## NOTICE OF MEETING

### Land Subsidence Committee

10:00am – Tuesday, September 23<sup>rd</sup>, 2014

at

Chino Basin Watermaster

## AGENDA

- 1. Scope and Schedule for the Land Subsidence Committee Activities for FY 2014-15**
- 2. Update to the Chino Basin Subsidence Management Plan**

Watermaster will present a draft outline for an update to the current Subsidence Management Plan. The update is necessary for the following reasons:

- The content of the current Subsidence Management Plan is dated and is not an accurate reflection of Watermaster's current and future efforts with regard to the monitoring and management of land subsidence in Chino Basin.
- Differential land subsidence has been continuously occurring in the Pomona Area near the San Jose Fault, which is the type of land subsidence that can lead to ground fissuring. The updated plan should include a process to investigate subsidence in the Pomona Area and develop an appropriate subsidence management plan with the long-term objective to minimize or abate the occurrence of the differential land subsidence (Pomona Subsidence Investigation).

The Committee can approve the outline or suggest revisions.

- 3. Form Technical Sub-Committee to Develop the Pomona Subsidence Investigation**

A technical sub-committee needs to be formed to prepare the scope (including schedule and budget) of the Pomona Subsidence Investigation.
