic conceptual model of the Northwest MZ-1 Area was developed, and a report was published in 2017.⁴ This report described the hydrogeology of the area, speculated on the causes of the observed land subsidence, and included a recommended monitoring program.
- A preliminary one-dimensional (1D) compaction model, based on hydrogeologic information from the MVWD-28 well site, was constructed, calibrated and used to explore the future occurrence of subsidence in Northwest MZ-1 under various basin-operation scenarios of groundwater production and artificial recharge and to identify potential subsidence mitigation strategies. A report⁵ was published to document the results and interpretations of the modeling, which were: the deep aquifer system is most susceptible to future compaction and associated land subsidence, and hence, heads will need to increase in the deep aquifer system to minimize or abate future subsidence in Northwest MZ-1. The report also included a recommendation to construct the Pomona Extensometer.
- The initial monitoring program was implemented to closely track groundwater-levels, groundwater production, recharge, and ground motion across Northwest MZ-1. This monitoring program included the construction of the Pomona Extensometer to measure and record depthspecific heads and aquifer-system deformation. Implementation of the monitoring program is ongoing.
- A new 1D model was constructed and calibrated using the hydrogeologic information collected at the Pomona Extensometer. The 1D model at MVWD-28 was also updated and recalibrated using current information. The objectives of this exercise were to: (i) describe the subsidence mechanisms and the pre-consolidation head by aquifer-system layer in Northwest MZ-1 and (ii)

³ Work Plan to Develop a Subsidence-Management Plan for Northwest MZ-1

⁴ https://www.cbwm.org/docs/engdocs/GLMC/nwmz1/Final NWMZ1 Task1 Report.pdf

⁵ https://www.cbwm.org/docs/engdocs/GLMC/nwmz1/20171220%20Final%20NWMZ1%20Task3-4%20Tech%20Memo.pdf

develop modeling tools that can be used to explore the future occurrence of subsidence in Northwest MZ-1 under various basin-operation scenarios of groundwater production and artificial recharge and to identify potential subsidence mitigation strategies. This work was reviewed by the GLMC, and additional model calibration refinements and sensitivity analyses were performed based on GLMC input. In November 2022, the Watermaster Engineer published a final report⁶ on the 1D Model calibrations and sensitivity analyses (with review by the GLMC) and deemed the 1D Models sufficient to simulation future land subsidence under prospective plans for pumping and recharge.

- In 2023, the Watermaster Engineer, with review and input from the GLMC, developed an initial "Subsidence Management Alternative" for Northwest MZ-1 called SMA-1. SMA-1 is equivalent to the planning scenario that was simulated with the 2020 Chino Valley Model (CVM) to support the 2020 Safe Yield Recalculation (2020 SYR). The 2020 SYR was intended to represent and simulate the Parties' projected pumping, recharge, and use of storage through 2050. The results of the 2020 SYR (*i.e.*, projected hydraulic heads by CVM layer) were used as input data for the 1D Model simulations to predict the potential future occurrence of subsidence through 2050. In September 2023, the Watermaster Engineer published a draft TM titled 1D Model Simulation of Subsidence in Northwest MZ-1—Subsidence Management Alternative #1. The Watermaster's recommendations from this work were the following:
 - a. Establish a preliminary "Northwest MZ-1 Guidance Level" of 630 ft-amsl for hydraulic heads in Layers 3 and 5 at the PX location. The preliminary Guidance Level is an aspirational Watermaster recommendation that, if achieved, would likely slow or stop aguitard compaction and land subsidence in Northwest MZ-1.
 - b. Compliance with the Guidance Level should be measured at the PX-2/3 piezometer, which is generally representative of heads in Layers 3 and 5.
 - c. The methods to achieve the Guidance Level could include but are not limited to: voluntary modification of pumping patterns; in-lieu recharge; wet-water recharge via spreading and/or injection; or a combination of methods. These methods might necessitate: voluntary modification of water-supply plans of the purveyors in the Chino Basin; modification of Watermaster practices for recharge and replenishment; and/or the implementation of regional-scale storage or conjunctive-use programs.
 - d. Additional SMAs should be developed and evaluated with the 1D Models to generate the necessary information to finalize the Guidance Level and the *Subsidence Management Plan for Northwest MZ-1*. The additional SMAs could be developed during Watermaster's groundwater modeling efforts associated with the 2025 Safe Yield Reevaluation and the development of the Storage and Recovery Master Plan. The GLMC should participate in the scenario building exercises associated with these Watermaster efforts to develop the SMAs, so that the scenarios include various methods to achieve the Guidance Level. Then, the 1D Models should be used to evaluate the potential future subsidence in Northwest MZ-1 under the SMAs. These model results and evaluations will support the establishment

⁶ https://www.cbwm.org/docs/engdocs/GLMC/nwmz1/TM%20-%20941%20-%201D%20Model%20-%20Final.pdf

of a Guidance Level in the *Subsidence Management Plan for Northwest MZ-1*. It should be noted that future monitoring and analyses always hold the potential for revisions to the Guidance Level, consistent with the adaptive management approach called for in the Chino Basin Subsidence Management Plan.

Based on the expected progress through FY 2023/24, the following work is recommended for FY 2024/25 to develop the *Subsidence Management Plan for Northwest MZ-1*:

Task 6.1. Aquifer-System Monitoring

The established monitoring program of piezometric levels and pumping at wells in Northwest MZ-1 will continue through various techniques, including: (i) SCADA-based monitoring by the Monte Vista Water District; (ii) monitoring of piezometric levels via sonar⁷; (iii) monitoring of piezometric levels via pressure transducers at City of Pomona production wells; and (iv) manual measurements of piezometric levels. These data, along with data collected from the PX in Task 2.1, will improve the understanding of the hydrogeology in Northwest MZ-1, will be used to develop the *Subsidence Management Plan for Northwest MZ-1*, and in the future, will be used to adapt the Chino Basin Subsidence Management Plan, as appropriate.

In this subtask, all data is collected, compiled, checked, and analyzed every three months. Charts and data graphics of pumping, piezometric levels, and aquifer-system deformation will be updated to support the data collection and analysis. The PX extensometer data is charted and analyzed monthly in the ongoing effort to improve the reliability and accuracy of the extensometers.

Task 6.5. Provide Advice in the Development of the 2025 SYR Scenarios

The ongoing 2025 SYR involves the development of multiple projection scenarios of future hydrology, pumping, managed recharge, and use of managed storage in the Chino Basin. These projection scenarios will be simulated with an updated CVM. The CVM results will be used to determine a tentative Safe Yield, which will be evaluated for MPI and then used to evaluate the current Safe Yield of the Chino Basin. The evaluation of MPI associated with land subsidence will be performed using the 1D Models in Northwest MZ-1 and in other Areas of Subsidence Concern (see Task 7 below). In FY 2024/25, the GLMC can provide the Watermaster with valuable advice on the following:

- The development of the 2025 SYR scenarios to ensure a plausible range of future conditions are simulated.
- Interpretation of the 1D Model results re: potential subsidence-related MPI associated with the Safe Yield estimates.
- How the model results can be used to evaluate the minimum recharge quantity of supplemental water in MZ-1 as required by the Peace II Agreement.

⁷ The use of sonar technology to measure piezometric levels in wells in currently being used in Monte Vista Water District wells 28 and 31.

Providing GLMC advice should be conducted in conjunction with the 2025 SYR and can be discussed at regularly scheduled GLMC meetings at no additional cost.⁸

Task 7. Construct and Calibrate Additional 1D Models Across Western Chino Basin

As described above in Task 6, the Watermaster has constructed, calibrated, and used 1D Models at the PX and MVWD-28 locations to evaluate the potential future subsidence in Northwest MZ-1 through 2040. The Watermaster used the information derived from the 1D Models to develop a preliminary "Guidance Level" to avoid future subsidence in Northwest MZ-1.

In Task 7, three additional 1D Models are constructed and calibrated across other Areas of Subsidence Concern in western Chino Basin, so that Watermaster can use all of the 1D Models during the 2025 SYR process to:

- Evaluate for subsidence-related MPI during the 2025 SYR.
- Refine the preliminary "Guidance Level" in Northwest MZ-1 and the Managed Area.
- Evaluate for the minimum recharge quantity of supplemental water in MZ-1 as required by the Peace II Agreement.

In FY 2023/24, the three additional 1D Models are being constructed and calibrated in the following areas: Northeast Area (at Ontario Well 33 location), in the Southeast Area near the CDA well field (at the CCX location), and in the Managed Area (at the Ayala Park Extensometer location).

The deliverables of this task are the following:

- A draft TM to describe the background/objectives of the task and the methods that will be used to
 complete the task. The methods include a description of the proposed locations for the additional
 1D Models and the data that will be used to construct and calibrate the models.
- A draft TM that summarizes the construction and calibration of the additional 1D Models.

This task was budgeted and scheduled for completion in FY 2023/24, but the final work will likely spill over into FY 2024/25. If necessary, unspent budget from FY 2023/24 will be carried over to FY 2024/25 to complete this task. *No additional budget in FY 2024/25 is necessary to complete this task*.

Task 8. Meetings and Administration

Task 8.1. Prepare for and Conduct Four Meetings of the Ground-Level Monitoring Committee

This subtask includes preparing for and conducting four meetings of the GLMC:

 August 2024 – Review and discuss GLMP for FY 2024/25. Review and discuss the draft TM on Task 7 – Construction/Calibration of Additional 1D Models.

⁸ This is because most of these discussions will be occurring in the 2025 SYR peer review process with the same technical consultants that participate on the GLMC.

- September 2024 Review the draft 2023/24 Annual Report for the GLMP
- March 2025 Review the draft recommended scope and budget for FY 2025/26
- April 2025 Review the final recommended scope and budget for FY 2025/26 (if needed)

Task 8.2. Prepare for and Conduct One As-Requested Ad-Hoc Meeting

This subtask includes preparing for and conducting one ad-hoc meeting of the GLMC, as requested by the GLMC or Watermaster staff.

Task 8.3. Perform Monthly Project Management

This subtask includes monthly project administration and management, including staffing, financial and schedule reporting to Watermaster and subcontractor coordination.

Task 8.4. Prepare a Recommended Scope and Budget for the GLMC for FY 2025/26

This subtask includes preparing a draft and final recommended scope of services and budget for FY 2025/26 for the GLMP to support the Watermaster's budgeting process.

8.2 Prepare for and Conduct One As-Requested Ad-Hoc Meeting	a 3	\$6,792	\$84					\$84	\$6,876		\$5,470	\$1,406
8.3 Perform Monthly Project Management	3	\$7,728						\$0			\$11,592	-\$3,864
8.4 Prepare a Recommended Scope and Budget for the GLMC for FY 2023/24	5.25	\$11,298						\$0			\$9,530	\$1,768
Totals		\$306,271						\$87,376		\$393,647	\$612,772	-\$219,125

Notes:

WEST YOST WBS_GLMC_FY2024-25_v1.xlsx

a Assumes in-person meetings.

Attachment A – Responses to Comments

The comments received from the GLMC as of April 4, 2024 on the "Recommended Scope of Services and Budget of the Ground-Level Monitoring Committee for Fiscal Year 2024/25 (Draft)" and the Watermaster Engineer's response to comments are documented below.

Comments from the City of Chino (Hye Jin Lee)

Comment 1 – Task 1. Setup and Maintenance of the Monitoring Network.

Task 1.1. The City understands settling of the vault structure located at the Ayala Park Extensometer facility has occurred over time which allows water to enter the vault and potentially flow into the monitoring wells. Watermaster proposes to address this field condition by installing French drains around the vault. The City is concerned the construction of French drains may not be the most suitable means to address the field condition. Any contemplated construction activity at the park must be approved by the City of Chino and coordinated with the City of Chino's Community Services for any planned activities in the area. Prior to taking any steps towards implementing the French drains the Watermaster is advised to contact the City.

Response:

Watermaster staff and engineer will work closely with the City on any modifications at Ayala Park to prevent flooding of the piezometer vault.

Comments from the State of California (Rick Rees)

Comment 1 – Task 3. Basin-Wide Ground-Level Monitoring Program (InSAR)

The InSAR-based monitoring proposed in the 2024/2025 budget is only for the western portion of the Chino Basin. Therefore, it is not "basin-wide" as the task description implies (text and Table 1). The committee has discussed conducting occasional InSAR monitoring of the eastern part of the Chino Basin. This should be considered for the next budget. One option that would reduce cost is to provide InSAR results published by the Department of Water Resources (DWR) to cover the entire basin. Although the DWR InSAR data are not the same level of resolution and not directly comparable with the data that West Yost will process for the western part of the basin, it should be easy to generate true basin-wide InSAR results. This should be continued less frequently than annual (e.g., every five years) to verify that there are no subsidence issues outside of the western part of the Chino Basin where ground levels are well documented every year.

Response:

We concur. The effort to conduct InSAR monitoring of the eastern part of the Chino Basin using InSAR results published by the Department of Water Resources (DWR) will be described and budgeted for the proposed scope and budget for the GLMP for 2025/26.

Comments from Monte Vista Water District (Justin Scott-Coe)

Comment 1 - Task 1.1 Maintain Extensometer Facilities

"Non-routine efforts to be performed during FY 2024/25 under this subtask include... Monthly adjustments to the PX extensometers to improve the accuracy of the measurements of aquifer system deformation."

Watermaster has recognized the importance of the extensometer data in monitoring current conditions and understanding hydrogeologic conditions. As stated in the Technical Memorandum "Construction and Calibration of 1D Compaction Models in Northwest MZ 1 (September 23, 2022), "Continued monitoring and enhanced understanding of hydrogeologic conditions is crucial to minimizing model error and uncertainty, especially the monitoring of the PX in Northwest MZ-1." The District recommends providing a briefing and the currently available extensometer data to the Ground Level Monitoring Committee (GLMC) for review.

Key questions regarding the PX include:

- How is Watermaster assessing the reliability/accuracy of the extensometer data?
- What adjustments have been made and are proposed to be made to the PX in the upcoming year and what is the anticipated result of those changes?
- What does the extensometer data currently indicate regarding ground-level motion in Northwest MZ-1?

Response:

We concur with the recommendation to brief the GLMC re: the currently available extensometer data and answer the questions listed above. This topic will be included on the GLMC meeting agenda for August 1, 2024.

Comment 2 – Basin-Wide Ground-Level Monitoring Program (InSAR)

A significant cost identified under this task is \$62,000 for "preparation and checking" of InSAR data. What is the basis for this cost, and are there opportunities for more efficiency by workflow automation in the data processing (e.g. save money over time)?

Response:

The basis for this cost is about 28 days of staff time multiplied by the various daily rates by staff position.

The Watermaster Engineer has recently hired Sean Yarborough to perform this task directly. Mr. Yarborough previously worked for the long-time InSAR subconsultant that worked for the Watermaster. The engineer expects the level of effort for this task to decrease in subsequent years as automated coding of processes are developed and implemented and as junior staff are trained to perform portions of this task.

Comment 3 – Develop a Subsidence-Management Plan for Northwest MZ-1

"...the same pattern of differential subsidence that occurred in the Managed Area during the time of ground fissuring."

The District suggests removing this clause from the sentence or revising to indicate that the differential subsidence conditions in the two areas are not identical. Groundwater levels in Northwest MZ-1 have

stabilized since the late 1970s and no ground fissuring has been reported in Northwest MZ-1 to date. Ground fissuring in the Managed Area was reported to occur as early as the early 1970s and accelerated in the early 1990s.

Response:

The phrase has been revised to read "spatial pattern of differential subsidence" to distinguish it from rates and magnitudes of subsidence.

Comment 4 – Progress to Implement Work Plan through FY 2023/24

"a. Establish a preliminary 'Northwest MZ-1 Guidance Level' of 630 ft-amsl for hydraulic heads in Layers 3 and 5 at the PX location. The preliminary Guidance Level is an aspirational Watermaster recommendation that, if achieved, would likely slow or stop aquitard compaction and land subsidence in Northwest MZ-1."

The District recommends removing language from this progress summary suggesting that the aspirational Watermaster recommendation would "likely slow or stop aquitard compaction and land subsidence in Northwest MZ-1." It is the District's understanding that modeling to support this statement has neither been conducted nor provided to the GLMC for review; as such, this statement is not supported by relevant technical analyses.

"d. Additional SMAs should be developed and evaluated with the 1D Models... The GLMC should participate in the scenario building exercises associated with these Watermaster efforts to develop the SMAs, so that the scenarios include various methods to achieve the Guidance Level."

Because the "Guidance Level" cited here has not yet been evaluated, scenario-building to meet this or any other proposed guidance level is premature. Any proposed guidance level should be simulated versus a no-action alternative to evaluate the effectiveness of the guidance level at reducing projected land subsidence versus a no-action alternative. The simulation results should then be presented to the GLMC for review prior to initiating any scenario-building to meet the proposed guidance level.

Response:

For (a), the statement suggesting that the aspirational Watermaster recommendation would "likely slow or stop aquitard compaction and land subsidence in Northwest MZ-1" is based on the physics of aquitard drainage—not on modeling. In other words, any increases in hydraulic heads within the deep aquifer system would have the result of slowing or stopping aquitard drainage.

For (d), the ongoing process to re-evaluate the Safe Yield will include a "no action" scenario(s) and will include 1D compaction modeling in Northwest MZ-1 for review by the GLMC.

Comment 5 – Construct and Calibrate Additional 1D Models Across Western Chino Basin

Regarding Additional Expenditure on 1-D Models

The District continues to have concerns regarding the use of 1-D Models as management tools in Northwest MZ-1 and other Areas of Subsidence Concern. Given the size and heterogeneity of the alluvial sediments across the Areas of Subsidence Concern, the limitations and appropriateness of 1-D models should be re-evaluated before additional budget expenditures. (See above comments on Proposed Locations and Data for Construction/Calibration of Additional 1D Models.)

"The Watermaster used the information derived from the 1D Models to develop a preliminary 'Guidance Level' to avoid future subsidence in Northwest MZ-1."

The District's understanding is that the "preliminary 'Guidance Level'" cited here for the deep aquifer was based on water levels in the shallow aquifer and not on "information derived from the 1D Models." If this is the case, this language does not reflect how the preliminary "Guidance Level" was developed. The preliminary "Guidance Level" was not based on an analysis of 1D Models with the guidance level implemented or evaluated compared to a no-action alternative. Whether the currently proposed guidance level will avoid future subsidence is also unknown. The District recommends that this sentence be removed or modified to reflect the approach taken and the uncertainty regarding the effectiveness of the preliminary "Guidance Level."

Response:

As stated in this memorandum, this task was budgeted and scheduled for completion in FY 2023/24. No additional budget in FY 2024/25 is necessary to complete this task.

- (A) Includes attorney and witness preparation, hearing attendance and potential post-hearing activities.
- (B) Variety of day-to-day matters that arise throughout the month concerning the Judgment, Rules, agreements, etc.
- (C) Activities related to clean-up and maintenance of Watermaster's roster of parties and Pool members, along with potential Court filings.
- (D) Variety of day-to-day activities such as workshop reviews; research Pool membership issues; stormwater and new yield; review agreements and contracts; coordination of ongoing Watermaster projects; review of draft documents; special activities as requested by GM, etc.

General Notes:

- * Brownstein maintains a 10% discount on all fees over \$100,000 as part of the original contract with Watermaster.
- * Rather than attempt to project which budget items would be affected by the 10% discount, and which out-of-pocket cost items might be relevant to which budget items, the budget detail assumes they offset each other.

^{*} Rates for most BHFS attorneys reflect an increase for the first time in several years.

Memorandum

DATE: March 26, 2024

TO: Watermaster Staff

FROM: Brownstein Hyatt Farber Schreck, LLP

RE: FY 2024-2025 Legal Counsel Budget Detail and Analysis

This worksheet has been prepared at your request to provide additional detail regarding the expected legal fees and costs that will be incurred if Watermaster implements its responsibilities under the Restated Judgment, pending Court Orders, including the Peace I and Peace II Agreements, and the Optimum Basin Management Program (OBMP). The Nine Member Board is expected to implement these measures. Additional fees and costs may be incurred in connection with actions that are within Watermaster's duties and implementation authority but outside the control of staff and counsel. That is, Parties to the Restated Judgment and persons not bound by the Restated Judgment may initiate actions that require a response from Watermaster.

This worksheet utilizes the original budget as proposed by legal counsel in March of 2024, and will be updated, as necessary, so that any adjustments in the budgeted amount can be made considering actual projections concerning time and level of activity associated with anticipated budget line items. The experience of Watermaster over the past more than twenty years since Brownstein Hyatt Farber Schreck (Brownstein) was retained as counsel provides a basis for the budget based upon a customary level of activity. These projections are included within the budget as requested to provide service as legal counsel to the Board. Thus, the proposed budget amount analyzed below is \$1,349,679, which includes a roughly \$38,000 allocation for unanticipated activities.

<u>Budget Assumptions</u>: The number of hours expended to provide the desired level of service is the primary factor in legal counsel expense. The budgeted amount includes reimbursement for out-of-pocket costs that include phone charges, electronic legal research charges, travel costs (including mileage, lodging, etc.) and other incidental costs. While these costs traditionally vary from month to month, they do not constitute a material portion of the budget. Typically, 2-5% of a monthly bill is cost recovery.

Brownstein has represented Watermaster for over 20 years and consequently, as a matter of Brownstein policy, Watermaster enjoys a continuing and gradually steepening discount against standard rates. In some cases, the discount approaches 45%. As a further accommodation to Watermaster and its favored status, Brownstein maintains a 10% discount on all fees over \$100,000 as part of our original contract with Watermaster. When spread over the entirety of the Brownstein fees, this discount results in an approximately 8.5% discount on all fees whenever incurred.

Rather than attempting the detailed analysis that would be required to project which budget items would be affected by this discount, and which out-of-pocket cost items might be relevant to which budget items, the budget detail below uses a simple multiplier of time spent against rates for each attorney. This has the effect of creating an approximate 6% cushion in the estimates provided below assuming that the cost ration from recent bills is representative (i.e., 8.5% - 2.5% = 6%).

Slater and Herrema are the principal lawyers assigned to the Watermaster matter. Over the years, Slater's activities are generally reserved to Watermaster Board meetings, assignments directed by the Board, and task driven.

<u>Definition of "unanticipated expenses"</u>: For the purposes of this memorandum, "unanticipated expenses" refers to an amount of money that is budgeted to account for legal issues that <u>may</u> arise post budget approval that were not anticipated in the budget, or to account for underestimates in the budget for the anticipated matters as a result of unforeseen complexity. Historically, the Watermaster budget preference had been to under fund all parts of the budget, including contingency, so as to not create an expectancy of the higher expenditure. Experience suggests that the Watermaster Board and the Parties to the Restated Judgment have been more comfortable with assigning additional funding to a matter after the actual need has been identified. Such funds whose use requires a Board-approved budget transfer/amendment are sometimes identified as "contingency." This analysis uses the term "unanticipated expenses" in the first sense to refer to an amount of money that is budgeted to account for unanticipated expenses.

Detail articulated below includes:

Regular Meeting Attendance	\$220,583
Board Briefings/Workshops	\$ 29,215
Court Coordination	\$144,040
Rules and Regs Rewrite	\$ 10,495
Personnel Matters	\$ 28,150
Interagency and Miscellaneous	\$217,776
Party Status Maintenance	\$13,590
Total:	\$663,849

Regular Meeting Attendance (6275, 6375, 8375, 8475, 8575)

\$220.583

Assumptions: Three meeting days per month staffed by one attorney per meeting. Assumed hours commitment of 5 hours per Pool Committee meeting and 4 hours per Advisory Committee meeting, inclusive of attendance, travel and preparation. Assumption of regular attendance by Slater at the Board meeting (12 hours x 11 months = 132 hours), and by Herrema at Pool Committees and Advisory Committee (5 hours x 3 pool committees x 11 months + 4 hours x 11 months = 209 hours) for an approximate total of \$220,583.

Board Briefings/Workshops (6375.1)

\$ 29,215

Over the past few years, Watermaster staff and legal counsel have conducted Board Briefings to provide Board members with information as to the legal background for Watermaster's activities, the functions of the Pool Committees, Advisory Committee and Board, the role of Watermaster staff and current issues. This budget assumes that one or two briefings or workshops will take place in FY 2024-2025. Responsibility for this task is shared by Slater (20 hours) and Herrema (25 hours) for an approximate total of \$29,215.

Court Coordination (6071)

Activities:

(1) Regular court hearings

\$144,040

Based on present trends in the motion practice before the Court and the pending appeals before the Court of Appeal, we anticipate a continued high level of effort in 2024-2025 in regard to interactions with the Courts. Given that Court hearings require more preparation than regular monthly meetings, this category assumed an hour commitment of 30 hours per hearing inclusive of attendance, travel and preparation of reports or other filings. This category assumes one attorney per hearing, though it is often necessary to staff

a hearing with more than one attorney. Responsibility for this task is shared equally between Slater (80 hours) and Herrema (80 hours) with assistance from associate attorney Laura Yraceburu or an equivalent billing attorney (100 hours) for an approximate total of \$144,040.

(2) Rules and Regulations Rewrite (6072)

\$ 10,495

Watermaster Board has directed that the Rules and Regulations be reviewed for any necessary updates every other year. While a planned update is proceeding during FY 2023-2024, legal counsel spend a small amount of time each year tracking necessary updates for the biennial updates. This budget item presents the level of effort for such a rewrite. Responsibility for this task is shared by Slater (5 hours), Herrema (5 hours), and Yraceburu (10 hours) for an approximate total of \$10,495.

Personnel (6073) \$ 28,150

It is not anticipated that any significant personnel issues will arise in FY 2024-2025, though some level of activity is the norm in any year. Thus, we have proposed a nominal budget for this item for employment and benefits counsel, Christine Samsel and Nancy Strelau of 50 hours, and an approximate total of \$28,150.

Interagency Issues and Miscellaneous (6074 and 6078)

\$217,776

There are always a variety of day-to-day matters that arise throughout a month concerning questions that require interpretation of the Restated Judgment, Rules, agreements, etc. Herrema (120 hours) is the attorney responsible for these matters, with assistance from Slater (80 hours) and Yraceburu (120 hours), with an approximate cost of \$177,240.

To the extent that agreements between the parties arise, there will likely be a nominal involvement from legal counsel. In addition, it is likely that several interagency agreements will be required in FY 2024-2025 as in past years. These activities assume the work will be done by Herrema (72 hours) for an approximate total of \$40,536.

Party Status Maintenance (6077)

\$ 13,590

In each year, there is a small amount of work to do to regarding the proper placement of parties in Pools and the Pool and party rosters. The proposed budget assumes working with Watermaster staff to undertake this clean-up. The proposed budget assumes that Herrema will be the primary attorney assigned to this task (10 hours) with assistance from Yraceburu (20 hours), for an approximate total of \$13,590.

Archibald South Plume (6907.31)

\$ 12.565

The proposed budget assumes that Slater will be the primary attorney assigned to the task of any necessary ABGL facilitation (5 hours) with input from Mark Mathews (5 hours) and involvement from Herrema (10 hours) for an approximate total of \$12,565.

Chino Airport Plume (6907.32)

\$ 12,565

The proposed budget assumes that Slater will be the primary attorney assigned to the task of any facilitation related to the Chino Airport Plume (5 hours) with input from Mark Mathews (5 hours) and involvement from Herrema (10 hours) for an approximate total of \$12,565.

Desalter/Hydraulic Control Issues (6907.33) Regional Water Quality Control Board (6907.38)

\$ 38.680

\$ 63,200

Given the significance of the Desalter and Hydraulic Control issues to the OBMP, legal counsel believes it is appropriate to expect continuing activity on this issue continuing into FY 2023-2024 – specifically in light of the reduced groundwater production in areas of the Basin due to water quality concerns. Given his participation in the CDA facilitation, Slater will be the primary attorney (20 hours) with assistance from Herrema (40 hours), for an approximate total of \$38,680.

Regarding the Regional Water Quality Control Board, a Basin Plan Amendment related to the revision to the Salt and Nutrient Management Plan is planned to proceed in FY 2024-2025. On this matter, Slater will provide (25 hours), Herrema (40 hours), and Yraceburu (60 hours) for an approximate total of \$63,200.

Santa Ana River Water Rights (6907.34)

\$ 21,405

Legal counsel is currently completing a process to extend the time in which Watermaster must seek to license its water right permit numbers 19895 and 20753 – a substantial amount of work was completed on this in FY 2017-2018, and additional progress has been made in FY 2021-2022 but it is likely that the SWRCB's processing will not be completed until FY 2024-2025. SWRCB staff have requested additional information in order to complete this process. Watermaster additionally is required to complete annual reporting to the Department of Fish and Wildlife and the SWRCB regarding its diversions under its permit 21225. In addition, given the history on the Santa Ana River it is prudent to account for some level of activity regarding water rights on the River. Work under this budget item is split 1/3 Herrema (15 hours) and 2/3 Yraceburu or an equivalent billing attorney (30 hours) for an approximate total of \$21,405.

Santa Ana River Habitat Conservation Plan (6907.36)

\$31,280

There is an increased level of interest in species issues on the Santa Ana River. These include the development of a Habitat Conservation Plan for certain activities within the watershed, potential environmental review related to the SARCCUP, as well as litigation related to diversions and operations within the River. These issues touch on Watermaster's interests in the River, including its stormwater diversions in the Prado Basin watershed and the Prado Basin Habitat Sustainability Committee activities. The Parties and the Board have shown an interest in continuing to be kept abreast of these developments and we anticipate work related to the implementation of the HCP and the formation of the entity responsible for implementation in FY 2024-2025. It is anticipated that the effort in this regard will be spread among Slater (10 hours), Herrema or equivalent attorney (20 hours), and Yraceburu (30 hours) for an approximate total of \$31,280.

Recharge Master Plan (6907.39)

\$ 14,270

Each year, counsel spends a limited amount of time assisting with administration of the projects approved as part of the RMPUs. It is anticipated that the effort in this regard will be spread among Herrema (10 hours) and Yraceburu or an equivalent billing attorney (20 hours) for an approximate total of \$14,270.

Storage Agreements (6907.40)

\$ 0

At present, there is no work anticipated to be done in conjunction with storage agreements or the review of any Storage & Recovery application.

Prado Basin Habitat Sustainability (6907.41)

\$ 10,290

The Peace II Subsequent Environmental Impact Report includes mitigation requirements as to the development of a Prado Basin Habitat Sustainability Committee and Program be developed. Watermaster and IEUA have entered into a cost sharing agreement as to the required mitigation and Watermaster will have ongoing obligations thereunder. It is anticipated that Herrema will provide (10 hours) and Yraceburu (10 hours) for an approximate total of \$10,290.

SGMA Compliance (6907.44)

\$ 10.290

Based on the Chino Basin's adjudicated status, Watermaster has certain obligations to annually report information to DWR. It is anticipated that there will also be a minimal amount of work associated with tracking and evaluating how new SGMA directives may affect the Basin or suggest changes to Basin management. This will include work by Herrema (10 hours) and Yraceburu or an equivalent billing attorney (10 hours) for an approximate total of \$10,290.

OBMP Update (6907.45)

\$177,240

The Watermaster Board approved the 2020 OBMP in October 2020. The LSLS was approved in July. Work in 2024-2025 would include assistance with OBMPU implementation and assisting the parties with issues associated with potential amendments to the Peace Agreement and OBMPU Implementation Plan. This effort would include work by Slater (80 hours), Herrema (120 hours) and Yraceburu or an equivalent billing attorney (120 hours) for an approximate total of \$177,240.

2021 Safe Yield Reset (6907.47)

\$80,190

The Court's 2017, 2019, and 2020 orders as to future Safe Yield resets include processes for potential update to the reset methodology, peer review, and the outcome of the State's process regarding water use efficiency requirements. There will be work in FY 2024-2025 associated with the implementation of these orders, including the completion of the 2025 Safe Yield Reevaluation. This will include work by Slater (25 hours), Herrema (50 hours), and Yraceburu or an equivalent billing attorney (80 hours) for an approximate total of \$80,190.

Ely Basin Litigation (6907.48)

\$64.890

Watermaster has been brought in as a defendant in the Kaiser Permanente plaintiffs' lawsuit. Trial in the matter had been set for March 2024 and a settlement in principle has been agreed upon but not yet finalized. For this item, it is anticipated that it will include work by Slater (20 hours), Herrema or litigation counsel (50 hours) and Yraceburu or an equivalent billing attorney (50 hours) for an approximate total of \$64,890.

San Sevaine Basin Discharge (69007.XX)

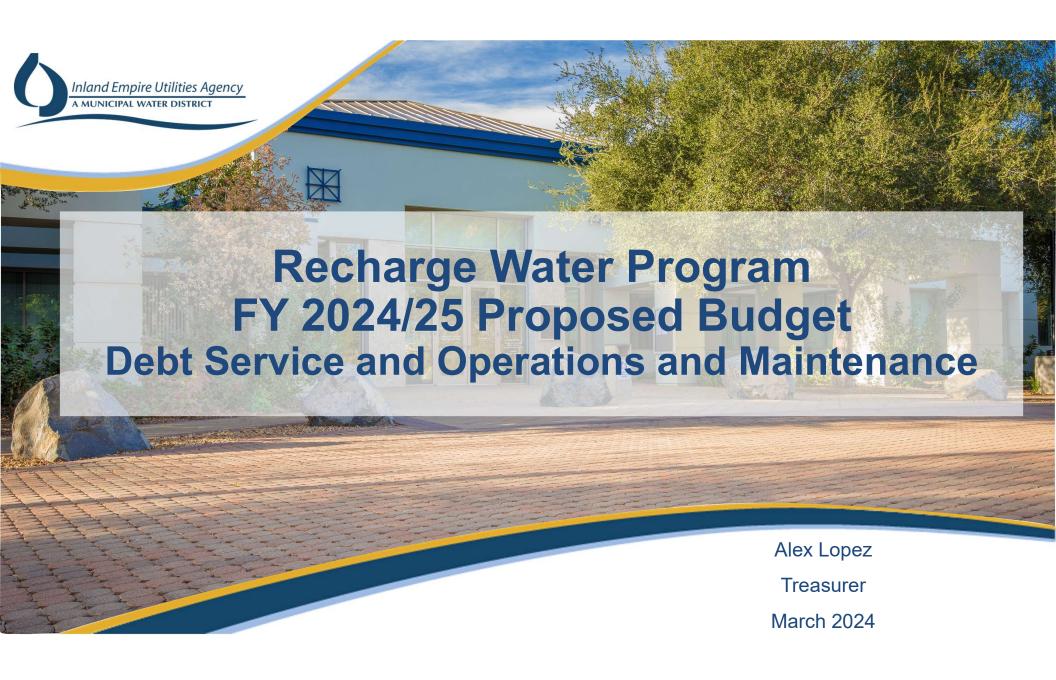

\$110,080

Watermaster and IEUA recharge stormwater and recycled water in the San Sevaine recharge basins. During the winter of 2022-23, sediment was discharged into the basins from upgradient properties. Watermaster and IEUA are seeking compensation for the impacts of that sedimentation. For this item, it is anticipated that it will include work by Slater (40 hours), Herrema or litigation counsel (80 hours) and Yraceburu or an equivalent billing attorney (100 hours) for an approximate total of \$64,890.

Unanticipated Activities (6907.9)

\$ 38,885

Regarding the unanticipated activities that may occur during the year (please see the discussion on page 1, above), Slater has been budgeted at (25 hours) and Herrema is budgeted (35 hours) for an approximate total of \$38,885.

Summary Debt Service

Debt Type	FY 2024/25 Budget	Funding from CBWM	Funding from IEUA
2020A Refunding Bonds (2008B Variable)	\$759,649	\$379,825	\$379,824
San Sevaine Improvement (SRF loan)	\$101,947	\$50,973	\$50,974
Lower Day Basin Improvement (SRF Loan)	\$54,550	\$54,550	\$0
Montclair Basin Improvement (SRF Loan)	\$97,446	\$97,446	\$0
Interfund loan supporting RMPU projects (interest only)**	\$202,100	\$189,974	\$12,126
Total Debt service	\$1,215,692	\$772,768	\$442,924

^{**} State Water Resources Control Board (SWRCB) is significantly behind in processing disbursements for SRF loans and grants; outstanding receivables are \$8.6 million related to the RMPU projects.

FY 2024/25 budget includes interest on outstanding interfund loans of \$ 202,100. The interfund loan principal is expected be repaid beginning in FY 2023/24 and ending in FY 2026/27, payments will be made with proceeds of the SRF loans.

Footnotes:

3/14/2024

^{*} On quarterly invoices, IEUA will credit CBWM for an estimated pro rata cost share based on this cost sharing methodology
At the conclusion of the fiscal year upon obtaining final budget actuals, IEUA will account for a pro rata credit/debit to be applied to the then current fiscal invoicing cycle.
